Welcome...

Welcome to the 4th annual Bull Power Sale what an exciting time to be in the cattle business seeing cattle prices we have never seen before, and the future is looking very optimistic. Once again, the consignors have on offer a tremendous set of bulls there's heifer bulls, power bulls, calving ease bulls all representing each individual breed. We would like to welcome a new consignor, MT RANCH from Dawson Creek who will be consigning 4 two-year-old Simmental bulls. Also on offer is a feature Black Hereford female along with packages of angus cross females and Simmental Hereford cross ready for breeding this spring. Also on offer is semen packages on 4 homo black, some are homo polled all qualified for Canada and US Black Hereford Semen. You will want to take advantage of this offer.

As always you are invited to preview the sale offerings Friday, March 6th from 4 to 7pm where you meet the consignors and complimentary coffee and donuts. For those people unable to attend you can reach out to the consignors to preview on the farm and online bidding is available through DLMS and VJV. Hope to see everyone sale day.

Welcome everyone, here we are again bull sale season is in full swing. Another year has come and gone so quickly for many of us in the Peace, BC and Alberta region we had another very tough year with drought and grasshoppers many having to reduce or sell off their cattle herds.

We can only hope that this year is better and by the amount of snowfall we all have received things are looking up. The bulls we have on offer this year represent some tremendous bloodlines from some of the top breeders in the Angus business. We are proud of the offerings from these sires representing calving ease, good maternal traits and good performance numbers. We are offering 11 yearling bulls along with 5 two-year-olds. The yearlings we have on offer 9 were born March and April 2025 we are very happy with how these guys performed during the winter. They were fed a 14% Bullseye complete pellet, no grain along with hay cereal silage. As of February 2, 2026, the whole group ave WPDA since birth is 3.75 pounds. They were weaned September 15, 2025. They were fed free choice hay until mid October then started on their ration. We feel this TMR ration helps to maximize forage utilization, improve gut health helps the bulls to develop and express their genetic potential. We welcome visitors anytime prior to the sale to come look through the bulls, coffee is always on.

Lakeroad Black Angus Two Year Olds

Splash has been a big influence in our program the last couple years. This LD Grazer son has displayed in his offspring calving ease we use him on heifers, consistency you can quite easily pick his sons and daughters out in our herd, his offspring wean off in the top end, amazing hair coat and his females display excellent mothering abilities and very good milkers. Last year in this sale his 2 daughters ave \$8,800 and bull at \$8,750. There are a couple calving ease sons off him in the sale.

I totally love this bull. We purchased him as a lead off bull in the Belvin Angus 2023 Bull Sale. His offspring display calving ease we use him on heifers to, his small head and so smooth through his front end. His disposition is second to none. He's a very balanced bull with muscle, shape and style. His daughter 21M sold in the Northern Select Sale in Stettler in November to Belvin Angus for \$12,500.00. Look up his sons in this sale you won't be disappointed.

This America son is sired by SAV AMERICA 8018 the all-time top selling, record setting son of PRESIDENT. 60L has 8 of the 11 yearlings sired by him in this sale. He is a performance sire, he does not give up calving ease either his sons display bigger birth weights but were born unassisted. 60L WW 910 and YW 1550. BW was 95. The way the calf prices are now the more pounds you get the more money in your pocket. He has a March 22, 2025 born son in this sale on Feb 2 2026 weighed 1335. His WPDA is 4.20. The bull feeding program is built to maximize forage utilization, gut health and as a result, quality sperm production. Nutritional status of a bull, particularly from the previous 60-days can affect the semen quality being ejaculated today. Sperm production is a continuous process and proper nutrition is critical to maintain peak fertility and longevity of bulls. Bull calves are generally developed on grass with their mom's on a quality mineral program.

Once bull calves are weaned, they are slowly moved onto a balanced TMR. The bulls are challenged with a forage-based TMR to help them develop and express their genetic potential. This is important for consistency of maturation and puberty of bull calves. Sampling and analyzing forages are important for properly balancing the overall ration. Forage quality and digestibility are important for maximizing ruminal health. Matching suitable protein sources with proper starch with the available forage sources is key to promoting lean muscle growth. The addition of organic minerals are used to ensure proper immune function and overall health of bulls. All of these factors contribute to semen quality and conception within a herd.

