

2026

**P&H RANCHING CO.
CIRCLE G SIMMENTALS
GALLELLI CHAROLAIS
BULL SALE**

**SATURDAY, FEBRUARY 21, 2026
1:00 P.M. MST • Innisfail Auction Market**

Welcome to our 16th Annual Bull Sale!

We are incredibly grateful for the continued support of our loyal customers, friends, and family. Whether you've joined us at previous sales or purchased directly from the farm, your trust in our breeding program is the greatest compliment we can receive. Thank you for being a part of our journey.

This has been an outstanding year for the cow-calf sector, and we remain hopeful for continued prosperity—a welcome change after many years of patience. The Charolais breed is seeing a significant surge, as Charolais-cross calves continue to prove their value by consistently topping the markets.

Our mission remains clear: to produce high-quality bulls that strengthen your bottom line. As operating costs rise, securing the 'Charolais premium' for your calf crop is more vital than ever. We are confident that our current lineup can help you maximize your returns. Whether your goals include calving ease, high-growth performance, or retaining top-tier replacement females, you will find a bull in this sale that fits your program.

Russell Gallelli is proud to offer an outstanding set of yearling Charolais bulls this year. His dedication to the Charolais breed is evident in the quality of his cattle. Additionally, Shelby and her mom, Marsha, continue to grow their footprint in the breed, offering two of their finest yearling bull calves. Make sure you check their yearling bull offerings out; you won't be disappointed.

Garth Cutler has put together an impressive set of yearling bulls that truly represent the Circle G Simmentals standard. His eye for genetics and his commitment to his customers' success are reflected in every bull he brings to the sale. Be sure to give this group a close look—they are bred to perform.

Videos of the bulls will be posted on DLMS a few weeks before the sale. We also invite you to visit our farms at any time before the sale to view the bulls in person. Additionally, the bulls will be available for viewing at the Innisfail Auction Market on the Thursday afternoon before sale day. If you are unable to attend on sale day, please take advantage of online bidding via DLMS or contact any of the sales staff to place bids on your behalf.

Thank you, once again, for your continued support, and we look forward to seeing you at the sale.

Insurance

Monica Czech CANADIAN FARM INSURANCE (780) 733-7715

If bulls are returning to the seller's farm after the sale, we recommend insuring them. While sellers will take every precaution to protect their health and safety, bulls remain there at the buyer's risk.

Thank you Monica, and Canadian Farm Insurance for sponsoring coffee & donuts.

Sight Unseen Purchases

Buyers unable to attend the sale may call or place bids with the owners or sale staff. Buyer satisfaction guaranteed.

Sale Day Discount

Save \$150 when you take your bull home on sale day. If you need to pick up the following day, arrangements can be made with the seller and auction market; and you'll still receive the discount. Circle G bulls return to the farm after the sale unless other arrangements are made in advance.

Bull Delivery & Board

Bull delivery is complimentary within 300 km; delivery beyond that distance is available at cost. Deliveries will begin within a reasonable timeframe after the sale at the seller's convenience. **Bulls may be kept at the farm free of charge until April 1, 2026.** A \$5/day fee applies thereafter.

LOT 1

PH White Owl 26M, has always been a stand out during pasture checks throughout the summer. He is a wellbalanced bull with plenty of red meat, offering extra rib and overall thickness. With a moderate BW and moderate stature, 26M combines performance with practical usability. If you are looking to add dimension and thickness to your calf crop, he is a bull worth serious consideration. His sire, ONL Signal Hill 66K, purchased from O'Neill Livestock, was selected, in part, for his beautiful hair coat, sound foot structure, and excellent disposition. These same traits are clearly being passed on, and 26M is strong proof of that consistency.

ONL SIGNAL HILL 66K - SIRE OF LOT'S 1, 3, 9, 27, 28 & 29

LOT 2

PH Concord 47M is a stout, performance-driven bull that demands attention. He ranks in the top 10% of the breed for both weaning and yearling weight with a strong 4.05 WPDA. His 15.3 in² rib eye area is at the top end with his pen mates, and he sits in the top 20% of the breed for REA EPD. Structurally sound with excellent foot quality, he moves with ease. His dam, 12G, has already proven herself with two popular maternal sons selling in previous sales. If you're looking to add extra body and substance, 47M is a bull worth serious consideration.

