

Bull Sale

Thursday - March 9, 2017- 1:00 pm
North Central Livestock Exchange
Clyde, Alberta

Welcome From Jonomn Hereford Ranch

Welcome to our 45th year of marketing bulls. Always a pleasure to visit with our loyal repeat customers and look forward to meeting new folks and friends alike. Our 2017 sale will once again be held at NCL Clyde, AB, where the bulls will be walked in the ring in front of you and online as well.

These cattle are working man's cattle. They are not pampered or highly managed. Their purpose here is to utilize all marginal, tough ground that Michael can't farm. They sell in their natural condition and will excel in most environments. Barring accident and rare circumstance, customers report excellent results from our bulls.

Our program is not high on electronically generated figures but on visual performance appraisal. Full spectrum, season long, all in appraisals for production & manageability in all environments. Joanne checking from her horse year round, Mike Grimmeyer and myself from birth to background to sale.

Emphasis on total management, performance and most of all reproduction. We evaluate from the ground up. Feet, legs, depth of rib, guts and do ability. Big quarter, level hip and thick strong top. Then we've added the cosmetics to our program of pigment, deep eye-set, clean sheath all with thick northern hair coats.

We have closely monitored other breeds but we have specialized in the redevelopment of the Hereford breed to a standard that is comparative and compatible to all. Manageability by all family members is a must.

We are proud of these cattle and look forward to responding to what they can accomplish for you. Joanne, Mike G and I develop them. Michael, Leanne and kids make feed for them and we all look forward to seeing what our program can do for you. We all look forward to your company and visiting sale day.

About the JoNomn Hereford Bulls

These bulls are managed to be active good breeding 2 year olds. Born April and May with no creep, special attention or confinement. Fed and managed in large groups out in the open field behind wind fence. Pictured and presented in their working clothes. They will be totally examined and evaluated by the vets at Westlock Veterinary Clinic and will all sell with satisfactory semen test. In addition all bull are given hoof rot vaccine at semen testing to protect them in breeding season.

As yearlings they ran in a large field, fed high roughage rations and are never fed to achieve big performance to 365 days. Turned out on grass in the summer then started again on cut hay then to silage as the pasture runs out.

We have had good reports that bulls are very sound and stand up well. Buy with confidence, these bulls are targeted to peak in your breeding pastures.

This calf crop was weaned and weighed October 25, and yearling weights obtained April 20.

Targeted to peak in your Breeding Pastures.
