

28<sup>TH</sup> ANNUAL  
ANGUS BULL SALE

SATURDAY . MARCH 21 2026

AT THE FARM | GLENBORO, MB | 1:00 PM

*Quality genetics in volume*

# HAMCO CATTLE CO.

We would like to welcome everyone to our 28th Annual Hamco Bull Sale. Our bull sale day is our most important day of the year & we are very appreciative for the great customer support we have received and the many friends we have made over the last 28 years. We are very thankful & honoured to be able to deal with a great group of cattle producers.

This past year has seen record high cattle prices again & it is great to see determined producers that stayed in cattle business get rewarded. This past year there were excellent growing conditions and our pastures were great all season long and the forage crops were very good. It is also great to see new beef producers entering into the cattle business. The weaning weights were up and the calves have been very healthy & developed very well on the high forage post weaning ration. The cattle markets look very good for the next number of years. Cull bull prices are also at an all time high. A great time to add new genetics to your herd!

We are very proud of our bull offering this year. We maintain our herd at about 525 cows (50% Red Angus, 50% Black Angus). We add about 120 heifers per year and cull our herd aggressively. We select our bulls from about 260 bulls born every year. Over the years our clients seem to be looking for bulls with good calving ease & then good growth. As you review our catalogue you will see we have produced a large number of bulls that are born with lighter birth weights that go on and grow once they hit the ground & have impressive weaning & yearling weights. We do not creep feed prior to weaning so it is impressive to see how well these calves do on mother's milk & pasture. The other important thing to point out is that our 3 star calving ease bulls can be used on cows as well. You will not see any drop in the performance of the calves but you can enjoy the convenient calving ease & vigor at birth.

The selection of a herd bull is a very important decision for your farm as your herd bull contributes 50% of your calf's genetics. For the most part, herd improvement comes from the bulls and it has been estimated that over 80% of herd improvement is directly attributed to bull selection. We feel we can provide the genetics to take your herd in the direction you need to go. We have a good selection of bulls suitable for heifers \*\*\*, bulls that would work on cows or well grown out heifers \*\* and some we recommend only using on cows\*.

As breeders we believe we should provide as much information as possible so you can make an informed buying decision. We provide you with as much current information as possible in the catalogue. The bulls were weaned October 14, 15, 16, 2025 and were started on a 83 day home test (Nov 14 to Feb 6). The information in this catalogue is current to Feb 6, 2026. Scrotal measurements were also done Feb 6 and at this age yearling bulls will add approximately 1.5 cm per month so the scrotals will be at least 2–2.5 cm larger or more by sale day. Two year old bulls were also weighed and scrotal measured on Feb 6, 2026. Most of the yearling bulls will be about 140 lbs heavier by sale day. All bulls in the sale will have a breeding soundness evaluation prior to the sale. Updated scrotals & weights will be available by sale day.

We would like to thank Stewart Bertram, Mark Abbey, Mitchell Graham, Brayden Hykaway & Corland Keyes for their hard work and dedication on the farm. We would also like to thank our families and friends for their support and hard work to help us put on the bull sale.

We are very fortunate to be involved with the Angus breed. An Angus bull is the king of crossbreeding and will provide performance and desirable carcass traits to your herd while maintaining calving ease, high conversion rates, maternal strength, easy fleshing ability and the Angus vigor at birth. The resulting hybrid vigor is still one of the best deals in the cattle industry. Remember all Angus bulls are homozygous polled. As many farmers are expanding their herds, it is important to consider the Angus breed for their strong maternal genetics. Having Angus genetics in your cow herd is always a good thing.

Our program's main target is to produce Angus bulls for the commercial producer and we are honored that our bulls have entered many top commercial programs. Managing a larger herd forces us to think like a commercial producer. We believe we have a number of bulls in this sale that would offer some excellent genetics to purebred herds as well.

Please call us if you have any questions about our bulls or our program. Again this year we will have a video sale in our large heated work shop. The bulls will be penned outside the sale facility & can be viewed prior to and during the sale. The bulls will also be in their pens at the bull yard prior to the sale. We encourage you to come prior to the sale to view the sale bulls. Videos of all the bulls will be available to view online about 2 weeks prior to the sale. Most of the bulls were pictured and we encourage you to review all the bulls by watching the videos as well.

