BULL SALE

AT THE FARM - BRANDON, MANITOBA

GUEST CONSIGNORS

MCRAE LAND & LIVESTOCK | ANGUS VALLEY FARMS | MC-THREE FARMS | SPRINGHILL FARM

Welcome

MAR MAC FARMS

TO THE 19TH ANNUAL MAR MAC BULL SALE

It is hard to believe 19 years ago we moved the sale to the farm.

2022 was an interesting year with heavy rains in this area but the calves did extremely well with lots of grass and fall grazing. We are extremely proud of this strong group of bulls on offer.

We are a 5th generation farm where everyone is involved in the day to day operations. Our grandson is the 6th generation and loves spending time outside on the farm. We love to be part of Agriculture and take pride in producing a top-quality product. Mar Mac Farms are proud to be members of the Canadian Angus Association for 68 years and the Canadian Simmental for 47 years.

2022 was a busy summer with the Canadian Simmental Annual Meetings and YCS show, Canadian Junior Angus Showdown and Manitoba Youth Beef Roundup all in Manitoba. Our family members were involved as organizers, judges, volunteers, sponsors, and official photographer. Great to see everyone in Manitoba for these very successful events.

It is exciting to see our cattle working so well in other programs. Some of the feature bulls in this sale are sired by Lincoln who was the High Seller in our 2021 Bull Sale, selling to Six Mile Ranch and M.C. Quantock, check him out on the herd bull page. At the 50th Anniversary of Canadian Red Roundup, the High Selling live Open Female sold for \$ 35,000. She was owned by Allison Farms, AB and sired by Mar Mac Powerplay who they purchased in our 2021 Bull Sale.

While in New Brunswick this year, Blair and I toured the Springhill herd. They have purchased a bull and females from our program. We were impressed with the bull calves and their mothers, so we invited them to be part of our Bull Sale. We welcome our guest consignors: McRae Land and Livestock, Angus Valley Farm, Mc-Three Farm and Springhill Farm to our sale. They all work hard at their programs producing top quality cattle for the BEEF industry.

Hosting a sale takes lots of time and we would like to thank our Friends and Neighbours who jump in and help us when ever needed. Special Thanks to Tyson McRae who works at Mar Mac Farms for all his dedicated effort in our program.

We look forward to visiting with you and discussing your bull needs. We would personally like to thank you for supporting our BEEF program.

A Program You Can Trust!

This crop of bull calves has been one to admire for the uniformity and depth of quality in all 3 divisions. As you toured through the pastures admiring what the mother cows had produced you get a sense of pride of the cow herd you have worked hard to establish. As you will see in the footnotes many strong cow families have been established in our herd and work well every year. Our cowherd grazed most of the winter on corn grazing and bales till calving season. Once they are brought home from our other farm, the cows are fed a silage, hay, and straw mixture.

When we select a herd sire, the bull's mother or grandmother is an important part of our selection. Stop by anytime to view the dams of the Red Angus and Simmental bulls, we are very proud of the cowherd we have assembled. We have spent long hours researching our herd bull battery and are very proud of the cow bulls and heifer bulls we have added to our program. If they do not work for us, they are gone.

This year in the Red Angus, and Simmental, you will find power bulls for your cows, and heifer bulls for those ease of calving individuals. 98% of our calves are born unassisted we feel mainly due to our cowherd being fed out in paddocks with lots of exercise, blended rations, and bull selection.

Birth Weight: The weights you see are the bull's actual birth weight. Within 12 hours of birth, our calves are weighed, vaccinated, tagged, and tattooed. Let's remember that we get paid by the pound for our calves and length of body adds pounds. Check out the article in the catalog on Birth Weight and Calving Ease. Mar Mac has tried hard to keep that length and natural thickness in all of their divisions. Weaning weights are the actual weight of the bull on September 21st.

In this year's catalog, you will see the calf's actual Birth weight and what it was as a % of his dam's weight at weaning. It is assumed that most cows will calve 7% of their body weight. The average of these bulls % is 6.08%.

Our calves are not creep fed in the summer, so we can evaluate the full potential of the cowherd. Two weeks before weaning, a feeder with an oat pellet ration is put in the field to get the bulls used to eating away from their mothers. Then one week before weaning, the low stress quiet weans are put in. Calves are returned to the pasture with their mothers for 5 days. At the time of the nose wean insertion, fall booster vaccines are administered. Deworming and parasite control are administered in mid October.

