INSURANCE

Guild Insurance Group will be on site to offer insurance on all purchases.

BOARD

A fee of \$10 per day will be charged for animals remaining at the Test Station two weeks from sale day.

US BUYERS

Our sales are conducted in Canadian funds. The U.S. exchange rate will be available at the settlement desk. Upon successful purchase of an animal, the consignors will assist with the necessary documentation, health exams, brokerage and U.S. custom charges necessary to export your animal to the U.S. An additional fee of \$300.00 U.S. per animal will be charged for this service, and is due at time of settlement. Transportation is not included in this amount.

We are so pleased to have the opportunity to offer this heifer up for fund raising for the Test Station as this year's Raffle Heifer. She is from the top and heart of the herd. Her Dam Gushy Roxie 13G (SDA 13G) is one of the most notable cows in the Basic Herd sold to Stepler Farms. A real Beef Cow, always brought home one of the better calves. This raffle heifer Norma Roxie 3N is living up to her background and at the 84 day wt. is the top indexing Shorthorn Heifer. Her maternal 3 year old sister sold this fall for \$15,500 in the Jewels Sale. If you are a purebred breeder and want genetics that are hard to beat, buy lots of those \$10.00 tickets! If you are a commercial producer and want a true punch of hybrid vigour, you'll get it from her. There is no outcross blood in this heifer. Chance of a lifetime to own a heifer like this for a \$10.00 ticket. Never would this heifer been offered had it not been that we are in the process of dispersing our herd.

DONATION HEIFER PROCEDURE

The final bid in each round will denote the amount of that bidder's donation.
 Example: Round 1 - Final bid is \$300.00 to Ryan Smith, Ryan's donation is \$300.00. Round 2 - Final bid is \$250.00 to Tom Jones, Tom's donation is \$250.00. Round 3 - The female is re-auctioned on a downward scale until no further bids are received at the low of \$10.00.
 Each \$10 purchased (donated) represents one chance in the final draw. (Ryan Smith has 30 chances, Tom Jones has 25 chances and so on down the scale to the final \$10.00 donation worth one chance each.)

One ticket for every \$10.00 bearing the contributor's name will be put in the draw barrel. At the end of the sale, one ticket will be drawn with that person winning the heifer.

If you would like to purchase tickets before the sale, please contact Tracy Wood at douglasaffleheifer@gmail.com.

WELCOME FROM THE STATION PRESIDENT

On behalf of myself and the board, I'd like to welcome everyone to the 62nd Annual Douglas Bull and Female Development Center Sale.

Wow, what a great time to be in the cattle business! With strong calf prices, it sure makes things a little easier and adds to the optimism moving forward.

I'd like to personally thank our loyal consigners who continue to bring top-quality genetics for us to showcase. Year after year, the bulls and heifers just keep getting better, and that says a lot about the people behind them.

A big thank you to Cam, and his right-hand woman Tracy, for everything they do to keep the Development Center running smoothly. A lot goes on behind the scenes, and their hard work doesn't go unnoticed.

Thanks as well to all the consigners and individuals who step in and lend a hand when extra help is needed around the station — it's truly appreciated.

A very special thank you to Bill and Isabel Acheson, lifelong consigners who are winding things down. Your years of dedication and support of this sale and the industry have meant a great deal, and you will certainly be missed. We wish you both all the best!

If you have any questions, please feel free to reach out to myself or any board member. Cam is always happy to visit and give a tour of the cattle, so stop in anytime — the coffee is always on!

WELCOME FROM THE STATION MANAGER

Welcome to the Douglas Bull & Female Development Center's 62nd Annual Sale!

The past year has been an exciting one for the Canadian beef industry. Strong cattle markets have rewarded producers for the hard work and commitment it takes to build quality operations, and the optimism across the industry is as strong as it's been in years.

It's been a busy year at the Station as well. We've completed several improvements, including the installation of all new water drinkers throughout the facility to support cattle performance. We're also proud to introduce our new Youth Incentive Program, designed to encourage and support the next generation of cattle producers. Once again, our consignors have brought us an outstanding offering of bulls and females. Quality runs deep across all breeds represented. In addition to our individual heifers, we're pleased to offer four pens of heifer calves, giving buyers added flexibility and volume to meet a variety of needs.

