## DLMS FARM GATE TIMED AUCTIONS

<https://farmgatetimeductions.ca>

1. Visit <https://farmgatetimeductions.ca>, then click on the LOGIN/REGISTRATION button. First time users will select the REGISTER button from this page. Fill out the registration form to sign up for a free user account and it allows you to select a username and password for use on all Farm Gate Timed auctions. This program will send you text and email messages whenever there is activity on your favorite lots or someone challenges your proxy bid and this is why you will be asked for both your current email and cell phone number. If you are a past participant in the Farm Gate Timed auctions simply enter your user name and password to continue. This takes you to a list of both current and upcoming Farm Gate Auctions.

2. You can choose your favourite lots in this sale at this time and the program will allow you to open either all sale lots or just your favorite lots on your screen. Any time there is active bidding on a lot you have identified on your favorite list you will get a text and/or an email noting this activity.

3. The program allows you to place a proxy bid on any sale lot. This in fact protects your interest in any lot of interest for you to a specified dollar value you set, when you may not be able to give 100% attention to the sale. If the lot has a \$2000 bid on it and you place a proxy bid of \$3500 into the system, the computer will bid \$2100 for you but if someone else bids \$2200, the computer will again bid for you, this time at \$2300. The system will look after your interest to a maximum of \$3500. If another bidder is on at \$3600, your proxy will no longer be effective and you will no longer have the winning bid on this lot without once again logging in and bidding again or moving your attention to a second lot of interest.

4. At closing time of the sale the entire sale will extend bidding for 5 minute if a bid is placed on any lot in the sale. Any bid received after 6 PM will extend the sale by 5 minutes from the time of that bid. When no bidding occurs for 5 min the computer will declare the sale finished.

5. Within 24 hours of the sale close DLMS will contact winning bidders via email with an invoice payable to Greenvalley Ranch Ltd. Transfer of papers and delivery will be arranged with Greenvalley Ranch Ltd upon sale completion.

If you require assistance with using the new DLMS Farm Gate web site, if you don't understand how to create a favorites list, if you can't figure out the proxy bid or you just plain want to bid via phone, please talk to any of the DLMS team or Sale Consignors.

**WHAT IS RACEHORSE STYLE SALE CLOSE?** Racehorse style sale close is when the entire sale stays open in extended bidding. This type of sale allows you as the bidder to change to a different lot within the same sale if the bidding has gone in to extended bidding.

**HOW WILL EXTENDED BIDDING WORK?** When we get to the close out end time the clock for close extends with any bid placed with less than 5 min on the clock. This type of extended bidding turns the end time to more of a soft time. Extended bidding allows bidders to compete in lots like a real auction and give all bidders the same time to make a decision. Always follow the clock to see how much time remains in the sale you are interested in.

## Welcome FROM THE STEWART FAMILY

Warmest welcome to our sixth annual bull sale. We are excited more than ever to be in the cattle business with these great prices. It's great to see the hard working cowboys getting paid back for years of tough times. It really does pay to hang in there.

Thank you doesn't seem near enough to say for the support we have had to our program. To all the past customers repeat and first time THANK YOU! We are here for the long haul and look forward to many years and strong relationships with our customers.

We have continued with the strict selection process to insure our program continues to improve each and every year. I feel that is my responsibility to our customers, the breed and the business.

Our bulls are raised on their dams with access to a pellet creep feed designed for their health and growth. Once weaned they are put on a 25 acre tame hay plot with access to pellets/pail feed ration, and free choice hay. Once harvest is complete and the cows are near home the TMR is fired up and they are switched over to a silage/hay/pellet ration to insure gut health and proper development. As we are in the business to raise breeding stock, we demand this is what they do. Our bulls are 100% satisfaction guaranteed as our motto is bred and fed to last!

2025 has been a struggle with family health issues and yet another drought. Tough times make tough people so we are going to keep chugging along. The kids are growing up fast and are busy with extracurricular activities; their full blood program has continued to grow, adding a bred heifer and landing a handful of embryo calves. This fall we had success on the show road picking up a few banners and well I gotta say - I finally got my buckle. We were humbled to win Stockade Lady in Lloydminster to a pedigree that has a few of our prefixes in it. It is pretty cool to see that some of our selections have received a little spotlight.

