Ninth Annual

Elite
Genetics

ONLINE BULL SALE

WITH FARMGATE TIMED AUCTIONS (DLMS)

Welcome

On behalf of the Kopechuk family of RSK Farms and their partners, all of us at Bohrsen Marketing want to welcome you to the ninth annual Elite Genetics Online Bull Sale. Andrew, Jessy and the crew have again assembled a strong set of beef bulls for your evaluation representing both Hereford and Angus bulls. Their bulls are developed gently with longevity in mind and you can rest assured these bulls will get out and get the job done for you in a sound, athletic manner. These bulls are soft made, good haired and great structured that we know you will appreciate when you get the chance to view them. Please reach out to any of the contacts to visit about the cattle and be sure to make plans to tour the offering as well as the program itself. Andrew & Jessy love to visit about cattle and would be pleased to help you with narrowing down some options for you. If any of us at Bohrsen Marketing can be of any assistance, please do not hesitate to contact us.

Best Regards, The BMS Team

BOHRSON MARKETING SERVICES

Scott Bohrsen - 403-370-3010
Taylor Richards - 306-821-4169

PAYMENT: Payment must be made following the sale by all buyers. An invoice will be mailed to all purchasers following the sale. Payment can be made by cash, cheque or e-transfer. No animal shall leave the consignors until payment has been received. Any animal remaining at either ranch because of payment still owing after 30 days will be charged a fee of \$5.00/day.

BID: Every animal consigned to the sale must be sold by auction. Each animal will be sold to the highest bidder.

RISK and INSURANCE: Each animal becomes the buyer's risk immediately after the animal is sold. All purchases must be insured with your chosen representative. (Keystone Livestock Service - Lois McRae: 204-728-3058)

CERTIFICATE OF REGISTRATION: Each animal is registered through the Canadian Hereford Association and Canadian Angus Association. Each animal's registration will be supplied to the purchaser after payment has been made. It is up to the purchaser to provide transfer instructions after the sale.

GUARANTEE: All animals are sound and right, and all with a responsible breeder guarantee of satisfaction. All animals are guaranteed by the seller to be DLF, IEF, HYF, MSUDF, MDF unless stated in the catalog. All animals are sold under the terms and guarantees set forth by the Canadian Hereford Association and Canadian Angus Association. Examinations shall have been conducted prior to sale on all bulls.

EXCEPTION TO THE GUARANTEE: In the cases of bulls, they are guaranteed to breed naturally according to the applicable Canadian breed Association guarantee, but no guarantee is given that semen from any bull will freeze. When purchasing your bull, please remember that semen

tests are a snapshot in time. Injury and stress may impact a bulls ability to breed successfully. Other factor that may impact a bull include a rapid change in diet, a new environment or being placed in a pen with older bulls.

HEALTH: All sale animals have met all necessary health requirements and it is the buyers responsibility and expense to determine health requirements for importing any animal into their province or state. We are happy to assist with the paperwork and getting your purchases across the border.

DELIVERY: The consignors will help each purchaser with arranging delivery on their purchase as soon as possible after the sale. It is up to the purchaser to provide shipping instructions after the sale.

EXCHANGE RATE: The US/Canadian Exchange Rate will be announced prior to the sale.

VOLUME DISCOUNT: Purchase 3 bulls to receive a 3% discount, 4 bulls for 4%, and 5 bulls or more for 5%.

SIGHT UNSEEN PURCHASES: If you are unable to attend the sale day, we would be happy to discuss your program to help select to most suitable bull for your herd. 100% Satisfaction Guaranteed.

FLUSH & SEMEN RIGHTS: The consignors reserve the right to flush any female or draw semen from any bull that is on offer. This will be at the buyers' convenience and the sellers' expense.

ANNOUNCEMENTS: All announcements from the auctioneer or seller will take precedence over the printed matter within this catalogue.

LIABILITY: The owners, employees, their representatives and sale staff accept no liability for accidents that may occur and persons that attend do so at their own risk.

