WELCOME

Welcome to our 8th Annual Bull and Female Sale! If you have been with us from the start, THANK YOU we sure appreciate your support of our program. If your new, Welcome...we hope you can plan a time to walk thru our cow pens and pastures to see for yourself what we feel makes a great Angus herd; great Angus females! We spend countless days touring cattle searching for genetics that will work back home for us. These many miles have certainly improved our cow herd and bull sale offering; and we have made some wonderful Angus friendships along the way.

We hope you love the Open Range crosses as much as we do, they have exceeded our expectations, and we are going to continue to use him heavily in our program. We would like to introduce you to Stellfplug KADE 2050, a mature bull that has the best feet of anything bull we have seen; last but not least the Tango bull is going to see more use in 2026, and we are excited to cross some Open Range females that way.

The bulls were weaned Sept 12th and brought along slowly for longevity, on Zoetis herd health, two doses of foot rot vaccine and semen tested prior to sale day.

If you are in the market for some straight Angus commercial females we have 3 groups of 5 on offer this year.

Sale day is Thursday March 19th at 2pm at the Parkbeg Ranch, we hope you can join us for some hospitality and if not, you can watch online and bid with confidence on DLMS. Please give us a call with any questions or assistance with your selections.

Sincerely JP and Marlene

Josee Justin and Hudson

JP & Marlene

Colton

Schedule of Events

WEDNESDAY March 18th 2 pm
Bulls will be ready for viewing at the sale location

THURSDAY March 19 SALE DAY
Lunch is served at 12 noon and Sale starts at 2PM

HIGH-DENSITY GENOMIC TEST

Genomically enhanced GEPDs can be up to 40% more accurate than EPDs.

On young animals, this gives Canadian Angus members and their commercial customers the ability to identify animals with superior genetic merit or breeding value with more accuracy. Considering there is little room for mistakes in the cattle business, this investment in genomics and additional accuracy is invaluable.

Angus HD testing is an investment that some Canadian Angus breeders make to enhance the information available to their customers.

Genomic technology contributes to:

1. More accurate EPDs, particularly on younger, unproven animals, and
2. EPDs for traits that are difficult or expensive to measure like tenderness, marbling, docility, foot angle, claw set, and feed efficiency.

TEST INCLUDES PARENT VERIFICATION

GENOMIC PERCENTILE RANKS DEFINITION OF TRAITS

Calving Ease Direct (CED)

Is an indicator of an animal's genetic potential for unassisted births in first-calf heifers. Animals in the top 20th percentile of the breed indicate more direct calf calving ease than animals in the bottom 80th percentile.

Birth Weight (BW)

Measures genetic potential for calf weight at birth. Animals in the top 20th percentile of the breed indicate lighter birth weight calves than animals in the bottom 80th percentile.

Weaning Weight (WW)

Is a measure of genetic potential for calf weight at weaning. Animals in the top 20th percentile of the breed indicate more pounds of weaning growth than animals in the bottom 80th percentile.

Yearling Weight (YW)

Describes an animal's potential for calf weight at one year of age. Animals in the top 20th percentile of the breed indicate more pounds of post weaning growth than animals in the bottom 80th percentile.

Yearling Height (YH)

Characterizes an animal's genetic potential for height or frame. Animals in the top 20th percentile of the breed indicate larger frame size than animals in the bottom 80th percentile.

Mature Weight (MW)

Is an expression of genetic potential for mature cow weight at six years of age. Animals in the top 20th percentile of the breed indicate larger cow size in pounds than animals in the bottom 80th percentile.

Mature Height (MH)

Characterizes the genetic potential for mature cow height at six years of age. Animals in the top 20th percentile of the breed indicate larger cow size in frame or hip height than animals in the bottom 80th percentile.

Dry Matter Intake (DMI)

DMI is a predictor of difference for feed intake during the postweaning phase. Animals in the top 20th percentile of the breed indicate less requirement for dry matter intake, or less appetite, than animals in the bottom 80th percentile.

Calving Ease Maternal (CEM)

Characterizes an animal's potential for unassisted births in first-calf daughters. Animals in the top 20th percentile of the breed indicate fewer assisted births in first calf heifers than animals in the bottom 80th percentile.

Milk (MILK)

Is a measure of milk and mothering ability as expressed in daughters. Animals in the top 20th percentile of the breed indicate more pounds of weaning weight in calves through the dam's milking and maternal ability than animals in the bottom 80th percentile.

Scrotal Circumference (SC)

Is a measure of genetic potential for scrotal circumference, a predictor of bull fertility. Animals in the top 20th percentile of the breed indicate more yearling scrotal size than animals in the bottom 80th percentile.

