The BRITISH CONNECTION BULL SALE

Saturday, December 5, 2026 | 1:00PM
BALOG AUCTION, LETHBRIDGE, AB

Welcome Cattle Producers!

Another year has come and gone and this one certainly offered a challenge with mother nature taking the lead role!!

The good news!! Still a very strong and aggressive market with the second best prices we have ever recieved and the strongest abundance of feed we have ever produced.

The rebuilding program is slow to start so whether you have been in the business or just getting going, now is the time.

The British Connection sale is the benchmark!!

Yearling Angus and Hereford bulls and coming two year old Hereford bulls, give a selection option second to none, and this year a powerhouse offering of commercial Angus bred heifers, noth solid black and black white face.

Proven, reputation breeders with outstanding long time successful programs.

Be a part of this opportunity.

Respectfully,

R.C. (Bob) Balog

VOLUME DISCOUNT

3% OFF ON 3 BULLS | 4% OFF ON 4 BULLS | 5% OFF ON 5 OR MORE BULLS

TERMS The terms of the sale are cash or cheque payable at par to Balog Auction Services Ltd. at Lethbridge, AB, on Sale Day. The right of property shall not pass until settlement is made. All settlements must be made with the clerks of the sale before any cattle will be released.

BIDS Every animal entering the ring will be sold to the highest bidder.

DISPUTES In case of disputes, bidding will be reopened between the parties involved. If no further bid is made, the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision in such matters will be final.

ANNOUNCEMENTS Errors discovered in the catalogue will be corrected by announcements from the Auction Stand at sale time and such corrections will take precedence over the printed matter in the catalogue.

CERTIFICATE OF REGISTRY A certificate of registry duly transferred will be furnished to the buyer for each animal after settlement is made.

HEALTH All animals in the sale have met all necessary health requirements. All will be guaranteed eligible for US Export.

SEMEN INTEREST We as breeders reserve the right to draw in herd semen use on any bulls sold in this sale at our expense and buyer's convenience.

LIABILITY Balog Auction is acting as agent only and assumes no responsibility for representations made by seller. Purchaser must look to the seller for fulfillment of all guarantees and representations made hereunder.

BREEDER'S GUARANTEE Each animal becomes the purchaser's risk immediately after the animal is sold. All animals in this sale will be sold under the terms and guarantees set forth by the Canadian Angus Association and Canadian Hereford Association with regard to health, freedom from defects and from both reproductive and specific genetic unsoundness. All Long Yearling Bulls will have been Semen Tested prior to the sale.

ACCIDENTS Although every precaution will be taken to protect the safety and comfort of buyers, neither the sales manager, auctioneer nor any owner assumes any responsibility in this matter and disclaims any liability, legal or otherwise, in the event of accident or loss of property.

WINTERING, EXPORT, DELIVERY OR SALE DAY PICK UP All bulls can go back to the consignors for wintering with delivery starting March 1st. If the purchaser takes his bulls home from Balog's on sale day there will be a \$200.00 per head discount. Assistance will be given loading these purchases out after the sale is over. If you can take delivery of your bulls within a couple weeks following the sale there will be a \$50.00 per head discount. Delivery is free in Canada up to 300 miles, at cost after that. Bulls exported to the US will be taken back to the contributors for testing and delivered to the Sweetgrass Port of Entry. Any additional expenses including duty, brokerage fees, testing, transport from the Port of Entry, etc. are the responsibility of the buyer. Purchasers are requested to furnish shipping, wintering and delivery instructions when making settlement.

INSURANCE We recommend insuring all of the Bulls purchased. All bulls being wintered by a contributor must be insured.

EPDS EPDs recorded September 13, 2026.

welcome from BJ CATTLE CO.

**All bulls in sale have Genetic Enhanced EPD'S and are
all Sire & Parent Verified!**

We would like to welcome everyone to our 11th Annual British Connection Bull Sale. We sincerely thank all who supported our program in the past and value the relationships we have built.

Once again I feel there is a great set of calving ease and performance type bulls that will work out on the range and bounce back after they are done breeding. This year we had a ton of bull calves to choose from. We cut harder and we all know that makes them even more uniform than ever. We value cows that have lots of longevity and check the boxes on being functional cattle that are sound and easy on the eyes. We have shifted more to using outstanding walking bulls that we have gone the extra mile to see the mom and granddams or sisters to evaluate the best foot structures we can find as well they need to be what we are looking for.

We all were nervous in May but then came June with loads of moisture, which turned into a great forage crop that we all are very happy about. The calf price is still very high with many of us probably cashing in on the second biggest calf cheque ever. I feel inventory is key at times like this. Retaining heifers is a great way to maintain numbers and keep the cow herd youthful. Many bulls are suited for heifers in this sale!

