

21ST ANNUAL

FLECKVIEH BULL & FEMALE SALE

Saturday December 6, 2025 | 3 PM On the farm | Valleyview, AB

IN OUR NEW SALE FACILITY

Welcome to our 21st Annual Fleckvieh Bull and Female Sale

This is our 21st year of offering powerful Fleckvieh genetics to the beef industry. It would not have been possible without all of our past buyers, especially our high percentage of repeat buyers. Our breeding philosophy has always been to produce performance cattle. When we combine this with the extra age and high-forage rations that our unique breeding program is centered around, our bulls and females possess great longevity.

The beef industry continues to experience record-breaking prices, and the cattlemen that have persevered are now receiving their well-deserved pay days during this season of highs. Our industry is demanding larger-framed genetics to increase efficiency and productivity through larger carcass weights. At Wolfe Farms we have always pushed for size and growth within the Fleckvieh breed. Our genetics will help you add more power to your calves and cow herd.

This year we have a group of eighty-two powerful Fleckvieh bulls, seventeen open Full Fleckvieh heifers and twenty-two registered bred heifers. Our open heifers are left unexposed so that they can better integrate into a January calving program. Our elite Fleckvieh-influenced commercial bred heifers were well received the past two years, so we have an even larger group to choose from this December. There are over one hundred bred for January 17th (one cycle) and thirty-seven bred for April 2nd calving. Exposed to Wolfe Farms' genetics, they are carrying calves that should be easy to market. These commercial heifers have been selected from great producers who have been using Fleckvieh genetics for many years. Be sure to check out our videos of these heifers, that are sold in groups of 4-6 head.

We have four new herdsire groups in this year's sale and we are very impressed by each of them. These four bulls are: JNR Barbarian, NUG Rambler 228K, Anchor D Kash 403K, and MAVV Foreman 53K. They were all selected for their conformation, growth, as well as the cows that backed them. Respectively, their dams were 8, 9, 11 and 10 years old at the time of purchase. We think you will find something you like from each of them. In the years to come, you will also find unique genetics coming from our acquisition of thirty-five head (2024 and 2025 heifer calf crops) from Wolfe's Fleckvieh in Sundre, AB. Shane and Shannon and family made the tough decision to disperse their herd this year (more information on this is on page 39).

In continuing to offer our customers cattle that will help them meet the demands of the industry, we carcass-ultrasound all our sale bulls and heifers, as well as our own replacement heifers. The results will be available on the homepage of our website within the "Interactive Supplement Sheet" found on the right hand side. In addition to the carcass scan results, this document will also contain links to CSA listings, videos, scrotal measurements, diluter status, and weights. Information is added as it becomes available.

We would like to remind potential buyers of a few things:

- Bulls can stay on the farm through the Winter free of charge.
- Bulls are delivered for free (within Western Canada) in the Spring.
- For bull purchases, buyers have the option to pay 50% on sale day and the remainder in the Spring upon delivery.
- Videos will be accessible approximately one week prior to the sale through a link on our website homepage. Click "Lot Videos" on the right-hand side.
- Our sale start time is 3:00PM.

Once again, big thanks to Stefon Beechinor and Mackenzie Stout for photographing all our sale animals -they always do an awesome job. Thank you to Keltey Whelan for putting our catalogue together so nicely. I would also like to thank my employees and family for the work they do all year long, as well as on sale day. If you have questions regarding our unique breeding program or this year's offering, call me any time at 780-524-9322. Everyone is welcome to tour through the pens prior to sale day. We hope to see you on Saturday, December 6th, to help us celebrate 21 years in the business. Stay after our 3p.m. sale for Annabelle's great smoked brisket!

WOLFE DESSERT 963D

- Polled.
- This heifer's sire Avenue is one of the best polled bulls in the Fleckvieh breed.
- Very well balanced in her make up.
- Lots of eye appeal and four pigmented feet.
- **Exposed to WOLFE KANE FF 369K (1438849) from July 2-September 8.**

A photograph of a man and three women standing in a grassy field with several brown and white cattle in the background. The man is on the left, wearing a cowboy hat and a light blue shirt. The three women are standing next to him, dressed in casual attire. The background shows a line of trees under a cloudy sky.

a new chapter for **WOLFE'S FLECKVIEH** genetics

We have witnessed the genetics from Wolfe's Fleckvieh perform within our herd for over twenty years through bulls such as Pasta, Stetson, Brewster, Bell, Wolfes Geronimo and Dynamite, as well as through cows like Wendy and Dixie.

Their herd was built with a focus on maternal power and performance throughout its development. I don't know of any other herd with maternal traits this strong. My brother Shane always bred cattle to improve the females in his herd -not to focus on producing paternal bulls that follow industry trends and fads. He always believed that the true power in a bull is from the maternal background and the females that he will produce. As a result, Wolfe's Fleckvieh created one of the soundest maternal cowherds in the industry.

Wolfe Farms is very proud to announce that we have acquired all of the 2024- and 2025-born females from Wolfe's Fleckvieh. JNR Farms has purchased the main cowherd, including several strong donors.

We would like to recognize Shane and Shannon Wolfe for over four decades of raising what we believe to be some of the best Fleckvieh cattle in North America. This is one of the last herds built around strong maternal traits. Shane and Shannon, along with their daughters Hanna and Carmen, should be very proud of what they have accomplished.
