

THIRD ANNUAL

*Millington
Wilberton*

SIMMENTAL BULL SALE
MARCH 10, 2026

On behalf of the entire Bohrson Marketing Services team, we are proud to welcome you to the 2026 edition of the Millington & Willerton Bull Sale. For the third consecutive year, this offering will be marketed through DLMS FarmGate Timed Auctions, providing cattlemen from across the country with convenient access to a high-quality, ranch-focused set of Simmental bulls. The partnership between Millington Ranch and Willerton Simmentals continues to strengthen with each passing year, and this bull crop is a direct reflection of two like-minded programs committed to building cattle the right way. These bulls are bred with a clear focus on calving ease, performance, foot and udder quality, and longevity which are traits that matter where the rubber meets the road.

A major strength of this sale lies in the maternal foundation behind these bulls. Both programs have invested heavily in proven, cornerstone females with track records you can trust. On the Willerton side, influential cow families such as Sage, Reebea, and the powerful 55D continue to anchor the program, consistently producing cattle that combine reliability, performance, and longevity. At Millington Ranch, elite females like Satin 1377J, the renowned Tula 104Z, and the Sprinkles cow family form the backbone of a program built around consistency and real-world functionality. These are dams with famous lineage, proven production records, and the kind of maternal strength that ensures you can buy with confidence. What we respect most about these programs is the disciplined, practical approach taken in developing these bulls. They are raised to thrive in real-world conditions, not pushed for the sake of sale day, and that philosophy shows through in their structure, soundness, and overall durability. These are bulls you can turn out with confidence and expect to go to work and stay working for years to come.

We strongly encourage you to take advantage of the open house opportunities, study the catalogue, and view the videos posted online. If you have any questions or are unable to view the bulls in person, please do not hesitate to reach out to Dean, Trevor, or any member of the Bohrson Marketing Services team. We are happy to discuss the offering and help you find the right bull for your program. Thank you for your continued support and interest in this sale and we wish you the very best on sale day.

best regards, Bohrson Marketing Services

ONLINE

Sale is online with DLMS Farm Gate Timed Auctions

DIRECTIONS

Millington Ranch: 4.5 miles North of Duval on Hwy 20; East side of the highway.

Willerton Simmentals: 1 Mile East and 1 Mile South of Hwy Junction 38 and 23, which is the town of Chelan, SK.

DELIVERY

Free delivery to central points in Alberta, Saskatchewan and Manitoba. We will try our best to deliver them right to your yard. Cost shared arrangements can be made to other destinations. Delivery date is at seller's convenience. **Payment must be paid in full before delivery of bulls.**

PURCHASERS RISK

All bulls become the risk of the purchaser at the close of the sale and must be insured if they are being left at the farm.

INSURANCE

Amber Hoffus, Johnston Agencies
(Porcupine Plain) 306-278-2101

SIGHT UNSEEN

If you are unable to view the bulls in person call Dean, Trevor or any of the BMS staff. They will go over the bulls with you and recommend the ones that will suit your needs. Bulls bought sight unseen are guaranteed to meet your approval when delivered.

VIDEOS TO VIEW

Videos will be posted to view in mid to late February on DLMS.ca.

U.S. PURCHASES

Exchange rate will be announced sale day. On any animal that is to be exported we will require \$400 to cover the costs of all of the vet charges. Testing will not take place until payment is made in full. We will work with the purchaser on a cost shared basis of getting the bull delivered after he has been paid in full and passed all tests.

BULL DEVELOPMENT

Millington bulls are developed on pail fed bull developer ration and self feed grass/alfalfa hay. Willerton bulls are pail fed stage one. Then, bulls are fed a stage two bull developer ration from Masterfeeds until approximately January 1. Then they are pail fed oat chop until delivery along with self feed grass/alfalfa hay.