Again this year we will have online bidding through DLMS for anyone that is unable to attend the sale. We still have our Sight Unseen Program available and you can bid on the phone if you prefer.

Thank you for the interest in our program and please contact us if you have any questions.

Kyle, Larissa, Glen, Carleen, Nyla, Nova,

Jeremy, Julie, Kaitlyn, Derek, Shelley, David,  
Brinley & Baylen Sophie & Molly

## How To Read This Catalogue

### Calving Ease Code

This is our best estimate based on EPD's, actual birth wt & body shape. Take into consideration your own cow herd genetics, environment & feeding.

- \* Use on Cows
- \*\* Use on Cows & well grown out heifers
- \*\*\* Very few calving problems when bred to first calf heifers

### Frame Score

Is a height measurement at a point directly over the hook bones of the pelvis. That measurement is then put into a formula that adjusts for the age of the bull. Frame score is a convenient way of describing the skeletal size of cattle. Most animals should maintain the same frame score throughout their life while actual height increases with age. No one frame size for an animal will be best for all feed resources, breeding systems & market specifications

## EPDs

**Calving Ease Direct EPD:** Predicts the percentage of unassisted birthings expected from an animal's calves. This EPD reflects a combination of gestational growth and a calf's conformation. The higher the CED EPD, the more likely it is that the animal's calves will be born without assistance.

**Birth Weight EPD:** Expressed in lbs, predicts on average how much heavier or lighter than the breed average an animal's calves will be at birth.

**Weaning Weight EPD:** Expressed in lbs, predicts comparative progeny weight at 205 days of age; reflects pre-weaning growth potential that an animal is expected to contribute to its calves.

**Yearling Weight EPD:** Expressed in lbs, predicts the differences in progeny performance at 365 days; reflects the animals calves' potential for post-weaning growth.

**Milk EPD:** Expressed in lbs of calf weaned, this is a prediction of an animal's daughter's milking ability.

## CANADIAN ANGUS ONE GENETIC EVALUATION

Please note that the EPDs listed in this sale catalogue are the product of the Canadian AngusONE Genetic Evaluation. These EPDs are calculated by Angus Genetics Inc in partnership with the American Angus Association. Therefore, EPDs for Canadian Red Angus, Canadian Black Angus, and American Black Angus animals are directly comparable to each other. This is a completely new base for Canadian Red Angus in 2019, so please be advised that the EPDs are not comparable to 2018 or earlier EPD's for Red Angus. These EPDs are on a completely different scale, so please familiarize yourself with the new Breed Average and with the new threshold number for traits of importance to you. The new AngusONE breed averages are shown below to help you adjust to the new base. Percentile rank graphs for each animal are easy to use and available at [www.cdnangus.ca](http://www.cdnangus.ca). The right EPD for you will depend on your cow herd, your management, and your breeding goals.

Combined American & Canadian EPD's	CED	BW	WW	YW	Milk
Average EPDs of all <b>Black</b> Angus calves born in 2025	+3.3	+2.0	+56	+99	+24
Average EPDs of all <b>Red</b> Angus calves born in 2025	+2.3	+1.3	+44	+75	+25

## Management of Hamco Bulls

The yearling bulls were all born in late Jan, Feb, March of 2025 and were weaned on Oct 14, 15 & 16, 2025. They did not receive any creep feed prior to weaning. The bulls were then developed on a carefully balanced total mixed ration (TMR). On a dry matter basis they were fed 50% alfalfa grass hay, 50% corn silage & the grain (oats, corn & supplement) was gradually increased over the first 2 months. By Dec 25, 2025, the bulls reached their final ration (dry matter basis) consisting of 20% alfalfa grass hay, 45% corn silage, 35% grain mix (corn, oats, canola meal & supplement). The bulls should never have had more than 10 lbs of grain/protein mix per head per day. The TMR ration gives us complete control of the ration and insures that every bull receives the exact same feed. Bulls developed on a high forage TMR ration should never develop acidosis and laminitis, and should be healthy and be able to perform for years. The bulls are developed in a 4 acre pen & get a lot of exercise and should be athletic and ready to breed. We will continue to develop the bulls after the sale. The two year old bulls were similarly managed as yearlings and then maintained on a high forage ration. They were fed a high forage TMR with plenty of exercise in a 20 acre pen. They are not over conditioned and should breed well.