I'd like to take this opportunity to wish all of the cattlemen and women the very best success in 2026 with a safe and healthy calving season. We also look forward to the formation of the Republic of Alberta.

We would remind everyone that here we have an open door. We are proud of the herd we are putting together and would love to give tours any time of the year. As for now, the bull pen is open to viewing at anytime and we hope to see you for your evaluation of the group. If time doesn't permit my phone is always on and Scott, Taylor, and Jaxon are well familiar with my program to help you find a suitable bull for your needs.

We look forward to seeing repeat customers and look forward to meeting new and potential customers.

Thank you again and best of luck to all in 2026.

Hugh & Raylene and Family.  
Vermilion, AB 780-581-8608

## Welcome FROM THE BOHRSON MARKETING TEAM

If you ever wondered what vision, passion and a disciplined approach to breeding cattle looked like, you will find it in the next 30 some odd pages as it is absolutely impressive and commendable to see where the revamped Greenvalley Ranch program has come in the last 9 years since they started acquiring purebred cattle again. Hugh Stewart and family are passionate agriculture folks with a real passion and no nonsense approach to breeding cattle. This is their largest and deepest offering of Simmental Bulls they have ever offered up for sale and we think you will be very impressed with the consistency throughout the red, black and fullblood Simmental Bulls. The building they have done around elite cow families is evident as you study the pedigrees of these bulls both top and bottom. In many cases, Hugh put a really high end production cow through the motions and once she had proven herself, he flushed the snot out of her to create a big time cow herd that annually produces some of the real good pens of bulls we get to be associated with. Hughs approach is simple yet crucial. He expects these cattle to be low maintenance, easy doing and fault free while remaining highly productive and kind on the eyes! Hugh really doesn't put up with anything and that has built

a program around strong feet and udders with loads of maternal merit and performance bred into each animal. This years set is no exception and is a prime example of the powerful herd bulls both acquired and produced right at GVR and their strong embryo transfer program. We think anyone who comes through the GVR bull pen would be blown away with the quality and would be able to find multiple options for their own programs. We invite you to tour the pen with Hugh anytime previous to the March 2nd online closeout with DLMS Farmgate. Be sure to give Hugh a call to discuss the bulls, he would be excited to talk shop with you. If any of us listed from BMS can be of any assistance, please don't hesitate to call as we are very familiar with this program and the bulls on offer. We would be happy to chat with you!

Timed Auctions Made Easy

# Greenvalley TERMS & CONDITIONS

## SIGHT UNSEEN PURCHASES

If you are unable to attend the sale please contact myself or any of the Bohrsen Marketing sales staff and we will gladly assist you to ensure a bull is chosen that suits your needs. For the sight unseen purchases we guarantee satisfaction upon delivery when the purchase is consulted.

## DELIVERY

We will deliver the bulls to central points in Western Canada by April 1st. Transport of bulls not taken on scheduled delivery runs will be the buyers responsibility. For bulls headed to the Eastern provinces the transport cost will be the responsibility of the buyer.

## USA DELIVERY

Greenvalley Ranch will assist in arrangements for the cattle to be shipped to wherever you are in the US, at the buyers cost. All bulls sold to the USA will be charged an additional \$250/bull to cover testing and border crossing costs. Payment for export cattle must be 50% prior to testing, and the balance will be due prior to shipping.

## PAYMENT OPTIONS

Bulls must be paid for in full before delivery. Please call Hugh prior to the sale if you would like to make alternate payment arrangements. The right of property shall not pass until settlement is made in full.

## CATALOG & VIDEOS

View the catalog and videos of all animals online at: [www.dlms.ca](http://www.dlms.ca) and [cattlevids.ca](http://cattlevids.ca). This will be an online only sale. All of the sale cattle will be available for viewing prior to the sale, at Greenvalley Ranch.

## RIGHT TO SEMEN

Greenvalley Ranch reserves the right to collect semen at their expense and the buyers convenience. Any semen collected will be for Greenvalley Ranch's in herd use only, unless specified in the terms of sale of a lot.

## HOOF TRIMMING

No feet have been trimmed on any sale bulls.

