VIDEOS OF THE BULLS

Videos of the bulls may be viewed
online at cattlevids.ca

FERTILITY All bulls will be semen tested prior to the sale.

IN-HERD SEMEN We reserve the right to collect semen on any bull in the offering at our expense and your convenience.

PHONE BIDS/SIGHT UNSEEN We hope you can visit the farm before the sale to make your selection. If you can't make it, give us a call to discuss what you're looking for. If we have talked before, your satisfaction is guaranteed. Online bidding and videos will be available on dlms.com

GUARANTEE All bulls sell under the terms and conditions of sale as recommended by the Canadian Simmental and Angus Associations.

INSURANCE We strongly recommend insuring your purchases sale day. See Larry Toner of Stockman's Insurance at the sale. 306-834-7652

DELIVERY With rising feed and fuel costs we look forward to working with you to get your bull home in a timely manner. We will do our best to get your bull as close to you as possible if not right into your yard. We will begin delivering bulls following the sale within the prairie provinces. If you are not able to take your bull when we are headed your way, it is the buyer's responsibility to arrange transport. Any bulls left after April 15 will be charged \$4/day and all bulls will be delivered by May 1. For bulls to eastern Canada, British Columbia or leaving the country, we will organize necessary health testing and assist in custom travel plans up to \$200. Costs over \$200 will be paid by the buyer. We look forward to working together to get your bull home!

TERMS AND CONDITIONS The terms of the sale are cash or cheque. All settlements must be made with the clerk following the sale before any cattle will be released.

DISPUTES Bidding will be re-opened between the parties involved in the dispute. If no further bids are made, the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision on all disputes will be final.

ANNOUNCEMENTS All announcements made from the auction block will take precedence over the printed material matter in the catalog. Buyers are therefore cautioned to pay attention to such disclosures.

ACCIDENTS Although every precaution will be taken to protect the safety and comfort for all those in attendance, neither the owner, the auctioneer of Association assumes any responsibility in this matter and disclaims any liability, legal or otherwise, in the event of accident or loss of property.

Welcome to the 16th Annual City View Simmentals and Abound Livestock Bull Sale, featuring guest consigner Gold Bar Livestock. These three operations share a common goal, raising performance-oriented cattle with strong maternal traits, bred to thrive in the real-world environment they were raised in. These bulls are developed to last and are supported by easy doing maternal cowherds with significant emphasis put on feet and udders.

Whether you're interested in Blaine and Tina's Simmentals, Brian and Lisa's Angus, or Sarah's Angus, you can invest with confidence. These bulls are bred and raised to produce big hipped, heavy haired offspring that are highly sought after and command a premium in both commercial and purebred sale rings, and replacement females that will last the test of time.

We invite you to join us on March 24th at the City View Simmentals sale facility. Come early to evaluate this exceptional sale offering and enjoy hospitality that is second to none. If you cannot attend on sale day, we recommend visiting beforehand to view the cattle in their home pens. Any of the three families would be delighted to give you a tour and discuss which bull would best suit your breeding programs.

If we at BMS can assist you prior to or on the day of the sale, please feel free to reach out to discuss the bulls or to provide any information you may require. We look forward to seeing you on sale day!

Welcome to our 16th Annual Bull Sale! It's a great time to be a part of the livestock industry. The prices we're seeing in the commercial sector and the demand for our product has been a long time coming! Thank you to all the bidders, buyers and everyone who has attended our past sales.

We feel we have put together a very useful and high quality set of bulls for your appraisal. We have everything from power bulls to some easier calving options, reds, blacks, and fleckvieh. Last fall we took three red bulls out as part of our show string. They stood strong in some very competitive classes at both Farm Fair and Agribition. As a group they were named Reserve Senior Champion pen at the Medicine Hat Pen Show. On the black side we may be down in numbers to prior years but not to sacrifice quality as it was a heifer kind of year. The fleck bulls are once again a very strong set as well.

The bulls have been developed on the same program as years past. If it isn't broken why fix it? They always have a feeder full of alfalfa/brome hay and are pail fed a 14% textured ration along with brown oats in the "feed pen". They are housed in a large hilly pen that provides lots of exercise and our feeding method provides a great deal of human interaction. No feet have been trimmed. As always it is a pleasure to work with Jessica Hextall from Trouw Nutrition. Mineral for our entire herd comes from Bulls Eye Feeds under the recommendations of Matt Criddle. As in the past the bulls have been developed on the Zoetis herd health program, have received Ivomec and Clean Up II.

Joining us once again is Abound Livestock and Gold Bar Livestock with an elite, powerful set of Black Angus bulls.

Every fall we like to take the opportunity to exhibit at Farm fair and Agribition. It's a great chance to catch up with our "show family", see what's out there for new genetics and showcase our own. This past year we also decided to exhibit at the Medicine Hat Pen Show, the feedback on our pen of three bulls was truly awesome. Thanks to Joe and Aaron for being our traveling partners and helping out whenever needed. Also a big thanks to our son Brody and longtime friend Joho for looking after things at home while we're away.

