4 bulls - 4% discount
5 bulls - 5% discount

DELIVERY:

A) Bulls picked up on sale day receive \$100 off/bull.
B) Free delivery to central points in Alberta and Saskatchewan. Destinations beyond our regular delivery route will be cost-shared. We will do our best to deliver directly to your yard. Delivery will begin approximately April 1. Bulls remaining on farm after March 9 must be insured unless alternate arrangements have been agreed upon prior to sale day.

CUSTOM LIVESTOCK TRANSPORTATION:

ELCO Livestock - Cody Doucette - 780.243.4412

HEIFERS:

Purebred heifers will be delivered if needed. Commercial heifers shall be picked up sale day or shortly after.

SIGHT UNSEEN:

If you're unable to make it to the sale, or to view the offering ahead of time, please give us a call. We are more than happy to discuss your programs and find the bull or female that best suits your operation. We will refer you to our sales staff on sale day. We do guarantee satisfaction upon delivery.

IN-HERD SEMEN INTEREST:

Red Willow Ranch Ltd. reserves the right to collect 100 doses of in-herd semen from every bull in the offering. This is to be done at the new owner's convenience and the seller's expense.

BREEDER'S GUARANTEE:

No guarantee is given that semen collected from sold bulls will freeze. We do not warranty injury or mismanagement.

EXPORT CATTLE:

All health, duty, and any other US or CAD customer fees for US-bound cattle will be the financial responsibility of the buyer. Cost of delivery to the US border will be covered by the buyer unless otherwise negotiated.

Darren and Tina Tyler & Family

Josh, Jada, Stetson, & Waelyn Tyler

Welcome to our 16th annual Simmental bull and female sale. It's difficult to fathom we've been doing this for almost two decades now, but here we are. This year's offering truly does bring our strongest set of bulls to the sale. We've always selected easy-fleshing, high production cattle for several years and it's rewarding to see them perform and excel in real-world conditions. Our bulls are backed by a highly maternal cowherd and we pay a small tribute to some of those foundational females on page 6. We feel our bulls are right for the times where the pressure is on now, more than ever, to raise the kind of cattle that produce higher yielding carcasses. Our power bulls come to you today showcasing a more moderate frame without sacrificing performance. Our calving ease prospects continue to offer the growth required to maximize your profits off those first-calving females. The feedback from our customers continues to be positive as they report weaning off their heaviest sets of calves using our genetics in their herds, and we could not be more humbled by this!

Our fullblood bull group displays unmatched colour and pigment, easily becoming our most eye-appealing group of传统s we've had the pleasure of raising. Our red bull highlights are deep in colour and capacity. They're a consistent set showcasing style, performance, and docility. Our black bull offering brings power, style, and a number of calving ease prospects for you to assess.

The purebred and commercial heifers are strong groups with a good selection of stylish femininity and powerful, broody, herd-building characteristics. The quality is that of previous years that you've come to know and expect.

With many commercial cattle producers seeing record profits, we encourage you to take careful consideration in securing herd bulls that are going to help capitalize on the upward trends we've been seeing.

Thank you to all those who have expressed interest in our program. Whether you've bid, bought, or stopped by just to tour and talk cattle, we truly appreciate the time you've spent on getting to know our operation and the trust you've placed in our program to serve yours.

Please contact us or the sales representatives anytime. We hope to see you on sale day, Monday, March 9, 2026!

- the Tylers

RWR 78D with her 2025 Heifer Calf

Scott Bohrson Taylor Richards Robert Voice Darryl Snider Jaxon Payne Martin Bohrson Nate Marin Cody Haney Riley Bohrson

Welcome from the Bohrson Marketing Services Team

On behalf of the entire Bohrson Marketing Services team, we are proud to welcome you to the 16th Annual Red Willow Ranch Ltd. Bull & Female Sale. This event has firmly established itself as a must-attend stop on the spring sale calendar, and once again the Tyler family delivers an offering built on performance, consistency from an ideal working cowherd. Red Willow Ranch Ltd. is a performance-first program that never loses sight of the cow behind the calf. The sire power represented in this year's bull offering is as deep and proven as we've seen here, and it is backed by a maternal base that has been carefully built over generations. These bulls are bred to add pounds, efficiency, and longevity while maintaining the structure and functionality required to thrive in real-world environments.

The Fullblood division is once again a major highlight and speaks volumes about the direction and discipline of the program. This group is led by influential sire groups such as Output, who is doing an exceptional job stamping performance, consistency, and eye appeal, and Mogul, a breed-leading sire whose impact on growth, structure, and maternal quality continues to set the bar. You will also find strong representation from Kinsman, offering added power and balance, and Boone, a proven calving ease and maternal sire that has been widely trusted across the breed. Together, these sire groups create a remarkably uniform set of Fullblood bulls that combine colour, hair, fleshing ability, and long-term maternal strength.