PH JADA 12G - DAM OF LOT 2

LOT 3

PH White Owl 60M is another attractive Signal Hill son with plenty to offer. He carries a moderate 102-lb birth weight and combines eye appeal with added length of body and rib shape. Sound-footed and built for durability, he is a bull that will cover country with ease. His dam, 83H, is a deep-bodied cow with an excellent udder and strong milk production. She has already produced a son that sold to Rey Creek, followed by another standout bull in last year's sale, which went to Arrowwood Colony, establishing herself as a consistent and reliable producer with a promising future. Utilize 60M to enhance the value of feeder calves while improving maternal strength and replacement heifer quality.

LOT 4

PH Liberty 77M ranks in the top third for all growth traits and posted a strong 15.2 in² rib eye area. An impressive calf at weaning, to the point I considered him for the yearling sale pen; however, due to his younger age, I thought it best to hold him over for this year's two-year-old offering. He has matured into a powerful, eye-catching individual. He is loaded with muscle, exceptional thickness, a strong hip, and a balanced, athletic stride. His dam, 105F, is a maternal sister to the dam of Lot 2, stemming

PH WILLOW 30A
GRAND DAM OF LOT'S 2 & 4

PH MISS ADVANCE 105F
DAM OF LOT 4

from a proven cow family. The inset photo of their dam highlights the strong maternal side behind this bull. 77M offers commercial producers a rugged, high-capacity bull that will add pounds, muscle, and feeder-calf value while maintaining maternal strength in replacement females.

	8.6	-1.1	67	132	26	59		3.40	4.29	17.09	68.25

PH Nationwide 43M ranks in the top one-third of the breed for all growth traits and combines that performance with carcass merit, posting strong marbling and an impressive 17.1 in^2 ribeye area. He is a stout, meaty bull with a well-balanced, powerful look and is built to sire calves that push the scale down at every stage. His dam, 145E, is a proven top-producing cow, and a maternal sibling from last year's sale sold to Carmangay Colony, further validating the consistency and reliability of this cow family.

PH Shadow 40M offers a little more frame while maintaining excellent balance and athletic design. He is smooth-shouldered and correct from front to back, built to cover cows and convert frame into added pounds. He is backed by a deep, consistent cow family, with five maternal siblings having already sold through our sale ring. His dam, 73B, traces to our proven 63U cow family, a bloodline that shows up repeatedly in our offering and is known for durability and productivity.

PH NORA KAY 5F - DAM OF LOT 7

PH Shadow 36M, a full brother to Lot 6 from last year's sale that sold to Rey Creek Ranch, offering buyers a repeatable and proven genetic package. He sells as an unregistered purebred, with multiple generations of purebred genetics behind him. His dam, 5F, is a big-volume, no-miss cow that consistently gets the job done. An eye-catching bull with added depth and capacity, 36M moves freely and is built to sire a heavy-weighting, performance-driven set of calves.

PH Kaboom 104M has stood out since weaning with his balance and eye appeal. As he has matured, he has developed into a truly soggy-made, deep-bodied bull that is a natural easy keeper. He combines that extra capacity with muscle, posting an impressive 15.6 REA. This is the kind of bull that will add real payweight and performance to a calf crop without sacrificing efficiency. His dam is a maternal sibling to Lot 7, PH 36M, and she is no slouch herself, further backing up the consistency and productivity behind this mating.

CPC White Owl 29M posts an impressive weaning-to-yearling weight ratio, showing his ability to grow efficiently. He is a smaller-statured bull with a lighter birthweight and a clean, attractive head that should translate into easy calving. Despite his moderation, he adds extra thickness and rib shape where it counts. He carries the excellent hair coat and positive disposition of his sire, Signal Hill, making him a practical, user-friendly option for a wide range of programs.

PH Reload 64M is moderate in frame and in BW. In the top 30% for WW and has a respectable REA. His TSI is in the top 15%. In our 2024 sale, he had a maternal sibling who sold to the Millers at Thorsby. 64M will make a good all-around bull for ranchers wanting to add pounds to their calf crop.

S & M CHAROLAIS

INNISFAIL, ALBERTA Shelby Ramsay TEL (403) 872-4064

Another year has come and gone for Shelby and Marsha Charolais. I would like to thank my sale partners again for letting me continue in this year's sale. I have two outstanding yearling bulls that are out of two half sisters. These two females I purchased from The Cedarlea Female Sales. Both females have beautiful dispositions as well as nice udders with lots of milk.

