TERMS & CONDITIONS

The information printed has been supplied by the seller and believe to be accurate. Updated sheets and announcements will take precedence over any incorrect printed material. Cattle will sell under the standard terms & conditions put forward from CSA & BMS. These are available upon request.

**NEW BIDDERS TO THE DLMS FARM GATE TIMED AUCTIONS
MUST CREATE A NEW ACCOUNT**

All new bidders to DLMS FarmGate Timed Auctions must create a timed auction account to be able to bid on this timed sale.

This log is different from your DLMS.ca live sale account.

CREATING A NEW ACCOUNT

Click Register on the top right corner fill in your account info, log in to verify your phone number and you are ready to roll with DLMS Farm Gate Timed Auctions.

OUT BID NOTIFICATION SETTING REMINDER

All bidders please remember to activate your email and text notifications to receive out-bid notifications for lots that you are bidding on. To turn on notifications go to the top right corner of the screen go to My Account, click on Notifications, confirm you have check marks beside your EMAIL & PHONE notifications and then click save.

CLOSING

At closing time of the sale the entire sale will extend bidding if a bid is placed on any lot in the sale. Any bid received after close time will extend the sale by the time listed on each sale. When no bidding occurs for the extended time the computer will declare the sale finished.

INVOICING

Following the sale the Bohrsen Marketing will invoice all buyers in the sale, please contact the seller with questions or to arrange delivery, pick up or shipping of your purchases.

For more info and assistance with bidding contact the sale contacts or

CREAM OF THE CROP FEMALE SALE

ONLINE SALE OPENS 9AM CST
MONDAY, DECEMBER 8TH, 2025

ONLINE SALE CLOSES 5PM CST
TUESDAY, DECEMBER 9TH, 2025

Welcome to the 2025 edition of The “Cream of the Crop Sale”. Such a fitting name as the 3 contributors always pull right off the top of their progressive programs to make this exciting online auction what it is. Horner Cattle Co, Downhill Simmentals and KCH Cattle Co are some of the really strong breeders and recognizable operations in the province and are using this format to showcase the very best they have to offer. Nothing held back, no stones unturned, this is certainly one of the highly anticipated sales of the season. We invite you to join us for viewing and hospitality before the online closeout December 9th at Horner Cattle Co sale facility near Minnedosa, MB.

The 2025 offering of open heifer calves is the deepest in quality as ever before. Females of both breeds that represent some of the real elite cow families with lengthy, impressive lists of breeding accomplishments. These females are ready to hit the show road and in many cases have already done so very successfully winning classes and banners throughout the province. This set of heifer calves has as much future and promise as anywhere this fall and we encourage you to study them closely as they are destined for great for years to come.

The bred portion of this offering is truly serviced for profitability. These bred heifers and one exciting cow represent proven and predictable cow families sired by industry leading bulls and carry services guaranteed to give you a quick ROI. These bred heifers are a unique group with potential donor candidates and front pasture type cows in the making. In these times in the cattle industry, you can't afford to not surround yourself with the highest of quality of cattle and this section has that in spades.

Be sure to plan to be in Minnedosa anytime prior or on sale day to view this exciting offering. The consignors would love to hear from you and tour you through the sale cattle. If any of us listed from BMS can help in your selections, please don't hesitate to call on us as we would be happy to assist. We hope to see you in Minnedosa and look forward to visiting with you on Cream of the Crop 2025!

Best regards,
The Bohrson Marketing Team

PUREBRED SIMMENTAL - HOMO POLLED - HOMO BLACK

5034N has made a ton of friends throughout her life and it is no question why. A female that took our attention right off the get go, and it was decided very early in life that she was special and would be a female we would like to promote.

5034N is so massive centred, chested, boned and footed. But yet with all this mass and volume she is still so well constructed, smoothy tied together and absolutely effortless on the move. She is great haired and one we think would be really competitive next fall as a bred on the show circuit, but still has all the right pieces to produce those high volume sons and look good doing it. Mothered by another great young Rose cow, we sold a feature son in last year's bull sale. We can't say enough good about the Rose daughters.

Sons have sold to Griffin Zalluski and Bull Rush Ag

Selling full interest, retaining the right to one successful flush with a minimum of 6 embryos.

HFL LONGVIEW LONG SHOT 4074M

Every year we like to highlight a few heifer calves of the highest caliber. While things do look different this year, these are truly the cream of the crop!

HFL 5080N is a female we were struck on from the get go. A female so massive in her build, heavy and round muscled, bold sprung and stands on a large foot. While being so massive she is still so smoothy made, balanced, and carries that volume right down to her lower 3rd, forebag and heart.