Weaning day, the bulls are weighed, weaned and brought home. Once home they are started on a TMR ration of corn silage, hay, grain and supplement that has been balanced and formulated for longevity and fertility. In early January the bulls were vaccinated with Express 5.

These sale bulls have been through a strict culling process with structural soundness, ease of fleshing, and disposition taken into consideration. Any of the bulls in the sale, we would use in our program.

We would like to retain the right to collect 200 straws of semen for our own herd use at your convenience and our expense, on any of these sale bulls.

At Mar Mac Farms and Guests: Customer Service is very important; we talk to our buyers at least once during the year to see how the bulls are doing. If you have a problem with your bull, we expect you to call and talk to us.

As you see in the catalog, we have a larger group of coming 2-year-old bulls. These bulls are virgin bulls and developed specifically for this sale. They are not leftovers; this is an added feature if you have a large pasture that an older bull can handle more cows.

Brett and Chantel McRae (McRae Land and Livestock) have expanded their program in the Angus and this year are offering a top group of coming 2-year-olds. The bulls are all fed in one spot, you will find fatter bulls, but these are fed to last.

Any questions please feel free to give us a call or check out our website for more info.

From the desk at T Bar...

Welcome to Mar Mac Farms and Guests Bull sale at the Farm just outside Brandon, Manitoba on March 8th, 2023. There are bull sales every day throughout the spring season, none can claim a Fifth Generation Farm and nineteen annual bull sales. This operation makes their livelihood out of agriculture, mainly producing herd improving seedstock for multi-generations... quite an accomplishment.

It has been said many times that the cream rises to the top. Travelling the country viewing herds you can routinely find the influence of Mar Mac... and what a year they have had both breeding and marketing..."it's got to be that cream."

Exciting lineup... you bet! The Red Angus bulls are powerful with several breeder type bulls in the group. Not just one.... several, but you decide on the one for you and make sure to be the last bidder. The Simmental bulls are small in number but big in quality and performance. Brett and Chantel have a strong offering of Red and Black Angus.... uniform, thick and stout and jam packed full of maternal and calving traits.

March 8th will be a very good day to be in Brandon to add value and quality to your livestock program. Along with their guest consignors, you will be treated to great hospitality and breed leading cattle. Stop by anytime prior the sale and preview the lineup or just give these great folks a call... they always have time to talk cows.

If we may be of assistance, prior to or sale day, feel free to contact any of the T Bar Team or myself, we will help you in a professional manner.

MAR MAC FARMS BULL SALE

1:30 PM - MARCH 8, 2023 - MAR MAC FARMS SALE BARN

BIRTH WEIGHT AND CALVING EASE

University studies in Wyoming and data from Montana and Colorado lend credence to the following conclusions.

1. The birth weight itself influences calving ease by 65%.
2. The female has 60-70% influence on birth weight of her calf.
3. The bull has 30-40% influence on birth weight of his progeny.
4. Pelvic measurement and angle as well as the shape of the calf has 35-40% influence on calving ease.
5. Length of gestation greatly affects birth weight. A fetus can gain over one pound per day in the last days of gestation.
6. Weather and temperature the last 30 days affect the length of gestation.
7. Size and maturity of the cow influences calving ease.

Remember, everything is relative. Increased growth, frame and performance will increase BW. A longer-bodied calf will weigh more. If a calf is expected to have the genetics to growth, it will display this prior to birth as well as after. As a rule of thumb, it takes a calf weighing 85 lbs. at birth to finish at 1200-1250 lb. A cow should easily give birth to a calf weighing 8% of her own body weight. Thus a 1200 lb cow should give birth to a 96 lb calf with ease.

Continued selection for light birth weights will ultimately reduce the mature sizes and performance of your cattle.

Lincoln, the first Navigator son to sell, sold for \$30,000 in our 2021 Bull Sale to Six Mile Ranch and Mc Quantock Ranching. This unique individual is out of a Black Resource female going back to a Mulberry cow. Lincoln is dark cherry red, full of red meat and a bull that should improve the maternal and paternal strength in a program. These are an extremely impressive set of Lincoln sons in the sale and Lincoln has proved to be short gestation. Our first Lincoln daughter sold for \$10,500 to Wilbar Farms.

