CATTLE COMPANY

Charolais and Angus Bull Sale

TUESDAY, MARCH 10, 2026

AT THE RANCH • SEDALIA, AB • 5:00PM

The Wagstaff Family

Quinn and Jamie
Hannah, Haylee, Olivia

DESERTLAND
CATTLE COMPANY

Welcome to our Fifth Annual Desertland Cattle Company Bull Sale!

We would like to personally invite you to join us on March 10th for our 5th Annual Bull sale, at the ranch south of Sedalia. Hannah and Olivia are continuing to focus on their Black Angus herd, Wildflower Angus. The bulls they are consigning this year are all two-year-olds, born the end of April to the first of June. Their cows run with the Desertland herd for the winter with the same goals in mind.

It's been another busy year around Desertland with Hannah working on her 3rd year at Saskatoon studying Animal Bio Science and Haylee at Olds College in her first year of Ag Management. Olivia is in Grade 11, and spends lots of time helping on the ranch, and working at the Auxillary in Oyen. All the girls spend lots of time helping on the ranch, riding horses, and going up and down the road with rodeo.

We had a very dry spring until mid-June, and then it started to rain. Ended up having one of the better years in history out here. Combined record crops, put up a couple year's worth of silage, and sold some of the heaviest calves we have ever sold at record prices.

A couple of this year's highlights on the purebred side of things was going to Agribition in Regina in November. It was a great chance to campaign the Sir Mac bull and his dam. Met lots of great producers, and had lots of fun. In December we sold "Sir Mac" in the Superstar sale in Saskatoon. We would like to thank Cougarhill Ranch for purchasing him, and Hunter Charolais for purchasing the embroyos.

We have bred high maternal cows that exceed in longevity. Longevity to us means efficient, maintenance-free, natural-fleshing, and fertile cattle that are correct with sound feet and legs. Also, they are tight-uddered with small teats, and adequate milk that constantly wean off heavy calves each year.

This year the bulls were weaned the start of October with the excellent fall grazing we left them on the cows a couple weeks longer. The bulls have been on an oat, silage, and tub-ground ration. We don't pamper the bulls. They are developed on high roughage ration for longevity, and not maximum gain. By not force feeding these bulls you can be assured they will be sound, athletic, and ready to breed cows. This year we have worked with Bull's Eye Feeds to test the feed, and build a complete supplement to ensure the bulls maintain healthy development from weaning to bull sale.

You can count on Desertland bulls to deliver valuable pounds in growth, and feed performance. Our cattle work for us, work for others, and will work for you!

The entire Desertland Cattle cow herd, and bull pen are on a full vaccine and herd health program. All bulls in the sale will have their Footrot vaccine.

If you are unable to attend the sale but would like to bid on bulls or heifers, we encourage you to call prior to the sale. We have sale day staff that will handle your bids with confidentiality. Please call with any questions so we can help you make your next bull selection.

This has turned into a family ranching operation with the ladies being the 5th generation to raise cattle. We spend much of our time moving cattle on horses, and taking the time to enjoy the ranch way of life. We are grateful for the time we get spend together as a family.

*We look forward to visiting with you on Sale Day!
Tuesday, March 10th at 5pm!*

Delivery: Bulls will be delivered free of charge within 250km of the ranch as soon as possible after the sale at the seller's convenience. Over 250km will be arranged at a cost. Bulls will be kept at the seller's farm only if prior arrangements have been made.

All bulls returning to the seller's farm must be fully insured.

DLMS will be attending the sale. All individual videos will be available for previewing ahead of the sale on their website: www.dlms.ca

Find a map to the ranch on page 6.

Join us after the sale!

17N is pen stand out for sure! He is as long as you can make them with a smooth shoulder, loads of natural muscling, and an ideal skull. He is the only bull off the old Square Dance bull that we used for years. Square Dance was probably the best-footed bull we ever owned. His females make exceptional cows. Don't miss out on this one of kind herd bull.