We're extremely grateful for our dedicated group of consignors whose willingness to help — whether on weigh days, during picturing, or proofreading the catalogue — plays a big role in the success of this sale. It's especially encouraging to see strong participation from young consignors, highlighting a bright future for our industry. We're also grateful to our many family and friends who step up when we need an extra hand.

This year's sale truly offers something for everyone, including yearling bulls, yearling heifers, semen packages, pen lots of heifer calves, and the opportunity to win a heifer. Multiple breeds are represented to suit both commercial and purebred programs.

On sale day, the Carberry 4-H Club will be on site serving beef-on-a-bun and the always-popular homemade pies. As always, we invite you to visit the Station prior to sale day to evaluate the offering, we enjoy visiting with fellow cattlemen and talking cattle.

Thank you for your continued support. We look forward to seeing you on sale day.

Cam & Tracy Wood

BUILT ON TRADITION

Focused on the Future

Now celebrating its 62nd year, the Douglas Bull & Female Development Center remains the longest running multi-breed development station in Canada. For over six decades, consignors from across the country have trusted the Station to develop and present their bulls and females in a consistent, practical environment that reflects real-world cattle operations.

Our multi-breed format is a strength — offering buyers the convenience of evaluating quality genetics from several breeds in one location, developed under the same management conditions. For consignors, it provides a competitive yet supportive setting where cattle stand alongside respected programs, allowing meaningful comparisons and broad buyer exposure.

The 112-day bull and heifer development program focuses on steady, responsible growth. Cattle are managed daily by a knowledgeable herds person using low-stress handling practices that promote soundness and longevity. We work closely with veterinary professionals to provide custom health care, breeding stock evaluations, ultrasound data collection, and carefully formulated rations designed to support sustainable development.

The Station continues to serve as an ideal platform for new and upcoming breeders, as well as smaller operations that may not have the numbers to host their own production sale. Through professional photography and video services, custom fitting, a detailed sale catalogue, coordinated advertising and marketing, and an experienced sales management team, consignors benefit from a respected and well-established marketing program.

This past year, we invested further in the facility with the installation of new water drinkers throughout the Station— part of our ongoing commitment to animal comfort and long-term infrastructure improvement. As we look ahead, continued updates and strategic improvements will remain a priority as we strengthen the station for future generations.

We are equally proud of our youth incentive initiatives, encouraging the next generation to gain hands-on experience and confidence within a structured, professional program.

After 62 years, our focus remains steady — develop quality livestock, support progressive cattlemen and women, and continue building a program that evolves with the industry.

Producers interested in consigning and becoming part of a trusted, multi-breed program built on consistency and forward-thinking management are always welcome to reach out.

Yearling

BULLS

Hand-Fed Program

These cattle have been developed to promote adequate growth & muscle development all while challenging their genetics and feed efficiency. The bulls topped out at 16lbs/day on a 13% barley pellet complimented by grass/alfalfa hay and we feel they have excelled in this type of feeding scenario. The heifers were also fed a similar ration topping out at 10lbs/day.

HAND FED ANIMALS ARE DENOTED WITH AN HF

A powerful Fernando son and a true highlight in the Limousin pen. We've had nothing but success with Fernando, consistently siring easy-calving calves with strong growth, and 30N is no exception. This marks the third son to sell from our 13F cow, and each one has ranked near the top of the Limousin pen for both phenotype and performance. Maternal brothers have sold to Eden Meadows Farm, SK and Chris Fee, SK. Twin to a heifer.

Big Star progeny set the pace in our bull pen last year, and 106N is poised to carry that torch again. He has 'the look' with added muscle, extra length, and the kind of eye appeal that commercial producers demand. His full brother sold in 2025 to Laura Tolton, proving the consistency of this cow family.

In the Limousin pen, 65N brings a slightly different pedigree and a deep cherry-red colour that immediately draws the eye. A son of Zambuka and a favourite since birth, he comes backed by proven maternal genetics, with a two-year-old brother selling through this sale last year after being used successfully on our own cows. 65N impresses on first sight, combining eye-catching colour with exceptional length of spine and serious natural thickness.

