TERMS Cash or half cash – balance due June 1, 2026, interest free. If half cash terms are desired, we request that the buyer leave a post-dated cheque. US buyers please note – US funds will be accepted at par, exchange will be calculated per bank exchange rates as of sale day morning.

GUARANTEE The cattle will carry the guarantee as recommended by the Canadian Hereford and Angus Associations. Doenz Ranches stands behind all animals sold in the sale.

VOLUME DISCOUNT Purchase 5 to 9 bulls take 5% off the total price. OR Purchase 10 or more bulls then take off 10% of the total price.

DELIVERY If the buyer wishes, free fall delivery up to 300 miles to central points. $200 will be deducted off the purchase of a two-year-old bull if you pick up the bull(s) up to 3 days after the sale.

WINTERING Bull calves can be wintered for free. Two-year-old bulls can be wintered until April 1 for $400 each. All bulls must be picked up by April 1, 2027. All bulls must be insured and this service will be offered sale day.

USA Animals going to the USA will be delivered through the Coutts/Sweetgrass border with federal health papers. Buyer assumes transportation costs from Sweetgrass, Montana. Again, animals need to be insured sale day.

LIABILITY Mishaps at cattle sales are very rare and every precaution will be taken for the safety of visitors; however, the owners and management assume no liability should an accident occur.

INSURANCE The purchase of insurance will be available sale day through Canadian Farm Insurance Corporation representative Maureen Balog.

ERRORS If errors are noted in the catalogue, corrections announced from the stand take precedence over printed material.

DIRECTIONS TO RANCH
3.2 km (2 miles) east of Warner on #504, then 3.2 km (2 miles) North on Rg Rd 170, down into the coulee to the sale barn.

Welcome to Doenz Ranches

Another year on the ranch brings new challenges, new lessons and the reward of seeing our hard work come together. As we look at this year's offering, we're excited about the calf crop in front of us. This is one of the strongest groups we've raised, and we're proud of the cattle, the cow families behind them, and the progress we're making in our breed program. Every year is an opportunity the build on what we've learned and continue raising cattle that work in the real world.

Our goal has always been to produce sound, functional cattle with the kind of performance and longevity that make a difference in our customers' herds. We know that choosing a bull is an important investment, and we take that responsibility seriously. We stand behind the bulls we sell and value the relationships that continue long after sale day. To our returning customers and those considering our program for the first time, thank you for your trust, your loyalty, and your continued support. It means a great deal to our family.

This year, our family has also experienced the unexpected loss of Nelson in April. His absence is felt and as we carry on with the work and traditions that mean so much to our family, we remember the part he played in our lives and operation.

We would be pleased to have you join us at the ranch in Warner on December 3 at 1 pm. Come early and enjoy lunch with us and spend some time looking through the cattle. We always appreciate the opportunity to visit with fellow cattlemen, hear how things are going in your operations, and talk about the cattle we've put together for this year's sale.

For those unable to attend in person, videos of the offering will be available through CattleVids, with online bidding available through DLMS. We will also offer the option of paying half on sale day with the remaining balance due June 1, 2027.

Thank you for being part of our program and for helping make this sale a tradition we are proud to continue. We look forward to seeing you in December!

Brad, Veronica, Jordy and Branson Doenz

We were introduced to 12K's sire- Bear Creek Stoney himself and his progeny at a field tour in Saskatchewan and felt that he could offer so much good to the angus breed. We found 12K is one that we are happy with here. He's marked each of his calves just like him with a moderate frame that packs on the muscle with exceptional hoof structure and is very easy fleshing. Every one of 12K's sons you can pick out a mile away. They have big, round, smooth, well muscled hind quarters with a great sized hoof. I know you'll like the look of these guys here.

A favourite by visitors all summer. A bull that checks all the boxes - long, soggy, thick and loads of bone and performance. His dam 184F is a solid footed, flawless SAV Senstation daughter. She carries loads of depth of body and has level perfect teats and udder. Her son last year sold to Mackie Ranch and the year before that to Houg. This guy was 1130 lbs. on September 30 - a true pound maker with being in the top 9% for weaning weight, Top 10% for yearling weight EPDs of the breed.