If you have any questions about the nutrition program, please feel free to reach out. Buy with confidence knowing the bulls have been developed on a balanced nutrition program.

Best of luck on sale day!

We would like to invite you to join us at the annual Bull Power Sale. Come evaluate the cattle, tour the bull pens, and let us help you invest in genetics that will move your program forward with confidence. Dry Creek Ranch is a third-generation operation in northern British Columbia, proudly raising purebred Charolais cattle for over 40 years. Our program is driven by proven genetics, structural integrity, performance, and cattle built to thrive in real world conditions. We emphasize calving ease, growth, muscle, and disposition. Producing bulls that go out and work, adding pounds to your calves, and delivering consistency you can count on. If you would like to come see the bulls before the sale you are always welcome, we would love to talk cattle with you.

Dry Creek Ranch Charolais

White Polled. Even though this guy is a twin, he is the total package with 71lbs birthweight and weaning off at 720lbs! This unique breeding piece is a mix of old and new exciting genetics.

White Polled. Marksman exemplifies outstanding maternal qualities, making him a standout in the herd. His maternal lineage is particularly impressive; his maternal great grand dam continues to produce at 11 years of age, a testament to the longevity and productivity embedded in his genetics. Over the years, she has contributed 5 daughters to our herd, further reinforcing Marksman's reputation for strong maternal traits and reliable performance.

Sale season is upon us once again and we are honored to be welcomed back to this year's edition of the Bull Power Sale! We were truly humbled last year with the amount of support and interest we had in the cattle that we had on display. I want to thank everyone that came to last year's sale, whether you were bidding, buying or were there just for the visit and amazing meal the girls put on for us. Our consignments are a bit different than last year, but I am confident you will be just as happy with the quality. US interest is welcomed and encouraged; both the registered heifer and bull can be exported to the states. We will work with you to get them back to your state. Thank you all again, come find us sale day!!!

Our Nova heifer was one of the first calves born last year and we knew she was going to be a good one. Her dam has been a solid producer for us year after year all while maintaining an impeccable udder and good solid feet. I have no doubts that whoever goes home with this female will be happy for years to come.

This is the first time we have ever sold a bull in a sale and not just off the farm. Nixon is a AI son out of BAR JZ RIMRIDER 505K, a dark red, heavily pigmented, thick, easy calving Hereford bull. With a low birth weight of 81 lbs and a calving ease of 19.4 he's the perfect heifer bull!

We have offered up 3 commercial, open replacement heifers again. These ladies are out of our keeper pen and are a nice balance of Black Hereford and Simmental genetics. They are all sired by the same herd sires that we use in our registered program. We try and do at least 3 cuts in the heifer and bull pens before making our final decisions on who gets to stay and they were in the remaining set. These heifers have all been cycling and are ready to put with a bull of your choice.

Our semen packages on offer consist of 4 of the top bulls in the ABHA. Semen is certified for Canada and the USA. We have used all of these bulls heavily in our program and have never been disappointed. All four are Homozygous black and many are Homozygous polled. With numerous progenies registered within Digital Beef it's easy to see what sets these bulls apart. They are genetically tested, and have proven themselves all over the world, not just Canada and the US. There's nothing worse than wanting to try a new bull or multiple bulls but having to purchase a full cane of semen at a time; that is why we have decided to leave it up to the buyer. Bid on as many as you want, mix and match, price will be per straw. Semen is stored at Alta Genetics, shipping is the responsibility of the buyer.

All cattle are on full herd health Bovi-Shield Gold program designed by Emerson Trail Veterinary Services in Beaverlodge AB.

**** I'm willing to ship all cattle to the USA if buyers wish as well. ****

Friesen Farms

Chad & Anna Friesen
Grande Prairie, Alberta

Anna: 780-831-8338

Website: friesenangusfarm.ca

On behalf of the Friesen family, we would like to welcome you to the Bull Power Sale. We are very excited to be joining this sale for the second year in a row. We have worked very hard over the years to grow and develop a herd of cattle that we are proud of because our animals are able to stand the test of time.