HERD HEALTH

Millington Ranch

- For our herd health and semen testing needs we deal with Dr. Laurie Zemlak based out of Bar Z Veterinary Services. At birth the bulls receive Inforce 3, Vitamin AD, Dysotel (Vitamin E and selenium).
- April – Ivermectin, Ultrabac 7/Somubac, Bovi-shield gold one shot
- August – Ivermectin, Safeguard, Bovi-shield booster
- December – Sabre for lice

Willerton Simmentals

- For our herd health and semen testing we use Dr. Mike Evenson, NE Veterinary Clinic located in Tisdale.
- At birth bulls receive Inforce 3, Calfguard, Vitamin AD, Dysotel, Vitamin E and Selenium.
- April – Ultrabac 7/Somubac, Bovishield Gold One shot and Cyvence
- August – Ivomec, Ultrabac 7/Somubac, Bovi-shield booster
- December – Cleanup for lice

We both use Dr. Blair Simonson for our farm embryo work and implanting.

sale *details*

TERMS/PAYMENT

Check, Cash or e-transfer due sale day unless earlier arrangements have been made. Ownership will not change and papers will not be transferred until settlement has been made.

GUARANTEE

- All animals will carry the standard breeding guarantee as specified by the Canadian Simmental Association (CSA). At no time shall the sellers liability exceed the purchase price of the animal.
- This does not cover death, injury, sickness or mismanagement.

ACCIDENTS

Although every precaution will be taken to protect the safety and comfort of the buyers, neither Millington Ranch, Willerton Simmentals, sales management or CSA assumes any responsibility in this matter and disclaims any liability legal or otherwise in the event of accident or loss of property.

WEANING WEIGHT DATE

- Millington Ranch – August 17
- Willerton Simmentals – August 21

IN-HERD SEMEN COLLECTION

Both Millington and Willerton reserve the right to collect semen on any bull sold. This will be at purchasers convenience and sellers cost.

OPENS MARCH 9, 10 AM CST – CLOSSES MARCH 10, 7 PM CST

Welcome to the third annual Millington and Willerton Bull Sale. Once again we will host a sale online on DLMS Farmgate Time Auctions.

We would like to thank our past bidders and buyers from our previous sales and the continued partnership with Dean, Gina, Maren, Brooke, and Lila at Millington Ranch.

As we go into 2026 we are experiencing exciting times to be in the cattle industry. We are seeing record high prices and hope it stays strong well into the future.

We are a family-run purebred Simmental operation located just outside of Chelan, Saskatchewan, which is located at the junction of highway 23 and 38. As a breeder we strive to produce top end bulls and females using only proven dams with excellent feet, udders, and temperament that is backed by productivity and longevity. We achieve this by using embryo transplant and artificial insemination to keep on top of the breed's leading and desirable genetics with our base.

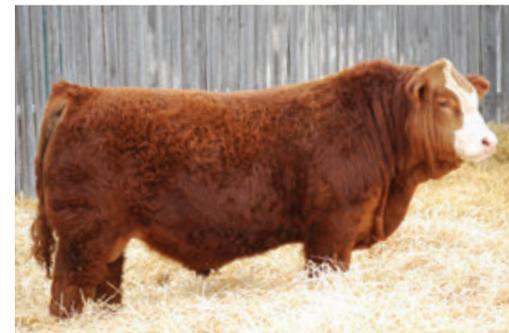

sincerely, Rylie, Trevor, Debbie Willerton

**open
house**

Homo Polled. I guess it is a good thing when you're not quite sure which bull should be your lot 1 in a sale offering. I've decided to go with this blazed face calving ease prospect. He is very eye appealing with excellent growth, moves well, is bigger framed, and has good testicle development, along with an 84-pound birth weight.

Sired by TOP TIER, a go-to calving ease bull that purebred breeders have used with a lot of success. Out of a first calf heifer we purchased from Rainbow River, a WTL daughter with a perfect udder and a temperament to match, who is also a full sibling to the great female-maker Betts. RWS Nitro 49N has a pedigree filled with great breeding, and we are excited about this guy's future.

Homo Polled. I have a very hard time putting this powerhouse in as Lot 2. I love this bull and everything about him. When looking for a bull, he has everything you need. RWS Nevada 43N is extremely long and thick, stands on huge very good feet, easy fleshing great growth, docile, big testicle growth, lots of hair, and very athletic. Sired by WTL, who needs no introduction, and out of, who is quickly becoming my favorite and most consistent cow, JNB Reeba 43H. JNB Reeba 43H is a No Miss Red Express daughter that goes back to LRX Reeba, she is one you never have to worry about and always brings in one of the best. This bull wouldn't be going anywhere if we didn't have 3 WTL daughters and 3 Red Express daughters in our little herd.

