# WELCOME FROM BLACK GOLD

On behalf of all of us here at Black Gold Simmental, we would like to welcome you to our annual bull and female sale. We would like to thank you for the interest in our program, and taking the time to go through our catalog. This coming sale will be our fifth bull sale hosted at the farm, although we have been selling bulls for 25+ years and this is something that we are very passionate about. Each year we are overwhelmed with the support of new and existing customers, and we are always doing everything we can to advance our program and produce the highest quality product for you, our valued customers.

Looking back at last year's welcome, we stated how "fun" it was to be in the cattle industry with the change we have seen in our market the last little while. Well for this year, all we will add is that there truly is no better time to be in this industry. Cow/calf producers are being rewarded with record prices on both feeder and slaughter cattle, as well as replacement and bred heifers. Prices that have surpassed several ranchers' wildest dreams, with a strong steady market still in sight. As I write this, we are coming towards the end of a very warm last ten days, that has made calving cows a dream. Although running water and ice around the yard is far from ideal in the winter months, it sure has been nice to let cows calve outside, and keep them out of our barns if possible.

Our offering for 2026 is our largest to date, and represents the kind of cattle that we are striving to produce. On the fullblood side, we are excited to offer the first sons to sell off BLL Atomic 318L. This is the largest sire group we have ever offered, and we like these bulls and their ability to combine power, colour, hair, and structural integrity with good feet. Vigilante will sire another solid and consistent sire group, with several being moderate at birth with impressive weaning and yearling performance. This sale will also feature the sixth sire group to sell off of the proven Battle Cry, and his sons are still so consistent and solid from front to back. A larger offering of calving ease bulls are highlighted by sons of Kilipso, with several homozygous polled, low birth weight bulls available. On the red side, Mountain View sons are still easy to find being the blood red, stout made, easy doing kind. It is crazy how much one bull can do for a program, and now that we are calving Mountain View daughters, it's evident his influence will be seen here for a long time. We are ecstatic to highlight one of the first sons to sell off the \$210 000 Black Gold Tangleflags 31L, and think lot 66 has a lot of similarities to his unique sire. On the black side, Cabaret sons are our kind being huge bodied, good footed, and rugged made with lots of hair. With that being said, a pair of Right Time sons may be as unique as any, with the blazed face lot 96 being a favorite among many and an absolute powerhouse. He leads off an impressive set of brothers that are off of our Hayleigh donor. The lower birthweight lot 101 is backed by one of the breed's greatest donors of all time, and combines calving ease with a high quality phenotype. Once again we are excited to offer a consistent group of heifers, that represent the same pedigrees and cow families as the bulls, and a good representation of the kind of cattle we strive to raise here.

Each year an extensive AI and ET program allows us to source some of the best genetics available. This also allows us to move our program in the right direction at a more rapid pace, and we enjoy seeing the influence made by some of our best donor cows in just a single year. We also take purchasing herd bulls very seriously, and often do everything possible to ensure that we are buying the best available, that are backed by the right kind of cows. We strive to produce cattle that don't just excel in a single trait, but rather have a balanced set of quality traits throughout.

We work extensively with Ryley and the entire team at Bullseye Feeds to develop our bulls. Our bulls are fed a high roughage TMR ration from weaning on, with the goal of developing them slowly with longevity in mind. Our cowherd is also on a full mineral program year round, as nutrition is something we pay close attention to and always put emphasis on. We guarantee that these bulls are structurally sound and have passed a semen test by a licensed veterinarian, unless otherwise stated in our supplement sheet prior to sale.

Once again, we would like to thank all of our past, current, and future customers for their support in our program. We are proud of the set of bulls we have to offer, and encourage anyone to come out and have a look through them prior to, or on March 14th. There is always someone around to take you for a tour. We are passionate about the cattle industry, and enjoy talking anything cattle so please feel free to reach out with any questions.

## DELIVERY

Free Delivery Options Within Western Canada

**OPTION A-** If the purchaser can take their bulls before the first of April, we will take \$100 off the purchase price. We will still help with delivery of the bulls.

**Option B-** At the purchasers request, bulls are able to remain at the farm free of cost. We will work with the purchasers to the best of our ability to get their bulls delivered to them approximately when they're wanting them. All we ask is that bulls remaining at the farm after April 1st are insured.

We will help with the delivery of purebred heifers as soon as we can after the sale.

## USA CUSTOMERS

We will announce the exchange rate the morning of the sale, and help with the testing needed for export at our expense. We are willing to work with the purchaser to arrange trucking for their purchases.