Docility (DOC)

Is an animal's genetic potential to be extremely calm, or to have calm offspring. Animals in the top 20th percentile of the breed indicate more docile animals than animals in the bottom 80th percentile.

Heifer Pregnancy Rate (HP)

Is used as a tool to increase the chance of a sire's daughters becoming pregnant during a normal breeding season. Animals in the top 20th percentile of the breed indicate more probability of daughters becoming pregnant at first exposure than animals in the bottom 80th percentile.

Carcass Weight (CW)

Is a genetic predictor of hot carcass weight as measured at harvest time. Animals in the top 20th percentile of the breed indicate more pounds expressed than animals in the bottom 80th percentile.

Fat Thickness (FAT)

Is a predictor of the differences in back fat thickness measured between the 12th and 13th ribs, with animals in the top 20th percentile having potential for less back fat than animals in the bottom 80th percentile.

Ribeye Area (REA)

Characterizes an animal's genetic potential for ribeye area size, with animals in the top 20th percentile having potential for a bigger ribeye area than animals in the bottom 80th percentile.

Marbling (MARB)

Is an expression of marbling score, with animals in the top 20th percentile having more intramuscular fat than animals in the bottom 80th percentile.

Tenderness (TND)

Represents genetic potential for Warner Bratzler shear force or steak tenderness, with animals in the top 20th percentile having more tender steaks than those in the bottom 80th percentile.

Claw Set (FC)

Represents the genetic potential for symmetrical toes that don't scissor or spread to far, with animals in the top 20th percentile having better feet than those in the bottom 80th percentile.

Foot Angle (FA)

Represents the genetic potential for 45-degree pastern joint, with animals in the top 20th percentile having more ideal foot angle, toe length and heel depth than those in the bottom 80th percentile.

Functional Longevity (FL)

Is an indicator of the genetic potential of a sire's daughters' ability to stay in a herd and produce a calf every year. Animals in the top 20th percentile will have daughters who produce more calves at age 6 than animals in the bottom 80th percentile.

Teat (TEAT)

Is an expression of genetic potential for small cylindrical teats at calving, with animals in the top 20th percentile having smaller and more cylindrical teats than those in the 80th percentile.

Udder (UDDR)

Is an expression of genetic potential for tightly suspended udders at calving, with animals in the top 20th percentile having smaller, tightly suspended udders than those in the 80th percentile.

FIVE ROLLS OF AGED TRIPLE SMOKE ALL BEEF CHARCUTERIRE SAUSAGE FUNDRAISER

All Proceeds will be donated to Huxley Berting

When the cattle industry sees a need we come together to help. If you know JP, you know about Triple Smoke All Beef Sausage. Garry and Donna Berting of Middle Lake first introduced us to Triple Smoke, many of you probably have met them at our bull sale. We have had so many inquiries to purchase Triple Smoke that we are donating 5 rolls (approx. 2.5 lbs. each) to support Huxley Berting expenses as he travels twice weekly physio appointments in Regina. Please help us help a great young cattleman.

A NOTE FROM AUCTIONEER

DONNIE PEACOCK

Mark the calendar, March 19 for the 8th Annual JPM Farms Bull and Female sale. The first time I auctioned for JP & Marlene the cattle were very good, it's amazing; given how strong that first offering was to see the massive improvement in this herd. A program with a mission and a passion. JPM is an industry treasure. Please join us to share that passion! See you sale day!!

Donnie Peacock
(306) 662-8266

VETERINARY SERVICE PROVIDER

JP and Marlene Monvoisin of JPM Farms at Gravelbourg are a premier cattle breeding operation that we have had the privilege to work with for many years. Their operation focuses on high quality genetics and high-quality herd health. These goals are achieved by strict genetic selection, targeted culling and an optimal herd health program. We work prudently with JPM Farms to ensure that the best preventive medicine and protocols are implemented at each stage of development. Their animal treatment knowledge and animal handling skills are excellent. I would not hesitate to purchase an animal from such a well-managed operation.

Dr Terry Goslin of Peak Animal Health

- When we say we would breed every single cow we own to Open Range it isn't an exaggeration... I am quite sure he could get the job done, very few bulls are that efficient of breeders. His daughters are very feminine and correct as yearlings and just grow into themselves keeping that distinct front end with tons of milk and exceptional udders. Open Range has proved himself to be a calving ease sire mostly because of his phenotype; smooth shouldered with authentic Angus breed character and gender specific traits. We bred 100% of our commercial heifers to Open Range in 2024. Open Range will improve overall maternal qualities, structural integrity, fertility, and calving ease with extra performance. His full sisters: EA Bells Girl 1064 and 1144 are at the top of the Ellingson donor pen, proving that know matter how they are bred, they are producers. He is a direct son the iconic donor EA Bells Girl 2181, Open Ranges maternal sister; EA Bells Girl 7617 produced the well known Ellingson Badlands 0285, Preeminent, Progressive, Elite and Brickhouse, a true testament to the maternal excellence of the Bells Girl family.