79N is an ET calf sire by the maternal leader True North. Two full brothers sold very well in last years sale. Dam is our old crowfoot cow who was second to none for simply producing the good ones and breeding back first service. She has a calving interval of 362 days in her entire career which is exceptional. 79N is Angus HD tested, free from all genetic defects and he is in the top 4% for CED, 5% for BW, 1% for DMI, 2% for MCE, 3% for milk, 5% for teat size and 15% for udder structure. He is bred for calving ease, longevity and maternal excellence! You will want to keep all his daughters! Being in the hand fed program even further ensures a long service life for this excellent herd bull prospect. No creep feed while on the cow and parent verified.

Only two days from being a March calf, this stud is a thick, wide topped, deep bodied Blairswest Charlo 28E son. His sire 28E also has the distinction of having Bar E-L Erica 74A; maybe the greatest female in the Angus breed as his mother. The owners of 28E, MJT Cattle Co., sell a pile of his sons every year through their bull sale. 226N is out of a Perrot Cattle Co. bred dam who boasts SAV blood on the top and bottom side. To date she's produced four bulls who have all been registered. Consistency in a strong maternal, yet heavy muscled herd bull package.

Merle was a pasture favourite all summer, his thick build and docile demeanour have made him a standout. He has the numbers to work well on heifers but won't give up anything in gains on your cows.

His sire's first three sons selling at public auction averaged \$15,000. The Lion was CWA champion junior yearling bull, national show Senior champion bull, and produced the national champion junior bull calf the same year. His paternal grand Dam is a third generation donor cow. He has performance and calving ease in an outcross pedigree to the most popular pedigrees today. His dam has consistency in production, she's a no miss, early cycling cow with great feet and an outstanding udder.

This bull is sired by SAV Territory who is known for adding 'real-world' pounds to commercial calves, with many finding his progeny to be easy-fleshing. Offering a balanced package of performance; masculine, stout, heavy-haired with massive volume, Tik will add, not reduce, frame and substance to your herd. We love seeing our bulls make a mark in other programs and we know this bull will add performance and structural soundness to your herd.

When we saw countess 7077 with 9026 at side we fell in love! The kind of donor cow that can transform a program. We purchased embryos off 7077 and went three for three implanting them.. the result was 1J and two bulls. If you look at the pedigree of Running M Density 25N it is a representation of some of the biggest career money earners in North America. 25N has the ability to sire consistently powerful cattle that will leave you some of the best replacement females in your herd.. the guess work is done on this young herd sire prospect... buy with confidence!

RUNNING M RANCH - SCOTT MCCORMACK
Grenfell, SK | 306-697-7844

Hill Valley Reckoning is truly a unique and powerful hersire. He is sound and heavy muscled and leaves cattle with vigour, hair, look and great dispositions. His mother is a beautiful uddered female who is truly elegant in her design. 10N was a stand out in the pasture from a young age with growth and exhibiting a large foot and big hip. A bull who we truly believe in and would like to use in our own program as we feel very strongly in what he has to offer as a maternal herdsire.

Neptune is a bull calf that belongs in a herd where he can make replacement heifers. His dam, Crossroads Candace is a phenomenal uddered cow that knows how to raise a calf. A son of hers has been my main herd sire for the last two years and I've been very impressed by his calves. His sire, Lawless, was a high gaining calf with early development and his first crop of calves are the same.

Carman, MB | 204-750-0333

Here is a bull I would gladly keep for the versatility he provides, especially with that nice blaze face. This guy from the first month after he was born showed signs to be a good bull in the future and he didn't disappoint. He's off a bull we bought as a two-year-old from Dequier Cattle. He has really impressed so far with this guy being part of his first calf crop on our farm. I expect this guy will make whoever takes him home a very happy person.

Kicking off the Simmental side of our program in a big way! This Westcott son has exploded with growth all summer and hasn't slowed down since. Out of our first Simmental purchase, a deep, sound, and docile cow who's stamped 79M with all the right traits. Power, performance, and that eye-catching money stripe to top it off!