Thank you to our 2026 sponsors: Farm Credit Canada, TD Bank, Trouw Nutrition, Masterfeeds Moose Jaw Coop and Young's Equipment for the use of the BBQ. Also thank you to Pittman Print Media, Twin View Livestock and Golden Thread Livestock Images for putting together our catalog, pictures and videos.

We welcome you to the farm anytime for a herd tour, go through the bulls and evaluate our program. Bohrsen Marketing will once again Nate and Cody and Don Oberg will be on hand to conduct our sale. Feel free to reach out to any of them or us if you have any questions.

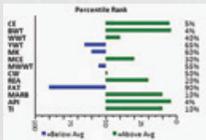

As always, join us the night before for a casual viewing and refreshments. Pizza will be served at 5pm. On sale morning, come for coffee and donuts along with our delicious steak dinner. Hope to see everyone then!!

*The Barnett Family
Blaine and Tina, Brody & Addison*

*All Simmental bulls have a complete
100K DNA PROFILE*

Lot 1

- Who doesn't love an easier calving baldy with lots of performance?
- Dark hoof, clean fronted, tons of muscle in a very attractive package

ABOUND LIVESTOCK

Welcome to the 16th annual sale! It's hard to believe how fast the years go by but here we are still looking ahead and planning for the future. We are pleased to be working along side City View Simmentals and guest Gold-Bar Livestock once again. The sale is held in a video format with the number one goal being less stress for the cattle and to provide a laid back atmosphere for everyone to enjoy a hearty meal and fellowship before and after the sale.

This business has allowed us to meet some of the best people in the purebred and commercial industries. I just want to say congrats to everyone for hanging on and seeing our way of life get the rewarding prices we all deserve! Cows are talked about daily around here. What worked, what didn't, who's next and who's gone. A mother cow with high maternal traits, good udders, and sound feet are very important to us. Our herd is for the most part still young and these mother cows are still developing themselves as well as raising calves that meet the mark in some less than ideal conditions. Put them in a good scenario and things could get pretty exciting I think. Disposition of our cows and bulls is taken very seriously as we have a very actively involved 3 year old that helps with all aspects of the cattle. From carrying feed pails, to riding her gator through the bull pen, to screaming through the barn like a dinosaur, our cattle have seen and heard it all.

The bulls have been developed on a textured 14% ration from Trouw and the best hay we can produce. They spend their time in a 20 acre pasture with steep banks and we space the hay feeders to make them walk as much as possible so they are hard muscled, fit and ready to go to work in all conditions. Thanks to Jessica Hextall for making sure we are always looked after nutrition wise.

This past summer we were fortunate to be able to acquire the remainder of the Ivanhoe cattle. I am sure the barn cats there are livin' large now that the old barn is quiet. We can't thank Ron and Marilyn enough for the opportunities they have sent our way since the start of Abound Livestock back in 2017 and we couldn't have done it without them.

As always, you are more than welcome to come for a tour at Abound anytime where we take pride in what we do and what you see is what you get! We aren't perfect and there are no flashy show cattle, just realistically managed cattle that work for us. Thanks again to everyone has supported us in the past and we can't wait to get to visit with everyone.

Talk to you soon,
Brian, Lisa and Cassie

Lot 35

Here is one of the younger bulls in the offering but a very impressive bull. This Playbook son is a stout, dense made bull that has lots of eye appeal. You can't help but stop and admire this bull when he gets out on the move. His dam is a daughter of Harvester 66D, a bull that we used widely in our program for many years. Females are top notch mothers with good udders, easy fleshing, and just all around honest hard working mama cows.

Ivanhoe Royal Pride 52B, maternal sib to BARN 307L

Harvester 66D, grandsire

LOT 38

Out of a first calf heifer, Playbook 524N is a very thick bodied, solid made calf with a great foot composition. In typical fashion of this sire group, this bull has a middle of the road frame size and solid EPD profile. His dam is a Jack Daniel daughter and we really like these young females. They have good udders and teat size, exceptional temperaments, and excellent mothering abilities. You can count on this more calving ease option to make sure that your first calvers offspring come easy and perform.

Alternate View of 531N

Most people know that we like to play with fire sometimes and Max 531N is a bull that bleeds power. He stands on a strong foot with tree trunk legs and has an incredible wide top. He went about a week passed his due date so his birth weight crept up a bit but we aren't going to lie, on the right cows this bull is throwing you 100 lbs calves and nothing but pay weight steers come fall. Let's be honest, the commercial cattle industry would be in trouble if we as breeders culled every bull that was born with an ounce too much power and performance.

--------	-------	-------	---------	------	-------

We really like how consistent these Jack Daniel bulls profile. Cleaned skulled, good neck extension and very smooth made. One of the key qualities that we will not budge on as a producer is foot quality. As environmental conditions continue to put pressure on pasture and water quality, it goes to show everyday the importance of having cattle that have a solid foot composition so they walk. At the age of 5, Jack Daniel 9J still has an impeccable foot and passes along those same qualities to his progeny.