ANIMAL NUTRITION

I have worked with RSK Farms for many years providing nutritional consulting with their cow herd, replacement female program and their Bull Development Program. Bull Development is a high priority at RSK, ensuring the bulls are developed to the best of their ability without over doing it. Growth and performance, body condition, hair, structural soundness, and reproductive development, are some of the hi-lites we aim for when designing a bull program. We want to stay away from over condition bulls that break down, are not fertile, and just don't get the job done. These bulls only cost you a lot of money! At RSK over the years we have seen changes in their development process. From self feeders and hay feeders to incorporating higher quality forages and less grain. Silage bales, top quality hay, oats and a custom bull development product is the direction RSK uses to develop their bulls. We sample and test on farm ingredients using the nutritional values of the ingredients and then design the program with a custom Bull Development Product to meet the protein and energy requirements of the program. This program is designed and balanced using the Cargill Beef Max Ration Balancing Program. This product fills the nutritional gaps the ingredients have and we enhance the program balancing proteins, amino acids, energy ,fiber levels, micro and macro minerals and vitamins. RSK also sees the value using Diamond V NaturSafe in this product to enhance gut health, immunity and a better absorption of nutrients. We know this helps with reproductive development for the bulls as well.

The goal for the Bull Development Program to raise bulls in a safe and nutritionally sound environment that will provide optimum value from their customers and prospects in their sale.

Cargill Animal Nutrition - Doug Allison - Beef Consultant - 204-724-2652 - doug_allison@cargill.com

WWW.FARMGATETIMEDAUCTIONS.CA

All new bidders to DLMS FarmGate Timed Auctions must create a timed auction account to be able to bid on this timed sale. *This log is different from your DLMS.ca live sale account.*

CREATING A NEW ACCOUNT

Click Register on the top right corner fill in your account info, log in to verify your phone number and you are ready to roll with DLMS Farm Gate Timed Auctions.

OUT BID NOTIFICATION SETTING REMINDER

All bidders please remember to activate your email and text notifications to receive out-bid notifications for lots that you are bidding on. To turn on notifications go to the top right corner of the screen go to My Account, click on Notifications, confirm you have check marks beside your EMAIL & PHONE notifications and then click save.

PHONE IN BIDS

Will be accepted during the sale at the phone numbers listed below for those without internet access.

CLOSING

At closing time of the sale the entire sale will extend bidding if a bid is placed on any lot in the sale. Any bid received after close time will extend the sale by the time listed on each sale. When no bidding occurs for the extended time the computer will declare the sale finished.

INVOICING

Following the sale the seller will invoice all buyers in the sale, please contact the seller with questions or to arrange delivery, pick up or shipping of your purchases.

For more info contact the sale contacts or

Vaccinations: Pyramid 5 plus Prespense as an aid in the prevention of disease caused by IBR, BVD Types 1&2, PI3 and BRSV, and as an aid in reduction of severity of pneumonic pasteurellosis caused by *Mannheimia haemolytica*. Covexin 8 Plus to protect against diseases caused by *Cl. chauvoei* (black leg), *Cl. haemolyticum* (bacillary hemoglobinuria), *Cl. novyi* Type B (black disease or infectious necrotic hepatitis), *Cl. perfringens* Type B (lamb dysentery), Type C (hemorrhagic enterotoxemia), Type D (pulpy kidney), *Cl. septicum* (malignant edema) and *Cl. tetani* (tetanus). Pour on Ivermectin products and Clea Up 2 are administered as well. Also Maxi Guard is given in the spring, before heading to pasture that controls *Moraxella bovis* bacterin for the prevention and control of pinkeye. At the time of fall booster shots, Quiet Weans (yellow nose clips) are inserted into the calves noses to prevent nursing and are left in for 5 days. This proves to be very effective for a low stress weaning solution. Strict emphasis is put on structural soundness, testicular development, do ability, performance, functionality and disposition!