## IN-HERD SEMEN INTEREST

We reserve the right to collect semen on any bull sold in the sale for in-herd use only, at our expense and the buyers convenience.

## TERMS & CONDITIONS

Cattle will sell under the standard terms and conditions set out by the Canadian Simmental Association.

# WELCOME FROM BOHRSON

One of the most highly anticipated sales each and every spring is the Black Gold Simmentals Bull & Female Sale and we wish to once again welcome cattlemen and women from near and far to join us for their 2026 offering. The set of Fullblood and Red & Black Simmental bull and females assembled for this years sale are deep and consistent in quality. We do hope you can take time out of your busy schedules to join us sale day as we know you will be impressed with the set of cattle the Noble family has put together.

The bread and butter of Black Gold has always been the fullblood division and this years set is extremely stout. The anticipated first calf crop from Atomic has surpassed expectation and household favourites such as Battle Cry, Kilipso, Vigilante and Kayne are well represented as well. The fullblood bulls are consistently dark in colour, well pigmented, heavy haired and soggy. The red bulls also carry the "Randy Noble" colour as we call it, being dark red and super hairy. They are again headlined by Mountain View and feature an exciting set of sons from past high seller, the \$210,000 Tangleflags! The red bulls are diverse with calving ease and performance options in spades. The ever growing black division is heavily influenced by the leading donors at BGS. The Hayleighs, Flirts, Cream Soda's and Fox Trot's among many other industry leading cow families have filled the black section with some incredible options. They are big bodied, big haired and big styled bulls that are stout with muscle and power. The Black Gold bulls are backed by a super maternal, easy doing set of working cows that look the part 365 days of the year. They are exactly the type of cows you want your bulls to be out of and the exciting set of open heifers available are a great chance to dip into the BGS replacement pen to get some females to build a new cow family around. No matter what your flavour, colour, bull or female, the options will be endless March 14th.

The Noble family eat, sleep and breath Simmental Cattle and the livestock industry. They are among some of the great leaders of the entire business that are looked up to by many. We hope you can join us to celebrate this great set of bulls and the Noble family and their accomplishments assembling an impressive set of cattle for your appraisal. Be sure to make plans and tour through the pens anytime prior to the sale and be back with us for a great lunch and some BGS hospitality on sale day. If your busy schedules keep you away from sale day, please don't hesitate to reach out to our team at BMS as we would be happy to assist you in our free order buying and consultation services!

## SONS SELL LOTS 1-23

We are very excited to offer our first group of Atomic sons, as we have never had a sire group this large in numbers, and possibly this consistent. Atomic was purchased for his dark red colour, powerful muscle and body shape, sound structure, awesome dark foot, and backed by an ideal cow. This sire group uniquely combines pen leading performance with advantages at the ground in their foot quality and structure. It's been fun to watch these bulls develop and we think they only get better as they're maturing, and would love to show you to them.

BLACK GOLD HOTCHELLRAE58B

**D** BLACK GOLD HOTCHELRAE212K

**HOMO POLLED, NON-DILUTER.** We initiate the 2026 offering and leadoff this sire group with this homozygous polled, dark red powerhouse. We really like the way 237N carries a proud head, crest, and herdbull look, but blends back into a very bold rib shape and expressive muscle pattern, and steps down an ideal, square foot. 212K is a favorite young cow around here with a nice, tidy udder and backed by one of our favorite donors, 58B who has raised seventeen calves for us in her career. 237N is just a February born bull, but no question a feature to sell this March.

 BLACK GOLD MISS WILDWEST 171G

**HETERO POLLED, NON-DILUTER.** Another polled Atomic son who carries the wide pen set, powerful stifle and lower third, and lots of top side muscle. 10J is fun to show visitors due to her being the powerful, big bodied type, who has generations of strong udders behind her and goes back to both Battle Cry and Stuey. We are impressed with the big, square, dark feet Atomic has put on his calves, and 228N carries those some advantages.

BLACK GOLD MS KALI 9F

**D** BLACK GOLD MS KALI 222J

**HOMO POLLED, NON-DILUTER.** For the longest time we struggled to get the same power and performance in our polled cattle as we found in our horned ones. It sure appears that isn't the case anymore, as this homo polled bull has as much WPDA and "jam" as any of them, and would be on the younger side. This cow family is known for the extras in terms of body and muscle, and is responsible for raising the Black Gold Commander 101E bull that was owned by Rendezvous Farms. 220N combines extra pigment and power, without sacrificing structural integrity, and does so in an impressive homo polled package.