LOT 46

Here is calf #10 for the Ivanhoe Black Lucy 41B cow and we think she keeps giving it her all at raising powerhouse bulls just so we never have a reason to send her to town! Mama cows like this who are made to withstand whatever Mother Nature throws their way and consistently raise top end calves are your true mama cows. They just can't do that and have functional longevity unless they have all the core fundamentals in place. Abound Profound 522N is a very sound bull. He is super deep sided, long bodied, and has that touch of added frame to give him that long stride and free movement.

CE 1	MCE 8

We almost have a little déjà vu when writing the footnote for Profound 514N. Here is a bull that profiles very similar to his full brothers that have sold in past sales. His dam passes along her incredible athleticism and progeny are made to get out and cover ground. He is a very heavy loined bull that is structurally made right, stands tall, and is full of presence, pride and performance!

Coalition 206C, sire

Abound Lady May 301L udder

Coalition 206C is a bull that's made a come back the past few years. We found numerous 206C daughters in past fall sales that we liked but unfortunately they sold well above our price range. So, we set out to make our own female. After securing the rather expensive semen, selecting our young Lady May heifer to be the candidate, waiting.... and wouldn't you know we got a bull calf! The females this guy will produce should be the kind you want along the road!

Thank You!

Thank you to Hi Low Angus for purchasing Abound Lassie 511N at the 51st Masterpiece sale this past October!

GOLD-BAR LIVESTOCK

Welcome to the 2026 catalogue edition! And thank you for taking the time to peruse our offering. Three of our bulls are sired by our latest herd sire Freyburn Temptation 97L. Temptation was chosen for maternal attributes - with HF Tiger 5T and U2 Erelite 109Z in the pedigree, there is no doubt that we will want to keep every daughter. His calf crop has been consistently good for hair coat, performance and temperament. We can't wait to see what the future brings for his progeny.

Dam of Lot 51

LOT 51

GBL 101N is the result on an "in dam" purchase from Sandra Jeffery. His Mama is built as good as it gets - superior feet and a beautiful udder. This bull is a great combination of a light birthweight followed by an accelerated growth curve. He'll work in either the heifer or cow pasture probably for the next 10+ years.

Dam of Lot 52

LOT 52

GBL 211N was unfortunately kissed by mother nature. However, should he ever lose his tag, it will be pretty easy to remember what year in February he was born! His moderate-framed Bravo dam has the best udder in the herd. If you follow the show circuit, his granddam was also the 2018 RBC Beef Supreme Champion Female at Agribition. This handsome devil will dance with the heifers for years to come.

Thank you to the following Buyers who invested in Gold-Bar Genetics in 2025:
Deer Hill Ridge Angus Farm / Log & Tin Cattle Co. Ltd. / Reid Ranching / Bar-E-L Angus
Windy Willows Farms / Autumn Dew Angus

Dam of Lot 54

If you're looking to take advantage of today's price advantages for payweight, 214N is your guy. He adds some length of body in a harder, more muscular package. This guy also stems from our Heroine cow family and is out of a big bodied, easy fleshing MLG Momentous daughter.

What Do The Numbers Mean?

Calving Ease (CE) - The ease with which a bull's calves are born to first calf heifers. The larger EPD indicates a higher percentage of unassisted births for calves sired by that bull.

Birth Weight (BW) - Calf weight at birth adjusted to the dam's age. The larger EPD indicates a heavier average birth weight.

Weaning Weight (WW) - Weight taken between 160 and 250 days of age and adjusted to 205 days of age and to the dam's age. The larger EPD indicates a heavier average weaning weight for calves sired by that bull.

Yearling Weight (YW) - Weight taken between 330 and 440 days of age and adjusted to 365 days of age and to the dam's age. The larger EPD indicates a heavier average yearling weight for calves sired by that bull.

Maternal Calving Ease (MCE) - The ease a bull's daughters calve as first calf heifers. The larger EPD indicates a higher percentage of unassisted births for calves born to the sire's daughters.

Milk - The milk EPD is a predictor of a sire's genetic merit for milk as expressed in his daughters production, or in other words, the part of weaning weight attributed to milk genes. The larger EPD indicates heavier average weaning weights due to daughter's greater maternal ability.

Total Maternal (TM) - A bull's ability to pass on milk production and growth rate through his daughters. It predicts the total weaning (direct and maternal) that will be displayed in his daughter's offspring. It is calculated by adding half of the Weaning Weight EPD with the Milk EPD. The larger EPD indicates higher pounds at weaning.

2025 Simmental Breed Averages - CE 7.1 BW 3.4 WW 79.2 YW 115 Milk 26.2 MCE 4.1

2025 Angus Breed Averages - BW 2 WW 56 YW 99 Milk 24 CE 3.3 MCE 6.5

Win a \$2000 Sale Credit

Purchase a bull from any current Saskatchewan Simmental member and when the registration papers are transferred, you are entered to win a \$2000 sale credit! The draw will be made at the SSA Annual general meeting in July and the lucky winner will have one year to use the credit at public auction or private sale on bulls or females from any current Saskatchewan member.
