live simmental female sale :: beaverlodge, alberta

NOVEMBER 21, 2026

WELCOME

It's hard to believe 2026 is nearly in our rearview mirror, and here we are welcoming you to our 2nd Annual KSL Simmentals Production Sale!

First and foremost, we want to extend a sincere thank you to everyone who supported our inaugural sale last year. Seeing buyers from across the country invest in our females was truly a feather in our cap. We are incredibly grateful for your confidence in our program and look forward to seeing the impact these females make in your herds for years to come!

When we first decided to host our own female sale, we spent a lot of time considering whether we needed a catchy sale name, like so many others have done. Thankfully, we received some wise advice to "keep it simple," and we're sure glad we did.

Much like our sale name, our cattle are built around one simple principle: PRODUCTION.

Our goal has always been to raise cattle that stand the test of time. Cattle that can thrive in harsh conditions, adapt to varying climates and withstand everything Mother Nature throws their way. From drought to wet years and changing feed conditions, we expect our females to maintain their body condition, raise a valuable calf and breed back year after year.

The last few years in the Peace Country have certainly put our cattle to the test, and we are proud to say they have risen to the challenge.

We are fortunate to be involved in the cattle industry on a large scale, breeding just shy of 1,400 females in 2026. This gives us the opportunity to utilize a wide range of genetics and evaluate their performance not only in our registered herd but in our commercial operation as well. That experience allows us to be extremely selective in our breeding decisions and ruthless in our culling process. We believe this is what continues to drive our program forward, producing cattle with genuine genetic value and the ability to advance the beef industry.

This year, you will notice a larger selection of May-born bred females in the offering. These females were specifically selected for the sale, held over and given the opportunity to develop throughout the summer before being bred for January calving.

We see tremendous value in allowing these extra-age females the time to grow and mature. They enter motherhood with added development, maturity and the ability to really turn on production. These are true production females, ready to go to work!

That certainly doesn't take anything away from our January-born females. They represent some of the very best from that calving group and offer the same quality, functionality and maternal characteristics as their extra-age counterparts. Having grazed alongside the bigger, older females all summer, they have proven they can compete, maintain themselves and hold their own. We are confident they will do the same in any herd!

Another point of pride for us is that we own the sires of every heifer in this offering, with the exception of the two Black Gold Preacher daughters, which resulted from a semen package we were fortunate enough to secure. We also own every service sire these females are bred to.

These bulls have walked the pastures at KSL and proven themselves where it matters most. They have been selected and evaluated for feet, legs, structural soundness, type and kind, while fulfilling their individual roles in calving ease, performance and horned or polled genetics.

We feel fortunate to see these sires becoming recognized throughout the industry for their consistency and ability to produce high-quality offspring. Watching KSL genetics make their mark in other programs is something we take a great deal of pride in.

We are probably our own toughest critics and hold our cattle to a higher standard than anyone else could. But we firmly believe that approach has allowed us to continually improve the quality, consistency and predictability of our herd on a large scale.

The females selling represent exactly what we believe in: cattle bred to produce, built to last and backed by generations of practical selection.

Whether they raise a standout bull calf destined for the bull pen or a high-quality replacement daughter that becomes the foundation of a cow family, we believe these females have the potential to leave a lasting mark.

Our hope is that PRODUCTION is what these females become known for, year after year. The kind that develop into future donors, establish influential cow families and raise cattle that make the beef industry proud.

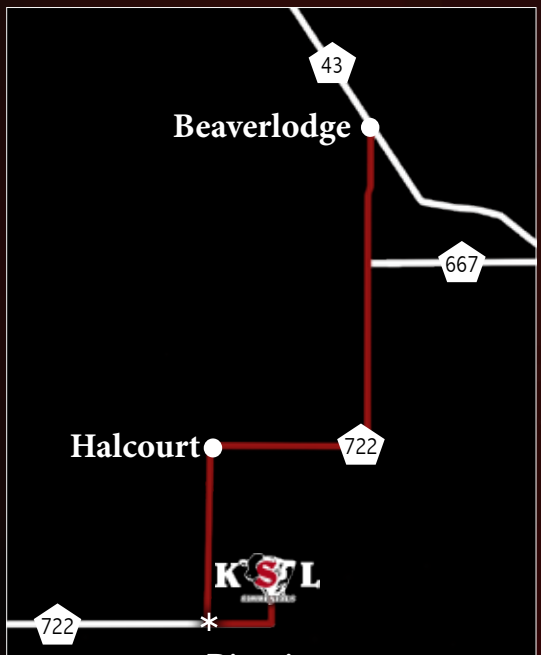

We sincerely invite you to join us at KSL on sale day! Come enjoy an evening of great cattle, a delicious supper, warm hospitality and live music.