501N is a powerful, dense-made individual that combines performance with proven maternal strength. His dam, Springcreek Abbey 99E is a cow that checks all our boxes and is known for making powerhouse bulls that have gone on and excelled in so many different programs. His sire, Mader Walk The Line 92J is a proven sire and has made several top end progeny. We think this cross worked really well and are proud to offer such a solid bull that will add pounds and structure to almost anyone's breeding program.

• NON-DILUTER

A solid red bull with goggles that is thick and smooth from end to end. He moves freely on sound feet and legs and has solid scrotal development. He carries a quiet disposition, much like his dam, who is a moderate-framed, excellent-uddered female with loads of milk. Her bull from last year is working at Rooke Farms. He should sire heavy steers and attractive replacement heifers — be sure to check him out.

• NON-DILUTER

A dark red, horned bull with goggles that is super long and smoothly made from front to his powerful hindquarters. He tracks well on strong feet and legs. His dam is a standout in the pasture — moderate-framed, well-uddered, with lots of milk, liver red in color with goggle eyes. Her docile nature has been passed on to him. This bull would work very well in a pen of heifers.

We only sent one bull to the test station this year, but we didn't hold back on quality. 505N is the type of combination bull we strive to raise. Sound structured, performance oriented and backed by a cow with a perfect udder that breeds back in the first cycle year after year. We have retained 2 heifers in our own herd off her and her bull calf last year sold in this sale to Trevor Lees.

HERBOURNE SHORTHORNS - BILL & ISABEL ACHESON
Somerset, MB | 204-744-2525

Nova Ruby 5N is from a really big cow that gives me calves with grow written all over them. At the 56 day wt this heifer although limit fed was the top WDA Shorthorn heifer on test. Although she has been passed by that claim by some of the self fed heifers, watch her and by sale time may well be pushing that claim again. Her sire's heifer calves were all picked up for breeding stock in the '25 crop year.

HERBOURNE SHORTHORNS - BILL & ISABEL ACHESON
Somerset, MB | 204-744-2525

A solid red middle of the road heifer that did real well in the first 56 days of the limit fed heifers. Backed off some in the 84 day wt. Still looks good. Her dam is a moderate cow that is doing her job well. Her Grand-dam is an outstanding red neck roan cow that is now a stand out in Stepler Farms Shorthorn herd. She was one of my show heifers in 2019. This limit fed heifer may be a real bargain for someone and could breed real well for her new owner.

This heifer here speaks for herself! Out of a first calf heifer you can't ask for much more. A black blaze face True North daughter out of a heifer with a beautiful udder. She has impressed all summer long and it was tough to make the decision to put her in here. She's a heifer that I think would be a great addition to any cattle herd!

• HOMO POLLED, SIRE VERIFIED

Here's another heifer that I think will do good on any farm. She's a deep made heifer out of a big cow we purchased from Triple R Simmentals years ago and a Bentley son from Perkins Land and Cattle and I'd say they made for a pretty good combination. I expect her to put the pounds to her calves and make really good females for whoever takes her home.

So, we contemplated putting commercial heifers in here but figured we give it a try and this heifer here is out of a first calf heifer and the well known Epic bull. Her mother is out the LFE Stratton bull and a young cow that goes back to a pure bred cow we purchased from Twin Oak livestock.

This is another commercial heifer but this time has the desired blaze face that is always sought after. She is out of the Red Heat bull that provided the calving ease everyone wants and here's a chance to buy one of his daughters.

Pens of 3 OPEN HEIFERS

Returning for 2026 - Pens of 3 Heifers

We felt it was a great time to showcase our consignors who have commercial divisions in their operations. These heifers will be developed on farm and will be onsite for your inspection March 28th at the Station.

Watch Facebook for photos and videos!

Simmental 924

PEN OF 3 HEIFERS

We decided to offer 3 Red Polled commercial Simmental Heifers as a pen of 3 for the sale. They are late February/early March born. They were vaccinated with Bovishield Gold, Ultrabac 7 and had a pour on solution in December.

