Gelbvieh Bull Sale

MARCH 4-5, 2026
FARMGATETIMEDAUCTIONS.CA

BUYER INFORMATION

SALE DAY PHONES

Chuck Williams 403-854-6270
Jenn Williams 403-854-0190

DLMS BIDDER APPROVAL/TECH SUPPORT

Mark Schologan 780-699-5082

INSURANCE

Insurance will be available to purchase on sale day. Ownership of animals become your responsibility as soon as they are sold. We recommend insuring your purchases. Seller is not responsible for animal if you choose not to insure your purchase.

Craig Flewelling 403-556-0515
flewcc@xplor.net

DELIVERY

Bulls that are picked up by March 12th will receive a \$100 discount. Delivery of bulls will be free of charge within 250 km. A delivery fee may apply to further distances. Seller is not responsible for any injury during transport. Deliveries will start around April 1st.

TERMS

The terms of the sale are cash or cheque All settlements must be made before any cattle will be released.

Cheques Payable To Flatland Ranch
Box 1086 Hanna, AB T0J 1P0

FEED

Bulls are given free choice dry hay and pail fed a balanced feed ration built by a nutritionist to ensure bulls maintain a natural and healthy development. We are fully committed to raising bulls with longevity that will get out and work for you for years to come.

HEALTH

- Bulls will be vet inspected, and semen tested prior to sale.
- All bulls are DNA verified for parentage and Homo polled genetics.
- All cattle are on a full herd health program.
- All cattle are managed under verified beef plus program.

BIDDING

Bidding **OPENS** March 4th at 9am MST
Bidding **CLOSES** March 5th at 6pm MST

SUPPORTING INFORMATION

DAM OF MERIT

• A Dam of Merit must have produced at least 3 calves and a Dam of Distinction must have produced a minimum of 8 calves.

• Age at first calving must not exceed 25 months-Produced a calf that was born between Jan 1 last year and March 1 of this year.

• Possess a minimum average weaning weight ratio of 101 for all calves.

• Maintained a regular calving interval. Average calving interval must not exceed the value calculated using the following formula
(# of calving intervals X 365 days) + 30 days
/ # of calving intervals

Or

• The female had her third calf before her fourth birthday and maintained a 365 day calving interval thereafter.

SALE INFORMATION

WELCOME FROM FLATLAND RANCH

On behalf of Flatland Ranch, we would like to welcome you to our 25th annual bull sale. We would like to thank all our valued customers and supporters over the years. We truly appreciate your friendship and trust in our program, and we always look forward to meeting new faces.

Bulls will be selling on DLMS.ca Farm Gate Timed Auction again this year starting March 4th and ending March 5th. Bulls are available for viewing anytime before the sale. Please join us for an open house and refreshments on March 1st from 10am – dusk. For those unable to view the bulls in person, feel free to give us a call and we will recommend suitable bulls that will work with your operation.

We strive to produce quality functional ranch cattle that will get out and work for you for a long time to come. Our breeding operation aims to build cattle that are sound, consistently raise a quality calf, and do it without being pampered. Honest, hard working cattle that are easy fleshing, with calving ease, performance, hair and longevity.

Chuck and Jenn Williams

FARM GATE TIMED AUCTION

HOW TO PARTICIPATE

1. Visit www.dlms.ca, scroll down sale list to find the sale you are interested in bidding on. Click on the sale listing and you will be taken to the Farm Gate Timed Auction Sale page.

2. After you are at the Farm Gate Timed auction site - farmgatetimedauctions.ca, click the LOGIN/REGISTRATION button.

First time Farm Gate users:

- First time users will select the REGISTER button from this page. Fill out the registration form to sign up for a free user account and it allows you to select a username and password for use on all Farm Gate Timed auctions. (please note due to some of the text notification features the Farm Gate Time Auction Site requires a new separate account from your DLMS Live sale site)

- After you create your Farm Gate account you will receive a text message with a pin code to verify your account.

- On your first login to Farm Gate Timed auctions we recommend you go to your profile and confirm your notifications are set to YES. This allows the site to send you text and/or email notifications when you are out bid and if there is activity on your favorite lots.

Returning Farm Gate users:

- If you have used Farm Gate Timed auctions in the past simply enter your username and password to continue. After you have logged in you are able to browse the timed auctions on DLMS Farm Gate Timed Auctions.

3. How to Bid

Now that you are logged in and your account phone number / email is verified you are able to bid on an upcoming sale. Simply find the lot you are interested in bidding on. After you have found the lot there are 2 options for bidding on the lot.

- Place Next Bid – to place the next bid on the item, you see the amount in the first box, you simply click the “Place Bid” button and after you review the bid and agree to the terms and conditions your bid will be placed.