- It is a real honor to lead off our 2026 offering with a top and bottom bred JPM Farms natural born bull, JPM OLD POST 150N. Calving ease through and through plus big-time performance. This is a bull we would be comfortable using on every single commercial heifer we own. The value of a true heifer bull when your selling bred heifers is immeasurable... these calves will have lots of vigor and grow and the females will make the replacement pen. The granddam is CA Brill Miss Evergreen 101, one of the best cows to ever come from the Sankey program and the grand sire is HA Cowboy Up. In our very first bull sale, JPM Reride 75F sold to Kody Traxel of Seven Persons, AB; Reride 75F went on to sire bulls with great feet and lots of scrotal. We are going to use him back heavily in 2026.

HEIFER SELECT PROGRAM

The Heifer Select Project is a unique opportunity for commercial producers to make heifer retention decisions informed by data and genomic technology—including sire verification and genomic predictions for traits such as growth, female productivity, and carcass quality.

If you are a commercial beef producer using registered Angus, Hereford, or Charolais sires and you are interested in:

- Learning how genomic tools can improve replacement heifer selection decisions
- Exploring how data-driven insights support herd performance and profitability
- Discovering the current economic value of replacement heifers

Contact the Heifer Select team at Genomics@HeiferSelect.ca

Heifer Select is funded by Results Driven Agriculture Research (RDAR) through the Sustainable Canadian Agricultural Partnership (Sustainable CAP).

- We are firm believers in sourcing mature proven bulls; We first saw Kade 2050 as a yearling at Rob Garners and we were very impressed with his foot structure and depth of heel. That fall we were touring in Nebraska and discovered the Sitz Henrietta Pride Y2 donor cow, WOW she is a model angus female. Combining the extension and femininity that Y2 adds and the structure of Barricade 632F we think Kade 2050 a total package and the foot improver everyone is searching for. A strong genetic outcross for our customers. Thank you to Nordal for allowing us to partner on this proven sire.

• I'm not exactly sure what everyone else is saying about Barricade 632F but I know when we went touring a couple of falls ago, we were consistently seeing Barricade daughters that naturally came to the top. It was in part why we were so confident using Stellpflug Kade2050 so heavily in our program. As there is virtually no semen left in Canada on 632F, JP used his contacts and located a few straws; Lots 19 & 20 are a result of the mating with the CFS Erica 34X donor. We let Erica 34X go last spring at the age of 15, still sound with that tight, tight udder. Long sided with excellent feet these bulls will get some attention on sale day.

Donor dam CFS Erica 34X at 14 years old

- Ellingson Profile was the Lot 2 bull at the 2024 EA production sale, flushmate to the \$300k popular AI sire Ellingson Prosper. Absolutely amazing the amount of grow these cattle have, unfortunately we lost Profile and this is his only calf crop and they were mostly heifers...good for us and not so great for our customers. I am quite sure we will see some great cattle come from these genetics in the very near future.

THANK YOU

We could not do this alone!! Thank you to our family and friends that are like family for everything you do. Thank you to our neighbors for always lending a hand. we are so fortunate to have such a wonderful friendship with each of you.

SPECIAL THANKS TO

Colton Monvoisin

McCoy Munteanu

Kevin and Darlene Goruick
Thank you for helping Sale
Day

- Colton Monvoisin for showing up every day and giving your all.
- Our Mom and Mother-In Law. Paula Monvoisin for always making sure we are fed and taken care of. You truly are amazing!!
- Josee, Justin and our precious Hudson for always checking in and giving us the greatest gift ever- being a grandparent
- Trevor Johnson aka "Dr J" for feeding and checking on the Parkbeg place.
- McCoy Munteanu for giving us so many of your extra hours.
- Nutritionist Jack Fisher
- Our veterinary health providers: Peak Animal Health and the Animal Hospital of Assiniboia
- Our embryology clinics BoviGen- Moose Jaw and Bow Valley Genetics – Brooks AB
- Sale Day Staff: Donnie Peacock. Darlene and Kevin Goruick and lunch provider, Bonnie Clubbe.
- Michelle Brice of Branding Smoke Photography for capturing our sale day images.
- Tyler Harris for the superb photos and videos including all the help getting this huge task accomplished.
- Colton, McCoy, Jonathon, Hunter, Barney, Kade, Clint, Byron and Josee for picture and video help.
- Caryl Cammack for putting it all together in this beautiful catalog.