Well Game Day has done it again. We don't have much semen left of Game Day so we use it very selectively. 10N combines thickness, length, great feet, and an overall balanced package. His 93lb birth weight is absolutely ideal for most cows. 969 has sons working at Steve & Sandra Rude and Rude Land and Cattle.

Desertland Cattle Co will be retaining 25% interest in DLCC 10N.

12N is very similar to the 10N bull. He carries all the great traits that Game Day stamps his offspring with. He deep sided, thick topped, very quiet, and beautiful hair. 79H has a little bit of French in her so he gets a little extra natural muscling.

Homo Polled and PA Tested

47N is one of the only tan Game Day sons we have ever raised. He is a thick, deep-ribbed, soft-made bull. I feel 47N is a herd bull. The cow is an absolute powerhouse female. We got her from the Tri N dispersal a few years back, you can't make udders any more perfect, ideal feet and the size of cow we all aim for. He is one of the younger bulls in the sale but don't over look this bull. Doesn't matter if you are raising bulls or building cows, 47N will do the job for you.

Desertland Cattle Co will be retaining 25% interest in DLCC 47N.

Hank has been a bull we have used extensively over the last few years. He has been a no-miss bull, doesn't matter what we cross him on. He is definitely a bull the commercial producers recognize as an asset to raising commercial calves. He puts the extra pounds on his offspring, yet calves perfectly, lots of hair, great disposition, and that little French adds natural muscling. The last few years we have registered over 50 calves a year from him. As we use him in both winter and summer calving programs.

8N is going to mature to be one of the bigger bulls in the pen. This bull has tons of performance in his pedigree. He has a great disposition, super hair coat, and is long-bodied. 785E, his mother, is a no-miss cow. Last year she raised the lead off Finale bull. Bought by Blaine and Darlene Roth. I think you will have this bull marked.

We bought 5 straws of Flatland semen in a frozen genetic sale a couple years ago and were very pleased with the results. DLCC 36N is a very clean-fronted, smooth-made, moderate-made bull. In the Olds White Lights Sale they sold a half brother to 36N for \$105,000. These are definitely eye appealing with impressive muscle pattern. Thick-built type of cattle.

44 N is a impressive individual, He may be one of the younger bulls but doesn't show it. He carries massive amounts of muscle from head to tail. Not to mention his huge rib and the amount of muscle on his hip. His mother is a daughter from the 109 cow from the Tri N dispersal. These cows are identical. If you cut the tags out you would have trouble telling them apart. If you are looking for a tan bull, he's a tank!

4N is quite a bull coming from a first calver. This is dad's pick of the pen. He is at the top of the list for gaining. All of these Joint Venture bulls are very similar made. These bulls are made for calving ease. There are more ranchers inquiring about breeding Charolais heifers. This sire group has made our heifer program easier than ever. This is the second calving season and we have not helped a heifer yet. If you have thought of using a Charolais bull on first calves this is the perfect opportunity!

52M is a very complete bull, when we turned the bulls out on grass we knew this would be the lead off bull in the sale. Has lots of stretch in his spine, tremendous muscle shape, loads of hair, great disposition, and really smooth through the front quarter. He is off a very feminine 8-year-old cow, that is productive.

This year "Hank" is the main sire for this group of bulls. Hank has proven himself over the years with his bull calves selling so consistently to the commercial cattlemen. He puts the length, bone, hair, and extra pounds that we like when marketing your calf crop. If you are wanting to retain Charolais females we currently have several daughter's milking. They are not show cows, but very productive, well-natured, good-footed, great-uddered cows. Don't miss out on this group of bulls! Stop by and take a look anytime.

We bought "Hero" a few years back for the heifer pen. With only a 70lb birth weight, he calves very easy. He is a smaller frame bull but has lots of muscle shape, strong top, and great feet. We use him on larger framed heifers, and it's been working well.