Shelby

Marsha

Russell Gallelli TEL (403) 804-7442 EMAIL russellgallelli@live.ca

Wow! Just when you didn't think the cattle industry could get any better here we are! With record breaking beef prices all across the board, the dedication, devotion and determination in the cattle industry is paying off. I couldn't be happier in joining the P&H Ranching and Circle G annual Bull Sale once again. Corrine and Garth a huge thank you to having me once again, I am very thankful!

This year's bull crop has been as impressive as they come and I think there is a bull within the pens that will work for any producer. From calving ease bulls, to range bulls to show bulls these bulls could work in many different operations. Our genetics continue to grow with using new herdsires like ONL Demand 50 and utilizing embryo genetics to bring in different pedigree lines that I haven't used before. As always the bulls need to come from dams that are maternal in their make with good udders and foot structure beneath them. The bulls need to be docile to handle with ease, powerful enough to get out into any terrain and cover all of your cows without any concern.

I would also like to thank my parents, Darcey and Leisa, I would not be where I am today without your continued support, knowledge, advice and the never ending help. A special thank you to Natasha for supporting me everyday and taking the absolute best care of our daughter, Avery.

The bulls once again have been fed a well balanced ration that has allowed them to grow at a rate that they will be productive for years to come. We follow a full herd health program with our friends at Veterinary Agri Health Services to ensure that they are healthy and ready to perform when the pastures turn green and are turned out with the cows. I look forward to seeing all of our customers new and old at the Innisfail Auction Mart! The bulls are always available for viewing along with the coffee hot and the beer cold.

Sincerely,

Russell

Natasha, Russell, Avery, Leisa & Darcey

Russell & Avery

LOT 33

What a stand out of a bull RUSS NUCLEAR 505N has been all year. A high performance cow bull that has gone out and turned heads where ever he has been. The thickness, depth and stretch this bull carries so soundly I look forward to his future and seeing his calves hit the ground.

CIRCLE G SIMMENTALS

Welcome to the 2026 edition of our bull sale. First and foremost, we extend a huge thank you to all our buyers over the past year. Whether it be our many valued, long-term customers or first-time buyers, the support shown Corinne, Russell, Shelby and myself is very gratifying. We truly appreciate this loyalty and understand the degree of trust you place in us when you invest in our bulls. We take pride in offering high quality genetics and standing behind our product.

What an exciting time to be in the cattle business...it's a good time to own cows! Beef producers are finally being rewarded for their hard work and dedication. Quality beef is in high demand and the North American cowherd numbers are low so the industry is well positioned to be profitable for many years to come.

I'm very proud of this set of bulls. Much time, effort and money has been devoted towards building this cowherd...they are the factory. Visitors compliment me on my cows' ease of fleshing and uniformity as well as their foot and udder quality. This has been achieved by culling ruthlessly for those traits. I also utilize genetics that enhance calving ease, feed efficiency and carcass quality while maintaining above-average growth and performance. I believe that epds are a valuable selection tool, especially for BW, CE and carcass traits. Carcass quality is a crucial economic trait and we as seedstock producers need to improve what's under the hide to move the breed forward and improve our customers' bottom line. I use ultrasound carcass scanning technology to find out where my genetics rate and to provide actual data to build my carcass epds. I'm pleased to see most of my genetics rank highly. This data is important and I urge you to evaluate these traits when making bull purchases. Some of the "popular" Simmental sires have very disappointing epds for carcass quality and other traits. I pride myself on breeding cattle that look good and are functional, while having top ranking, balanced epd numbers that indicate they are good under the hide as well...take note of the breed epd rankings listed with each sale bull.

This catalogue has pictures of the mothers of most my sale bulls...very few sales provide these but I feel it is very valuable information that's needed to truly evaluate the bulls and make informed buying decisions. With Joe's assistance I was able to get these pictures taken last fall prior to weaning.

Long term employee and friend, Ben Dowling, returned home to Ontario last spring. His good help and efforts over the eleven years here were much appreciated. Thanks to family and friends for helping out at busy times during the year and to Joe Faubion for continuing to work hard to keep things under control at Circle G. Joe is a new father and he and Shayna are getting married this summer at Circle G.

