Shipping / Delivery / Pickup

Free feed until March 31, 2026
Feed at \$3 / day starting April 1, 2026 All bulls left at the farm must be insured.
Free delivery up to 200km.

Viewing Of The Bulls

Viewing of the bulls available anytime before sale day.

SALE TERMS & CONDITIONS

Sale Terms

The terms of the sale are cash or cheque payable at par to Don Okell Box 627 Duchess Ab T0J 0Z0 unless prior arrangements are made with seller. The right of property shall not pass until full settlement is made. All arrangements and settlements must be made with Jen-Ty Gelbvihs (Don & Lorna Okell) before any cattle will be released.

Purchaser's Risk

Each animal becomes the risk of the purchaser as soon as sold.

DNA

All bulls are DNA tested with Genomic Enhances EPDS & parent verified.

Bids and Biddings

Sale bidding opens March 3rd 2026 at 9AM MST
Sale bidding closes: March 4th 2026 at 6PM MST

During the Racehorse Style close extended bidding always follow the clock of remaining time left to bid. Follow DLMS How the Sale Works info in catalog

Shipping

Assistance will be given in making shipment after the sale but no risk is assumed by the seller. Expenses incurred are the responsibility of the purchaser. Purchasers are requested to furnish shipping instructions when making settlement. Any additional expenses are the responsibility of the buyer, including duty, brokerage fees, etc. We will have free shipping within 200km of consignors ranch.

Insurance

All bulls that are left at the consigners farm need to be INSURED.

Timed Auctions Made Easy

Welcome

To our annual bull sale. We would first like to thank all our buyers over the years, we feel extremely grateful to be able to sell our bulls to some tremendous people in the cattle industry and to see our bulls go out and work well for all of you. Your continued support keeps us excited to produce the best herd sire prospects that we can. This past fall has been a real positive outlook in the cattle market, don't think any producer thought prices would have been as good as they were. It is about time.

Again this year, we feel we have a great group of yearling bulls on offer. This is one of the strongest most consistent group of bulls to date. Whether you are looking for Red, Black, performance or calving ease, there is a bull for any program. This year we have on offer some tremendous black Balancer bulls that are all like peas in a pod, all very uniform. The reds are just as good and very consistent.

As in the past years we develop our bulls on a forage based free choice grass/hay mix as well as Trouw Nutrition Bull Ration which they only get 12 lbs a day to maximize longevity. We want natural thickness bred in not fed in.

The sires to all these bulls are a very uniform group of herd sires that all have tremendous amount of natural thickness and great body structure as well as good solid feet.

We believe the foundation of our program is our females and we pride ourselves in having a great group of dams that could raise any bull or replacement female.

We will again be selling this year's bulls on DLMS Farm Gate Timed Auction. We are very happy with this format to our sale and have had great feedback about doing it this way. So thanks again for supporting the sale.

The sale is March 3 & 4th the bulls will be available for viewing any time before the sale, just give us a call and we will be happy to walk you through the pens as well as show you their dams. For more info on any of the bulls don't hesitate to call.

All the information on how to get on and bid is offered in the catalog. Feel free to call us or DLMS if you are needing assistance.

Don & Lorna Okell

UNDERSTANDING EPDs

CALVING EASE DIRECT (CE)

Percent of unassisted births of a bull's calves when he is used on heifers. A higher number is favorable, meaning better calving ease. This EPD can be vital to a rancher looking to decrease the amount of calves pulled in his herd.

BIRTH WEIGHT (BW)

Predicts the difference, in pounds, for birth weight of the calf.

WEANING WEIGHT (WW)

Predicts the difference, in pounds, for weaning weight (adjusted to age of dam and a standard 205 days of age). This is an indicator of growth from birth to weaning.

YEARLING WEIGHT (YW)

Predicts the expected difference, in pounds, for yearling weight (adjusted to a standard 365 days of age). This is an indicator of growth from birth to yearling.

MILK (MILK)

The genetic ability of a sire's daughters to produce milk expressed in pounds of weaning weight.

CALVING EASE MATERNAL (CEM)

Represented as percent of unassisted births in a sire's first-calving daughters. A higher number represents more favorable calving ease. This EPD is important to a rancher's bottom line because it predicts which animals produce daughters with a genetic predisposition to calve unassisted as heifers.

STAYABILITY (ST)

Predicts the genetic difference, in terms of percent probability, that a bull's daughters will stay productive within a herd to at least six year of age. The stayability EPD is one of the best measures currently available to compare a bull's ability to produce females with reproductive longevity.