KWA CAN-AM 123H
SIRE

Homo Polled. This CANAM son is a good one. He's big hipped, lots of length, dark red, and comes with an 89-pound birth weight. I don't know if he would be safe on heifers or not, so I'm not going to advertise him as a heifer bull. But with CANAM and Red Express, he will be an easy calver for sure. His dam is a first calf heifer out of our (no deceased) donor cow, KWA Ms. Authority 55D, a real powerhouse. This guy checks a lot of boxes and shouldn't be overlooked come sale day.

Homo Polled. This combination just works – it is our last KWA 55D x Red Express embryo. We were of course hoping for a heifer to go with 29L, the mother of 29N, in the sale with another heifer we retained last year.

RWS Niko 10N is a moderate low birth weight bull that will fit into many programs. He has multiple full siblings working all over Saskatchewan, Alberta, and Manitoba. He is an ET calf with an 81-pound birth weight.

95	876	1478	6.2	3	101.9	144.9	4.1	15.9	112.97	84.22

Homo Polled. Our only black bull in this year's offering and he's a darn good one. He is moderate, super thick, and hairy. A WTL son out of Bently daughter we purchased from Kleppers a few years back. We were hoping for a blaze red heifer, being she was bred to WTL, but 0 for 3 – she had a solid black bull. That's the way it goes, but we couldn't be happier with the way his guy turned.

MADER WALK THE LINE 92J
 SIRE LOT 6 & 2

Millington Ranch

Welcome to the Third Annual Millington & Willerton Online bull sale. First of all, we would like to thank all past bidders and buyers for the support of our program. This is an exciting time to be in the beef business. I, for one, am pleased to see all the optimism in the industry today.

This year's bullpen is one we are very proud of, with performance type and calving ease bulls on offer in both black and red. Our main donor cow Tula 104z highlights our offering; featuring three black direct sons as well as two red grandsons. This year we changed our management practices – we developed these bulls out on pasture without any creep feeding. This was done with you the customer in mind as we work to manage bulls in an environment that is similar to how you expect these bulls and their progeny to go out and get to work for you.

As we work our way into 2026 the girls are all getting older. If you were by the stall at Agribition you probably saw Maren hanging around looking after the calves. She has really taken an interest to showing cattle the past couple years. As well as that she is busy with baseball, curling and volleyball. Brooke will be a first-year junior in 4-H and is excited to show a bred heifer for the first time. Brooke has really taken a shining to dance and is a natural when you see her on stage. Lila really likes being out with the baby calves, cats and riding in the tractor. As for Gina and I we are just along for the ride with these three fire crackers.

Once again we will be hosting an open house the afternoons of Monday, March 9, and sale day Tuesday, March 10, so feel free to swing by and tour the bulls and cows. If you can't make it in person don't hesitate to give myself or the Bohrsen crew a call to discuss the offering.

sincerely, Dean Sentes

**open

SVS RANCHER 42H
SIRE LOT 7 & 8

Homo Polled. The first of two full brothers, these two Rancher calves have been side by side in weights all year but both with a bit different make up. This one is a tic bigger framed with dark red wavy hair, loose hid and big square hipped. You will admire how well his power is tied into a free moving structure. This fall Maren showed a full sister to his dam and she stood in the championship drive of the Simmental division of the Junior Beef Extreme at Agribition.

R PLUS SATIN 1377J
 DAM LOT 7&8

Homo Polled. In a group as good as this its hard to have a personal favorite but this guy has been the guy all year in my mind. Right full of red meat, big hipped wide topped, deep ribbed and stylish we can't say enough good things about him. When I saw his dam a few summers ago I immediately new buying these embryos was the right decision. Her capacity was overwhelming but she still moved like a cat just like her dam 104z. This guy follows along in her body type and we feel it is the optimum type and kind for todays cattleman.

Retaining semen for in herd use.

MILLINGTON EMPIRE 9K
 FULL SIBLING TO DAM

Homo Polled, Hetero Black. This May born calf was carried over to specifically be a long yearling. We don't calve in May but after his dam aborted a calf late after a 4-H show we decided breeding her back right away was the right decision. Coming off the calving ease specialist Primetime he has calving ease in his pedigree and with his age he will be able to cover more cows than a yearling. Big bodied and smooth made is an accurate description of him. He is one you won't want to miss on sale day.