The Circle G bulls were weaned on September 10 and ran on green feed swaths and banked grass for 2 weeks in a 10 acre field. They were then started on a silage-based TMR ration that is balanced to grow them and allow them to express their genetic performance potential without impairing their soundness and longevity. No creep feed is used through the summer and no feet are trimmed. I feel it is very important to have the weaning weights reflect the dam's milking ability. The bulls were in their field getting plenty of exercise until December 8 when they were brought into the yard to be sorted and clipped for the pictures and videos and given their first shot of Fusogard. There will be heavier bulls sold at sales this year but you will not find a sounder, more athletic set of bulls anywhere.

All the bulls 12 months and older by sale time will be semen tested. The bulls will return to the farm after the sale and those bulls that haven't been semen tested will be after they have matured more. Delivery to your farm will follow.

This group of sale bulls were selected from 151 bull calves that were born. No games or tricks are played here to enhance certain sire's epds by placing "special" animals in separate management groups. These sale bulls are an exciting set with large sire groups that offer my customers some new genetics. Note that there are numerous bulls that will provide very similar calving ease to the Angus bulls that I offered in the past. In fact, there is a pen of 22 bulls that have been sorted into the calving ease bull pen. The sale bulls provide a wide range of bloodlines and phenotypes to suit different operations and breeding goals, and there should be a bull, or bulls, that will be a perfect match for your herd and budget.

We hope you can be with us in Innisfail on sale day, but for those unable to attend, we are providing various options and ways for you to buy your bulls. DLMS will be onsite to handle internet bidding, our sight-unseen buying program has worked very well in the past and a very competent sales staff can assist you as well. See pages 2 & 3 for more information.

I strongly encourage you to come and view the bulls and their mothers at the farm prior to the sale or call and visit about the bulls. Remember that no one knows the bulls better than me and I will gladly discuss them with you. The bulls will be available for viewing at Innisfail on Thursday and Friday.

This is the strongest set of bulls ever offered...the quality runs very deep. I aim to offer a quality product, with great customer service, and look forward to visiting with you at the sale on February 21st.

Sincerely, Garth Cutler 403.304.0896

GARTH CUTLER

JOE, SHAYNA & MABEL

See calving ease score chart and explanation on page 54.

VIEW VIDEOS OF ALL THE BULLS ON DLMS.CA

Please note that the video footage was shot when we pictured the bulls on December 29 & 30. The days are very short at that time of year so some of the photos and video footage may be darker and show some shadows. Also keep in mind that the bulls are just 10-12 months of age at this time.

MATERNAL BROTHER - HEAT WAVE

DAM - 838F

- Northern View is a feature bull that has been a standout from day one...he's hairy with extra depth of rib and a long, level hip
- Combines power, structural soundness and eye appeal with a great set of epds (12/13 measured traits are in the green) and take note of his superior carcass quality numbers
- Ranked 2/128 bulls in his management group with his ADJ WW of 957 lbs
- Dam, 838F, is one of the best cows at CG and has a stellar production record...her first calf, Heat Wave, sold for \$47,000 to Lewis Farms & Sandy Hill and he's now working at Beechinor Bros
- Other 838F sons have sold to Mitchell Cattle Co. in BC and Eastrise Cattle...an excellent maternal sister to 58N is the dam of the very good Lot 64 bull
- HOMO POLLED, PARENTAGE VERIFIED

RANK	2	2	4	3	2	65	100	10	3

- Latitude was my pick of the red bulls at the 2024 Westway Farms bull sale
- He's cherry red in color with the attractive baldy face, rock solid feet and an awesome set of epds...he bred consist and true as his calves are also similarly marked with excellent epd profiles
- 1768E dam is an outstanding female that Andi and Braden considered to be their best black cow...I strive to stack these elite females in my pedigrees and Stepping Stone offers outcross genetics to most programs

- Latitude worked extremely well as a yearling and sired 45 calves by natural service... this is a valuable trait as I believe this ability to get cows bred is highly heritable
- The Latitude sire group are like peas in a pod...he sires cattle that are dark colored, many with blazes, that have plenty of growth while keeping the birthweights in line, are sound structured and are very easy to look at
- 20 SONS SELL!