If you are unable to attend, please don't hesitate to contact Brad, Keegan or the outstanding Bohrson Marketing team for assistance. DLMS will also be available for all your online viewing and bidding needs.

Make the trip to the Peace Country! Take in Ladies of the Peace on Friday, then join us at KSL on Saturday for our Production Sale.

The Northern Cattle Are Worth the Drive!

Cheers, Keegan & Brad

Welcome

We are excited to join Brad and Keegan in welcoming you to Beaverlodge on November 21 for a tremendous offering of Simmental females, they don't mess around and always sell the best. Following a successful inaugural sale, the KSL crew has assembled another deep set of cattle that reflects the quality of their cowherd and their commitment to raising productive, practical cattle. There is every reason to make the trip to the Peace Country and spend the weekend with good cattle and great people.

Brad and Keegan are some of our favourite people to work with, and that sentiment is shared throughout our entire BMS team. Our crew on the road thinks highly of these two and always enjoys sourcing cattle for them, as they actively support sales and invest in other breeders' programs. That same enthusiasm carries over to every farm visit, where the hospitality is first class and there is always an impressive cowherd and an exciting set of sale cattle to tour, whether we are looking through the females in the fall or the bulls for their spring sale. Our BMS office thinks the world of them as well as they are organized, appreciative and enjoyable to work with from the first stages of preparation right through to the completion of the sale. Brad and Keegan are progressive breeders who give back to the industry in a big way through promoting the breed, supporting fellow cattlemen and investing in its future. Beyond all of that, they are simply fun people to be around, and anyone who has spent time with them socially knows they can certainly be the life of the party!

The cattle behind this program give us just as much reason to be enthusiastic. With nearly 1,400 females bred in 2026 across their registered and commercial operation, Brad and Keegan have a substantial foundation from which to evaluate genetics and select their sale offering. Their cattle are expected to work under real ranch conditions, maintain themselves, raise a valuable calf and breed back. That practical approach, combined with disciplined selection and a willingness to invest in quality herd sires, has built a cowherd with depth and consistency. This year's offering brings together an appealing selection of fullblood, red and black Simmental bred females, with strong opportunities across the catalogue. There is plenty of maternal strength, body capacity, muscle and the kind of substance we appreciate in females destined to raise valuable breeding cattle. The extra-age females offer added maturity and development heading into their first calving, while the younger bred heifers represent an exciting cross-section of the program. Whether you are looking to establish a new cow family, add a potential donor or source productive females to raise your next group of herd bulls, this offering deserves your attention. The service sires add another layer of interest and give buyers plenty to look forward to with the calves these females are carrying.

We encourage you to make a weekend of it, taking in Ladies of the Peace on Friday before joining us at KSL on Saturday for the sale, supper, live music and the hospitality Brad and Keegan are known for. If you are unable to attend, please contact any member of our BMS team. We would be pleased to discuss the offering and assist you with your selections and purchases. We look forward to seeing you in Beaverlodge!

All lots will sell under the standard terms and conditions put forward by their Canadian Simmental Association. These are available upon request. The terms of the sale are cash, cheque, and wire transfers, payable at par at the sale location unless satisfactory payment arrangements have been made prior to the sale with seller, buyer and Bohrson Marketing Services. Bohrson Marketing Services reserves the right to require a certified cheque as settlement before releasing any sale cattle. Payment in full must be made before cattle can be released and shipped. Exchange rates will be announced sale day and the sale will be held in Canadian funds.

