Upon Settlement, please choose one of the following options and inform the clerk at the time of settlement. Please leave detailed delivery instructions upon doing so.

- A: \$150 discount per bull if bulls are picked up sale day or within a week of the sale.
- B: Complimentary delivery to central locations within Western Canada will apply on invoices of \$10,000 or more. A delivery fee of \$150 per bull will apply to invoices less than \$10,000 within the same geography.

SIGHT UNSEEN PURCHASES

Can't make it to the sale? We guarantee you won't be disappointed in a Chapman "Forage-Developed" bull that you buy "sight unseen." In fact, we sell many bulls every year this way. Our experience over the past 76 years is the sooner you contact us, the better we are able to match the right cattle to your specifications. When cattle purchased sight-unseen are delivered, the buyer has the right of refusal for any animal that is not as they were represented. Guarantee applies only to cattle discussed with a Chapman Sale Professional prior to the sale.

GUARANTEE

We are confident that our 'Forage-Developed' 2 Year Old Bulls will meet and exceed your standards for longevity and performance no later than October 1, 2026. If for any reason you are not satisfied with a bull you purchased from us, please make us your first call so we can address your concerns. Any claims are to be made no later than October 01, 2026

Welcome

to our Annual Forage-Developed Bull Sale

Welcome to our Two Year Old Angus Bull Sale and thank you for your interest in the genetics we bring forward every year. Over the course of 76 years registering purebred cattle, we have been developing and marketing 2-Year-Old bulls exclusively. Within that time our philosophy to breeding cattle really hasn't changed: avoid any shot-gun approach to genetic selection, avoid chasing fads, and remain steadfast in maternal propagation.

As cattle producers, we all have access to the same genetics annually. We have focused on stacking proven genetics that fit a desired phenotype; while allowing the environment to sort through the genetic base we have, or have accessed, in order to determine the replacements we keep and the bulls we sell. This has resulted in a multi-generational product that breed true and offers more intrinsic value.

Over the past few years, we have had an added focus on docility and growth, and the results are positively reflected in this sale offering. The extreme uniformity we have within the cow herd has enabled using some different sires to achieve those goals, while maintaining the same

consistent phenotype. We were using the term "maternal" long before it became cool; and this sale offering averages in the top 15% of the breed for Teat, Udder and Functional Longevity Epd's. The ability to build the right kind of mother cow is deeply imprinted in this sale offering.

Breeding cattle that make a difference is an art and a long term play. We recommend that before you buy a bull anywhere, familiarize yourself with their cowherd, their breeding objectives, and their long-term philosophy. Epigenetics indicates you inherit the management as much as the actual genetics from where you source your herd sires. The genetics on offer will be resilient with real world expectations.

We own and walk every sire represented in the sale, as well as the females. The sale offering represents a cross section of proven genetics with a high percentage being calving ease bulls suitable for heifers or cows. The bull offering is uniform and consistent – quality sells throughout. Some of the best cattle come from the most underrated herds and invite you to evaluate the offering on or before Thursday, March 13th.

- Continuity in his maternal lineage as his dam traces back to cornerstone Chapman herd sires, Crowfoot Joker 6172S and Crowfoot Equation 5793R.
- Big middle bull, he posted a BW 89, WW 77, YW 1348, YSC 38 - ranks in the top 1% in the breed for both foot score EPD's. Daughters are milky and will be herd bull producers.
- 13H is stout, deep sided and walks on excellent feet. Sires excellent temperament, lots of hip and great phenotype. 100 females bred to him in 2025.

- Selected as a crowd favorite from the 2022 Redland Angus bull sale in Wyoming.
- Typical of the OCC downline, 570 is a very easy fleshing bull. He is moderate in frame but very long made with a tremendous amount of overall body mass. He has a big deep square butt and stands down square. His sons emulate his forage-efficient look with that classic Angus head, wide muzzle, added docility and deep chest capacity. Has been used on cows but mainly on heifers.
- The dam of 570 is a big volume, feminine fronted female with a strong udder attachment.

- Retained from the 2020 calf crop for his calving ease profile, pedigree and strong maternal compilation. 0816 was stifled early this season, but as a 5 year old bull he had matured into a replica of Robust.
- Not a lot of mystery in the history of 0816's pedigree as he stems from a long line of brilliant uddered ancestors. Robust's dam and granddam had show ring udder structure well into their career, plus 2413Z and 968W uddered up as good as it gets. Plus the extensive proof the Joker and Equation females earned. The young females sired by 0816 validate where he and his sons strength is.

- These black/red carrier sons of Reckless are out of our most proven and aged cows, including the mother to our 2025 high selling bull to McCumber. They are loaded maternally with cows that are still producing well into their teens.
- Ideally these would have been heifers, but these sons are cocky and offer a unique and fresh pedigree either side of the aisle.

EPD EXPLANATION

EPD's are predictions on how each bull rates against his own contemporary group and the rest of the breed. EPD's evaluate group averages and offspring's performance, however they cannot predict individual performance or weights.

For example, if Bull A (WW EPD of +10) & Bull B (WW of +60) were randomly mated with 10 similar cows, we would expect the group avg. weaning weight of Bull A's offspring to be 50 lbs. Lighter than Bull B's (60 - 10 = 50).

BW	Birth Weight - expressed in pounds, is a prediction of a sire's ability to transmit birth weight to his progeny
WW	Weaning Weight - expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny
YW	Yearling Weight - expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny.
MILK	A predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters
CE	Calving Ease Direct (CE), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.
MCE	Maternal Calving Ease (MCE) is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.
TEAT	Teat Size EPD (Teat), expressed in units of teat size score, with a higher EPD indicating a sire will produce daughters with smaller teat size compared to that of other sires' daughters. Our 2026 Reference Sires combined represent the top 15% of the breed for this trait with an average Teat EPD of 0.67. Breed Average TEAT EPD is 0.56@ 50th percentile.
UDDR	Udder Suspension EPD (UDDR), expressed in units of udder suspension score, with a higher EPD indicating a sire will produce daughters with tighter udder suspension compared to that of other sires' daughters. Our 2026 Reference Sires combined represent the top 15% of the breed for this trait with an average UDDR EPD of 0.66. Breed average UDDR EPD is 0.55@ 50th percentile
FL	Functional Longevity EPD (FL), expressed in number of calves, is a predictor of the number of calves a sire's daughters are predicted to produce by 6 years of age compared to that of other sires' daughters. A higher EPD is the more favorable direction indicating more calves produced on average. The 2026 Sale Bull offering, as a group, has an FL EPD of 1.07, which represents the top 15% of the breed for this trait. Breed average is 1.02@ 50th percentile.