Here is a young sire that puts the Mar Mac program all together. His sire, Lincoln sold for \$30,000 in the 2021 Bull Sale to Six Mile Red Angus and Mc Quantock. Lincoln has done an amazing job of breeding, siring cattle with short gestation, low birth weights and yet performance in the end.

Landmark's dam is the *Lady Trooper Cow Family* that has worked so well at Mar Mac Farms. Lady Trooper was the Show Female in the Canadian Angus in 2013 and has left a strong set of progeny since that time. Trooper has left us a number of daughters many in the Mar Mac program and sons working in the industry. There are 6 sons and grandsons of Lady Trooper 114Z in this sale. You will drive many miles to see a Red Angus female with the volume, balance, milking, udder, good footed at 11 years old female that moves like a cat and as sound as ever.

Landmark was Ag Ex Senior Champion Bull Calf 2022. This correct made, good footed, stylish bull with calving ease and yet performance and backed up by the two top cow families in our program. This is a bull to make the trip to view, as he will be an asset to your breeding program.

Now this bull is a tank. Thick made, structurally sound, beef bull with an excellent hair coat. Roughrider was used in our program for calving ease and made some beautiful females. We flushed Lady Trooper to Roughrider and here is the progeny. Don't underestimate the breeding potential of this bull as with Roughrider, Ribeye and Lady Trooper tons of maternal and paternal strength. Here is a bull you will drive a lot of miles to find one like him. This bull checks all the boxes, with moderate birth weight, performance, EPD profile and bull quality.

In our search for some outcross genetics, we decided to flush Lady Trooper to Payload. We had seen this bull at Bow Valley Genetics and thought he had a lot to offer. Excellent profile, feet and legs and performance. Here is two full brothers that can add length and performance.

We understand they are cattle producers but also understand they are grain producers as well. We encourage producers to grow as many on farm ingredients as they can and we will help fill the nutritional gaps that the forages and grains leave. McRae's do an outstanding job growing quality silages, hay, greenfeeds and grains that help provide protein, energy and some minerals and with their Custom Bull Developer Supplement I provide the nutritional shortages to balance their programs requirements. Over the past number of years we have been able to lower the energy requirement of the diets and increase the forage percentages because of the way the bulls are converting. Conversion is the most economical trait we have and The genetics in the Mar Mac bull program is showing us this.

Our goal is to raise well grown out bulls that will go out and cover females without breaking down and melting away. We want the bulls to mature and grow in a sound development program and we are very conscious about not getting them over

conditioned and to cool down the bulls post sale to get them used to their new surroundings and environment.

The sound nutrition I design will help enhance growth, conversion, and overall performance. Strong emphasis is on structure soundness, feet and legs, hair and reproductive development with increased scrotal development and semen quality. A sound nutritional program keeps all of this in mind.

I balance Mar Mac's feeding programs with Cargill's BEEF MAX Ration Balancing Program. This program balances to different types of proteins, amino acids, fibers, chelated minerals and selenium, vitamins and the natural Diamond V-NaturSafe product to enhance stronger immunity and absorption of nutrients.

Once again the key to a successful relationship is communication. This communication with Mar Mac Farms helps with a part of the success of their Bull Development Program for their customers.

SIRE - 364U

This is an old pedigree with **Ruby 10T Cow Family**. She had a number of sons and daughters that had worked well and we were hoping to get some more daughters to continue her legacy but ended up with these 2 sons. Ribeye was a powerful individual who left some stout beefy bulls that went out and worked in the purebred and commercial industry and his females were power cows with excellent feet and udders. Here are two bulls that will be assets to a program being on different recipis they continue to excel. These are the last two of this mating available.

lot 23

SIRE VERIFIED
 A few years ago we were looking for an outcross for our program and purchased some Red Windy Hill Zeppelin from our good friend, Kirk and Jill Wildman and family. Zeppelin at Mar Mac was used on heifers for calving ease and the mother cows have beautiful udders. This bulls dam is the daughter of our High Selling Bull in our 2019 Bull Sale to Gordon Resources, South Dakota We used some in herd use semen to produce some moderate framed, easy keeping daughters. This two year old **Frado Cow Family** female weaned off a 765 lb bull calf so they work. Some strong maternal genetics here.