Her quality is no accident and time again the 2 full sisters (1016J and 1035J) sold in our \$42,000 pick have out produced themselves and every year progeny finding themselves at the top of their pens.

1016J sons by Dark Horse will highlight the 2026 bull sale with one already being selected an all breeds champion, the other a reserve all breeds champion. 1035J's sons and daughters will also find themselves as features and in the past 3 of 1035J's sons have been given the honour of being lot 1 in our bull sale. Last years 1035J son won numerous titles at Blackgold Classic being the All Breeds Reserve Champion, Ag ex being the champion bull calf and reserve overall champion bull, and Agribition being selected Reserve in a super stellar set of senior bull calves.

He then found his home out in BC at Reanne Sandford and Nate Marin's place. Other sons have sold to Stepler Farms and Clint Robertson.

Milking daughters of both females have dropped beautiful udders and are excelling in production, we have them slotted to be corner stone females and future donors. This deep rooted quality and consistency is a staple of the Rose cow family, and solidifies our absolutely confidence in 5080N as a breeding piece and a production female. We have had great success flushing both full sisters 1016J and 1035J, with 1035J averaging 14 grade 1 embryos per flush.

Junior Champion at Blackgold Classic and an Ag Ex Class Winner.

Selling full interest, retaining the right to one successful flush with a minimum of 6 embryos.

We have really liked the No Limits progeny and feel they are curve benders in terms of performance. An extra shot of frame, muscle and rib in these No Limits cattle really make them the cattlemen's type and the lineage of some great females make using No Limits a no brainer for us.

5102N has peaked our interest all summer, and every day just gets better and better. We like the added shot of frame and bone she possesses, stepping down on a solid square foot; a staple feature of her dam Bretта 461H who is arguably one of the best footed cattle we own. 5102N possesses a lot of look as well, and would look really good campaigned as a junior or 4-H project. Her attractive double goggle eyes, and extra neck extension tied into a smooth shoulder with the ability to move effortlessly make her a pleasure to watch. As well ample rib shape, volume and balance into her lower 3rd, 5102N will make for a very interesting breeding piece.

Second In class at Ag Ex.

Selling full interest, retaining the right to one successful flush with a minimum of 6 embryos.

HPF CREAM SODA 248D

MATERNAL GRANDDAM

JUNIOR INCENTIVE

If these females happen to sell to young breeders we want to help these young people start off on the right foot. We at Horner Cattle Company, are offering development and breeding of these females, and are opening up our tank to any of the bulls we would use ourselves. Development would be at cost and if you chose to breed your female to one of our bulls or ai sires, the service would be our gift to you.

While we will take every precaution and treat these females as if they are still our own, females must be insured if you choose this and we assume no liability. We are also proud to host the Manitoba Simmental Field day August 8th 2026, and our entire sale group would like to offer any junior who purchases any of these cattle free entries to the field day.

PUREBRED SIMMENTAL - HOMO POLLED - HOMO BLACK

It always really excites us when a first calf heifer knocks one out of the park on their first attempt at motherhood and 5039N's mom did just that! 5039N garnered a lot of attention over the summer and was picked out as a favourite by a lot of visitors.

A female that possesses a lot of centre 1/3rd, balance, smoothness, hair, neck extension, a neat tidy skull and a ton of look, I think a junior would be thrilled to hang a halter on this one, and could be very dominate. We love this females mother and grand dam. Her grandam was selected as a feature from Riverpoint, a direct homo polled daughter of the great HPF 248D who has recently blazed a trail, and the great turnpike; it is no secret how much we like our turnpike cattle and the foot quality and size he sires is one of his greatest strengths. Throw in the great Walk this Way and the likes of the beautiful Iron Sugar and its no wonder we love 5039N's mother so much.

Selling full interest, retaining the right to one successful flush with a minimum of 6 embryos.

PUREBRED SIMMENTAL - HOMO POLLED - NON DILUTOR

This one is hard to part with, and in past years I've said no to selling almost every Heidi female we've had in efforts to build this great cow family. However, still having this females young mother in production and slotting her for the donor pen, and in efforts of putting our best foot forward we are offering up this great female.

4087M's greatest strength is her beautiful moderate mother, who sports what is for us, a perfect udder. Luckily 4087M is a splitting image of her beautiful mother.

Moderate and super complete, 4087M is heavy round muscled, massive ribbed, beautiful fronted and skulled, and is dropping a gorgeous udder much like her mothers. Relative to her frame size, she is massive footed and boned and is certainly one built for the long haul, profitability and efficiency. With the likes of High Roller, Bentley, Cobra, and Tula in the mix it would be wise to keep all of her daughters and build a Heidi cow family of your own.