FGAF ELECTRIC AVENUE 140E  
STBS SUSANNA 42F  
NAC BATTLE CRY 4F  
WCC WELLS' ZAVIERA 23Z

**D** BLACK GOLD/RUST MS ZAVIERA

**NON-DILUTERS.** A set of brothers that represent the kind of fleckvieh cattle that we have been striving to breed here for quite some time. Three bulls that offer consistent performance, muscling, foot quality, colour, and hair. It's been fun to compare the brothers throughout their life and watch them develop, as they are the kind of cattle that impressed us early and continue to get better as they mature. 211K is a past Evolution high selling female to Lindgren Simmentals, and no question is the kind we wish we had a lot more of. Her dam, 23Z, is calving again in January 2026 at the age of 14, and still has near perfect feet, a very solid udder, and maintains her depth and body condition extremely well. There is no question that both us and the Lindgrens will be building around 211K in the future, and can't wait to get daughters into production. These three 100% fleckvieh powerhouses should be easy to find on March 14th!

**SCURRED, NON-DILUTERS.** A couple years ago we were on the hunt for a new and exciting donor in our fullblood division, and that led us to one of the last groups of females ever offered by Virginia Ranch. 240K is everything we would want in a fullblood donor and more and quickly became a must own after laying eyes on her. To us, her colour and pigment is about as ideal as you can make one. She's great footed, really good uddered, and massive in her body shape, yet remains smooth shouldered and attractive up front. We were awfully excited when she passed her colour, foot quality, body and rib shape, and temperament onto these two 100% Fleckvieh studs. We think these are the kind of bulls that are hard to fault, and uniquely combine the muscle and width Atomic is known for, while remaining very good footed, good structured, and smooth throughout. When we flushed three of our top cows (211K, 240K, and 41H) to Atomic, we always said we needed to keep one of their sons to use in our own program. It wasn't easy to decide which one we thought we needed to use, but we have landed on 229N.

**LOT 9** We are offering 50% possession and 50% semen rights; please feel free to reach out to us with any questions.

 MCM MISS ELICIT 8E

**SCURRED, NON-DILUTOR.** 192N is a rugged, loose made Atomic son with plenty of performance, similar to this entire sire group. 113H is a homozygous polled, big bodied female purchased from our friends at Ultra Livestock. She has put two sons through our bull sale to date, selling to R L&L and P1 Land and Cattle.

It is such a pleasure working with the Black Gold operation. The energy and passion for the seedstock industry runs deep in all the Noble family. Each year they continue to have a selection of bulls that will move any program forward.

The cowherd utilizes a year-round organic mineral program that is balanced to the cow's requirements and feed sources. This supports proper bull calf health and development from a young age. The bull development program is built to maximize forage utilization and gut health. All forages are sampled and analyzed to ensure quality feed sources are used. Once the calves are weaned, they are slowly transitioned to a TMR. The TMR is forage based and is designed to promote lean muscle growth, allowing the bulls to express their genetic potential. Rumen health is of utmost importance, which is why suitable protein sources and proper starch levels are fed to the bulls.

Black Gold uses a total nutrition program on their entire operation, ensuring optimal performance and health of their cattle. If you have any questions about the nutrition of the sale bulls, please feel free to call.

*Good luck on sale day!*

**NON-DILUTERS.** A set of flushmates that have had that early maturing, herdbull look since a young age. It was a no brainer for us to take Atomic to arguably the most consistent, favorite cow in our donor arsenal. We have mated 41H to a different bull every year, and her calves seem to hit the top of our pens regardless of the sire. Her attractive look, awesome feet and structure, near perfect udder, and long and smooth body shape allows her to be a farm favorite from purebred and fullblood visitors alike. In this trio of brothers, 23N and 24N are the rugged, stout muscled kind, where 27N throws added hair, and smoothness to his bold body and muscle shape. These bulls are consistent in their kind, step down on big, square feet, and are sound structured. The first son and daughter to sell off of 41H led off both our bull and female sales and ended up high sellers.

**SONS SELL**  
**24-33**  
LOTS

This is our second year marketing Vigilante sons and we are very impressed with a larger group for 2026. Vigilante consistently adds length of body, foot quality, hair, all while moderating birthweight. As I write this, we have currently calved out a handful of Vigilante daughters and they appear to have small teets with lots of teet spread. The sire group for 2026 offers extra performance and WPDA, all while being smooth made bulls with the right kind of build and structure.