Black Angus
TWO-YEAR-OLDS

from
Wildflower
ANGUS

Wildflower ANGUS

HANNAH WAGSTAFF 403-664-9510 • OLIVIA WAGSTAFF 403-664-9855

This year will be the fourth year Olivia and I will be offering a set of two-year-old Black Angus bulls. We have put our best effort into selecting a cow herd that will raise useful offspring that represent the needs of the Angus breed. Our Grandpa and Grandma worked to sustain easy-keeping females living in Alberta conditions. All the herd bulls they have used over the years have had no white present on them. This is to ensure no white on the females retained in the replacement pen. We look forward to seeing you at the ranch on Tuesday, March 10th at 5pm. If you have any other questions or would like to stop and view the bulls, please feel free to call and we will do our best to help you select your next Black Angus bull.

Reference Sire

SAV EMBLYNETTE DIAMOND 6377

We purchased some straws of SAV Harvester 0338X to AI some of our heifers to expand our herd genetics. SAV Harvester is a performance powerhouse and an Angus sensation selling for \$275,000. 71M is the only bull calf for sale from this sire. 71M comes from a very moderate-framed feminine heifer that proved herself on her first calf. 71M is the ultimate package: well-footed, deep-bodied, and super eye catching. 71M would be an asset to any operation, adding females that are feminine-built and perfect-uddered, and sons that are loaded with performance and body volume.

 E A ROSE 918 WYAA ROSEBUD 3R

We purchased Banknote 129J from Riverfront, a very powerful yearling and our pick of their sale. His sire, Brooking Banknote 4040, also needs no introduction in Black Angus genetics, as he sold for \$125,000. He is a performance bull stacked with maternal strength to increase value in both his sons and daughters. He ranks in the top 1% for WW and YW. His daughters are perfect-uddered, moderate-framed, and very complete, sound-made females. His sons add extra muscle, stoutness, length of spine, all within very attractive-made packages. We feel he can add very nice replacement heifers and heavy-weighted steers in the fall to the commercial breeders.

Lot 75

We have a couple different groups of heifers for sale this year. These are all home-raised heifers from highly productive, proven, functional cows with good feet and udders. The Angus heifers are born in the last half of April and into May. If you saw the Wildflower Angus Pen of Three heifers at Oyen Beef Expo, the black heifers will be sisters to them. A lot of the heifers come from the purebred herd but sell with no papers. The Charolais heifers are from the commercial side of our operation. They were born in April. These are the top-cut, as we are not keeping any of them this year. They were weaned the first week of November, had all their shots, and fed at home. We walk or the girls ride their horses through the heifer pen every day to make them quiet. They sell with no brands and will be vaccinated, and palpated ready for breeding.

Lot 76 ROTH HEIFERS

It's hard to believe another year has come and gone already, and wow, what a year it was for the cattle market! With that, we are very honoured to have another set of heifers on offer at the Desertland Cattle Co and Wildflower Angus Bull Sale. We are offering both tan and red heifers again this year. Both groups of heifers were born in April/May and weaned in November. The tan heifers were selected from our commercial cow herd as replacement heifers and sorted for temperament, good feet and good maternal mothers. Anything we put on offer is a heifer we would be more than happy to incorporate into our own herd as we try to develop a set of reputable heifers to bring to the sale each year. The same can be said for the red package of heifers. The only difference is they are Angus x heifers as they are primarily out of our first calvers. All heifers will be vaccinated, palpated and ready to go to work. We again would like to thank the Wagstaff family for this opportunity to showcase our cattle for a fourth consecutive year at their sale.

brayden.schmidt@bullseyefeeds.ca

The bull feeding program is built to maximize forage utilization, gut health and as a result quality sperm production. Nutritional status of a bull, particularly from the previous 60-days can affect the semen quality being ejaculated today. Sperm production is a continuous process and proper nutrition is critical to maintain peak fertility and longevity of bulls. Bull calves are generally developed on grass with their moms on a quality mineral program.

