Welcome FROM KFC FARMS

We are excited to welcome you to our 6th annual online sale. On offer this year are 17 purebred Speckle Park Bulls and 1 purebred Charolais bull.

The bulls this year have out performed any group we have fed yet. I feel that is a testament to our program and what we are striving for. They have been fed since weaning a Total Mixed Ration consisting of barley silage, hay, oats and an added protein supplement and mineral package, prior to weaning they were on pasture with their mothers. We work closely with Brayden Schmidt at Bullseye Feeds for our entire herd to formulate rations that will encourage performance while still keeping longevity in mind. There is performance data available, as well as ultrasound results.

The Speckle Park breed has been consistently improving. The carcass qualities are not going unnoticed and we are experiencing a demand for our own steer calves. We are still offering our buy back program. We would like to buy back steers from our bull customers at fair market value! See the commercial steer buy back program in the catalogue for more information.

Please feel free to come view the bulls at any time or give us a call with any questions you may have.

Commercial STEER BUY BACK Program

We would like to extend this offer to any past or new customer who has bought bulls from us. We will buy back steer calves sired by KFC bulls in the fall at fair market value. We know that marketing these calves sometimes can be challenging and we would like to do anything we can to help. These steers will be put on a feed test program with Speckle Park Reserve where we can collect data from them in with the hope to market the Speckle Park breed for what its good at; Carcass quality and feed conversion!

Herd HEALTH Protocol

Bulls have been vaccinated at pasture turnout and weaning with Express FP 5 LV5 and Fermicon 7 as well as treated with Bimectin insecticide. They have received the Fusoguard footrot vaccine this winter as well as Clean-up Pour on insecticide. They have been inspected and semen tested by a certified veterinarian and are deemed healthy and satisfactory to breed.

Terms and CONDITIONS

Bulls will be fed free of charge until June 1, 2026. Bulls remaining in the yard will require insurance at the cost of the buyer. Deliveries to Western Canada. We will split the cost of going East.

Nomad 35N is the first KAYR Tremor 7015L son to sell. Tremor was the 2026 Agribition Supreme Champion bull. We purchased him out of KAY-Rs 2024 bull sale and are excited to see how his calves develop. We do not have a big Charolais cow herd and would have liked to have had more Tremor calves to offer, we just don't have them. 35N is a smooth made individual with shape and presence like his sire. He is so long sided. He has a nice skull shape and is smooth fronted. He is a sound, easy moving bull that should cover a lot of ground come breeding season. He shows in the top 15% for weaning and 10% for marbling. Heterozygous Polled/PA free. Scurred.