We welcome you to the 9th Annual RSK RAF Elite Genetics Online Bull Sale. The decision to move this year's sale offering to an online only bidding platform was based on the fewer numbers that we have this year. We are pleased to be working with Farm Gate Timed Auctions on DLMS.ca and excited to have Scott and the Bohrsen Marketing Service team involved in this year's event. They have been through the bull pen and will be available to answer any questions about the bulls.

We are thrilled with this years Hereford and Angus bulls and the strength of this years pen. We are continuously building, raising and acquiring new genetics to build the quality of the RSK and RAF programs. Our emphasis is on breeding well rounded, balanced offspring based on quality genetics that promote improved structure, muscle pattern and efficiency. Our bulls are raised on a high forage ration with a Cargill pelleted supplement in order to promote longevity and do-ability. Being in Manitoba you can be assured of the toughness and hardiness of our bulls. They are forced to endure many extreme highs and lows in their environment. This we cannot control. One thing we can control is how we make breeding and management decisions in order to insure that we are getting the best production out of our herds, and that starts with the right bull.

According to research information, the use of one sire line over another can make a difference of \$100 to \$150 in return per animal on feed. In many commercial beef herds, replacement females are selected from the herd's annual calf crop. Bulls, to which those females will be bred, are purchased from outside seed stock growers. If you take the average calf from within a herd and look at it genetically, the sire provides half the genetics and the dam the other half. This means that the dam's father provides 25 percent of that calf's genetic material, and the dam's grandfather provides another 12.5 percent. Simple mathematics illustrates that 87.5 percent of that calf's total genetic makeup comes from three bulls that have been selected by the beef producer to work in the herd. Those three bulls have a huge effect on how that calf will perform while on its mother, in the feedlot, hanging on the rail, and eventually, in the hands of the consumer. It becomes clear that sire selection is the main tool available to a rancher to continually improve the genetic performance of a herd.

The Elite Genetics Sale group prides itself on being progressive operations and breeders. We have made management and breeding selection decisions that are proving to increase productivity, quality, consistency, and profit in our product that will pass onto you, in your product. The depth and quality of this year's offering is second to none, and this year's sale offers a diverse group of breeding tools. Balance 207H and Command 91H calves make up the main part of the RSK pen this year. Two Hereford bulls that will play a big roll in the up coming future. Hereford and Angus genetics make up this year's sale, two breeds that complement any cross breeding program!

Many Elite Genetics customers are repeat and multiple buyers. This tells us that it's not just a bull business, but also a people business. Our customers are pleased with the product, but more importantly happy with an honest, reputable and knowledgeable service. We love catching up with our customers as it provides us with feedback about our product as well as assisting in improvements for breeding decisions. The continued support from our customers is what is keeping us in a business that we love. Elite Genetics takes pride in this detail.

New for this year, all the sale information will be online including bidding, videos and pictures. Feel free to contact any Elite Genetics member for more assistance.

We look forward to having you join us for our open house, Andrew Kopeechuk

Double Down has lot to offer; structure and movement; he puts it together perfect. A big solid foot, great skeleton and very fluid in his movement. This skeleton carries so much mass, muscle and shape. The amount of meat and muscle is tremendous. He is soggy made, deep hipped and big topped. 30H is also attractive looking and well balanced, big goggles, pigment, freckles and big red testicles. His EPD profile boasts big performance and very high maternal numbers. His dam continually out produces herself, and his sire All In has left a very big stamp on his progeny. Both dam and sire have an amazing show record to back them up as well.

His fist calf crop has really impressed us proving that structure, big shape, sogginess, color and performance was what we expected in Double Down as a breeding tool. 30H was the 2021 EG Bull Sale high seller at \$39,500 for half interest and full possession to Wooden Shoe Farms and 4 Taylors Livestock.