Once bull calves are weaned, they are slowly moved onto a balanced TMR. The bulls are challenged with a forage-based TMR to help them develop and express their genetic potential. This is important for consistency of maturation and puberty of bull calves. Sampling and analyzing forages are important for properly balancing the overall ration.

Forage quality and digestibility are important for maximizing ruminal health. Matching suitable protein sources with proper starch with the available forage sources is key to promoting lean muscle growth. The addition of organic minerals are used to ensure proper immune function and overall health of bulls. All of these factors contribute to semen quality and conception within a herd.

If you have any questions about the nutrition program, please feel free to reach out. Buy with confidence knowing the bulls have been developed on a balanced nutrition program.

Sale Terms & Conditions

Terms: The terms of this sale are cash or cheque payable at par at sale location unless satisfactory credit arrangements have been made previous to the sale. The right of property shall not pass until after settlement is made. All settlements must be made with the clerks of the sale before any cattle will be released.

Bid: Every animal consigned to the sale must be sold by auction. No private sales will be allowed except as otherwise provided for in the terms and conditions. No by-bidding will be permitted. Each animal will be sold to the highest bidder.

Disputes: In some cases of disputes, bidding will be reopened between the parties involved. If no further bid is made the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision in such matters will be final.

Purchaser's Risk: Each animal becomes the risk of the purchaser as soon as sold. Animals will be cared for at the purchaser's risk for a reasonable length of time.

Announcements: Announcements from the auction block will take precedence over the printed matter in the catalogue. Bidders are therefore cautioned to pay attention to any such announcements.

Certificate of Registry: The proper Registration or Recordation paper, as the case may be, will be duly transferred and furnished to the buyer for each animal after the settlement has been made.

Breeder's Guarantee - Bulls: Should any bull fourteen (14) months of age or over, fail to prove a breeder after being used on cows known to be breeders, the matter shall be reported in writing to the seller within six (6) months following the date of purchase or six (6) months after the bull has reached fourteen (14) months of age. The seller will then have the right and privilege of six (6) months to prove the bull a breeder. No guarantee is given that the semen collected from the bull will be suitable for artificial insemination. **Heifers:** All have been palpated and guaranteed open and in good health by a local veterinarian.

Should any bull fail to be a satisfactory breeder, he will be replaced with a bull of equal value and performance level. Should this not be possible, a credit toward the purchase of another bull will be awarded. All warranty and responsibility is limited to replacement of the bull in question and is acknowledged by the buyer as a condition of sale.

Exception to Guarantee: In cases where the animal is subject to any hormonal or surgical reproduction techniques after the sale, the guarantee shall be null and void.

Bull Semen Retention: All consignors reserve the right to collect semen on any bull sold for in herd use. This semen will be collected at the buyer's convenience and at the seller's expense.

Settlement: Transportation charges on animals returned to the seller for account of the purchaser. No incidental expenses such as feed, AI, signing fees, interest, veterinary charges, etc. will be charged by either party when making settlement. If the seller is successful in proving the animal a breeder, then said animal will be reclaimed by the purchaser at his expense. Should the seller fail to so prove the animal is a breeder, then the buyer is guaranteed a satisfactory replacement, F.O.B. the ranch or the refund of the actual price. In no event shall the seller be responsible for more than the purchase price. Should a dispute over the quality of a replacement animal, the Sales Management will appoint a mediator.

Accidents: Although every precaution will be taken to protect the safety and comfort of buyers, neither the Sales Management, Auctioneer, or Sellers assume any responsibility in this manner and disclaims any liability legal or otherwise in the event of the accident or loss of property.

Rights and Obligations: The above terms and conditions shall constitute a contract between the buyer and the seller and equally binding to both. Resale of animals following purchase in this sale shall constitute a separate transaction the rights and obligations of the two parties connected thereto are not covered by the terms and conditions of this sale.

Heifer Registration: Heifers are sold as commercial heifers. If you want registration, the fee is \$1,000 per head.
