Welcome everyone to our 16th annual bull sale! A big thank you to all our buyers, friends, and neighbours for all your continued support. Looking forward to seeing and visiting with everyone again Feb 26.

As we all know cattle prices are at an all time high and creeping steadily higher. There's no better time to invest in quality genetics. A bull that will sire sound functional females and thick stocky steer calves for years to come.

I'm very happy with the set of bulls on offer this year and will be glad to help anyone select the right bull for their program. Please don't hesitate to call or shoot me a text. The bulls are presented honestly with no feet trimmed prior to sale and no hot feed to hurt their longevity.

Bulls will be penned in small groups at the working pens by the feed yard south of the ranch the day of the sale. So please come early to take a good look. Or stop by anytime before the sale. At noon on sale day Chili and coffee will be available in the West Peace Metal's shop on the colony where the video sale will be held.

We offer second to none money back guarantee so buy with confidence!

Nat Tschetter

Watch, Bid & Buy Online

To view & bid visit [www.dlms.ca](http://www.dlms.ca), log-in with your username and password or sign-up for your free user account.

**BIDDERS** - click BUYER APPROVAL tab, select the sale you are interested in bidding at and click sign up.

For more information call:  
Mark Shologan 780-699-5082 or Purebred Team 780-991-3025

**CANADA'S ONLINE SEEDSTOCK SOURCE.**

***Vaccination Program:***

All bulls had Bovishield Gold One Shot and Ultrabac 7 with sommugen at 6 weeks of age, then again at weaning and again the following fall. Also a dewormer.

***Breeder's Guarantee:***

Bulls have been semen tested and guaranteed sound. We have a second to none money back guarantee, some conditions apply. Buy with confidence!

***Volume Discounts:***

- 3 bulls - 3% Discount
- 4 bulls - 4% Discount
- 5 or more bulls - 5% Discount

***Delivery:***

We offer free delivery in Alberta and to central parts of Saskatchewan and BC.

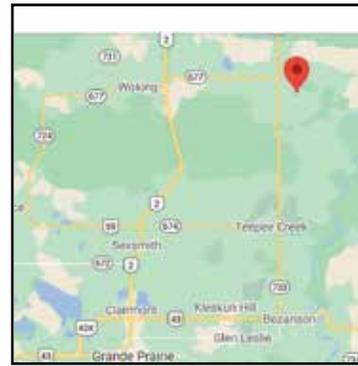

***Board:***

Due to feed shortages, we will be starting to make delivery trips in March. Starting April 15 we will charge \$5/day for bulls still on the farm as hay will need to be bought to keep them here. All bulls staying on the farm will need to be insured.

***Liability:***

We will not be liable for any injuries.

# A note about the cow herd & bulls

We start calving the purebreds April 1 and calving ease has always been a big part of the program. We do not check during the night when it is above -10. Nature has a way of taking care of itself until the human gets involved. Since 1992, George has always used sires with birth weights between 80 to 90 lbs. Every herd sire breeds heifers and cows until the day he retires. Resulting calves are expected to grow and wean at 40 to 50% of the dam's mature weight by 205 days. Over the years, we found that cows with a mature weight of over 1,500 lb are less likely to wean a calf that is 50% of her body weight. The bigger the cow, the less efficient she is. Of course, there is a lower limit too, and one has to pay attention by keeping good records.

Once the cows have calved they are then moved onto bigger pastures with some stockpiled grass so they can spread out, get exercise, and there's less chance of calves getting scours or other sicknesses. We rotational graze throughout the summer. We do not AI and use all walking sires. Around the end of October or beginning of November we wean the calves. They get fed a daily ration of chopped hay, silage, and between 6 to 8 lb of oats throughout the winter. In Spring, at first sign of green grass, the bulls are put on pasture where they can be bulls and develop naturally until the snow starts flying. After calves are weaned, cows either stay on stockpile grass, swath grazing or bale graze for as long as possible, depending on the year and the weather. God intended cows to have a dual role, turning forage into good quality protein while at the same time building healthy soil. May we always keep that in mind as we keep breeding for better genetics.