DAM - 90E

TESTIMONIAL FROM M2 FARMS ALIDA, SASKATHCEWAN

We purchased a Navigator son, Leader 93H from Blair and Lois at their 2021 Bull sale. The first thing that caught my eye when looking at him was his length and depth of body with a lot of rear end to go around. He had a hell of a coat of dark red hair, a small head, smooth shoulders and a calm demeanor. We were wanting a red bull to go with a group of mature cows. He had a little bigger BW but that didn't detour us because of his length of body. He went to work on July 1 of 2021 with 25 mature cows. He must have caught them all within the 1st and 2nd cycle as he had the most calves on the ground out of all our other bulls by mid April. The calves hit the ground growing with no calving trouble whatsoever. We are very happy with his calves; he produces the beefy calves that we were wanting to send to town in the fall. We kept the majority of the heifer calves he gave us, and they will become cows in our program
Cody & Michele Anderson

SIRE VERIFIED
 Add some length of body to your calf crop with this guy. A double bred Eliminator son, along with the Bonita and Ruby cow families. His dam 9H is a beautiful feminine, tight uddered two-year-old who will be exciting to watch down the road.

Springhill Farm

BEV 506.292.1248 -- KRISTA 506.470.8067

We here at Springhill Farm are honoured and humbled to be invited to the 2023 Mar Mac & Guest Bull Sale. We wish to thank Lois and Blair for their friendship and tremendous support of our program. Although not the bull mecca of the west - there's good cattle here in the Maritimes!

For 3 generations now the Mc Murtrie family has been farming at Springhill in picturesque Fredericton NB. Initially dairy and then pivoting to a commercial beef herd, Springhill Farm has since transitioned to a predominantly registered Red Angus herd.

The Springhill bulls on offer were selected from easy calving, maternally minded females with the ability to raise up a good calf. We need our cattle here in the east to work for a multitude of markets. Sound structure and temperament, reliable genetics, productivity and longevity in an attractive package is what we strive for and works for everybody.

Everyone is in search of new genetics and we bred a couple of Red Angus females to the Six Mile Horizon bull. Horizon was a Black Angus bull we purchased at Six Mile Ranch. We admired his presence, length of body, sound foot and depth of quarter. Horizon sold in our Black Angus dispersal to Leaning Spruce Farm. We hated to part with Horizon so collected some in herd use to try and get some outcross genetics. We ended up with two bull calves one bull we are retaining to use in our program and this 44K we are offering for sale. Good haired, stout made, stylish bull calves, these two are. A Black Red Pedigree with some real interesting potential.

HOMO POLLED - RED - PUREBRED - SIRE VERIFIED

A Red White face to lead off the Simmental Division. Top Tier is a son of the Mar Mac Utah Whiskey that has worked so well at Mar Mac Farms. Melissa purchased 8K's dam from the Labatte Simmental herd. This young two year did an excellent job for first year and will be exciting to see how she continues to produce. A red baldy bull, moderate framed and thick made.

lot 39

Lot 40

Oakview Hampton was purchased from Oakview Farms as a calving ease sire. He calved well on heifers and cows. Hampton left a strong set of calves the first year, thick quartered and extremely long bodied. The Deb Cow Family milks heavy to add pounds at weaning. We have worked hard to get the length of body in our program as it adds the weight to your calf crop.

McRae Land & Livestock

BRETT & CHANTEL MCRAE
204-729-1018

BRETT.MCRAE@ICLOUD.COM

A PROFITABLE, ENJOYABLE, BUSINESS THAT STRIVES TO IMPROVE LAND, LIVESTOCK AND LIVES

Welcome to the 2023 McRae Land & Livestock bull sale offering! We are very excited to offer some new bloodlines the year, as well as some proven favourites. All these bulls were born on pasture, wintered with their mothers until February 2022. From there they were backgrounded on hay and oats until pasture turn out where they grazed until November 2022.

Our cow herd is based on 3 major principles:

Fertility:

Cows that come into the fall with a calf in their belly and a calf at side.

Soundness:

Correct feet and udder structure and a docile temperament.

Low maintenance:

Cows that do the work on their own without a bunch of fuss!

On top of that, we try to be mindful of the product that we are producing:

Consistent, Reliable, and Predictable bulls.

We breed our maternal, calving ease type cows to proven, maternal, calving ease type bulls to produce bulls with consistent, reliable and predictable calving ease. Conversely, our cows with more performance are bred to bulls that offer more performance, but still maintain the low maintenance traits we are looking for.

