From Thunder Lake - 2 KM North from Thunder Lake Corner to the Stop Sign. Go Straight (Gravel Road) until TWP RD 602, Turn Right.

Go 1.5 KM to RNG RD 51A Turn Left. 2 Miles North until T (TWP RD 604). Turn Right 1st Place on the South Side.

Cell Phone - Text Wayne Branden (780)674-7867 for A Pin to the Farm.

Welcome to the 5th Annual JW Cattle Corp. Bull and Commercial Bred Heifer Sale. New this year, we are excited to host a live sale at the farm on March 5th at 1:00 p.m.

We would like to sincerely thank our past, present, and repeat customers for their continued confidence in our program. Your support over the past 30 years is truly appreciated and does not go unnoticed.

There has never been a better time to be in the cow/calf business. With cattle prices as high as they've ever been and strong demand ahead, we believe the outlook for the industry is as positive as it has ever been.

In 2011, we made a significant shift in our program by moving to an April/May calving season and marketing bulls at 21-22 months of age. This allows us to develop bulls with longevity and real-world functionality in mind. Every bull in this offering has gone through a rigorous culling process based on phenotype, structural correctness, foot quality and quality of dam - the same traits we demand in our own herd sires. Our wet, soft summer conditions truly put feet to the test, making sound feet and quality udders a top priority in our program, now and always.

We take pride in being disciplined and consistent in our selection process. Approximately 60% of our calf crop is culled annually, ensuring customer satisfaction and leaving us with what we believe is a uniform, high-quality group of bulls and heifers that we are confident and proud to offer.

We strongly encourage you to come evaluate the bulls and heifers in person. We would be happy to show you the cow herd and any siblings, allowing you to make the most informed decision possible to benefit your operation. If you are unable to attend, please don't hesitate to call or text - we will gladly offer our honest opinion, just as if we were selecting bulls for our own program. Mark from OBI Livestock Ltd. or Shane from Castlerock Marketing will also be available to assist you.

Thank you again for your interest and support. We look forward to visiting with you and hope to see you March 5th at the farm.

Sincerely, Wayne, Jane, Logan & Keaton

	1.7	51	83	31		82	695		

59M is a powerful, heavy made bull with as much middle depth and thickness as any we have raised. He maintains excellent structural soundness and travels on outstanding feet. The dam, 26A, has been a productive producer for us with sons selling to Neil Molzahn, Shane Allen and Keith Sotlar with another 3 daughters retained in the herd. The sire, Merit Mr. Wilson 1046J, has done a great job here adding power, hair and consistency. His sons are early maturing and his daughters have the predictability that 105A provides. Recommended for larger heifers or cows.

	1.3	58	99	28		80	676		

84M has all the pieces and is certainly easy to find. Combining moderate birthweight with an explosive phenotype. Masculine yet attractive in his makeup with a quiet disposition. His dam, 22H, has knocked it out of the park, posting an average weaning ratio of 113 on four calves. One that is destined for the donor pen with both her production record and look to match. Sound structured, deep sided and suitable for heifers. **RETAINING A 1/3 SEMEN INTEREST.**

Here’s another Mr.Wilson son that we like more every day. He catches your eye with an attractive, cocky, up-headed look backed by a super disposition. Moves around like a cat with above average heel. His dam, 51C, is as productive as any here with sons going to Dean Weigand (2023) and James Whalen (2025), along with three top daughters retained. She is easy-doing and sports a picture-perfect udder. Take a good look at 114M, he should have plenty of friends come sale day, as he is certainly the type we are trying to replicate. Recommended for larger heifers or cows.
RETAINING A 1/3 SEMEN INTEREST.

BLACK ANGUS 2 YEAR OLD BULLS

- Explosive in his design, with added crest and natural thickness
- Wide based and correct standing on a big hoof
- This will be our first set of 49G sons to sell, we were impressed with how he matured and bred on the commercial side, which led us to incorporate him into our purebred program after seeing the quality of his daughters. Being out of our 13D donor makes him a paternal brother to our high-selling bull last year, selling to HR Hahn Cattle Co. at Sherwood Park
- Recommended for larger heifers or cows.

- This fella has been an early standout displaying as much swagger and presence of any bull we've raised
- His dam, 84G, is a moderate, easy-doing, good-uddered cow purchased from the Poplar Meadows dispersal
- Awesome skulled and long made, he's heifer friendly yet a performance leader, topping the offering for Weaning and Yearling weights
- Steers will come easy and wean heavy and daughters should be as fancy as any with great udders

433M

BLACK ANGUS 2 YEAR OLD BULLS

- More moderate, long made type bull
- The last son of Freedom to sell, he consistently adds thickness to his progeny
- Granddam is the mother of 79M
- Adjusted weaning weight numbers up very well
- Cow bull that should calve easy based on his build

Here's the highest performing red bull and a true standout at that. A big framed bull by our standards, yet it's impressive how he maintains depth and capacity for his frame. He's been ahead of the curve in terms of performance at all stages. You'll notice several Freyja x Krimson bulls throughout this book, we used Krimson on many of our very best cows, and his dam, 7H, is no exception. She is an own daughter of our 30B donor, making her a sister to the 154E donor. This is the first set of Krimson sons we have offered, they are not extreme in any one area; rather, they bring consistency, dark red color, and strong maternal quality, with daughters that look to be long-term mainstays here. Use 6M to add pounds without sacrificing maternal traits. Recommended for cows.