TOP 5% FOR REA, 15% FOR WW AND YW, AND 20% FOR CARWT. - OWNED WITH STEVEN KNUTSON -

RSK SCK 7165 Wild Card ET 120K has so much to offer. He is a full brother to RSK SCK 7615 Double Down 30H who was the 2021 EG Bull Sale high seller at \$39500 for half interest and full possession. Wild card is very similar. He has a structure that boasts so much mass, shape and muscle pattern. He's built from the ground up with a great structure and skeleton, propping up that mass and muscle. Cosmetically he has the pigment, freckles and short red markings. His EPD profile is well balanced to boot. Also remember Wild Cards age, he's only a March 21st bull calf and already shows so much promise!

The Nellie 20E dam is a super star and will continue to do so. Wild card was 2nd in class at CWA and really turned heads when people saw him. Wild Card indexes 102 on WW and 101 on YW!

POLLED - RSK 86K - C03101241 - 03/03/2022

TOP 5% FOR CARWT, 15% FOR WW AND YW AND 20% FOR REA

RSK 173D Ka-Ching ET 86K is one of the most impressive individuals in the 2023 bull pen. His dam Ms Braxton 031A smacked it out of the park with this Endure 173D son. I don't think you can make a herdsire this complete. Ka-Ching 86K is an example of perfect structure, body, length and style, well rounded and very balanced. Big googles and short marked, one should really take some time to analyze this guy, even his stats are impressive. Big balanced numbers and indexing 109 on WW and 103 on YW.

Use Ka-Ching to add some pounds and performance to your calves.

Reference Dam

LJE T719 MS BRAXTON 031A

POLLED - C03030113 - 14/03/2013

LJE T719 Ms Braxton 031A has been a tremendous good female. I purchased her a few years back for Ehlke Herefords in Montana. She has been a solid no miss producer and we have flushed her a lot. One of her best daughters is working in the Harvie Ranching program as RSK 6964 Miss Braxton 94F. We have flushed Ms Braxton and will continue to implant embryos. She has 3 sons selling in this edition of the EG Bull Sale and we could not be more impressed with them!

RSK 7165 Bank Roll ET 64K is an All In x Braxton herdsire. I love the completeness of Bank Roll. He has expression and shape and a boldness of body that maintains a smooth and full look. He packs in a real deep sided look that cattlemen appreciate, deep chested and deep flanked, full of volume. Bank Roll is great in his structure and movement. Bank Roll is Homo-Polled as well!

TESTIMONIAL

We have used RSK heifer and herd bulls and both have worked out very well. RSK bulls will add size, structure and good temperament to your herd. A very good cross with our Angus or Simmental based cows. We plan on adding more RSK bulls to our herd in the future.

DAM :: PIXIE ET 707E

SIRE:: DOMINATE

RSK SCK 308 Dominate ET 3K is the second of our Horned Hereford lots. One really needs to study his pedigree and performance. Dominate 3K is a real stand out individual. He was purchased in recip dam from the inaugural Rocking G Sale. His sire SR Dominate 308F is a massive made bull with the range bull look that was competitive in the Show Ring winning the first OKC Horned Show and is backed by one the most proven females from the Churchill program, Churchill Lady 1162Y. 3Ks dam, RG 5511 Pixie ET 707E is a many time National and Division Champion in Canada and the USA, making her mark as a top contender.

Dominate 3K has all the pieces to complete the breeding puzzle. Massive length, sound structure, big bone and foot all holding together a big substantial body and muscle pattern that intrigues cattlemen.

RSK 173D COMMAND 91H POLLED - C03073323 - 17/02/2020

"Command" has been an eye catcher since the day he was born. The minute he arrived we knew this calf was special. He puts everything together so well, right from phenotype to genotype. Command possesses a massive hip, loin and testicles wrapped in a structural package that is hard to beat. His movement and fluidity are unmatched by many with everything planted on a big solid foot. Command completes the package with beautiful balance and appeal, great extension in his front with a skull and shoulder structure that makes me feel comfortable in using him on heifers.