We have, on offer this year, an exceptional pen of 2 year old black angus and red angus bulls as well as a handful of excellent Hereford bulls. We are proud of the pen of bulls we have on offer as they have come out of dams that are easy calvers, have strong maternal instincts as well as udders and feet that last.

As a veterinarian, I want to produce bulls on our farm that have outstanding confirmation with the ability to add pounds without being pushed too hard because I want our bulls to stand up over the years. I want bulls from our farm to be known for longevity and ability to breed and produce offspring that pass on calving ease and are structurally sound with exceptional ability to grow and be productive.

If you have any questions about our bulls or commercial heifers on offer, please feel free to contact me. Visitors are also welcome on the farm if anyone wants to preview the animals on offer as well as see the sires and/or dams.

Herd Health:

We have a complete herd health program in place starting at birth with the Nasalgen intranasal vaccine followed with Bovishield Gold 5 and Ultrabac 7/Somubac at 3 months of age and then boosted in the fall. Vaccines are boosted annually thereafter. The bulls have been boosted prior to the sale and are ready to go for breeding, no need to boost in the spring.

Bulls received ivomec in the fall as well as a second dose in January followed by Cylence.

The heifers are on the same program and have also had their boosters so do not need to be revaccinated this spring.

Friesen Farms Red Angus

Reference Sire

Red Wildman Karlos

2231611 BGW 121J Mar. 22, 2021 BW: 73

This is one of my favourite bulls. He is out of the Karl lineage, known for calving ease and calves that are fleshy and have the ability to gain. He produces calves with depth and frame that consistently have higher than average weaning weights.

Nikki, Kristin, Courtney & Whitney Drschiwiski

Cecil Lake, BC

Farm: 250-785-6362

Nikki: 250-261-0876

Kristin: 250-261-8746

Greetings from 8-Way Charolais Drschiwiski Family.

This year we have 13 two yr olds and 1 three yr old on offer. These bulls have thick hairy coats, balance throughout the body, and calm easy going personalities.

We have a return of Wrangler Dino and Oakley sons with the debut of son's from 8-Way Jarvis, 8-Way Artillery and our new calving ease specialist SOS Jim Beam.

We vaccinated the bulls with Ultrabec 7, Triangle 10, and Fusoguard.

Farm visits are welcome and we hope to see you at the sale.

Scurs. Frame score 5.5. He is a smooth bodied, smaller boned, easier calving type bull.

MT Ranch
 Marty & Talon Gauthier
 Dawson Creek, BC
 Talon: 250-219-3944

MT Ranch is located a few miles northwest of Dawson Creek, owned and operated by Marty and Talon Gauthier and their three kids Brooke, Hanna and Jed. Our ranch was established just over 10 years ago with commercial cattle (now a Simmental/Angus/Gelbveigh cross bred to papered Simmental bulls) and a small registered Simmental herd was introduced in 2021. As we have a spring calving program we only offer two year old bulls for sale. The bulls were fed whole oats all last winter until grass, whole oats again at the start of this winter and are now on a 14% Bull Developer pellet from Bullseye Feeds. They also have access to hay at all times. The bulls are purposely developed slowly for longevity. Our program focuses on polled genetics along with calves that will grow well when raised on the range with just their mom and grass. Temperament is very important in our cattle herd as we have young kids wanting to help all the time and all the bulls are pail fed in an attempt to keep them quiet and used to people. We look forward to seeing these bulls in the herds of Peace Country cattlemen/women and thank all the buyers and other consigners of the Bull Power sale

The background of the page is an abstract geometric composition. It features a dark, almost black, color palette with various shades of grey. The design is composed of numerous overlapping, semi-transparent polygons of various sizes and orientations, creating a complex, layered effect. Interspersed among these polygons are several bright red, glowing lines that appear to be laser beams or light trails. These lines intersect at various points, adding a sense of dynamic movement and depth to the overall composition. The lighting is subtle, with some areas appearing slightly brighter than others, contributing to the three-dimensional feel of the design.
