LEADING

Ladies

THURSDAY, DECEMBER 3, 2026 AT 6:00 PM

LEWIS FARMS, SPRUCE GROVE, AB

WELCOME

I'd like to welcome everyone to the 2026 Leading ladies Sale. All parties aligned for this event contributed some of their very best. It is a treat to be able to work with the Koberstein, Zaft, and Ponich families on the purebred end of this sale. Some of the best young families emerging in the Simmental breed. As well we welcome Lorne Mast and Alois Kerchoff to this event with 2 exciting lots on offer. We're excited to bring a sale of all bred females. As well as a few genetic lots. The idea of an all bred heifer sale. We want immediate Return on investment for our customers. We want to sell you females with proven fertility. And lasty we are focused on selling quality females that will make lasting cows. As usual we couldn't or wouldn't want to host a sale without the help from Bohrson Marketing and DLMS. Two crews that are vital in making these events successful. Videos will be available early November on DLMS and Lewisfarms.ca. Feel free to slip by for a tour if your in the area. As well dont hesitate to call regarding any details on the cattle. We look forward to hosting this event. And excited to see everyone at the Leading Ladies.

Sincerely,

Kyle Lewis

6:00 PM Leading Ladies Sale Time

WELCOME FROM BOHRSON MARKETING SERVICES

Welcome to the 2026 Leading Ladies Sale! It is a pleasure to be involved with an offering that showcases the quality, commitment and dedication of the breeders behind these outstanding Simmental and Angus programs. Lewis Farms, along with their special guests Triangle K Simmental & Angus, TZ Livestock, Tandem T Farms, Pine Creek Simmentals and Masterloc Simmentals, have brought together an exciting set of females that represents the very best of their respective operations.

This is an opportunity to acquire females that represent the kind of cattle we all strive to build our programs around. Quality runs deep throughout this offering, with an emphasis on maternal strength, longevity and the kind of practical, functional cattle that make a lasting impact in a cowherd. Easy-fleshing females with quality udders, sound structure and the ability to raise productive calves are the foundation of any successful breeding program, and these are the traits that make this offering so appealing.

Whether you are looking to add proven cow families, invest in the next generation of replacement females or acquire genetics that can have an immediate impact on your operation, there is plenty to appreciate throughout this sale. The combination of quality Simmental and Angus genetics, backed by breeders who understand the importance of building productive, profitable cowherds, makes this an exciting opportunity for cattlemen and women.

On behalf of Bohrson Marketing Services, we would like to congratulate Lewis Farms and all of the guest consignors on assembling such a quality set of females and thank you for allowing us to be a part of the 2026 Leading Ladies Sale. We encourage you to study the offering closely, find the females that fit your program and invest with confidence. We wish everyone the very best of luck with their selections and appreciate your continued support!

Best Regards,
The Bohrson Marketing Team

The most complete black bull ever bred at Lewis Farms. Homo Polled and Homo Black. Selling for $140 000 in the 2023 sale. Cabaret is a performance black bull with unprecedented phenotype. He's athletic with the correct amount of muscle and bone structure. For the past 2 springs Cabaret son's have topped sales at KT, Black Gold and Lewis Farms. LFE Cabaret continues to service 3 separate breeding programs in 3 separate provinces, every year!! He's held up and continues to impress us and visitors. Dam, Kat 671E continues to raise the good ones. The kids showed a full sib daughter to Cabaret this summer. 671E has been a mainstay in the donor pen

LFE Granite was purchased this spring by Horner Cattle Co. He has covered both heifers and cows at both Horner and Lewis programs. Granite is an outcross pedigree to most Simmental operations. His dam is a low set, light boned black baldy Countertime daughter. Rolling Stone was a calving ease solid black bull purchased by Parkview Farms. We think there is big future here with this young herdsire. This will likely be the only opportunity to acquire semen for the 2027 breeding season. **Co-owned with Horner Cattle Co.**

Pine Creek Mrs Fortune 628M has the honour of being the first daughter of NGDB Commotion 24L to sell, and with his untimely passing, opportunities to acquire his females will be few and far between. This beautifully constructed polled female is striking from every angle, combining a gorgeous head and exceptional neck extension that flow into a powerful middle and rear quarter, all while maintaining tremendous depth, length, thickness, and a great foot. Her dam, is a polled Paydirt daughter we are extremely excited about; she certainly outdid herself with her first kick at the can, and we feel 628M is a testament to that. To top it all off, she comes with an early service to the tried-and-true Anchor D Imax. A female with the pedigree, presence, and potential to make a lasting impact!

Here is a dark brown, polled female with nearly black goggles that checks a lot of boxes! Masterloc Nebula 1N is a daughter of NAC Panther 133J, backed by the young and very productive DC Luna FF 2L/HP-HEP, a first-calf heifer who has already proven she can raise a good one. Nebula came into the world at a modest 75-pound birth weight, then powered her way to an impressive 724-pound adjusted weaning weight and 1,196-pound adjusted yearling weight. She is extremely deep-bodied, square-standing on all four feet and legs, and moves out with the kind of freedom and athleticism we appreciate in a brood cow. Her sweet, well-made udder is a real feature and gives us plenty of confidence in her future as a productive female. She combines eye-catching colour with the kind of maternal design that keeps your attention. Nebula 1N sells bred to Masterloc PFF Kinsman 2K, adding another exciting chapter to an already promising young female. A beautifully balanced female with performance, structure, udder quality, and a very bright future ahead of her. We would also like to extend our sincere thank you to Lewis Farms for including Masterloc Simmentals in this prestigious sale. We are honoured to be part of such an outstanding offering and truly appreciate the opportunity.

Health of all

CONSIGNOR CATTLE IN SALE

All guest consignors' cattle have been treated and handled in a very similar manner to the Lewis Farms heifers. Prevention to all the diseases covered in the Lewis Farms program have been done.

All the heifers in the sale in early November Lewis Farms and Guest Consignors will be reconfirmed pregnant and had a pelvic size and shape check. They will be given the pour on parasite treatment Solmectin (ivermectin). They will be given a rumen magnet and their first scours vaccine. The booster shot for scours will be given just after the sale.

We want to be totally transparent on their health protocols, so you know what they are protected against. If any more specific questions about health protocols, please reach out to any of the consignors they will be happy to discuss this information with you.

It is my wish as a veterinarian that more sales catalogues will contain pertinent health information in it. Important for you to know as a purchaser and not just assume everything is always done. Plus, there could be something specific to your herd or region of the country that you may need to add in. That includes the USA or other countries.

In modern cattle production cattle are

often transported over great distances seeing great different temp gradients and potential exposure to things so protection from vaccination brings with it a built-in biosecurity program.

All of these heifers are all very quiet and with the clipping proper low stress handling become even quieter over time. Hope you are happy with your purchases but if any questions regarding health or acclimating these heifers into your herd don't hesitate to reach out to any of us.

- Roy Lewis, DVM