## Health Status

This is a healthy group of bulls. They have all received 3 doses of MLV (IBR, BVD I & II, PI3, BRSV, Haemophilus) and 3 doses of 8-way blackleg vaccine. They have been treated with Ivermectin pour on and Boss twice. They have received 2 injections of Fusoguard - a foot rot vaccine that is usually effective in preventing foot rot - a condition you would certainly like to avoid in a breeding bull.

Birth—Inforce 3 (Intranasal IBR, PI3, BRSV)

Pre Breeding (April) -(Calves) - MLV IBR/BVD I & II, PI3, BRSV, Pasteurella, & 8-way Blackleg

Pre Breeding— (Cows) - MLV IBR/BVD I & II, PI3, BRSV, Lepto, Late Fall (Cows) - Scour Vaccine & 8-way Blackleg, Ivermectin

Mid July (preg check) -(Calves) Deworming on pasture (Longrange), 8-way Blackleg, IBR, BVD I & II, PI3, BRSV, Haemophilus

Weaning (October 14, 15, 16, 2025)-Ivermectin pour on & 8-way Blackleg & Fusoguard(Foot Rot Vaccine– Bulls)

November 14, 2025 - Fusoguard & IBR, BVD I & II, PI3, BRSV, Haemophilus, test start weights,

February 6, 2026 - Weigh yearlings, scrotal measurements, frame score measurements, Boss pour on

February 6, 2026 - Weigh 2 yr olds, scrotal measurements, Boss pour on

March 9 & 10, 2026 - Semen test yearlings & 2 year olds (Fusoguard, IBR/BVD I & II, PI3, BRSV, Haemophilus, 8-way Blackleg)

Our whole herd is on a strategic vaccination and parasite control program to insure our bulls stay healthy. However we know BVD is a potentially hidden yet devastating disease, & bulls can be carriers of the BVD virus (both from acute infection & as persistently infected (PI) carriers). Our vaccination program insures that BVD should not be a problem in our bulls. *You can be assured that when you purchase a bull from us that the bull is PI negative and is not a carrier of the BVD virus and he is adequately vaccinated against BVD.* We manage the feeding of the bulls very carefully. With our high forage TMR ration we were able to start the bulls on feed gradually & experienced no digestive upsets. On a 83 day test, the 210 bulls had an ADG of 3.58 and WDA of 3.27. We will continue to develop the bulls after the sale & insure a smooth transition from our ration to the grass based ration they will receive during the breeding season. All potential carriers of genetic defects have been tested, and as far as we are aware there should be no carriers of known genetic defects in the bulls.

## Sight Unseen Program

We realize you may not be able to attend our sale in person. You have several options.

- 1) DLMS on line bidding—be sure to register prior to the sale
- 2) On the phone live bidding. Please be sure to call prior to the sale so we can have someone on the phone with you.
- 3) Sight Unseen Program—Those who are interested in this plan are urged to call Larissa or David with your specifications & discuss the offering & will gladly assist you with sale selections & have someone represent you on sale day. Every effort will be made to buy you the right bull or bulls, at the right price to make you a happy, repeat customer. If for any reason you are not satisfied with any of the bulls you purchased on order, you are under no obligations to accept them.
- 4) Contact any of our sales staff to discuss & they can bid on your behalf.

## Semen Rights

Hamco would like to retain the right to possibly collect semen from a few bulls in the sale. At the new owners convenience and at our cost we reserve the right to collect semen from any bull in the sale for in herd use only. We can also collect and freeze semen for the new owner if they wish. This can usually be done prior to delivery.

## Free Board Till April 15, 2026

We will keep your bull up to April 15, 2026 at no additional charge.

Bulls are managed at the new owner's risk. After April 15, 2026 we can continue to board your bull for \$3.50 day.

## Volume Discounts on Bull Purchases

Take advantage of our Volume Discounts on bulls purchased through this sale.