## BULL WARRANTY

All bulls are guaranteed to breed, semen tested and vet inspected, and under a full herd health program. The Standard Canadian Simmental Association guarantee applies. We do not warranty against injury or illness after the sale, and encourage the use of insurance for that purpose. Greenvalley will have replacement bulls on hand to cover your breeding season should an issue arise with your bull. Under no circumstances shall Greenvalley be responsible for more than the purchase price of the sale animal.

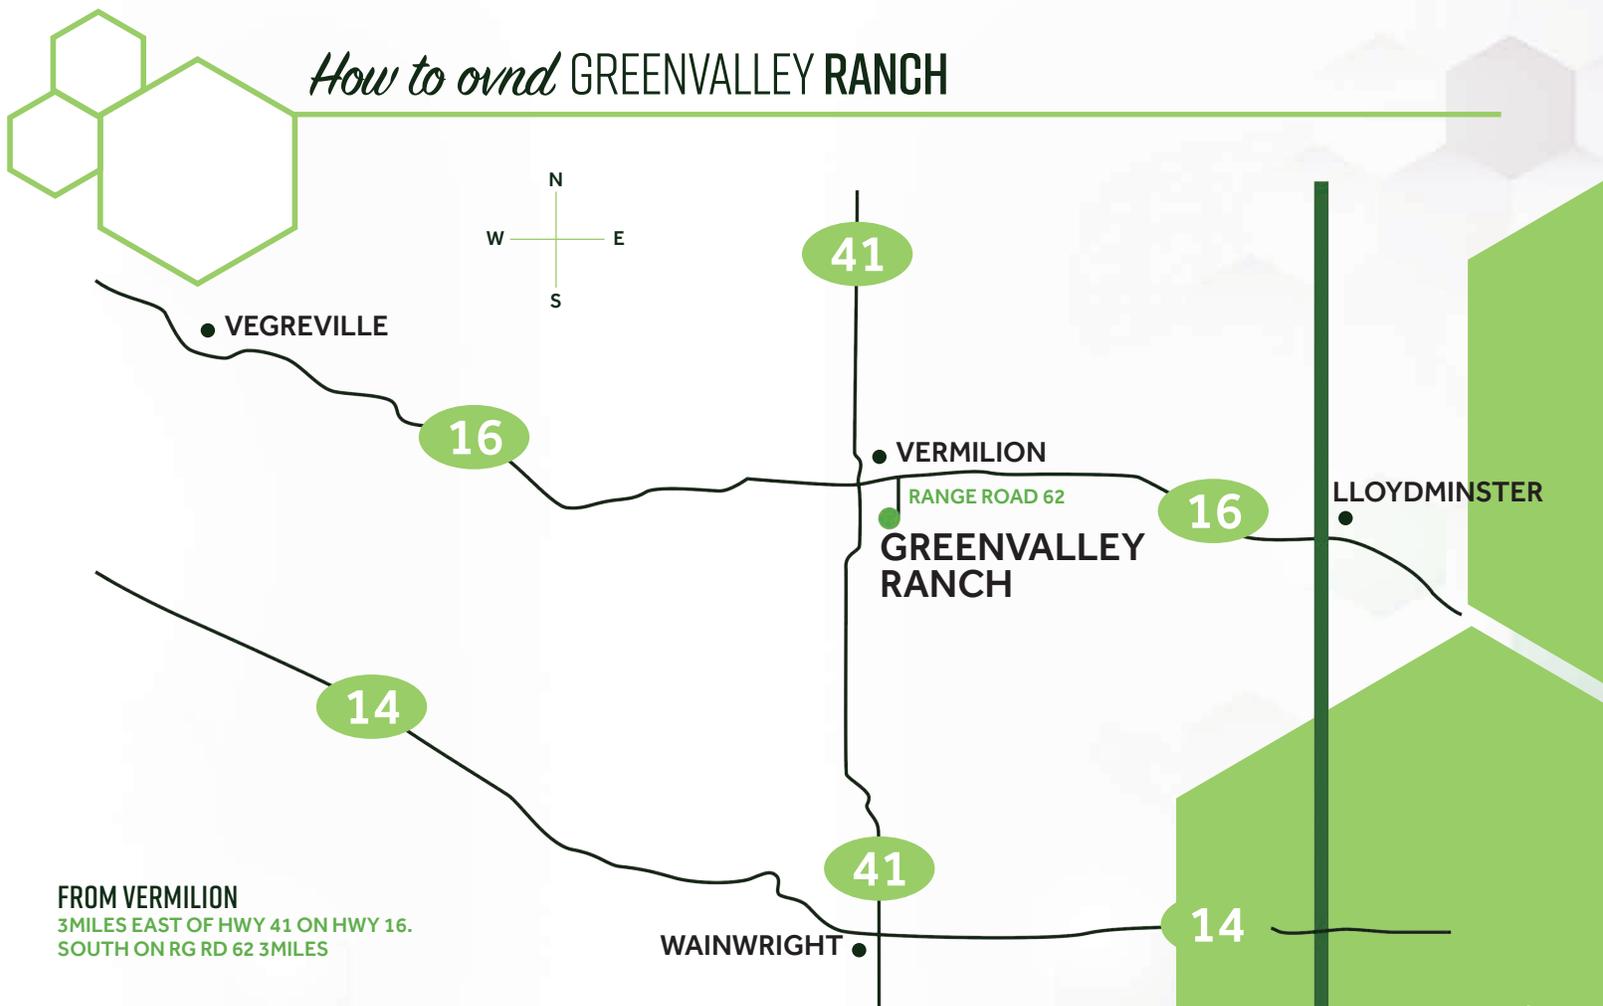

## PURCHASER'S RISK

Each animal becomes the risk of the purchaser as soon as sold. In an effort to protect the buyers interests, we strongly recommend insuring the bulls. There are many insurance options available, including a 6 month plan to get them through their first breeding season.

## ANNOUNCEMENTS

Announcements during the online sale take precedence over what is printed in the catalog.

Stacked genetics is the result of this flush son. Being the only bull of the six full siblings last year made Boss pretty special and we knew from the start this calf would need to be in our fall show string. Boss was with 2 full siblings sisters and a paternal brother along side their dad. Boss made the rounds and won Reserve Champion Simmental bull at Barrhead, Champion Junior bull at Olds fall classic, and Second in class at Farm Fair. His full sibling sister won Stockade Lady at Lloydminster. Moderate frame with the rib shape and smooth made excites us for the future of 102N. Big time maternal qualities can be picked out of any name in his pedigree.

FULL SISTER

GVR BOSS 102N

BOSS WITH HIS SIBLINGS

Talk about rib shape!!! Easy fleshing Genetics pull through all day long on this bull. Dark red and big time udder quality from both sides make me excited to think of the females this bull will make.