JESSE JAMES

1

HOMO POLLED FULLBLOOD

-this golden coloured female is a smooth made homo polled lady with all the bells and whistles, excellent design, big shape and dimension

-beautiful pigment, flawless udder development that the Jesse James females are known for Mystique is neat mix of calving ease and performance, the twist of pedigree includes an explosive shot of performance from KSL Powerhouse (Regio and RJRS Penny)

-the maternal power coming from the Keets Gaia female is something to note, a lineage of production influencing programs from across the country from Rosemead Farms to Keets Simmentals to a massive influence here at KSL

EXPOSED TO ANCHOR D LAMBORGHINI 906L MARCH 18 - MAY 5
PREG TESTED 100 DAYS BRED JUNE 23/2026

HETERO POLLED FULLBLOOD | NON DILUTOR

-the lone Ferrous daughter in the sale Natalie is moderate made with a nice completeness from front to back

-we have found these Ferrous females really pack a punch when it comes to being able to moderate birth weight in their offspring but really kick it in to high gear and wean favorable calves come fall

-if you are looking to keep your cows a little more moderate but still perform like a true Simmental the Ferrous females should be on your radar

EXPOSED TO AJB ROYAL RECRUIT 1M MARCH 18 TO MAY 5
PREG TESTED 65 DAYS BRED JUNE 23/2026

HETERO POLLED FULLBLOOD

-a pen favourite and the only Lambo heifer in the sale, Lush is as soft sided and soggy as you can make a female, she has a great hair coat, perfect foot and is so well balanced

-Lambo Lush's dam is none other than Jesse James's maternal sister, she is a homo polled female that has a very bright future making selling 79N a little easier knowing she is still producing for us, because a female like this in a polled package is one we must try and recreate

-the structural integrity and style in the Lambo calves is note worthy; I look forward to adding his offspring to our herd for years to come.

POLLED FULLBLOOD | NON DILUTOR

We are very excited to be the proud owners of the 2026 lead off bull from Anchor D Ranch. We love when we are able to find the type and quality of cattle from a family we respect and enjoy doing business with so much. Monterey immediately caught our eye with his length of spine, solid structure and frame size, and distinguished muscle shape. Then make him dark cherry red, great haired, perfect pigmented and soft sided makes Monterey a real breeding piece. Smooth polled and backed by an unreal pedigree pairing Creed and French Attack, this opportunity to add some of his semen to your tank shouldn't be missed. A polled bull for the times that will have a huge impact. These three lots of 5 should be a hot commodity as they will be the only straws available for the 2027 breeding season!!

POLLED FULLBLOOD | NON DILUTOR

A homo polled bull that works so well in the heifer pen and as well as on mature cows is a rare find. The Jesse james offspring are born with low birth weight and come easy but maintain the growth and performance that make him a true curve bender in the fullblood world. His dam continues to be a valuable asset and producer for us at KSL. His maternal sister and dam of lot 24 in the sale will quickly become a herd favourite proving this cow family just works. As you will see from the daughters in the sale he is a great female maker and his sons continue to be a hot commodity for our commercial beef producers come bull sale season. If you are looking to take some horns off and infuse some calving ease with the means to really produce make Jesse James one of your future breeding options.

CE: 16.1 BW: -0.6 WW: 39.9 YW: 55.0 M: 28.0 MCE: 8.6 MWWT: 48.0

POLLED FULLBLOOD | NON DILUTOR

He might not be the newest herd sire on the block but he is here with relevance and purpose due to his ability to be used in the heifer pen. A true sleep easy heifer bull Ferrous continues to rise to the top as a homo polled calving ease bull that just flat out works. The calf vigour at birth is one of the true assets when they arrive. These calves are up like a shot and sucking extremely quick. As he is about to turn 9 Ferrous is still as sound and athletic as ever, his daughter are really impressing us as they enter production. These females work hard have great udders and seriously out produce themselves as moderate production females. The list of Ferrous sons that have gone into purebred herds across the country continues to grow every year as well as be picked up by commercial herds to increase calving ease in a polled package. A great opportunity to put a homo polled calving ease bull in the tank, Ferrous is a great choice!

POLLED FULLBLOOD | NON DILUTOR

Performance, predictability and homo polled in one package is always a great choice when selecting an AI sire. Nitro truly has been our go to bull when looking to produce polled bulls and females. Backed by an incredible cow family, the Lady A influence in the industry has been second to none. The user friendly offspring of this sire group has allowed us to incorporate proven polled genetics that have a great look and colour pattern. Growth and performance, maternal influence and strength. Great uddered daughters and sons that are sought after by our bull customers. With Nitro no longer walking the pastures at KSL his semen will be in high demand for years to come. So jump in and buy with confidence to secure some of his genetics!