Shorthorn Sired 925

PEN OF 3 HEIFERS

This group of Shorthorn sired heifers is a group we are quite proud of. The red heifer with white markings is sired by none other than Mossie Defender, who needs no introduction after his extremely successful show career and the great things he's doing for the Ross's. The two solid red heifers are sired by Apparition 2K who has also earned himself a few champion banners along the way. At the time of print, the first Apparition daughter has calved here, and she is milking well on a near perfect udder. These January heifers are hard to part with, they are out of some of our best Simmental commercial cows and I expect them to be every bit as productive as their dams.

HEDLEY LIVESTOCK - LESLEY & TRENT HEDLEY
Rapid City, MB | 204-573-1939

Simmental Sired 926

PEN OF 3 HEIFERS

This February/March born group of Simmental heifers are sired by NAC Ladies Man 136K. We purchased 137K from the Carson family in Rossburn specifically for his power and performance. He has done exactly what we hoped, Ladies Man offspring are stout, soggy made cattle that weigh up in the fall. His first daughters are calving here now and they are holding their condition well, and milking on tight, tidy udders. Their Simmental dams are all still in prime production, and are easy keeping no fuss females.

HEDLEY LIVESTOCK - LESLEY & TRENT HEDLEY
Rapid City, MB | 204-573-1939

Angus/Shorthorn 927

PEN OF 3 HEIFERS

A strong set of commercial Angus/Shorthorn heifers. 2 blues and one black. All should grow up to be big, strong cows with sound udders and great maternal instinct. We are confident these heifers will work for you and are picked from the heart of our replacement pen.

SALE TERMS & CONDITIONS

The terms of the sale are cash, cheque or e-transfer at par to the Manitoba Beef Cattle Performance Association Inc.(MBCPA Inc.) within 3 business days. The buyer assumes all responsibility of his/her purchase at the end of said purchase. The MBCPA Inc cannot be held liable after the sale clerk has recorded the buyer's bidding number on the sale receipt. All settlements must be made with the office clerks of the sale before any cattle will be released. Phone bids are welcome.

Announcements made from the block will take precedence over printed matter in the catalogue. Buyers are asked to pay close attention to announcements.

All bulls & heifers purchased may be left on site until convenient for pickup until no later than May 15th. Two weeks of free board then \$10 per head per day after that. Please inquire at the office for more details.

Livestock insurance will be available from Guild Insurance onsite sale day. Insurance is mandatory for any cattle being left on site after the sale.

Although every precaution will be taken to protect the safety and comfort of the buyers, neither MBCPA Inc, auctioneer or sellers assume any responsibility and disclaim any liability, legal or otherwise, in the event of accident or loss of property.

Pictures – By attending the sale you are granting permission for your picture to be used for promotional and advertising purposes relating to the sale.

The MBCPA Inc. is only acting as a medium between the buyer and seller and is not responsible for failure on the part of either party to live up to their obligations: or for the truth of any warranties or representations, expressed or implied. Any legal action taken in exceptional cases must be between the buyer and seller. The buyer must look to the seller for fulfillment of all guarantees and representations.

Decision Deferred Bulls:

A Decision Deferred Bull (DD Bull) is a bull who has not received a satisfactory semen test. About 45, 60, and 75% are expected to pass at 12, 13, 14 months of age respectively. A DD bull is usually a sign of immaturity and will most likely receive a Satisfactory passing with time. Any bull sold in the Manitoba Bull Test Station with a DD breeding soundness evaluation must still be above 50% normal and the veterinarian is confident that he will pass with time. If a bull is purchased in the sale, the purchaser will pay for the bull sale day and the funds will be held in trust. The bull will stay 4-6 weeks (dependant on veterinarian suggestion) at the Manitoba Bull Test Station and then will be retested at this time. If the bull receives a satisfactory grade, the purchaser can come pick the bull up and the cheque will be deposited. If the bull still does not receive a Satisfactory passing, it will be based on the suggestion of the veterinarian and consignor of how to proceed with the bull. Feed, yardage and semen retest will be the responsibility of the consignor until the bull reaches a satisfactory semen evaluation or other arrangements have been decided upon.