The Red and Black Purebred divisions further reinforce the depth of sire power behind this offering. In the red bulls, the first calf crop by Glacier has been nothing short of impressive, bringing performance, shape, and consistency in a sire group that is clearly making his mark. Sysco continues to be a popular and reliable option, while Enterprise adds undeniable power and mass. High Roller rounds out the red and black sire lineup with his strong maternal influence and trusted calving ease, offering bulls that are versatile and easy to incorporate into a wide range of programs. The black bull offering is anchored by a high-octane sire group in Dimensional, bringing added performance, growth, and presence.

Supporting the bull offering is an outstanding group of purebred open replacement heifers, selected directly from the heart of the Red Willow cowherd. These females showcase the maternal quality, udder structure, and longevity that define the program. Alongside them, the renowned Red Willow pens of commercial open heifers once again stand among the very elite offered anywhere this spring because they are uniform, broody females that are built to generate profit from day one.

This sale offering is a true reflection of the Tyler family's commitment to breeding cattle that work and backed by powerful sires, an ideal cowherd, and a philosophy centered on long-term success with their customers. We encourage you to make plans to join us at the ranch near Cut Knife, Saskatchewan, on March 9th, or to contact Darren or Josh to discuss the cattle and arrange a tour prior to sale day. If any of us at Bohrson Marketing Services can be of assistance whether evaluating cattle, bidding sight unseen, or helping you identify the right genetics for your operation, please don't hesitate to reach out. We would be pleased to help you source your next herd bull or foundation female at Red Willow Ranch Ltd.

Best regards,

- the Bohrson Marketing Team

Incredible eye appeal and power that you cannot really capture in a photo, we feel he's worth a trip to the ranch to assess in person. Born to a daughter off one of our foundational females, RWR Electra 63B, this bull isn't only all bull, he's backed by proven maternal traits you can't ignore. His dam, RWR 21J, is a no-miss female patterned almost perfectly with an ideal udder. Her first 2 sons averaged \$37,500, with her last year's calf selling to Wolfe Farms. RWR 33N is a reliable genetic package that will add length, power, and performance. He's deep red, and moves with ease on a big, square foot. We feel he's extremely correct for the times. Non-Diluter.

This calf is super stylish in his make, moderate in frame and deep cherry red. He looks great on the move and is one that we really appreciate for his stoutness and mass, both attributes typical of the CRF Output sons. His dam, RWR 86F, is an honest cow with a tidy udder. She's heavily pigmented and a female we think highly of. We couldn't be happier with the job she did on this guy. Born at a modest 81lbs and weaning off at 970, he brings growth and versatility to the table. Non-Diluter.

Another Output son that's really turning up the heat. Being one of the youngest on offer, we've been impressed with how well he's kept up with the rest of the group. He's heavy haired, balanced in his make, and boasts that deep red colour that the majority of our offering has. His dam is a model cow with a near perfect udder, beautiful neck extension, and pigment. Mark this guy high on your list if you're in the market for raising those eye-catching, highly sought after females the industry demands. Non-Diluter.

TFL CINDER 73A

As a mid-February born calf, we've been impressed with how he's held his own in the group. Loads of hair and pigment, and coloured right, he's another that's right for the times. We have found the CRF Output sons have really upped the ante this year in terms of quality and delivering what today's cattle producers are searching for. They're soft made, moderate in stature, but don't sacrifice on performance and their numbers are a testament to that. This calf's dam is another balanced, feminine cow with a great udder. Non-Diluter.

RWR 81D was a highly respected, proven female we had the honour of raising and reaping the rewards of her hard work. She was a powerhouse, capacious female that stamped her calves with her style and doability. The Westgold Standout females have been some of our best producers over the years and their legacy is timeless. This bull is another mid-Feb born, hairy, thick hipped, stout Output son. He's soft in his make and balanced on all fours. His 2 maternal brothers averaged \$25,000, with RWR Cash 30K working in the herds of SAJ Simmentals and Roach Ranching, and all of his maternal sisters are retained in-herd. The guesswork is removed from this guy, with a stacked maternal lineage, and a group of consistent Output sons selling alongside him, he's bred for predictability. Non-Diluter.

RWR ELECTRA 84G

So stylish. We've commented dozens of times on the look of the Output's this year. They really are a sight to see! Very impressed with the job this second-calver has done on her bull calf, but then again, there's a reliability piece at play here as his dam is backed by LWC Miss Rio Grande 20U. He's deep flanked, loose made, and carries that lower quarter down just the way we like to see. Deep red, hairy, and ready to stamp his calves with the Output look! Non-Diluter.

