Not often that you find a Stockman daughter in her prime being offered. Ginger is pictured in her working clothes as she was a late addition to the sale, but she has been a solid, productive cow in our herd. Ideally we would have brought along her outstanding heifer calf to show her productive value, but she gained a lot of attention on our Facebook page, and has been sold privately. Watch for Ginger's video where we will include her with the calf nursing at the end of August. The service sire is by Millbrook Fireball from the Prospect Hill Stage Show 51A cow that we have been flushing very successfully. The Stage Show females have produced well in a number of herds, including the Willow Springs herd who have a "Show" heifer calf consigned in this sale. Ginger is free of all known defects and Myostatin.

Exposed to Dungannon Machismo 12M ET from May 20 - June 25, and Preg checked safe. Due approximately March 1, 2026.

Some older proven genetics here. Bred in the Don Hoyt herd, Basin, WY. We purchased this bull after he was Grand Champion Sale bull in Denver. This bull has lots to offer the breed with a fault free structure, super footed with some performance built in his pedigree. Here's a bull that a lot of breeders could use and have excellent results. Stored at Alta Genetics.