Serviced March 24 to WFL Water Valley 2064K,
exposed to NAC Slider 36M April 1-May 30th, favourable to AI.

This was a female we initially had no intention of selling, with an early service and being the splitting image of her mother RLD 433E, the dam of our \$51,000 Mindgame bull, the logical thing would be to retain her for our own benefit. Instead the opportunity is yours.

Volume, balance, mass and hair sums this one up perfectly. We really like the way this one is constructed. Smooth shouldered, pretty skulled, adequate extension in her front 1/3rd, with depth and volume into her lower 3rd all the way from heart to fore bag, wide based and wide chested, but still travels so well and soundly. One that we think is hard to pick a hole in.

Her service to Water Valley is one that really excites us, we are really looking forward to following this female in her new home!

Serviced to WFL Water Valley 2064K March 23,
exposed to NAC Slider 36M April 1-May 30th favourable to AI.

PUREBRED SIMMENTAL - HOMO POLLED BY PEDIGREE

Served March 24 to R PLUS Fleetwood,
Exposed to NAC Slider 36M April 1 - May 30 , Favourable to AI

We can't say enough good about the set of females Bentley has left us and 4007 and 4012 are great examples why.

4007M is a female you have to stop and admire. She's built just right for us. Beautiful skulled, ample neck extension, lots of depth of rib, wide based, and extra shot of frame and length of body. 4007M is one of the largest framed females in the offering, even with all the extra power and volume, she still remains tidy and elegant. To us, she possesses ideal teat length, spacing and placement. She's going to be really exciting to watch develop into a cow and its going to be an exciting spring watching her mother up a Fleetwood calf.

We saw Fleetwood at Maxwells last fall and were sure impressed. We bred a large number of females to him and are super excited to watch them arrive in January! 4007M's mother has been a really solid producer and at the age of 9 she still has an awesome tight and tidy udder with excellent teat size. Logan has said to this day, her grandam 400B has been one of their best producing cows. 2 years ago we sold a maternal sibling to LA Ranch.

Another lovely Bentley daughter.

Not extreme in anyway, just a complete, soft made, well balanced, easy to look at and easy to like female. The Bentley's have made really good cows for us, tidy uddered, super complete, easy fleshing and 4012M fits that mould. Her mother 33D is a cow who has done us well, with numerous daughters retained within our own herd.

This spring in our bull search we set out to find a homo black bull backed by a tremendous cow with incredible strength in udders and feet generation after generation. That led us to a tremendous Erica 74A son from our friends at Rideau Angus, he and his 2 other full brothers impressed us and we ended up owning him. We used him with absolute confidence on a group of purebred females. We are most excited to see the resulting progeny and inject the maternal strength that the famous Erica 74A is known for time and time again.

A little different breeding on this one, but we feel the resulting progeny will truly be the best of both worlds and we are excited to see how these progeny develop! Imagine breeding up from this incredible cow power and the strength of descendant females for generations to come.

Exposed to Rideau CM Iceman 56M April 1- May 30.

Bred Rideau CM Iceman 56M April 10, favorable to that service.

702M is a broody daughter of S A V Magnum that offers extra length of spine and natural fleshing ability. Study her from any angle and you'll appreciate the raw power that she brings to the table. Combine this with her impressive EPD spread and her service to a son of BAR E L ERICA 74A and the genetic potential of her first calf is sure to impress.
Exposed to Rideau CM Iceman 56M April 1- May 30.
Bred Rideau CM Iceman 56M March 30, favourable to that service.

A Golden Opportunity!!! An incredible pair that has been admired by all that have seen them this summer. Cream Soda is a powerful 5-year-old in the prime of her life, she is a beautiful female with incredible length, mass & dimension which she carries up to an elegantly made front end that screams femininity & refinement. Her heifer calf sired by Walk The Line is a sight to behold, & has been admired all summer by everyone that has seen her. They have enjoyed many successes this summer including being crowned **Supreme Champion Pair at the 2025 Manitoba Simmental Field Day.**

Sweet & Sexy are the 2 words that come to mind when you lay eyes on this super stylish show heifer prospect. Sugar Rush is going to have a lot of friends on sale day, with her sweet front, sweeping rib shape, wide hip and elegant profile she is going to show and then make a great donor just like her mother Iron Sugar, who has been a prolific producer for Mader Ranches and is the mother of Walk This Way. Sugar will make a great junior prospect with her quiet disposition and tremendous show appeal. The only question is... Who is going to be the lucky junior to find her in their show pen???