MATERNAL GRAND DAM

- The uniformity of this sire group is impressive and very meaningful as consistency of type and kind pays dividends when we, as producers, sell any class of cattle
- Lots of quality and predictability in this pedigree as Night Rider is backed by the rock solid 223B female that is also the grandmother of Heat Wave
- A nice maternal sister sold to East Point Cattle Corp. in the package of 44 bred heifers they purchased last fall
- HOMO POLLED, SIRE VERIFIED

- News Flash leads off this year's set of the \$280,000 Walk The Line bull's sons...his sons that have sold in past sales have been extremely well received and have worked well in the breeding pastures
- The first WTL daughters calved last year and they have met my highest expectations with their udder quality and production
- 10N ranked #6 out of 128 bulls with his 946lb ADJ WW...he's a real good one and will sire pounds and outstanding females
- 145Y dam calved again early in January at 15 years of age and looks very good...her production record is stellar with 15 calves born in 15 years (with 2 sets of twins) and she has quality daughters and granddaughters in production
- Maternal brothers to 10N have sold to Daryl Hill, Double Four Farming, Scarlett Livestock, Rycroft Cattle, Redrich Farms and Shady Nook
- HOMO POLLED, SIRE VERIFIED

- Nightshift is a standout in the excellent set of calving ease bulls and his stats and epds indicate that he'd work great in the heifer pen...81lb BW and a WW of 960lbs with 11/13 epd traits very much in the green (including CW, REA and Marbling)
- The Primetime AI sire has been a calving ease option for use on heifers and his progeny have enough punch to excel
- 21N's War Zone sired dam contributes to this high quality genetic package with her super epds, correct udder structure and is backed by the strong Sabrina cow family... her mother was my pick of the black bred heifers at the Meadow acres dispersal and her dam was one of the high sellers to Rainbow River Simmentals
- HOMO POLLED, HOMO BLACK, PARENTAGE VERIFIED

In Appreciation of Kathy Matejka

For many years, Kathy played a crucial role behind the scenes of our bull sale catalogues, producing well over twenty catalogues for our family and, more recently, for P&H Ranching and Circle G. Her creativity, positive attitude, strong work ethic — and, yes, her patience — were genuinely appreciated.

Beyond her professional contribution, Kathy's friendship meant a great deal to us. She was truly a special lady, and her impact will be remembered by all who had the pleasure of working with her. While she will be deeply missed, her legacy and the many stories she helped tell through these pages will not be forgotten.

Kathy is held close in the hearts of her husband, Mark, and their very accomplished family: Brittney (Kolton & Mia), Carling (Stijn), and Tyson (Teagan), who were always a source of great pride to her.

- Notion is a true cattleman's bull as he provides payweight and carcass quality without compromising maternal traits...11/13 epd traits are in the green
- His sire, Legacy 51L, was the leadoff black bull in the 2024 sale and sold to Shady Nook Simmentals...I hand bred some cows to him before Stacey took delivery of the bull and have 2 excellent sons and 4 fantastic daughters
- 86H dam is a beautiful female and carries the same outcross blood as the good Lot 101 bull's dam...her good son sold last year to SW Keystone Cattle Co. for \$12,500
- HOMO POLLED, HOMO BLACK, PARENTAGE VERIFIED

DAM - 90F

DAM - 045H

- Take a good look here as Newsreel is one of the hairiest and deepest ribbed bulls in the pen...his picture could be placed in the dictionary to illustrate the meaning of "soggy"
- Ranked high with a 1035lb WW and has high growth and carcass epds
- McDavid was a high dollar Lewis Farms bull that sired so many top cattle for Spring Creek
- 827F dam is an excellent Venom daughter that has several daughters in the CG cowherd and her sons have sold to Brian Knight and the Alm Ranch
- HOMO POLLED, HETERO BLACK

- He's the first calf from the \$21,000 KT 3033L female that's a full sister to the very popular RF Caliber 014G sire
- HOMO POLLED, HETERO BLACK, PARENTAGE VERIFIED

COW POWER AT CIRCLE G

The Circle G cowherd has been culled ruthlessly for udder and foot quality, ease of fleshing and temperament. I insist on these fundamentals. The cows are not pampered and are managed similar to those of many of my commercial bull customers utilizing swath grazing and high roughage rations. 20% of their silage based winter feed is made up of straw to lower input costs and put selection pressure on the herd. Every year at least 15% of the cowherd is removed and replaced...each cow must earn the right to stay.

THE CIRCLE G COWHERD IS FUNCTIONAL, SOUND AND HIGHLY PRODUCTIVE.