Genetically, Command is jam packed with greatness. His sire, Endure is one of the most talked about Homozygous Polled performance bulls to surface in some time. He was the high selling bull at NJW for \$150,000 and semen has sold at auction for as high as \$750. His dam, Riesling was purchased out of the Mile High Sale from NextGen in 2016 by Harvie Ranching & Blair.ag and has demanded some of the top prices in the Hereford breed. She later went on to be named the 2016 CWA Champion Junior Female and CWA Reserve Champion Female! Her progeny has been topping sales and domination in the show ring! Command brought \$16000 for 1/2 interest in the Elite Genetics Online Sale to the Command Group of Breeders. Command is playing a big role at RSK Farms as a go to herdsire. His first 2 calf crops have impressed us and have waghered some high selling prices in their first sales.

2022 AG EX GRAND CHAMPION BULL

RSK FARMS SUCCESS!

Genetics from RSK Farms have been consigned to many sales over the past years and can be found throughout North America and the Globe. RSK Farms has had great success over the years showing and exhibiting cattle across the country. Showing cattle gives us another tool to gauge and evaluate how our herd is performing, and along with customer successes, we take pride in our track record.

From a young age CJBH 91H Prince 23K was one to keep an eye on! He expressed so much hip and stoutness with an eye appeal many cattlemen appreciate. He stands with a big foot, tones of volume and rib shape and backed by our top Leader daughter. His dam is a front pasture cow that is feminine and maternal made with a great level udder. We exhibited Prince alongside his dam this summer where they brought home Senior Champion Female, All Breeds Overall Champion Female, All Breeds Champion Bull Calf, and highlighting our Breeds Herd all summer in northern Ontario. Prince was Second in class at CWA as well.

DAM :: MS PRINCESS ET 76G

LOT 8 :: CWA 2022

BUJOLD FARMS

Bujold Farms is a fourth generation farm located in the Rainy River District. Established in 1937, we have been raising purebred Hereford and commercial Hereford/Angus cattle. We have been using AI and ET to excel our genetics to improve our calf crop year to year. Genetics that will improve maternal traits, udder and foot quality and performance. If you find yourself travelling through Northwestern Ontario we invite you to stop by and see what we have to offer.

RSK SCK 36G Keystone ET 70K and RSK SCK 36G KrackerJack ET 75K have been a standouts right from day one. These guys were purchased in the Harvie Ranching Dispersal as embryos and have turned out to be very eye catching individuals. They are both massive, stout made herd bull prospects with ample appeal, style, shape and volume. They are deep ribbed and bold, but stay clean in their lines and angles. Their sire United needs no introduction and the 300Y dam is a staple in the Harvie program. Keystone and Kracerjack will prove to be industry leaders in the future.

SIRE :: PIT BOSS 101H

TESTIMONIAL

Pit Boss came to us in perfect breeding condition and worked really hard naturally breeding a bunch of straight Angus 3 year old cows for us. We had a pile of confidence in the bull and also ai'ed him to 30 Angus heifers. He has calved with absolute ease and we haven't had to assist one. The calves have a pile of vigour and have all been stamped with the baldie face that demands market premiums. The bull looked great following a busy summer of work and our conception rates were great. Andrew was fantastic to work with and we couldn't be more pleased with our purchase.
 - Horner Cattle Co.

RSK FM 101H Paradigm 33K is our only Pit Boss son to sell this year. Pit Boss was selected by Horner Cattle Co. a few years back and has left a major mark on their commercial herd siring many baldie and brockle calves for them, that they love! Pit Boss bred very well for us as well and will be a go to for years to come. Paradigm puts it together so nice, style, balance and presence, reminiscing of his sire.

RSK 695D Elevation 91K has the style, stretch and front end to really make you look twice. Couple it with tremendous top and hip girth and you will keep coming back to this stand out Truman son. Elevation is out of Sage 65C whom knows how to raise them, she can pack a performance punch in her progeny.