MATERNAL BROTHER  
TO LOT 29

**DILUTOR.** Another early maturing herdbull prospect who should sire those heavyweight steers. 59F is a big performance cow with lots of milk and a nice, square udder. Starwest Bryck was unfortunately only around for a few breeding seasons, and left us a couple very consistent sire groups that topped our bull sale in those years. Once we got daughters in production, we realized that was his strong suit as Bryck daughters are consistently at our top end, and produce likewise, just like 59F.

HORNED

1267450

NAC 4F

JAN 1, 2018

**SONS SELL**  
**LOTS**  
**40-48**

Battle Cry has been a mainstay in our program for the last 7 years, and there's no question his influence here will be seen for a lot longer through his daughters. Battle Cry has consistently sired cattle with the kind of colour and hair we are after, awesome feet, and impressive birth-weaning-yearling performance. His daughters are typically good uddered with impressive maternal attributes. Unfortunately Battle Cry has been injured here for the last 6-7 months, and may not be able to cover cows again. There's no doubt we will continue using Battle Cry semen for years on our heifers, cows, and donor females, but this may be the last larger sire group we have off this breeding legend.

BLACK GOLD MS WHISPER 152J

D BLACK GOLD MS WHISPER 49L

**SCURRED, NON-DILUTOR.** 257N probably resembles Kilipso himself more than any son we have ever had. Moderate framed, great colour and hair, stout hipped, and sound structured. This fella would rather keep to himself in the pen as opposed to coming up for scratches. A Kilipso x Battle Cry combination here that goes back to the Whisper cow family, and his dam is a prime example of why we are so high on our Whisper daughters and granddaughters.

53

IPU 38F MS ADONIS 93L  
DAM

**SCURRED, NON-DILUTER.** A big bodied, stout made docile bull that came in dam from a purchase of a polled Stuey daughter from Labatte's. 93L matches 154N's "dense" body shape and has the kind of feet and udder that we look for. Labatte's are very happy and excited about their North Star calves and their consistent quality combined with calving ease. We think 154N would be a good option for first calvers due to his combination of performance, calving ease, and consistent cow family.

 DAM

It's hard to really put into words what Mountain View has done for our red program. This will be our fourth year selling Mountain View sons, and man he stamps them. Visitors are so quick to pick them out due to their colour, muscling, hair, and overall quality. They're often born moderate at birth and really take off and perform as good as any sire group we have had. We are really enjoying getting some of his daughters in production, as the maternal power backing Mountain View is what really sold us on him and made the decision a no-brainer to try and get him bought. The daughters appear to have tidy udders with small and correct teats, yet have plenty of milk. With Mountain View also recovering from a breeding injury, we have been forced to limit his breeding group each spring, and this may be the last year we have a larger sire group from him.

				DESS LIMITLESS 101G				ACT YW		1490
D BNS MS LIMITLESS 21K				KKBS CF 90H						

**HOMO POLLED, NON-DILUTER.** A dark red powerhouse to lead off our red section. Year after year Mountain View sires the blood red, long bodied, stout made kind and 53N is exactly that. Extra length of spine, pin width, and frame all while stepping down on a big square foot. 21K is one of our favorite young red cows and carries this same added power, with a great udder underneath her. She was purchased from our friends at Siroski Simmentals. 53N boasts an EPD profile that puts him in the top 5% for WW, and 10% for YW, all while being a moderate 92 lbs at birth and just shy of 1500 lbs on the first of the year. This is the kind of cattle we have come to expect when we cross Mountain View on our top cows, and think 53N is the ideal bull to start off this section!

- D** BLACK GOLD MS SUSAN 239H  
BLACK GOLD MS CRUSIN SUSAN 34E

**HOMO POLLED, NON-DILUTER.** A bull we have watched here for quite some time and a definite feature in our offering. 42N is our first ever son to sell off our 2024 high selling bull, the \$210 000 Tangleflags 31L. 42N's ability to combine length of spine with lots of softness and sweep to his lower body is impressive. He's wide pinned, and carries his muscle down low into a powerful stifle. With his added power, it's sure fun to watch him hold his head up and flex off both ends as well as he does. 239H is a top end red cow for us with a bold body shape, good udder, and big square foot. There were obviously high expectations for Tangleflags progeny going into this past fall and coming spring, but if our first calf crop is any indication on what his future will look like, then he will be seeing heavy use here year after year. His only two sons born here are both easy to find in the sale pen, and one of his few daughters born here this past year was our high selling heifer calf in The Evolution, and was Reserve Champion Simmental Female alongside her dam at Farmfair International. We see a lot of 42N's sire in himself, and find him to be a pretty intriguing herdsire prospect.

