Our philosophy remains the same: "We don't want to just sell you a bull on sale day, we want to sell you bulls that make you more money - MORE POUNDS MORE PROFIT!" We hope we have added value to each and every program we have sold bulls to over the past and have built a relationship of trust that we are supplying the very best Charolais genetics available!

The cattle markets have broke into new uncharted territory as the price for our commodity took a significant upward trend. And to top it off, the fundamentals look strong for the next five years.

1. North American Inventories are at a historical low.
2. With the continued slaughter of mature cows and the extremely high number of heifers being placed in feedlots around the country, there are no signs that the cow/calf industry have made the decision to increase the North American herd size.
3. Once producers do decide to expand the North American herd size, it will further deplete the number of heifers made available to the packing industry and from the time a producer decides to retain a heifer, it takes approximately 4 years for that heifer's offspring to finally enter the food chain.

With the constant demand for beef and the limited number of animals available to the feedlot/packing industry, the fed cattle that are being delivered to the packers are at all time high weights industry wide! The need for Charolais genetics is at the forefront to deliver the necessary performance to move the industry forward.

Not unlike the cow calf business, the philosophy of MORE POUNDS MORE PROFIT is exactly the same for the packing industry. Take my word having been in the slaughter business for close to 20 years, high dressing percentages will usually always make you more money than quality grade. Selecting the right kind of Charolais Bulls will easily position your herd to take advantage of the premiums being paid for high performing, high yielding cattle.

Thanks to the Scott Anderson Bred Heifer program, we are excited to once again offer an incredible set of 50 two year old Red Simmental cross heifers with their tan Charolais calves at side, all sired by McLeod Livestock herd sires. The Anderson team calved them out between Dec 26, 2025 and Jan 15, 2026. This entire group of 50 first calf heifers will be on offer in this year's Bull Sale and will sell in groups of 3-5 heifers.

We invite you to attend our sale Wednesday, Feb 18 – 1:00 pm at the Olds Cow Palace. You are certainly welcome to come see the bulls or Cow/Calf pairs any time prior to the sale at the farms. Otherwise, the cattle will all be in Olds for viewing on Monday evening, Feb 16 and all day Tuesday, Feb 17. If you are unable to attend sale day certainly don't hesitate to call and discuss your needs. Once again, Mark Shologan from DLMS will be broadcasting our sale again this year for your buying convenience plus videos can be seen on DLMS or Cattlevids.ca prior to the sale.

Thanks for taking the time to look at our catalog.

# 55

## *Sim-Angus Females*

**WITH CHAR-CROSS CALVES AT SIDE**

Take advantage of this incredible opportunity! 55 First Calf Simmental-cross heifers from Anderson Bred Heifers at Bowden, AB. These heifers calved between Dec 26/25 and Jan 15/26 and will be sold at the McLeod Livestock Bull Sale. They all will have char-cross calves at side sired by McLeod Livestock heifer bulls.

These heifers were all hand selected in the spring of 2025 and exposed to McLeod Livestock bulls for 12 days starting March 21, 2025. The pairs will be pre-sorted and sold in groups of 3 to 5 head per group.

Trucks will be available at the sale if you are the successful bidder or if you are wanting to purchase these heifers to use as recipis, these heifers can be hauled directly to Davis Rairdan Embryo Transplants.

The pairs will be at the sale in Olds for viewing all day Tuesday and Wednesday morning prior to the sale. If you would like to view the pairs prior to the sale, please contact Scott Anderson and he will be happy to have you come to his farm west of Bowden and look at them at your convenience.

**THEY WILL SELL AS LOTS 101 TO 120.**

100K Tested - High EPD Accuracy

We are proud to present to you the first set of sons sired by CML Tremor 31L at this year's sale. As we say, "We don't want to just sell you a bull on sale day, we want to sell you bulls that make you more money - MORE POUNDS MORE PROFIT!" We believe the Tremor sons can make everyone more money in their operation.

Tremor is currently ranked in the top 1% for Terminal Sire Index which represents a formula based upon Weaning Weight EPD's, Yearling Weight EPD's and Carcass Trait EPD's. He is ranked in the top 2% of the breed for both Weaning Weight and in the top 1% for Yearling Weight all while being ranked in the Top 3% of the breed for calving ease! This is what they call a true curve bender! - Once again, "MORE POUNDS MORE PROFIT!"

### WHY IT'S VALUABLE TO SELECT CATTLE THAT HAVE BEEN 50K OR 100K TESTED

EPDs contain information from an animal's pedigree, performance and possibly DNA (50K/100K Testing) which are directly used to calculate the EPD for that animal in each specific trait. The use of DNA (50K/100K Testing) in the EPD calculation allows us to dramatically increase the accuracy of the EPD for animals that have been 50K/100K tested. These genomically-enhanced EPDs allows us to greatly enhance our selection process and better predict the genetic potential of that animal, particularly in young cattle (calves, yearling bulls and heifers) that have no offspring to evaluate.