Nat Tschetter  
Heart Valley Angus

## Disposition Ratings

**We have rated all the sale bulls in the catalog on disposition for your use, this is our criteria:**

- 5 - very quiet and comfortable being by himself
- 4 - good to be around but gets uncomfortable when being pressured in tight areas
- 3 - gets uneasy as soon as he is by himself or in a small area
- 2 - will be high headed and might go after human if he feels threatened.
- 1 - goes after human , is not fit to sell or keep as a bull

## Calving Ease Ratings

- 5 - use on heifers confidently
- 4 - use on bigger heifers may have to assist a few
- 3 - not recommended to use on heifers, use on second calvers or cows.
- 2 - use on cows with confidence
- 1 - use on cows may have to assist the odd one

### **A NOTE ON CALVING EASE**

Calving ease is more than just birth weight, for over 35 years, no herd sire has been used in this herd with over a 90 lbs birth weight. Every sire we use walks the pastures and breed both heifers and cows. During calving we don't check during the night, assisting a cow happens very rarely, and if a cow needs assistance more than once she's not kept around.

Our bulls have been raised for generations to naturally breed big groups of cows, and cover a lot of country. It is most likely that a docile bull will not cover as many cows as one with some spunk, so please pay attention to the docility score. If you only have a small outfit that only requires one or two bulls, get one with a 5 disposition score. We cull vigorously, and all bulls in the catalog handle well when not singled out or they wouldn't be for sale. We stand behind our product so buy with confidence!

# Ranch Horses- for Sale

## Sound, Solid, Well-Trained Ranch Horses

*We're raising the kind of horses we would like to buy! All of our horses start with the best bloodlines that we know of like Doc Bar, Shining Sparks, Smart Little Lena, Doc O'lena just to name a few!*

*These horses are raised the natural way. They are all handled as foals and keep getting attention until they are started as two-year olds. From there we don't force them to do things. We make the right things possible and the wrong things difficult.*

*By the time they are four, they are willing partners and that's when we recommend you buy them. They are for sale by private treaty, and we offer a full year SATISFACTION GUARANTEED or your money back.*

A big volumed bull we bought as a mature herd bull from the good folks at 6U. They originally got him from Chapman Cattle Co. and what a cool breeding piece he has been. He covered a group of cows effortlessly at 11 years old and is still sound and perfect footed. He catches the eye of everyone touring thru through the bull pen.

DDA HOLLY 084

Payweights are known for rapid growth and exceptional carcass quality which are both traits we select for. Females sired by him are moderate with nice level udders, good feet, and ample milk. They will very likely be able to consistently wean above 50% of their body weight.

**Dam of Raptor 227K**

A bull we sourced from Hamco Cattle out of Manitoba. We strive to source herd bulls from unpampered outfits since it plays such a big role in the epigenetic potential that's passed on to the offspring. His offspring will improve udder structure and add fleshing ability, also unbelievable growth spread from calving to weaning. AVG BW on calves 79lbs, AVG 205 weight 723 lbs.

**HVE 8M**

Extremely powerful bull here. Used him on some purebred cows to test him this summer. His dam is the best black cow on the ranch and has always had a ripper for a calf. I would not worry about the birthweight on him as he could have gone overdue a little. We have his full brother in the yearling pen with an 85lb birthweight.

# Anything But Status Quo

INNOVATIVE LIVESTOCK NUTRITION SOLUTIONS THAT REDEFINE  
WHAT'S POSSIBLE.

## WHY BY-O-REG?

BY-O-REG ALL-NATURAL PRODUCTS ARE CRAFTED WITH MULTI-FACETED INGREDIENTS DESIGNED TO DELIVER MORE THAN JUST NUTRITION. EACH FORMULA IS CAREFULLY DEVELOPED TO SUPPORT KEY AREAS LIKE PERFORMANCE, INTAKE, GUT HEALTH, STRESS CHALLENGES, IMMUNE FUNCTION, AND REPRODUCTION. WITH A FOUNDATION OF TRUSTED, ALL-NATURAL INGREDIENTS, BY-O-REG ENSURES YOUR LIVESTOCK GETS THE COMPREHENSIVE SUPPORT THEY NEED TO THRIVE.

## JUST BECAUSE YOUR CATTLE ARE HIGH-PRICED DOES NOT MEAN YOUR MINERAL SHOULD BE

At Keddie's, we offer house mineral blends designed specifically for Peace Country Cattle. We provide:

- Custom mineral blends tailored to your herd and forage
- Chelated mineral options where they make economic sense
- Mineral programs designed around your production goals and budget

Whether you need a proven house blend or a fully customized mineral, we will design a program that works for your operation
