# Welcome

We have an exciting group of bulls on offer this year, sired by SOS 127D, KLR 13D, BBMT125E & BBMT 79E. McTavish Farms Ltd is located just off the #1 Hwy in the southeast corner of Saskatchewan, 6 miles east and 2 ½ miles north of Moosomin. We are offering yearling Charolais bulls, with built-in calving ease and performance. As far as the type, the bulls are structurally sound, moderately framed, stout, easy fleshing herd bulls with excellent temperament and thick hair coats backed by superior cow families.

Bulls are NOT CREEP FED; they are raised on momma's milk and grass prior to weaning usually in mid-September. Weaning date depends upon weather and grass. All bulls offered for sale are raised and developed as breeding stock. Bulls are fed on a silage based TMR to gently target gains of 3-4 lbs./ day. The rations are designed to build muscle, not fat! All bulls are semen tested; vet inspected and scrotal measured prior to the sale. We stick to the same health protocol every year. Bulls are vaccinated twice with Bovi-Sheild Gold/One Shot and Ultrabac 7, once in the spring prior to kick out to pasture with their booster shots done in the fall at weaning time. All are given Ivermectin at these times, as well as 45 days prior to sale day. Safeguard is given to weaned calves once they are eating well. Mothers are vaccinated yearly prior to breeding season with Bovi-Sheild FP5 and Tasvax.

It is always a hectic time of year, but we always look forward to bull sale time to reacquaint with old friends, customers and meet many new cattlemen in search of genetics to enhance their breeding program. We strongly encourage you to come and tour the bull pen prior to sale day for a more relaxed atmosphere, especially if COVID-19 restrictions remain in place.

The genetics we offer MARCH 26, 2021 are geared to work in any breeding program. We have done the culling for you, concentrating on traits like calving ease, vigor at birth, sound udders, temperament, and material qualities. Speaking of maternal qualities, we would like to take this opportunity to let you know, we added a package of females from Don Railton, DRD Charolais. Here at the farm, we believe that cows need to be able to calve on their own, but you also need to have the pay weights at weaning time. We believe that our genetics will work in any kind of environment and we are confident that they would work for you. We would be honored to be considered as your genetic source for your next herd bull.

Jordan Moore of CHARLA MOORE FARMS joins us again as guest consignor. It is always a pleasure working with him. Jordan has taken on the position as President of the Saskatchewan Charolais Association this year. Congratulations Jordan! Please join us for lunch before the Annual Bull Sale. If you need help in any way, don't hesitate to give us a call. Videos will be available at [www.mctavishfarms.ca](http://www.mctavishfarms.ca). Online bidding will be available sale day at [www.DLMS.ca](http://www.DLMS.ca). Again, come to the farm any time prior to sale day to view the bulls and their mothers. Hope to see you here on the 26th of March!

## SOS HOOEY PLD 127D

SOS 127D :: Feb 23, 2016 :: PMC709167

The Hooey calves that are being offered on the following pages speak for themselves. Hooey is adding pounds, disposition, & impeccable structure. He is surpassing all expectations, which is saying something because the expectations for this bull where pretty high! This bull checked off all of the things that I look for in a new herd sire; hair, disposition, structural soundness, and comes from one "wicked" cow family.

## ELDER'S CRACKER JACK 13D

KLR 13D :: Jan 14, 2016 :: PMC708102

This is one impressive bull! Not many bulls are built as thick & deep and still softly made. One of my favorite things about this bull is that his mother is one tremendous cow. His calves are soft made with ample amounts of thickness and depth of body.

What a job this first calf heifer did with 47H. He is a hairy, deep bodied and has great feet. His granddam 814U was one of our best producers. 7F was the only female 814U had and she is following in her mothers foot steps. 47H sire DAM 1A is still in use and sound as can be we have kept a pile of females off 1A and think quite highly of him. **HOMO POLLED**

57H is long bodied, hairy and just flat out good. He is out of our new red factor herd sire Go North 731E. This is his second calf crop on the ground but first bulls to sell as we only had heifer calves off the pure-bred cows he bred the first year. The daughters are milking now and all have very nice udders with good milk. **HOMO POLLED**

Heifer bull alert. 102H is built to calve small head smooth shoulder and long body. His mother DAM 88B has a picture perfect udder with lots of milk and always brings in top end calves. We have a full sister to 102H milking now and she has an udder just like her mothers. His mother 88B calved January 21st 2021. That speaks a lot of the fertility in this cow. **HOMO POLLED**