2 bulls -2%	5 bulls-5%	8 bulls-8%
3 bulls -3%	6 bulls-6%	9 bulls-9%
4 bulls -4%	7 bulls-7%	10 bulls-10%

## Hamco Bull Guarantee

We guarantee to sell you a bull that is structurally sound, & has passed a breeding soundness evaluation. Should the bull fail to be a satisfactory breeder—unable to physically breed a cow or heifer, he will be replaced with a bull of equal value or credit given towards the purchase of another Hamco bull. In the event that your bull is a non-satisfactory breeder, we, the seller, will not, under any circumstances, be responsible for more than the original selling price of the bull in the sale. We will make sure you have a bull to get your cows bred. We however, will not provide replacement or adjustment for physical injury or mismanagement. We do not guarantee that semen collected from these bulls will freeze. To further protect your investment beyond our regular guarantee program Hamco offers the

## Hamco Extended Guarantee

While under the Extended Guarantee, the regular bull guarantee is extended to include injury, sickness or death along with the bull being unable to settle cows after the sale.

If a bull is injured and unable to breed, dies or has to be shipped, Hamco will service your needs with a replacement bull of equal value, or a sale credit, or a cash settlement and if necessary a loaner bull will be provided to finish the breeding season.

Should an issue arise with your bull please notify Larissa by phone or email. You will need to contact a licensed Veterinarian to diagnose and treat the bull and fill out a veterinary report.

Contact us for more details.

**Reasons to Buy a Hamco Bull!!!**

- 1) Bulls are selected from a group of 260 bulls & only the good bulls make the cut and sell.
- 2) Our herd is on the Canadian Angus Association performance program. Complete performance data is available & published—birth wt, weaning wt, yearling wt, ADG, WDA, frame score, scrotal circumference, EPD's, calving ease,
- 3) All bulls sold have passed a semen test & a Breeding Soundness examination. The bull you buy will have scored satisfactory on a Breeding Soundness examination
- 4) Bulls are developed on a high forage TMR ration for optimal development.
- 5) Bulls are quite tame, and they have lots of exposure to people as they are walked through daily & we select for good docility.
- 6) We will manage your bulls and keep developing them free of charge until April 15, 2026 and for \$3.50 day after April 15, so that you don't have to worry about your bull until you need him to breed.
- 7) We will deliver your bull to your farm or haul your own bull sale day and receive \$100.00 off each bull purchased.
- 8) Our herd & the bulls are on a strategic vaccination program. Guaranteed BVD PI free and well protected against many diseases including foot rot.
- 9) Large Genetic base—we use top AI sires, elite embryo donors, and strong herd bulls. We offer a diverse package of genetics and if you have bought bulls from us before, there are numerous unrelated bulls in the sale.
- 10) Hamco Cattle Co Bull Warranty program (see page 5 or contact us for details)

- \* **Topp 38 Special 1004** (Caliber) is an ET son out of the popular, proven AI sire **Baldrige 38 Special** and the great donor cow **Topp Ruby 5307**. Ruby is also the sire of the popular sire **Topp Standard** that **Greenwood** has had so much success with
- \* He is a full ET brother to **Topp 38 Special 1016 (Revolver)**
- \* Very good EPDs CED, BW-top 10%, WW, YW-top 30%
- \* We have been impressed with the way this bull has bred, He was put out last year to breed a late group of cows so most of his calves are too young to sell as yearlings in this sale. Will be a lot more in the sale next year.

**Terms:** The terms of sale are cash or cheque payable at par. Settlement to be made immediately after the completion of the sale. All settlements must be made with the clerk of the sale before any cattle will be released.

**Disputes:** In case of disputes, bidding will be re-opened between the parties involved. If no further bid is made, the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision of all disputes is final.

**Announcements:** All announcements made from the auction block will take precedence over the printed matter in the catalogue. Buyers should pay close attention to any such announcement.

**Purchaser's Risk:** Each animal becomes the risk of the purchaser as soon as sold.

**Accidents:** Although every precaution will be taken to protect the safety and comfort of buyers, neither the sale management nor the auctioneer assume any responsibility in this matter and disclaim any liability, legal or otherwise, in the event of accident or loss property.

**Liabilities:** All persons attending the sale do so at their own risk and sellers assume no liability, legal or otherwise, for any accidents occurring in or about the premises.