HETERO POLLED PUREBRED

-this red Export female really brings it all together in the way we have come to appreciate in this sire group, impressive through her extended front 1/3, then really progressing into a beautiful rib shape, full middle and hip

-we always find Mafia in some of our best red females, his influence is always a desirable one

-exposed to our Black calving ease bull KKH Venture who we purchased from our good friends at Tri K Cattle, Venture calves are developing awesome and we look forward to having more in 2027

HOMO POLLED PUREBRED

-a black Jimmy daughter with loads of hair, big middle capacity and extended proud front end, this heifer is so sound on the move, has a great foot and a fresh cool type

-74N's dam is a beautiful black female that never misses a beat here at KSL and is always raising a good one

-the Venture calf in her belly should be heavy haired with loads of muscle shape

EXPOSED TO KKH VENTURE 866M MARCH 18 TO MAY 5
PREG TESTED 60 DAYS BRED JUNE 23/2026

CE: 4.9 BW: 5.0 WW: 86.6 YW: 134.2 M: 27.9 MCE: 3.4 MWWT: 71.2

HETERO POLLED PUREBRED

-grab your partner and Josie Joe, this little sweetheart is easy to work with and developing into a real gem

-her dam 19J was supposed to be a sale female for us at Lone Stone a few years back but ended up getting hurt before the sale, lucky for us she did because she has turned out to be an excellent producer

-these Jimmy females are dark coloured good footed and really developing into exciting young females

EXPOSED TO DESS EPIC 131N MARCH 18 TO MAY 5
PREG TESTED 100 DAYS BRED JUNE 23 BULL CALF IN VETS OPINION

CE: 7.3 BW: 3.1 WW: 77.5 YW: 112.2 M: 23.3 MCE: 3.0 MWWT: 62.1

HETERO POLLED PUREBRED

-35N was on so many youngsters lists as a heifer calf to be shown or picked for 4-H here but we had already decided she would be in the female sale

-moderate made in a very complete package this calendar born female is really starting to take shape and look the part

-we love her dam and grand dam, young black females with loads of eye appeal and work their tails off for us raising great calves

EXPOSED TO KKH VENTURE 866M MARCH 18 TO MAY 5
PREG TESTED 80 DAYS BRED JUNE 23/2026

46 KSL GLAMOUR GIRL 37N

CE: 11.2 BW: 1.2 WW: 64.0 YW: 92.4 M: 27.3 MCE: 4.5 MWWT: 59.3

HETERO POLLED PUREBRED

-a big powerful Black Gold Preacher daughter in a black blaze face package, Glamour Girl is much like her dam, big statured and going to mature into a big production female

-a neat twist on pedigree here with a nice shot of fullblood genetics on her dam's side, gives her an outcross pedigree, an added shot of milk and performance

-a black Venture calf with a blaze face will have a great ROI, we have a few in the bull sale pens for 2027 looking very promising

EXPOSED TO KKH VENTURE 866M MARCH 18 TO MAY 5

RF FLIRTIN FOR CERTIN 37U	BIG SKY DIANA 450D

CE: 5.4 BW: 4.2 WW: 80.1 YW: 115.5 M: 17.4 MCE: 2.3 MWWT: 57.5

HETERO POLLED PUREBRED

-the Queen herself finishes off the offering, but by no means deserves to be the last heifer in the catalog, she truly is a special specimen, the power capacity and broodiness this female posses is truly unmatched, a black female that is likely one of the very best to come from KSL

-the proud upright front end on a female with this much volume and swoop is truly notable and when you get behind and evaluate the width, muscle expression and depth of body on her you will stop you in your tracks

-the cow family behind this Lady always rises to the top, with 37U and the job she has done for the RF program and the Lysengs allowed Level Up to work wonders at KSL on cows like 64J, whose 450D dam is a Sherman tank

EXPOSED TO KKH VENTURE 866M MARCH 18 TO MAY 5
PREG TESTED 90 DAYS BRED JUNE 23/2026