D					T				

The most moderate made bull in the offering, unique in his type and kind, soggy, dark blood red with an attractive look. His dam, 55K, is a moderate, easy-doing, thick Little Deep daughter with a great udder. She is just beginning her story here and will be a key piece of our program moving forward, offering what we call 154E type feet the standard we strive to replicate. A full brother to 119M is a standout in the pen for next year. A true sleep at night calving ease bull that will add muscle, soundness and maternal strength.

	1.1	41	63	27		84	607		

Here's a feature heifer bull, correct from front to back. He may not stand out for being a high performing power bull but he's one that the more you look at him the more that can be appreciated. Ideal skull and front end design with that 154E type look to him. His dam, 154E, is ideal in so many ways for us, she has become our lead donor as we want to make as many of her as possible. She sets the gold premium for foot quality, if you are serious on honing in on feet, then this is a cow to keep an eye on. As for the production record, it speaks for itself, 3 sons have been highsellers in our bull sale along with a beautiful daughter retained in our herd. His granddam, 30B, has also been flushed for us, excelling in the fundamental traits that we prioritize. A younger bull with tremendous potential, he could quietly sire some of the best calves in the offering, backed by some of our best mother cows.

Here's a full brother to one of my favorite bulls that we raised and sold to Brendan Gerig in 2023. 124M is a spitting image of his brother at this stage of development, outlier thickness and muscle with good feet. His dam, 157E, is an excellent footed Regiment daughter that has consistently proved her stay here with yet another top end bull calf in the pen for next year. This late May calf takes the guess work out of things, bid with confidence on this young stud.

RED ROSEHOLM SPECIALIST 27J
 FULL BROTHER TO AJM 124M

RED ANGUS 2 YEAR OLD BULLS

- Dark red, stout, and big boned, this bull should produce an excellent set of steers in the fall
- Ranks highest in Weaning Weight and 2nd highest in Yearling Weight
- This will be last year of Specialist sons; the old bull was here until age eight
- Recommended for cows

- Another moderate Freyja x Krimson, combining our most prominent cow family with Krimson who has many of our top replacements should be a good match for anyone keeping females
- Brothers to Mark Killar and Trevor Mast
- Recommended for larger heifers or cows

139M

- Darkest red bull in the offering with a very strong, dark foot
- For being the youngest bull he has really caught up to the rest, will be interesting to watch this guy develop
- A heifer friendly bull with a little extra growth and size

Terms & Conditions

- All cattle sell under the standard terms and conditions set forth by the Canadian Angus Association.
- **Right To Collect Semen.** JW Cattle Corp. retains the right to collect semen on any bull in our offering for in-herd use only. Will be done at our expense and the new owner's convenience.
- Bulls can remain on farm until the beginning of April 2026. Purchasing insurance for bulls is strongly recommended to protect your investment. Bulls are left entirely at the risk of the purchaser after they are sold. Scrotal Measurements will be available 2 weeks prior to the sale. Insurance Agent: Canadian Farm Insurance - Jill Wildman (780)305-1146
- Invoices will be e-mailed to all buyers by JW Cattle Corp. following the sale. Full payment, unless other arrangements have been made, is required by cash or cheque payable in Canadian funds or e-transfer to jwcattle@mcsnet.ca. Customers who pick up bulls within 7 days of purchase will receive \$100 off the purchase price of the bull.
- We will deliver bulls free of charge to Alberta and Central Points in SK & BC.
- JW Cattle Corp. guarantees to sell you a bull that is structurally sound and has passed a semen test conducted by a licensed veterinarian. Should any bull fail to be a satisfactory breeder, he will be replaced with a bull of equal value. Should this not be possible, an adjustment will be made to reflect the bull in question as a credit towards the purchase of another bull. We do not warranty against mismanagement or injury/ illness after the sale and recommend insurance for this purpose. Call us right away if there is a problem and we will work with you to get your females bred.

- 100% Guaranteed & Free Delivery in Alberta and Central Points in SK & BC.
- Bulls are given 1st Shot of Fusagard for footrot prevention
- No Creep, raised on mother's milk and grass
- No feet trimmed, what you see is what it is, try to cull for feet and temperament
- These extra aged bulls can cover more cows/heifers
- Usually wean middle of November, once weaned, fed a ration to gain 2-2.5 lbs/day, then turned out to grass middle of May, then pulled off grass end of October, then fed a Bullseye Ration.
- \$100 Discount if you take the bull home within a week of the sale, any bulls staying at the farm MUST be insured.

35 Commercial Bred Heifers

We are excited to offer this year's group of bred heifers. We take great pride in our commercial herd, and these heifers come from some of our most productive, long-lasting cows. Years of rigorous culling have refined our program, removing cattle that didn't perform or thrive in our environment. From this foundation, we have selected only the most fertile heifers. These females are quiet, easy to handle, and we are confident they will add soundness, productivity, and longevity to your operation. Full herd health program. They got bimectin when preg checked October 16th as well will be given cyvence and their first shot of scour guard prior to sale. Exposed to 2 homeraised calving ease Executive Decision sons. Commercial Bred heifers need to be picked up 1 week after the sale. Call Wayne or Keaton to make arrangements.