If you follow our catalogs year to year you'll see that the dams of Lot 1 and 2 from last year are the mothers of Lot 1 and 2 this year! That speaks for itself. One visitor this summer thought 16P was the whole answer and he could be. 16P is smooth muscled and has a real round muscle shape to him. I'll say the same as last year that this dam is as sound footed and level uddered as the breed has. Last year's bull from this dam was the high seller to Orcutt Ranch!

A real meat machine. He has complete power and is an extremely well muscled bull. He is real thick with good depth of body and spring of rib. An impressive 950 lb. actual weaning weight! Dam 141G is an impressive Torque daughter that is flawless and has a full sister that also produced Lot 16 and Granddam 20B is also in production here.

This Is Jordy's bull out of a cow that we put in the sale in 2021 and was bought by Jordy and his Grandpa's cousin. This Torque cow has power of her own that she's bringing into this calf with a beautiful cross with Eternity. 78P is as long as a freight train and brings a massive amount of muscle, depth and thickness. His EPD's are phenomenal- Top 7% Weaning weight, 4% Yearling weight,if you care about carcass he's to top 6% for Rib Eye and top 12% for Milk. This cow also has a full sister one year older and is Dam of Lot 14. The Grand dam, 20B, has had many sale bulls and females on this place. 122H had a bull calf her 1st calving year and went to work for Ross Orcutt. I think it's pretty reasonable to expect some powerful calves from this guy.

Check out the power and mass in this bull. He has a fantastic weaning weight, yearling weight and milk EPDs. He's super wide based, lots of flank and has that herd bull look already. 151P's dam is a top producing Torque cow that has a gorgeous udder, flawless feet with lots of body and stretch to her. If you want performance and not lose the maternal characteristics, this bull is for you. 114H had a bull go to work for KevLon last year and FAB Fabricating before that.

Dam 22K has done it again, last year she raised the high seller and this year she's bringing serious power into this bull. All 3 generations on the dam side are still producing. Lot 34's Dam is the granddam to 199P and 22K also has a daughter producing here. Now look at this bull for himself- that super thick hip and smooth muscle expression with loads of depth and carries it deep. He's got that typical look that 12K brings to all his calves with a solid hoof structure. I'd expect loads of longevity from this bull and strong females from him too.

True to his sire's name here and out of a super broody cow that packs in power! If you look at his weight on September 30th, he made the top 3 list of heaviest calves. Can't say enough good either about the cow side. Maternal sister to 42P is dam of lot 6. 113H has a maternal sister that is a premier dam in the herd. Grand dam to 42P has had many sale bulls at our ranch. The fertility of this line is top notch, they can calve late then catch right up to AI breeding. 42P himself is in the top 10% yearling weight and 11% weaning weight EPDs for the breed.

This guy is how I like our polled bulls to look- loads of eye pigment, smooth muscled, a great locomotion with a top hoof and foot quality while he's backed by a strong cow family with longevity and quality and structure. You can't not look at him both on paper and in person. He's in the top 10%for Yearling weight, 4% Weaning weight and 2% REA EPDs of the breed.

Nelson Doenz

MARCH 26, 1955 – APRIL 4, 2026

It's with great sadness that we share that Nelson, a loving husband, father, uncle and friend passed away suddenly at home on April 4, 2026.

Nelson was the son of Leo & Helen Doenz, brother to Beverly & Holly and raised on the family cattle & grain farm. Graduated from Warner High School, then attended university while playing with the Golden Bears, followed by a backpacking trip to Europe with two school friends where they also visited the Doenz family in Switzerland. In 1977 he married Paula where they raised their two kids Kristy & Brad on the family farm continuing to build the LCI/ Doenz Ranches legacy.

Nelson never lost his love for driving through the cattle, along with picking out bull calves for the annual bull sale held each year that has continued for several years with Brad & Veronica with their boys Jordy & Branson (5th generation) running the operation.