**HOMO POLLED.** It's not often that we have a two year old bull of this kind of quality to offer up for sale. 120M was initially catalogued to be in our 2025 offering, but an injury kept him out of the sale. We kept him back and had him cover some cows here in May, and he's been good ever since. 120M looks like a herdbull with a smooth, yet masculine head and crest, and blends back smoothly into a deep lower body. He's long bodied, big hiped and topped, and travels the pen with plenty of ease. If we had more red cows to breed, there's no question we would be keeping 120M to cover cows here. His maternal sister was one of our feature red heifers in The Evolution last fall, selling to McIntosh Livestock.

SIRE

**HOMO POLLED, NON-DILUTER.** A low birthweight, great numbered calving ease option that reads with quality throughout. 38N is small headed, smooth shouldered, long bodied, but still reads stout hiped from behind and steps down on a big, square foot. His dam is the result of a forty embryo purchase on the great Sammie cow, and is 1 / 6 maternal sisters that we have milking that are some of our best young cows, with two of them already entering our donor pen. 38N combines a 74 lb birthweight, CE EPD that ranks him in the top 1%, and a BW EPD that ranks him in the top 2%.

77

**HOMO POLLED, NON DILUTER (LOT 76). HOMO POLLED, HETERO BLACK (LOT 77).** Two full brothers that are some of the youngest bulls on offer, but are still easy to pick out in a pen full of older counterparts. Ava's Scream is our \$102 500 high seller from our 2022 bull sale, and has been consistent in breeding added power and overall dimension. 532C has arguably been our top red cow, with a "whale like" body shape, big square foot, and good udder. Sons of hers have sold to Westway Farms, Southpaw Cattle, Red Willow Ranch, Anchor D Ranch, Wallgren Farms, South Seven Farms, Westhill Ranch, McIntosh Livestock, Nolara Farms, Curtis Simmentals, and more. The black, star headed 282N is one of the widest based, stoutest made bulls that we have on offer. Masculine about his presence and powerful from the tip of his nose to the tip of his tail. The red hided 318N has lots of hair, spring of rib, and body depth. He's smooth made throughout and sound structured on the go. These bulls are backed by two of the best donors to call home here, and we are excited to offer them up for sale.

RF CERTAINLY FLIRTIN 202Z

**HOMO POLLED, NON-DILUTERS (LOT 78 & 79). HOMO POLLED, HETERO BLACK (LOT 80).** A trio of brothers that are sired by the past high selling No Limits, and out of the great 956G donor that sold for \$110 000 for  $\frac{2}{3}$  interest. Her combination of look, body, hair, and feet and udder quality are consistent in the "Flirt" cow family. This trio of brothers no question are the performance kind, very similar to their full sister who sold in Friday Night Lights for \$37 000 to Pheasantdale Cattle. The dark red 3N and blazed face 10N are similar in their type with extra length of body, base width, scrotal size, and hip and top shape. The solid black 4N is soft made, sound structured, and smooth throughout with lots of hair and only an 80 lb birth weight. All of these brothers rank in the top 10% for WW and 4% for YW, and combine performance with a big time cow family behind them.

**81-91**

They say the best time to do your bull shopping is when you find a bull you really like, but don't necessarily need one. That was exactly the situation for ourselves, KT, and Canadian Sires when we saw Cabaret at Lewis Farms. Last year was the first year Cabaret sons hit the market, where 50 sons sold between ourselves, KT Ranches, and Lewis Farms, to average just over \$20 000 and gross over \$1 Million in his rookie calf crop. This sire group has been consistent for combining moderate birth weights, structural integrity and foot quality, with an easy doing, stout made image. This year's sire group has that herdbull look and we are impressed with their consistency throughout.

									ACT YW	1430

**HOMO POLLED, HOMO BLACK.** A favorite in the offering for quite some time, and this doesn't shock us due to the pedigree behind this guy. Last year, we sold five full brothers to 139N, with the leadoff selling for \$50 000 to Grant Lodge Farms and Clifford Land and Cattle. Foxtrot 862F has been an incredible donor for ourselves, Greenwood, and IRCC having quality offspring on a wide variety of bulls. 139N is a long bodied, ultra hairy bull, with the right kind of power and muscle throughout. He's got a herdbull look up front, but still reads smooth and tidy about his head and shoulder, while stepping down on a big, good foot. 139N combines visual performance with calving ease, and reads the same on paper as he ranks in the top 25% for CE, BW, WW, and YW. We feel, 139N combines a lot of traits that make him an intriguing herdbull prospect.