Proven genetics is the best way to confidently promote, and this is why we are offering semen on GVR Ranch Boss 52L. Son of the proven CRF Frankie 68F and Sunny Valley Rancher 42D, we see that genetic traits are extremely consistent. Ranch Boss is dark red, wide topped, excellent footed, and carries the genetics of foot and udder perfection. With now two years of progeny on the ground here, and many other farms that purchased semen, consistency and quality are proving true. Any where there are Ranch Boss calves they are in the top end of the pen. Feedback is telling the tale! Ranch Boss had a busy year again with his own breeding group and a busy fall show season. We are proud of Ranch Boss for what he has already done and what we believe he is capable of in the future. If you are looking for a TOP quality red sire that is out of a stacked up proven pedigree with multiple calves to see results, give us a call and we will gladly help you get the semen you need.

Semen is export qualified.

COME AS U R RED ROCKET  
RUST MISS 393A

I didn't check Websters to confirm but GVR 606F would be the perfect definition of power and performance. This dark red beauty for sure would be the deepest longest cow on the ranch. We decided to flush her and thought Red American would be a rockstar mating. We have heard from many in the business regarding the Purebred Simmental breed dropping in frame size. If you are wanting to add frame size with length, depth and deep color then 606F progeny is what you are looking for. We have embryos of multiple sires we would sell as well.

When I bought 17B from the Dispersal she was pregnant with a WarPaint bull calf. When that calf hit the ground I knew that was the perfect mating for her. When the opportunity presented itself we flushed Beverly to Warpaint again. In our implants for the 2025 calf crop this was the only bull we landed but we did manage to get 4 sisters and they are top notch good!!! Blaze face Beverly had an amazing udder with optimal teet size and fantastic suspension. War Paint added all the rib shape you can imagine and a full hind quarter. This will be the last and only opportunity to get a Warpaint x Beverly as all the embryos were implanted.