- Max Bid Amount – to place a max bid you put your max bid in the second box listed as “Max Bid” on the item, and then click the “Place Bid” button and after you review the bid and agree to the terms and conditions your bid will be placed as the next bid. With the Max Bid placed the computer will then keep you as the high bidder to the max amount you have placed. This can be a great feature if you are not able to give 100% attention to the sale close out and protect your interest so you do not miss out on any lots you want to purchase. The Max Bid amount is completely confidential from the seller during the sale process. Example of How the Max Bid Works - If the lot has a \$2000 bid on it and you place a proxy bid of \$3500 into the system, the computer will bid \$2100 for you but if some one else bids \$2200, the computer will again bid for you, this time at \$2300. The system will look after your interest to a maximum of \$3500. If another bidder is on at \$3600, your proxy will no longer be effective and you will no longer have the winning bid on this lot without once again logging in and bidding again or moving your attention to a second lot of interest. Please note that in some cases a lot value can change very quickly if 2 max bids are placed on the same lot competing against each other.

4. Watch List Feature

If you have items in multiple auctions or only a few from the same auction that you want to watch with out having to scroll through the entire list, you can add the lots to your watchlist. On each lot you will see the “eye” button beside the bid button, by clicking this “watchlist” Icon that item is added to your personal watchlist for easy viewing of just your favorite lots in this sale or on the entire site.

5. Sale Ending / Closeout

Most Farm Gate Timed Auction sales close racehorse style with extended bidding.

What is Racehorse Style Close?

Racehorse style sale close is when the entire sale stays open in extended bidding. This type of sale allows you as the bidder to change to a different lot within the same sale if the bidding has gone in to extended bidding.

How will Extended Bidding works?

When we get to the close out end time the clock for close extends with any bid placed with less than 5 min on the clock. This type of extended bidding turns the end time to more of a soft time. Extended bidding allows bidders to compete in lots like a real auction and give all bidders the same time to make a decision. Always follow the clock to see how much time remains in the sale you are interested in.

6. Bidding Close & Follow-up

After the clock has gone to “ENDED” and no bidding has occurred for 5 min the computer will declare the sale finished.

Following the close typically within 24 hours of the sale close the sale consignor will contact all winning bidders to arrange payment, transfer of pedigrees and delivery/Pick up of your lot. Or as the winning bidder you can contact the sale consignor / sale manager to confirm payment instructions.

Please make sure that your account info is up-to-date and correct if you are the winning bidder of a lot as this is how the billing is sent to Sale Manager and/or Sale Consignor.

For more info and assistance with bidding contact;

UNDERSTANDING EPD'S

CALVING EASE DIRECT (CED): Percent of unassisted births of a bull's calves when he is used on heifers. A higher number is favorable, meaning better calving ease. This EPD can be vital to a rancher looking to decrease the amount of calves pulled in his herd.

MILK (MILK): The genetic ability of a sire's daughters to produce milk expressed in pounds of weaning weight.

CALVING EASE MATERNAL (CEM): Represented as percent of unassisted births in a sire's first-calving daughters. A higher number represents more favorable calving ease. This EPD is important to a rancher's bottom line because it predicts which animals produce daughters with a genetic pre-disposition to calve unassisted as heifers.

HEIFER PREGNANCY (HP): Predicts the probability that a bull's daughters will become pregnant as first-calf heifers in a regular breeding season, expressed as a percent. A higher value of this EPD is favorable, meaning that a higher percentage of a sire's daughters get pregnant as first calf heifers compared to other sires in his contemporary group.

30-MONTH PREGNANCY (PG30): Predicts the probability that a bull's daughters will become pregnant and calve at three years of age, given that they calved as first-calf heifers. This EPD is expressed as a percent, again, with a higher number being more favorable meaning a higher percentage of a sire's daughters will calve at three years of age, given they calved as first-calf heifers.

STAYABILITY (ST): Predicts the genetic difference, in terms of percent probability, that a bull's daughters will stay productive within a herd to at least six year of age. The stayability EPD is one of the best measures currently available to compare a bull's ability to produce females with reproductive longevity.

BIRTH WEIGHT (BW): Predicts the difference, in pounds, for birth weight of the calf.

WEANING WEIGHT (WW): Predicts the difference, in pounds, for weaning weight (adjusted to age of dam and a standard 205 days of age). This is an indicator of growth from birth to weaning.

YEARLING WEIGHT (YW): Predicts the expected difference, in pounds, for yearling weight (adjusted to a standard 365 days of age). This is an indicator of growth from birth to yearling.