**HOMO POLLED, HOMO BLACK (LOT 92 & 93).** A mating that has worked for us and produced quality time and time again, and these two might be as impressive as any from this mating. To date, we have sold three full brothers to JP Cattle Co, Scissors Creek/Swan Lake, and Copper Kettle Cattle Co, to average just over \$30 000. This winter we are calving out some full sisters, and they appear to be very nice uddered, and the right kind. The blazed face 287N is long bodied, smooth made, and docile with lots of hair. The solid black 307N impresses us more and more each day with the same extra length of body and structure, but couples this with lots of dimension throughout and muscle carrying down into his stifle. Two bulls that are again on the younger side, but have done nothing but get better their whole life.

FULL SISTER OF LOT 104

**HOMO POLLED, HOMO BLACK.** A younger Countertime son that has done nothing but get better since weaning time. Another bull that offers extra frame and length of body, with lots of hair. He's big footed and big boned, and offers impressive performance. His full sister is the feature  $\frac{2}{3}$  interest donor we sold to LA Ranch in The Evolution, and her calf 120N sells a couple lots down.

**HOMO POLLED, HOMO BLACK (LOT 94 & 95).** We were excited to try some new matings on the great Hayleigh 15G, and the matings on this next set of brothers are possibly the best ones we have made yet. The flush to Right Time resulted in these two powerful individuals, along with some full sisters that currently top our replacement pen. 30N is the solid black brother that is so extended throughout with extra frame and performance, and a flexible structure. He ranks in the top 3% and 10% for both WW and YW. The blazed face 11N in our mind, is possibly one of the most intriguing black bulls we have ever raised. We love the way he can combine added frame, performance, and power, with a smooth, attractive front 1/3. He's big and square in his foot size, is stout featured, and flexes with lots of reach off both ends. With his impressive phenotype, he combines it with a balanced genetic profile, as he ranks in the top 35% for CE, BW, WW, YW, API, and TI. He is a 3/4 brother to the \$75 000 2/3 interest baldy donor that we sold in The Evolution to LA Ranch. She is no question one of our favorite females ever raised, and ended the show season as a member of the Top 10 in the Agribition Beef Supreme. These bulls combine real world power, fleshing ability, and foot quality, with extra pieces of look, hair, and structural integrity. *Lot 96 has froze 350 straws of high quality semen, and will sell with 250 straws. We are retaining 100 doses for in-herd use only.*

		KCC1 COUNTERTIME 872H								
		KDP MISS HOYA HAYLEIGH								

**HOMO POLLED, HETERO BLACK.** 120N is a long bodied, stout hipped, hairy rascal that is masculine yet attractive and smooth up front. He's had a herd bull look since a young age, is good footed, and is blessed with big, hairy ears. He was shown alongside his dam this past fall, where they were a Top 4 Supreme Finalist in Lloydminster, and a Top 10 Supreme Finalist at Agribition. She is a perfect uddered, huge footed, long bodied female with a powerful pin set and dimension throughout. She is arguably our favorite Hayleigh daughter to date, and one we want to build around, alongside our partners at LA Ranch. 120N combines just an 88 lb birth weight, with exceptional performance, and an EPD profile that ranks him in the top 25% for CE, BW, WW, and YW. 120N is a prime example of why we have always been so high on our Walk This Way progeny. If every heifer could spit an unassisted calf out and have them perform and grow like 120N, we would keep 100 of them!

									ACTYW	1365

**HOMO POLLED, HETERO BLACK.** A unique breeding piece and one we have had a close eye on for quite some time. 283N is a Right Time off the legendary 8543U donor who is arguably the highest income Simmental cow in recent history. I don't think any cow of any breed has raised more promotional AI sires and top end donor females than 8543U. 283N is a good footed, sound structured, long bodied bull who still reads bold in his pin set, and carries his muscling down into his stifle. He's small and attractive about his skull yet still masculine about his crest, and is extended and smooth throughout his front 1/3. On paper, he reads in the top 15% for CE, 3% for BW, and 1% for API. With that he combines a moderate 88 lb birth weight, with impressive performance and an adjusted yearlight weight over 1500 lbs. We feel 283N has a lot to offer, and we would like to retain the right to collect semen on him for use in our herd.

102