**LOT 10**

**MATERNAL BROTHERS**

Take your pick on these maternal brothers, whatever color suits you. Throw back to proven genetics is what you are looking at here with a touch of outcross on the dam side. 591C was one of the first cows we ever flushed. She had unreal fertility as we still have many embryos of hers to implant for years to come with the large flushes. Seeing results like this make us wish we had an abundance of recipis to get them all implanted. Feet and udder quality are big time positives in either of these brothers.

# FULLBLOODS

I figured it was time for the kids to have some cows of their own so new to GVR is the Full Blood division. Zane and Adalyn have four cows, Whispers, Labelle, Holly and Maggie's replacement heifer. I had talked about full blood for some time and thought it would be fun for the kids and easy for them to see which ones are theirs. I often joke with them that anything with white on its legs is theirs. As for me I do not like horns so the full blood division is POLLED!!!

One of these years I'm going to make the kids write their own foot notes for the full bloods. Labelle was a purchase from the Kuntz program through Border City Simmental Sale. She is a gentle cow that has a beautiful udder and keeps raising awesome calves. This year with farm fair having a Full Blood show we knew that Fred had to go for a walk in the show ring. Fred easily pulled off Champion Fullblood bull calf and got loads of attention. Dewalt turned out to be a fantastic cross with Labelle I could only imagine the females that Fred will make. Don't forget Fred is polled!!

Elo became a corner stone female for us. It was an easy decision to flush her and try to replicate her as many times as possible. Natural calves and embryo calves have always been highlights in their respective pens. We have won classes and reserve champion pairs with her and her daughter 481G. It is pretty cool when going through the herd to see many fantastic females that have stemmed from the arrival of 48E. Maternal traits are strong on this cow. Fantastic feet, udder suspension, amount of milk, and of course very easy fleshing.

Here is a natural calf off 48E. We have been very impressed with what Stepping Stone has done so it was easy to make this match with 48E. 171M was a twin to a heifer but raised solely by his natural mother. This bull has some life to him and we are certain there wont be a cow he can't find no matter what country he has to cover. Deep and fleshy 5N moves like a cat.

The anomaly! A red calf out of 48E. This cow has been a fantastic donor for us and has raised donor 481G which has multiple daughters that very easily can or will become future donors. The maternal qualities have proven multiple times making top end females. Rib shape and depth are strong traits of 48E. She is always in amazing condition and yet never leaves her calves lacking.

## GVR MERCHANT 60N

DAM: **MI MISS ELO 48E**

SKORS JOKER 75Y  
MJIS MISS AURBA 6A

481G was easily the best replacement hfr in her year and we were not surprised that she turned out to be a donor for us as well. Big time maternal traits with 48E and 202Z just help make her a package of greatness. It would be hard to find a cow with more rib shape and depth than 481G. Again with what we have seen of Stepping Stone we felt we had to breed her the same way as her mother and with the results I would do it again. Wide top, round and deep 5N will add pounds and maternal greatness in his offspring.

720G is a moderate size cow that mixed quite well with GVR 60K. Like his brother he comes from deep red on both sides and a line of quality udders. 74N has calving ease yet with great performance! Check out the spread from birth to weaning!

Well what can I say here? If you have followed along with our sales and managed to struggle through my foot notes and know me then you would know I'm very focused on our females. GVR 42L is a flat out awesome young and powerful female that I wanted a female out of as she was the first and only female I got from here mother. Sooo, I AI'd her to sexed female Next Level semen. To my surprise she had a bull calf. Yes, I sure was disappointed and not with how 169M has turned out, but that I didn't get my female. I'm not sure what happened with that semen specialist but here is your opportunity now on a flat out awesome bull!!

Don't ask me why I did this mating but I did and it worked quite nicely. 5L was a bull that we raised out of our very first donor dam 6105D. She was a whale! Efficiency was always the first thing that would come to mind when I think of her cause she could stay fat on fresh air and still raise awesome calves. Then fast forward to 31H a fleshy moderate black cow with quite a bit of calving ease we make a cross. This is a cool bull that would work on sooo many different cows I think it will be pretty cool to see the resulting calves he will make.