Nelson will always be remembered for his dedication to the cattle industry and friendship!

This is a real classy girl with lots of growth in her. She's going to bring power to her calves being a Big River daughter and out of a good homebred SAV Bloodline cow. 11N was turned in for natural service with 3 calving ease angus heifer bulls (CUA 5804N, LCI 203N, LCI 128N). She was preg checked safe with a January-February calf. Our bred heifers received 2 doses of FP5 prior to breeding and received Scour Bos 9 September 11 along with 8 way and pour on Ivomec.

A gorgeous female here with lots of length to her and still soft and feminine. Here's a chance to get a really productive 12K daughter that is going to bring performance to her calves. 188N was turned in for natural service with 3 calving ease Angus heifer bulls (CUA 5804N, LCI 203N and LCI 128N). She was preg checked safe with a January-February calf. Our bred heifers received 2 doses of FP5 prior to breeding and received Scour Bos 9 September 11 along with 8 way and pour on Ivomec.

Loads of frame, bone and performance in her pedigree. She's another 12K daughter out of a Maximus cow. Maximus himself brought frame and bone to the females here and they cross well with 12K as you see here. 248N was turned in for natural service with 3 calving ease heifer bulls. She was preg checked safe with a January-February calf. Our bred heifers received 2 doses of FP5 prior to breeding and received Scour Bos 9 September 11 along with 8 way and pour on Ivomec.

We really like this Bravo heifer as we've seen many of our Bravo females make great cows with loads of milk, beautiful udders and lots of depth of body and are easy keepers. This heifer will fall right into that frame work. 42N was AI'd to Basin True Value on April 16 and wasn't seen come back into heat by May 22. She was exposed for Natural service from May 22- June 20 to CUA 5804N and LCI 203N.
She was preg checked safe with a January calf. Our bred heifers received 2 doses of FP5 prior to breeding and received Scour Bos 9 September 11 along with 8 way and pour on Ivomec.

This girl is going to be a big framed female and will put lots of performance into her calves. She is out of a polled Warrior cow and her sire is progeny from one of our favorite R Leader females still in production. 18N is horned, but can still represent strong to whatever you choose to breed her with. She was AI'd to Blair-Athol Tarzan 47J on May 12, then was exposed for natural service May 22-June 20 to Angus bull CUA 5804N and Angus bull LCI 203N. She was preg checked safe with a February calf. Our bred heifers received 2 doses of FP5 prior to breeding and received Scour Bos 9 September 11 along with 8 way and pour on Ivomec.

Talk about a heifer that's long with soft features and great length of spine with pigment to beat! We think this heifer will do great things whether she brings a heifer or a bull calf, I would expect amazing pigment and exceptional performance. 20N was AI'd May 10 to Blair-Athol Tarzan 47J then was exposed for natural service May 22-June 20 to Angus bull CUA 5804N and Angus bull LCI 203N. She was preg checked safe with a February calf. Our bred heifers received 2 doses of FP5 prior to breeding and received Scour Bos 9 September 11 along with 8 way and pour on Ivomec.

This horned heifer has many maternal traits that we like to see here. She's deep flanked, wide over top with great stretch and length and from a line of cows with good udder and feet. 234N was AI'd to Stevenson's SH 8086 Stardance 520N on April 22.Then was exposed for natural service May 22-June 20 to Angus bulls CUA 5804N and LCI 203N. She was preg checked safe with a February calf. Our bred heifers received 2 doses of FP5 prior to breeding and received Scour Bos 9 September 11 along with 8 way and pour on Ivomec.

76 10 COMMERCIAL HEIFERS

Here is a strong group of 10 commercial heifers. There are 4 black angus, 4 herefords, and 2 black x hereford heifers. They are all bred with a calving ease, low Birth weight bull. They were exposed from June 20- August 20. These heifers have been preg checked on September 30 and found safe for that exposure. They have received Bovi shield FP5 twice before breeding and also were given Scour bos 9 and pour on ivomec at preg check. These girls are set up for healthy calving for you.