BE ASSURED THAT EVERY CIRCLE G BULL IS BACKED BY A QUALITY DAM.

SOLD TO WESTWAY FARMS

Calving ease is a combination of a bull's actual birth weight, his genetics (epds) and the females a bull is bred to. 50% of the equation is the management and genetics of the female. The Calving Ease Score (CE) provided is my best estimation of calving ease after evaluating the actual BW, epds, genetics and body shape of each bull.

CALVING EASE SCORES

- **** Suitable for use on heifers - should produce minimal calving issues
- *** Suitable for use on larger framed heifers
- ** Recommended for second calvers and cows
- * Recommended for mature cows

THANK YOU

TO OUR 2025 FEMALE BUYERS

Thank you to Shane & Erin Sawley & Family of East Point Cattle Corp. of Melville, SK for their purchase of a package of 44 bred heifers last fall.

Circle G females are for sale at the farm, throughout the year. Pairs, bred heifers or heifer calves... call Garth for more information.

CUSTOMER SERVICE

We are committed to providing top service to our customers by following up on cattle we sell. Buyer feedback helps shape our breeding programs. We keep a select group of bulls out of the sale for customers that may require a bull(s) through the breeding season.

THANK YOU

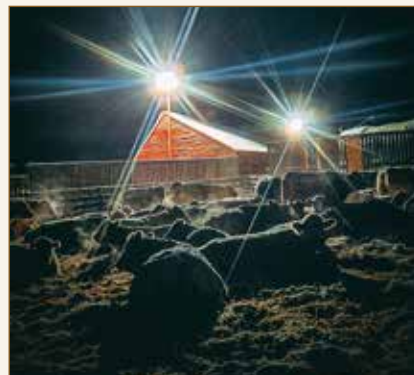

to the excellent helpers on the picture and video days. Kaitlyn Sehn, Cletus Sehn, Kallista Chessor, Larissa Lupul, Joe Faubion & Stacey Bell

THANKS to Bridget Andrews for shooting the video footage of the sale bulls and helping in the picture pen.

DOING WHAT YOU LIKE IS FREEDOM... LIKING WHAT YOU DO IS HAPPINESS.

EPDs - HOW TO USE THEM

Expected Progeny Differences... EPDs are a selection tool that provides estimates of the genetic value an animal will pass on to its progeny. They can be used to help ensure that you find the best bull for your needs and long term breeding goals.

EPD EXPLANATION

BW: Birth Weight - a prediction of sire's ability to transmit birth weight to his progeny...a lower value indicates lighter BW.

CE: Calving Ease - A higher value indicates increased calving ease.

WW: Weaning Weight – predictor of sire's ability to transmit weaning growth to his progeny.

YW: Yearling Weight – predictor of sire's ability to transmit yearling growth to his progeny.

MCE: Maternal Calving Ease - Indicates the ease which a sire's daughters calve...a higher value indicates higher calving ease.

MWT: Maternal Weaning Weight - Indicates the WW of a bulls daughter's calves when compared to other bull's daughters.

Milk: A predictor of sire's genetic merit for milk and mothers ability as expressed in her daughters.

API: All-Purpose \$ Index - Evaluates sires for use on the entire cowherd. Includes daughters retained to maintain herd size and the remaining heifers and the steers put on feed with their carcass grade and quality.

TI: Terminal Index - ranks animals based on their relative genetic merit for a situation in which Simmental sires are mated to a mature Angus cow herd. All calves are placed on feed and sold on a value based marketing grid that rewards carcass grade and yield.

TERMINAL SIRE INDEX (TSI)

The CCA Terminal Sire Index (TSI) utilizes economic and management descriptions of your ranching operation, along with EPD on available Charolais bulls to assist in identifying the most profitable sires for your unique operation. Using economic selection index theory, this tool will generate dollar indexes per terminal progeny produced on bulls in the CCA database, ranking them for profit potential given the inputs you provide. The dollar indexes are to be interpreted much like single trait EPD. For example, if sire A's index is \$191.66 and sire B's index is \$200.00, then we would expect Sire B's offspring to average \$8.34 more net return (\$200.00 - \$191.66) than sire A's offspring.