YIELD GRADE (YG)

Differences in yield grade score, which is a predictor of percent retail product. Smaller values suggest that progeny will have a better lean to fat ratio.

CARCASS WEIGHT (CW)

Differences in pounds of hot carcass weight, adjusted to an industry standard age endpoint.

RIBEYE AREA (REA)

Differences in ribeye area in inches between the 12th and 13th rib. Greater ribeye areas are preferable.

MARBLING (MB)

Predicts the differences in the degree of marbling within the ribeye as expressed in marbling score units. Greater marbling numbers are preferable and are an indicator of higher carcass quality grades.

FAT (FAT)

Differences for fat thickness, in inches, for a carcass over the 12th rib, smaller numbers of fat thickness are preferable as excess fat can be detrimental to yield grade.

Just a real standout from day one. Very eye appealing individual. We have always appreciated his overall body structure, his impressive natural muscling and big thick hind quarter. Hug deep rib as well as being very easy fleshing with loads of hair.

He has one of the most, easy going dispositions you will ever find in a bull his size. He carries his strong structure, on a good solid foot. He is just very unique.

Here is a herd sire that is sure to grab your attention with that wow factor.

Very easy fleshing big ribbed, natural muscling, extra length, big topped all wrapped up in a thick

black hair coat. He is very consistent to the Bravo group of bulls. He is mothered by a Chilli sired daughter who never disappoints raising us some real maternal replacement females and some tremendous bulls over the years. He will work for any cattleman.

How to Participate in the DLMS Farm Gate Timed Auction with Extended Bidding

1 Visit dlms.ca and follow the link to the DLMS Farm Gate timed auction site www.farmgatetimedauctions.ca, click the LOGIN/REGISTRATION button. First time users will select the REGISTER button from this page. Fill out the registration form to sign up for a free user account and it allows you to select a username and password for use on all Farm Gate Timed auctions. This program will send you text and email messages whenever there is activity on your favorite lots, or someone challenges your proxy bid and this is why you will be asked for both your current email and cell phone number. If you are a past participant in the Farm Gate Timed auctions simply enter your username and password to continue. This takes you to a list of both current and upcoming Farm Gate Auctions.

2 You can choose your favourite lots in this sale at this time and the program will allow you to open either all sale lots or just your favorite lots on your screen. Any time there is active bidding on a lot you have identified on your favorite list you will get a text and/or an email noting this activity.

3 The program allows you to place a proxy bid on any sale lot. This in fact protects your interest in any lot of interest for you to a specified dollar value you set, when you may not be able to give 100% attention to the sale. If the lot has a \$2000 bid on it and you place a proxy bid of \$3500 into the system, the computer will bid \$2100 for you but if some one else bids \$2200, the computer will again bid for you, this time at \$2300. The system will look after your interest to a maximum of \$3500. If another bidder is on at \$3600, your proxy will no longer be effective and you will no longer have the winning bid on this lot without once again logging in and bidding again or moving your attention to a second lot of interest.

4 At closing time of the sale the entire sale will extend bidding if a bid is placed on any lot in the sale. Any bid received after close time will extend the sale by the time listed on each sale. In most cases the time gets shorter the longer in to extended bidding the sale is. When no bidding occurs for the extended time the computer will declare the sale finished.

5 Following the sale the Consignor or Sale Manager will invoice all buyers in the sale, please contact the seller with questions or to arrange delivery, pick up or shipping of your purchases.

FAQ's

WHAT IS RACEHORSE STYLE SALE CLOSE?

Racehorse style sale close is when the entire sale stays open in extended bidding. This type of sale allows you as the bidder to change to a different lot within the same sale if the bidding has gone in to extended bidding.

HOW WILL EXTENDED BIDDING WORK?

When we get to the close out end time the clock for close extends with any bid placed with less than 5 min on the clock. This type of extended bidding turns the end time to more of a soft time. Extended bidding allows bidders to compete in lots like a real auction and give all bidders the same time to make a decision. Always follow the clock to see how much time remains in the sale you are interested in.

Invested in animal nutrition.

Optimize the performance of your herd with a **beef nutritional program** you can trust all year-round.

We carry a complete line of beef feeds including:

- Custom Ration Balancing
- Grower/Finisher Supplements
- Bull Rations
- HI-RANGE Mineral Program
- Creep Feeds