RSK 695D Horizon 99K is a well-rounded, stout, soggy made Truman son with red muscle and an explosive hip structure. He's very typical of what Truman can do. Look to this moderate made bull to add pounds to his progeny.

RIDEAU ANGUS FARM
We are excited to be a part of the Elite Genetics sale again this year heading up the Angus division. A smaller offering in numbers but what we feel is the highest quality we have offered to date. They are sound, functional and bred to go out and perform in any environment. Backed by industry proven sires and out of females that are the foundation cornerstones of our breeding program. We invite you to stop by anytime, have a visit and tour the bulls or make plans to join us during our open house weekend March 25-26th at the farm, Douglas, MB.
- Jessy Millne Smith

Rideau Rock Solid 35K... that is exactly what he is! This one is built "rock solid" from the ground up. Look at the depth of side, mass and quarter this guy has. Study his pedigree, you won't find very many rock solid's in Canada. EXAR Rock Solid is known for making his calves super stout with great rib shape and powerful hip and hind end structure. The dam of 35K is a hard working, heavy milking, moderate, no miss type of a cow around here who keeps producing sale bulls for us year after year.

Sleep easy at night when you turn 42K out on your females. Out of a first calf heifer who was purchased out of "Angus Collection" as our pick of the heifer calves that year from the W Sunrise program. A real red meet kind of bull, this guy will add some curves to your calves. Super long sided, sound made and thick! His pedigree is filled with great ones like HF Tibbie 137X, Executive Decision and HF Tiger just to name a few.

I said it last year and I'll say it again.... If there were ever two bulls I would go back in time and use more heavily again it would be Lookout and EXT. This guy just happens to have both in his immediate pedigree. I had a handful of embryos in the tank and this guy is the result of one we put in. 59K's dam was a no miss kind of cow in Ontario. Her bulls continuously topped the BIO Bull test station year after year for my grandfather and she had the type and quality of udder you wish your entire herd had with immense longevity living until the age of 14. 59K has that super long eye appealing design to him that makes you stop and want to analyze him. An older solid pedigree that is proven and powerful, you won't find many younger animals bred this way.

SHEREFF STOCK FARMS

Hello fellow cattle producers. We are primarily a commercial cattle operation that makes use of both AI and ET to improve our herd. With the kids getting older, they own their own Purebred Angus & Polled Hereford cows and are working on expanding their herd. We have been focusing on making females that will work well in our native grass pasture. These two breeds do that and make a great cross with each other. While we had hoped for females out of these embryos, the bulls have turned out pretty darn good. We would gladly use either one of these bulls on our replacement heifers or second time calvers. Both of these guys were tie broke and worked with in the fall when we were halter breaking heifer calves. We are pleased to be able to offer them for your consideration. We would like to Thank Andrew & Jessy for the opportunity to first purchase these embryos, and then to market these bulls in their 11th Annual Elite Genetics Bull Sale. They are a direct result of their hard work and years of experience in their breeding programs.

Tex Playbook is a proven sire that is known for several traits. He ranks in the top 1% for Maternal Calving Ease and Milk, top 2% for Calving Ease and Heifer Pregnancy, top 7% for Docility, top 15% for Weaning wt, top 20% for Yearling wt. It's tough to find calving ease that comes in the same package as strong Weaning and Yearling weights. Combine this with the very productive RAF Liberty Belle 80X donor cow who has 19 progeny to date, it's easy to see why this mating has worked so well.

Churchill Kickstart 501C ET is a Homozygous Polled bull who is backed by two great cow families and has tremendous eye appeal all wrapped up in one package. He is a bull that we would use again in our AI program. His Dam Blair's Xkeona 521X 1A is an easy keeping maternal cow who is still producing at RSK. This ET bull calf Shereff Kickstart has a straight top, clean sheath, clean front with the extra pigmented hooded eyes and a large dark scrotum that many of us look for in a moderate, mild mannered package.