This program assumes all offspring are marketed based on carcass value and replacement females are purchased or raised separately. Inputs should be provided based on historical information from your operation. The TSI economic default value is based on a three-year rolling average utilizing USDA data. **SIRE LISTING CRITERIA:** For bulls to have a Terminal Sire Index they must be registered with the Canadian Charolais Association. Each bull must also have an EPD for BWT, WWT, YWT, MAT, REA, HCW, MARB, and FAT.

Note: The new TSI (2024) was developed to model a production scenario and breeding system where Charolais bulls are mated to Angus-based cows, 2 years of age and older, and all progeny fed out with harvested carcasses marketed on a value-based grid which includes a premium structure for cattle that are in the upper 2/3 Choice quality grade. These development features are detailed

The complete source of information on TSI can be found on the CCA website. It is a good read.

P&H and Circle G bulls are developed on BULLSEYE Premix

Each bull sale consignor maintains a complete Herd Health Program and all the sale bulls are double vaccinated with FUSOGARD for the prevention of foot rot.

WHAT'S A BULL WORTH?

Cowman Formula

**Increase in pounds per calf
from a top-performance bull**

X the Number of cows bred to him per year
X the Number of years to keep the bull
X the Expected selling price of calves
= Additional dollars you can pay for a better bull

Example: A bull who will add 30lbs to the weaning weight of each of his calves mated to 25 cows per year for 4 years and you sell the calves for \$5.00 per pound.

30 lbs X 25 cows = 750 lbs

750 lbs X 4 years = 3000 lbs

3000 lbs X \$5.00 = \$15,000

This bull is worth \$15,000 more than the average bull who will keep your weaning weights the same. Take this formula and put your own figures in and see what you can afford to pay. This equation does not consider the increase in value due to calving ease, higher quality replacement heifers, yearling growth, feedlot gain and improved carcass quality.

BENEFITS OF P&H RANCHING CHAROLAIS CIRCLE G SIMMENTALS GALLELLI CHAROLAS S&M CHAROLAIS BULL SALE

- One-stop shopping for premium Charolais and Red & Black Simmentals
- No bulls have been sold before this sale
- All bulls are double vaccinated with FUSOGARD for hoof rot prevention
- Bulls are developed on high-roughage rations to promote long-term soundness and fertility
- First-class sale-day hospitality as a thank-you to our valued customers
- Committed to exceptional customer service — buyer satisfaction guaranteed (NFAC)
- Quality bulls are available across a wide range of prices to fit every budget