For example, in the evaluation of an Animal's DNA (50K test), it is roughly equivalent to the reporting of:

- 10 Offspring from the tested Animal when calculating Calving Ease
- 25 Offspring from the tested Animal when calculating Birth Weight
- 15 Offspring from the tested Animal when calculating Weaning Weight
- 8 Offspring from the tested Animal when calculating Yearling Weight

So in summary, it goes without saying that if you were selecting a bull for Calving Ease, it would be a lot more predictable to select a bull that already had information on 25 calves than a bull that didn't have information on any calves and only relied on information from his sire and dam and his own birth weight.

## CML *Marksman* 517N

POLLED CML 517N 2025-01-04 BW 90 LBS WW 1205 LBS

LOT

**HERDBULL ALERT!** When you make your check list on all the attributes that you want in a herd bull, we think that CML MARKSMAN 517N will check all the boxes! MARKSMAN catches your eye with his style and massive performance and thickness. Then when you analyze his exceptional foot structure, you get excited about what this bull can offer the breed. The Tremor calves also have tremendous testicle development and MARKSMAN will have one of the largest measurements in the pen.

Marksman had the heaviest weaning weight in the herd with an actual weaning weight of 1205 lbs and a weaning weight WPDA at 4.51 lbs/day and is in the top 3% for weaning weight, top 2% for yearling weight, top 1% for Milk, top 1% carcass weight and top 1% for TSI with a 308!

You can see the consistency of this powerful flush as Lots 2 and 3 are also flush mates and the pair of heifer calves that we exhibited at Farmfair this fall are also full sisters out of the same flush.

HERDBULL ALERT! As a purebred breeder, the fastest way to build an elite cowherd is to use a son from one of the breeds elite cow families. The dam of Whirlwind, CML Desirae 751E has quickly risen to the top of our donor pen and his granddam, PZC TR Desirae 012 was a two-time Agribition Champion Female and the 2015 Agribition Supreme Champion Female. Add in the genetics of Tremor and the Jewel cow family on the top side of his pedigree and you have an elite breeding bull that will anchor your herd for years to come. WHIRLWIND had an actual weaning weight of 1015 lbs and a weaning weight WPDA at 4.34 lbs/day and is in the top 4% for weaning weight, top 3% for yearling weight, Top 1% for milk, Top 1% for Carcass Weight, top 25% for Rib Eye Area and top 1% for TSI. We look forward to using this exciting bull in our programs in the coming years.

You can see the consistency of this powerful flush as Lots 1 and 3 are also flush mates and the pair of heifer calves that we exhibited at Farmfair this fall are also full sisters out of the same flush.

SELLING ½ SEMEN INTEREST AND FULL POSSESSION.

HERDBULL ALERT! HEIFER BULL! I think this might be the first time I have ever classified a bull as both a Herd bull and Heifer bull but here he is! APOLLO is a bull that you can use in either pen. We think this bull is pretty unique. Another son of CML Tremor 31L that is out of a daughter of CML Thor 898F and Cedarlea Wren 13E. Wren is the female we showed at Farmfair this year at the age of 8 years of age with the perfect udder and feet! Once again, you have calving ease and maternal power built in on both sides of the pedigree. His EPD profile is well balanced as he is in the top 10% for calving ease, top 3% for birth weight, top 4% for weaning weight, top 15% for yearling weight, top 5% for Milk and Top 3% for TSI.

**100K Tested - High EPD Accuracy**

GRAND DAM - CEDARLEA WREN 13E

HEIFER BULL! Of all the bulls in the sale, this is the bull you want walking in your heifer pen! We think that this one is special being a son of CML Tremor 31L, a performance sire that we have used very successfully in our heifer pen. Now, when you add in the fact that the mother of 214N is a daughter of LT Authority 7229 and you have calving ease built in on both sides of the pedigree. His EPD profile is well balanced as he is in the top 15% for calving ease, top 15% for birth weight, top 10% for weaning weight, top 10% for yearling weight, top 3% for Milk, top 4% for carcass and Top 2% for TSI. The mother of this bull was a \$18,000 high seller in the 2023 Alberta Select Sale and sold to Royale Charolais, Armand Roy. This is her second bull calf to be featured in our bull sale as a calving ease specialist. This bull is one of the younger bulls but he has as much libido as anything in the pen. Look at the birth weight – 68 lbs!

Owned by Royale Charolais, Armand Roy

HERD SIRE ALERT. This is the type of bull we strive to produce! He is a stand out in the pen and catches your eye every time. We think this bull checks all the boxes. He is the complete package with depth, length, exceptional foot structure, and a beautiful hair coat! Heifer safe and performance packed. If EPD's are important, take a look at this chart!

100K Tested - High EPD Accuracy ~ Hetero Polled

HERD BULL ALERT! As soon as we had access to CML Tremor 31L semen we flushed one of our Fargo donor females to get a jump on what we expected to be a powerhouse mating. Boy were we happy with the outcome. When calving these off-age calves we noticed consistencies of high vigor and low birth weight.

MMM Winchester caught our eye from the moment he hit the ground. He is loaded with muscle mass and masculinity. This versatile bull can be used on heifers, without sacrificing performance, or turned out into your mature cow herd, to add consistent power and pounds. He will be entering the ring with his full brother MMM Remington 47M. Sweep the ring on these dependable brothers and get 10% off.