As you have come to expect, each bull has been scored from 1-10 on their feet and docility. 10 being perfect, 1 being the worst. This is not a flawless system, but it should serve as a guide.

The mothers of these bulls are bale grazing this year in a field 6 miles away, you may look at them at anytime, but they are a challenge to get to.

We would like to Thank-You for taking the time to look at our program, it really means a lot to us! Please don't hesitate to contact us or stop by for a tour to find out more about this year's bull offering, our cattle herd or our program.

When I set out to breed consistent, quality, calving ease bulls, this is the kind of bull that I had in mind. His pedigree is stacked with proven maternal bloodlines that are known for producing good bulls with lots of calving ease. Best of all, even with all of his calving ease and maternal strength, he does not give up the masculinity, style, or performance that many "heifer bulls" do. This bull is the complete package, you will drive a lot of miles to find another bull that checks all the boxes that Bravo 403J does!

owned by Allison Farms
HIGH SELLING HEIFER CALF AT RED ROUNDUP 2022

RED MAR MAC DM LANDMARK 10K
AG EX SENIOR CHAMPION BULL CALF 2022

CUSTOMER SERVICE PLAN...

Give Mar Mac or any other of the consignors a call anytime... Call us a few days in advance of the sale with your bull needs and we will compile a list of bulls that we feel will work for you. As we are with the bulls everyday, we know the qualities in each bull. If we buy a bull for you sight unseen and you do not like him, you don't own him - no problem! Don't forget to check out the videos!

At the Mar Mac and Guests Bull Sale our 60 plus years of experience as a family run operation means **CUSTOMER SERVICE** is an important part of our business. We stand behind our bulls 100%, sight unseen purchase satisfaction, wintering program, personal contact after the sale of the bull and the coffee is always on for you to come and view our program.

BULL GUARANTEE...

All bulls have completed a breeding soundness evaluation. If your bull fails to be a satisfactory breeder, we will replace him with a bull of equal value or give you your money back. We make sure you will have a sound bull to service your cows. We will not provide a replacement if your bull has been miss managed. At no time shall the liability exceed the purchase price of your bull. **BULLS UNDER ONE YEAR OF AGE ON SEMEN TEST DAY WILL BE TESTED AFTER THEIR BIRTHDAY, BEFORE YOU NEED THEM.**

PIECE OF MIND...

Your new bull is a valuable asset and we recommend insuring your bull for infertility coverage and all risk mortality. If you are taking advantage of our wintering program, your new bull must be insured so we both have peace of mind. Insurance will be available from Keystone Livestock Services.

DELIVERY...

IF YOU PICK UP YOUR BULL AT THE FARM ON SALE DAY, YOU CAN SAVE \$200 PER BULL TO A MAX OF \$500 OFF THE PURCHASE PRICE.

We offer to board your bull free until April 15, after that at cost until you need him. **AS WELL, WE WILL DELIVER YOUR BULL FREE TO CENTRAL POINTS IN WESTERN CANADA OR THE US BORDER AND COST WILL BE SHARED TO EASTERN CANADA.** We will make every effort to get the bull to your farm. Delivery will be as close to the date you request your bull, but will be at our convenience. If you can not take your bull when we are in your area, we would appreciate if you made arrangements to pick up your bull.

CALVING EASE SCORE...

We evaluate each bull for calving ease determined by bone size, birth weight, birth weight EPD and profile. Scoring is as follows:

***** Recommended for use on moderate framed first calf heifers**

**** Recommended for use on well developed first calf heifers under supervision & cows.**

*** Recommended for use on cows.**

This system is just a suggestion, many other factors effect calving ease.

ACCIDENTS...

Although every precaution will be taken to protect the safety and comfort of the buyers, neither the sales staff, auctioneer or consignors assume any responsibility in this matter and disclaim any liability, legal or otherwise, in the event of an accident or loss of property.

TERMS...

The terms of the sale are cash or cheque payable in Canadian Funds. The right of property shall not pass until after settlement is made. All settlements must be made with the clerks before any cattle are released.

MAR MAC FARMS & GUESTS RESERVE THE RIGHT TO DRAW SEMEN ON ANY BULLS IN THE SALE FOR THEIR IN HERD USE.