TERMS & CONDITIONS

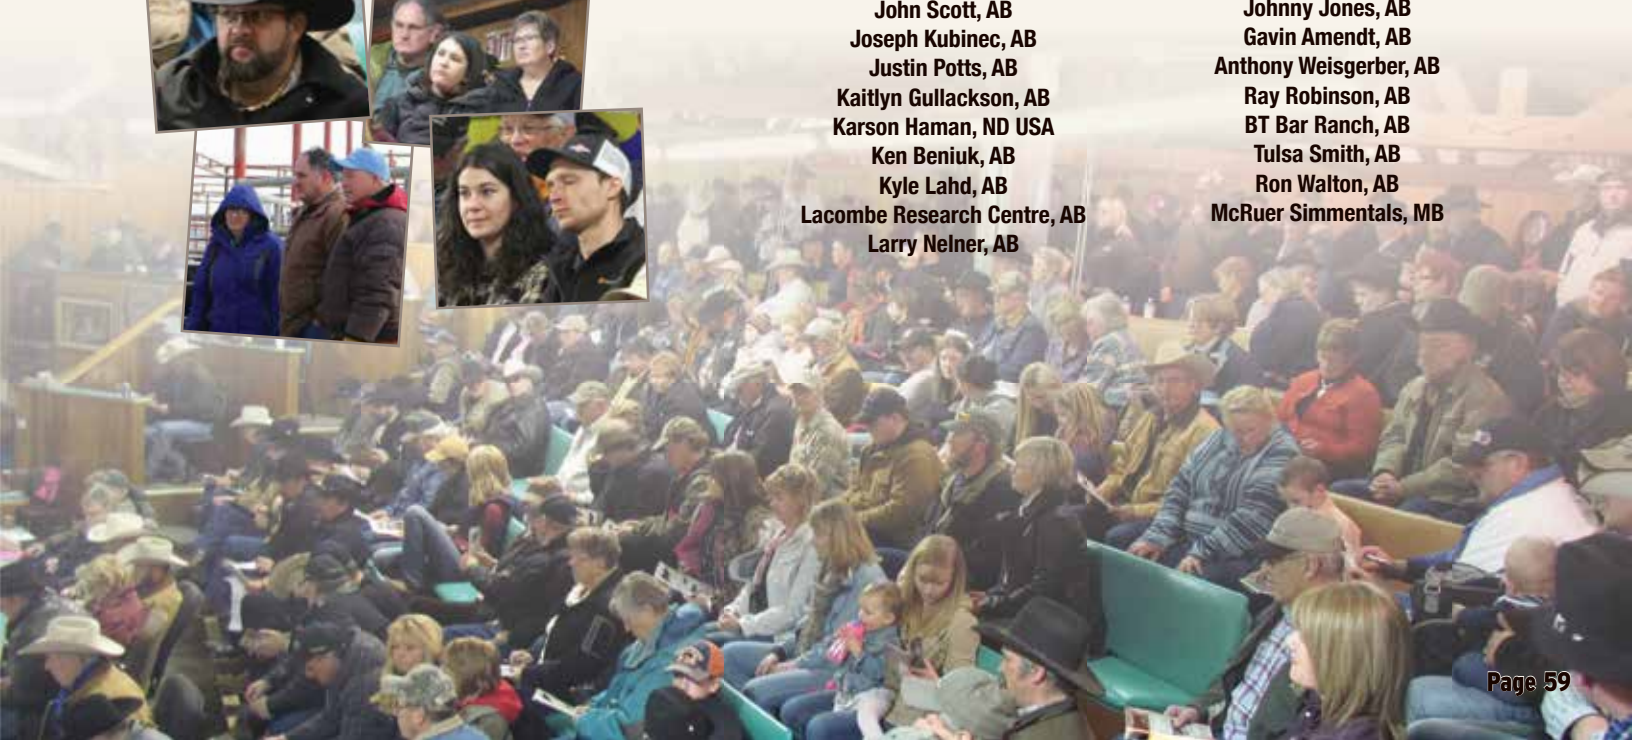

1. TERMS – The terms of the sale are cash or cheque payable at par in Canadian funds to the sale clerk on sale day unless otherwise previously arranged with the sellers prior to the sale. No releases will be given until satisfactory settlement has been made.
2. BIDS – Each animal will be sold to the highest bidder.
3. DISPUTES – In case of disputes, bidding will be reopened between the parties involved. If no further bid is made, the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision in such matters will be final.
4. ANNOUNCEMENTS – The information contained in this catalogue is believed to be true and accurate. Announcements at the sale by the owner, auctioneer or sales management will take precedence over the printed matter in this sale catalogue.
5. PURCHASERS RISK – Each animal becomes the risk of the purchasers as soon as sold.
6. CERTIFICATE OF REGISTRATION – The proper registration papers from the CCA and CSA will be duly transferred and furnished to the buyer for each animal after settlement has been made.
7. GUARANTEE – All bulls carry the standard breeding guarantee as specified by the applicable Canadian breed Associations. Bulls are guaranteed to be structurally sound and will have passed a semen test by a qualified Veterinarian prior to sale day or delivery. In the unlikely event of a dispute, the regular terms and conditions of the standard breed Associations will apply. At no time shall the seller's liability exceed the purchase price.
8. ACCIDENTS/LIABILITY– Every precaution will be made to protect the safety of those attending the sale. All persons attend the sale at their own risk. The seller, facility, owner & other persons involved with this sale assume no liability, legal or otherwise for any accidents that occur in, on or about the premises.
9. INSURANCE – Ownership risk to purchaser commences when the Auctioneer's hammer falls. Livestock coverage will be available at the clerk's desk from the appointed representative sale day. It is mandatory that all bulls returning to the seller's premises be insured at the buyer's expense.
10. DELIVERY – The sellers will deliver bulls free of charge within a 300 mile radius. Delivery beyond will be at cost. All bulls will be delivered within 30 days after the sale date.
11. P&H Ranching, Circle G Simmentals, Gallelli Charolais and S&M Charolais reserve the right to collect semen on any bull sold for in herd use. This semen will be collected at the buyer's convenience and at the seller's expense.
12. SOLICITING – It is unethical for anyone to promote, advertise or arrange the sale of any cattle, other than those in the sale, on the sale premises.