As always all the bulls can come back to the farm after the sale to be wintered free of charge and will be delivered to you in breeding shape, once they have passed their semen test! We invite you all to view the bulls at the ranch before the sale. Their moms are never far away and would love to show you the cow herd at any time. Videos will be up on DLMS mid November. Please contact us if you have any questions on the offering or to set up a time to come see the bulls beforehand. Look forward to seeing you at the sale on December 5th!

- Titanium was our pick of the bulls at Bar EL Angus 4 years ago. Once we seen the dam and grand dam he came to the top very easily. Their udders were second to none and their feet were perfect.
- Titanium has done nothing but impress us! Since birth his calves have been standouts and have just kept growing and looking better everyday.
- He adds lots of length and power while still maintaining a refined look.

bjcattlecompany.com

We would like to welcome everyone to our 11th Annual sale! We were all looking at ourselves mid May wondering how we were going to make it through this year. The taps turned on in June and blessed us with one of the best forage crops we have ever had. We are thankful for having lots of feed on board as you never know what years ahead look like. I feel we are still enjoying great times in the cattle industry and again feel inventory is key. Heifer retention can be a great way to maintain or increase cattle numbers. With that in mind there are a few options both Polled and Horned heifer bull options.

We would like to welcome visitors at any time to view the cow herd along with the bulls. We really pride ourselves on having fantastic Hereford cows that can produce at a young age right alongside our Angus cows. We don't wait for cattle to blossom on feed to sell as 2 year olds. If that doesn't wean a heavy calf they simply don't stay. We may not have huge numbers of Hereford cows but we really take a ton of pride in raising some of the best and if they don't produce and have a great look they are sent to town.

Please feel free to come anytime to see the bulls and cows at home before the sale. Sale videos should be up towards mid Nov. See you at the sale!!

Have you ever wondered why God chose us to live in this wonderful time in history? Today we get to share our love of agriculture and especially the cattle business and its people with each other.

The cattle here are produced with the customer in mind and are made for your rugged conditions. Things look pretty optimistic with the shortage of beef cows in North America. We should be set up with a promising future if politics can get out of the way and let the markets do what they should. Enjoy our time together today, buy with confidence and have a great Christmas.

God Bless.

Note: Bulls have all been parentage tested; all of them are free from known genetic defects.

Additionally all but Lots 49 & 51 are homozygous.

Welcome everyone back to the British Connection Bull Sale. We have enjoyed a great year with our kids growing fast and keeping us moving. We are extremely grateful to raise our family in the ag business and to have the ability to raise quality cattle. This will always be something we don't take for granted. We continue to invest in herd sires with replacement females with udder quality, soundness and longevity at the top of our mind. We have a nice set of bulls this year - same as every year, these guys are raised in a commercial setting, calving in spring, raised on no creep feed, back grounded in the fall and winter and put back out to pasture for spring/summer months. Thanks for looking and we wish everyone a good fall run.

We purchased 3042 together with DK Herefords from Bill King Ranch. We were looking for an outcross, but one backed by proven genetics, and with Belle Heir and Miles McKee in his pedigree, he carries some of the breed's best sires. We've been really pleased with his production. He holds exceptional condition year-round while breeding at both operations, and his first daughters calve this spring and are shaping up to be outstanding.

Baron son that will add some growth and performance into your herd. Really well marked with two goggle eyes and a deep red hair coat. Homozygous polled

welcome from EVIEW FARMING CO. LTD

Larry Stahl
Gull Lake, SK
(306) 671-7811

Eview Farming Co Ltd at Gull Lake, SK on top off the bench where we get lots off wind and very cold winters. These cold temperature make tougher cattle and cattlemen, and its also a very good place for lots of rain and good grass, so we can't complain.

Our cow herd consists of British breed females. We start picking heifers to keep for breeding at calving time. Moms have to have good feet, udders & teet size and have to have a very good temperament to pass the test. Calves have to be lively and have to get up right away to have their frist drink. Calves have to be in the birthweight of 80 lbs and up. At weaning time they get weighed and if they don't have close to half of there moms body weight they don't stay. The good ones we keep and feed them a TMR barley silage hay & barley grain ration with a mineral pack. We try and keep gain at 2 to 2.5 lbs a day. We only keep heifers penned for 50 days after weaning and then they go out on 5 acres so they get exercise. Before going out to get bred, heifers get checked over and anything we see wrong go to cull pen.

HEALTH PROTOCOL

At Branding time: Nasalgen 3 PMH. Vision 8 Somnus. Melouicam Oral
At Weaning time: Bovi-shield Glod One Shot. Vision 8 Somnus. Liquamycin LA 200
50 Days Per-Breeding: Bovi-Shild Gold VL5-FP5
Vet palpate heifers prior to breeding

We guarantee our heifers if there are any problems. We stand behind them 100%. If for any reason you are not happy with your purchase. We will refund or replace