Standout! This young female will be a competitive show heifer with stylish look, explosive rib shape and wide hip. Her show ring style has gained attention from everyone that has walked through the prospect pen. She is a maternal sister to KCH Defender, who walks the pastures of Duralta Farms & Soderghen Ranches. We are incredibly impressed with his daughters, they have the front pasture look and outstanding udder quality that really grabs your attention. Her dam 903G is one of our absolute favorite brood matrons and is heading to the donor pen in the spring. We love the Annie K cow family, they are deep, broody females with exceptional productivity. 527N is sure to have the same massive rib shape, long level hip, and a picture perfect udder as her dam and will become one of your most treasured breeding pieces.

SERVICE SIRE

For many years Horner Cattle Company has had bred heifers on offer by private treaty, this is an exciting start to a new venue to offer our elite replacement bred heifers. We have been breeding and raising our own replacements for over 20 years, selecting for high quality growth, easy doing, easy fleshing, tidy uddered females. As everyone knows a lot of factors go into selecting females out of your program to go on and better your herd. Environment is a huge factor across the cattle industry, what works for one guy may not work for the next, and that's what keeps the competition of the cattle industry interesting! We have selected these groups of females based on their specific traits, breed times, and sire groups to bring you 7 pens of what we think are very consistent females that work in our environment. These heifers are from the top of our replacement herd and if kept, would go on to become part of our embryo transfer program in our purebred herd, or be moved into the later calving program to calve out in our May June program. The 5 pens of early heifers were serviced by Homo Black calving ease sires. We invested heavily in our calving ease bull power this spring purchasing two sons with the genetics of Erica 74A, Coleman Glacier, Atlantis and Charlo on the Black Angus sires as well as purchasing a 1/2 Blood SimAngus from Rocky Meadow. The half blood bull is homo polled and homo black with definite calving ease features, he is a very impressive bull to see in person and look forward to his progeny in the future. With having both an early calving Jan Feb Program as well as a grass calving program in May June we can take advantage of two breeding seasons. The bulls were exposed for 30 days then pulled to give a distinct break in our calving windows. Heifers are then exposed to a bull later to catch any remaining cycling heifers for the start of may. Exact breeding windows will be listed with each lot. Heifers were preg checked early September and checked using ultrasound to allow us to estimate their gestation.

For more information and to chat about these heifers further, be sure to get a hold of Jake 204-768-0284

24B- 187M	SIRE: MISSILE X ROSE 23D	DAM: BLACK STUNNER/FINAL ANSWER SON Sired
24C- 345M	SIRE: MRL RAVEN	DAM: BLACK ANGUS Sired

A very consistent set of Black Simmental influence females, these three have a lot of length of spine and tons of volume! We are very happy how our black Simmental bulls are working on our cowherd, they are producing very strong boned, heavy set, good uddered, good haired cows. Last years reports of our sale bred's were positive and reflected what we want to provide to the industry. We want to provide heifers that have no surprises, good udders, good attitude, strength of structure and do-ability is what is expected whether a heifer stays in our herd or sells into yours. Look to these 3 heifers as some of the best we have raised and put together as a group to sell. These ones are hard to part with!

27B- 139M SIRE: MISSILE/ABSOLUTE DAM: BLACK, HEREFORD(YUMA) X ANGUS
27C- 246M SIRE: RSK PITBOSS 101H DAM: BLACK, STUNNER INFLUENCE

3 very maternally made heifers. We have used a Hereford bull as a 3rd cross in our Angus and Simmental cattle, they have consistently given us the highly marketable white face. The Hereford influence has given us strong made, good mothering and good uddered females. If these females were staying in our herd, they would go on to become suitable recipients under good care and management. Calve them out this year, expose them back for early January calving, keep good condition on them and you'll be implanting them in no time.

Exposed to Blairswest Glacier Ice 48M and RMR Desert Storm 121M

SIRE: RSK PITBOSS 101H

DAM: BLACK, SIM X ANGUS
DAM: BLACK, ANGUS

A nice pair of black baldie heifers, caught to the new calving ease bull we purchased this past spring from Rocky Meadow Ranch. They will calve in the late exposure; we have had good luck with these late heifers calving out on grass pastures, they have good maternal instinct, and will get the calves out and going in no time. These two are sure to have maternal calving ease bred into their genetics with sires like Pitboss and Rip in their backgrounds. The Rocky bull has a small birthweight of 70 pounds and is smooth built like a heifer bull should be.

Exposed July 17th to August 20th --- April 26th to May 30th Calving window
Exposed to RMR Desert Storm 121M
These heifers were preg checked to calve at the end of April into May