**LOT 36**

**FULL BROTHERS**

Identical twins is exactly what we have here. These two guys are peas in a pod and have been from day one. It's really impressive to see how they have grown and developed almost exactly alike. Quiet and moderate Tycoon momma really knocked it out of the park. These bulls were not raised on the same cow as we do our best to split twins and give them the best chance to grow and not wear their mom right out. 51K is a quiet cow that will not move from whatever angle you approach her if she thinks you just might have time to give her some scratches. Docility has definitely been passed on to these brothers.

158N was raised on momma and 159N was raised on a first calf heifer.

SIRE: **ERIXON LAD 5K**

MADER WALK THIS WAY 224B  
IRCC DARLIN' 613D

DAM: **GVR GOLDIE 72K**

GVR CHIEF 64F  
MAF GOLDIE 99E

Quite a cool pedigree here. 99E was a smaller frame cow that put the punch into her calves. Mating her with Chief resulted in 135N's mom 72K which added some frame size. Throw 5K in the mix keeping the smoothness of shoulders and adding a ton of hair 135N is sure to complement any type.

## GVR LAD 71N

#1502394 | GVR 71N | JAN 18, 2025 | HOMO POLLED | PUREBRED

42

ACT BW	ADJ 205	JAN 13	CE	BW	WW	YW	MK	MCE	MWW

IRCC DARLIN' 613D

DAM: **GVR MISTRESS 55J**

GVR CHIEF 64F  
SPRINGCREEK MISTRESS 111E

Calving ease comes with the smoothness and length in 71N. As I look through the pedigree to write these footnotes what comes to mind here is big time foot quality. 55J brings the frame size to the equation and 5K is giving the depth and great hair coat.

## GVR LAD 41N

#1502375 | GVR 41N | JAN 9, 2025 | HOMO POLLED | PUREBRED

DAM: **GVR MISS 80K**

CMS TIME WARP 835F  
CREST'S VIEW CENTERFIRE 38E

Check out the spread on the numbers. Thinking of 41N's pedigree it seems to me that he grabbed the best traits of all these generations. He's got the length, depth, and hair coat. Whatever his offspring is you can be sure they will be keeper quality and heavy on the scale at weaning.

## GVR LAD 125N

#1502419 | GVR 125N | FEB 2, 2025 | HOMO POLLED | PUREBRED

Alright now we are in the heifer pen! Calving ease sires are all the way through top and bottom of 147L's genetics. 32J was purchased from Sunny Valley program at the Border City Sale with the purpose to make heifer bulls. So since 87L didn't arrive as a bull we figured what a great opportunity to breed her to Mountain View and add even more calving ease to the lineup.

DAM: **GVR KAYLEE 87L**

KWA SLIDER 196H  
SVS KAYLEE 32J

Foot and structure quality flood the bottom side of this pedigree. Brisk was the biggest footed purebred bull I've seen and had the opportunity to walk. Chief had unreal feet and was a breeding machine that had two seasons every year. Udders are another thing that comes to mind looking though his dams side with amount of milk, udder suspension and teat size. 114N is backed by strong qualities throughout and I'd be certain he will make amazing replacement heifers.

## GVR MOUNTAIN VIEW 114N

**DAM:** **GVR CENTERFIRE 58L** GVR CHIEF 64F  
CREST'S VIEW CENTERFIRE 38E

Dark red and well bred. Again I can't say enough good about Chief's structure and feet. 38E is a great footed granddam and she will be one of the first to have her head in the pail.

148N was born towards the end of calving which gave him a little later start than some. Going back to the lovely SVS 95J cow that is the dam of 1N you can be sure that 148N is bred very well and will bring a nice deep red and fantastic udders to his daughters.

DAM: **GVR MISS 120L** R PLUS 0184H  
GVR MISS 48G

122N's dam is a paternal sibling to our high selling black bull two years ago to R-Plus. 120L comes from the lineage of 48E and she carries the maternal traits that run strong. There is a fair bit of calving ease in this pedigree as 48G is an Absolute daughter; and the sire of 122N is a heifer bull. Performance shines through this playful fella on what we have seen out of LRPS 0184H and of course 48E.

*Sire of 122N is assumed at this point but will be DNA Verified by sale time.*

## GVR 124N

#APPLIED FOR | GVR 124N | FEB 2, 2025 | HOMO POLLED | PUREBRED