Patterned so similar to Lot 11! Genetically, they're almost twins, being that his momma is none other than RWR 63B. It is a true flex of hers, being able to produce what she has at 12 years old on yet another year of less than ideal pasture conditions! We strive to breed and raise the kind that perform and excel in realistic, real world scenarios and she has done just that, time and time again. Lot 8 is long bodied, wide topped, and cherry red. He's smooth made from his shoulder to hip. A super honest bull that can be used in a multitude of ways. To date, RWR 63B's sons have averaged \$31,300, and have went to highly respected operations such as Crossroad Farms, Bar Crossroads Ranch, Rendezvous Farms, Windmill Stock Farms, and Grassy Flats Ranch. Each 63B daughter has remained in herd. Non-Diluter.

RWR MS SALTON 10D

Starting off the Mogul sons with this super complete herd sire prospect. From his length to his depth of rib, thickness and capacity, he's the total package. RWR 105N is typical of the Mogul sons with his cherry red colour, ideal pigmentation, and thick haircoat. He's impressive when you step in behind him, soft in his make and structurally sound. His dam is a dark red, pigmented up, easy doing cow with a great udder. The Mogul sons have been well received by our customers and this year's offering is probably the most consistent yet.

RWR 106N complements 105N so well, it was a no-brainer to have him follow in the catalogue. They're like two peas in a pod, showcasing the consistency Mogul continues to stamp his progeny with. This bold look is signature to this sire group, where style and functionality intertwine almost perfectly together. If you're looking to put together a package of replacement females, these guys should be high on your list! His dam, RWR 58G, is a hard working, moderate cow with a neat udder and great teat placement. A full brother sold to the great folks at Rose Creek Ranch last year. Non-Diluter.

The second youngest bull on offer and he's no late bloomer! He's a masterpiece with eye appeal you can't deny. Blood red to the ground, double goggled, lip rings, he's the dream if you utilize fullblood genetics in your program. If you don't, maybe he's your sign to start! Super complete and correct, he's hard to fault. With a YWPDA of 4.03, he's style and performance in one fancy package. His dam is a heavily pigmented female that produces well each year. We'd love to see a pen of his replacement females - they will no doubt be some of the most attractive ones around. Non-Diluter.

Everything about his look to his performance just confirms what I mentioned earlier about the Moguls tying style and functionality into one. A WW just shy of 1000lbs and a yearling weight of 1475 in a moderately built frame just showcases the job he does in efficient feed conversion. There's next to no waste on this guy. He's well muscled, clean fronted and packs a ton of punch. The industry pays on pounds and the Mogul sons are excellent candidates to help you maximize your profit potential. 30N's dam was a beast of a cow with awesome feet, deep red in colour and we have a full sister to Lot 16 calving this year that looks great. I'm not sure what else can be said about this calf. We invite you to analyze him and his penmates, they will speak for themselves. Non-Diluter.

Length, hair, style, a great lower quarter - I feel like a broken record when writing about these Mogul sons, but it's a good problem to have! Born to who is probably my favourite full-blood cow on the place, RWR 43B, he's got maternal longevity programmed in and will surely pass that on to his females. RWR 43B can always be trusted to raise a good one and her sons have been chosen by some great programs like Spring Creek Colony and Paul Murray Farms. If you're looking for reliability and predictability, then this mating should fit the bill. Non-Diluter.

This bull is extreme with loads of capacity. Everything about him cannot go unnoticed, from his thick, heavy hair, to length, depth of body, and overall mass. You'd never know he's a mid-Feb born calf. He has a softness to his build that is tough to follow. Deep flanked, great lower quarter and loose through the girth, he's got the makings of a tremendous breeder to sire those keeper females and impressive steers that are highly sought after by today's buyers. This bull is athletic in his movements and strides out on a correct set of feet and legs. His dam is deep in colour, moderate and easy keeping. If you're looking for that hybrid advantage, or a little bit of added chrome, this is one worth serious consideration. Non-Diluter.

STBS SIRI 47F

Our polled fullblood offering starts with this second natural-born calf of STBS 67K, who we purchased from the program of Stout Brothers Simmentals. As a hetero-polled fullblood, his performance numbers came to us completely unexpected. Sired by a polled bull we really appreciated for his colour and muscle mass, ROD Hight Perfect 60H and the mating with this remarkable Westgold Standout daughter has not disappointed. RWR 54N boasts tons of hair, capacity, and muscling that rivals many of our horned fullbloods. He's nice headed, coloured great, and a true standout in our minds when it comes to polled bulls. We cannot overlook his shape and dimension. Mothered by the model cow that commanded \$30,000, we are confident in the females he will produce. STBS Tissaia 67K's first calf, a heifer, sold to Jason Heideman at the World Simmental Sale in 2024 for \$15,000. Hetero polled, non-diluter.

Another ROD Hight Perfect 60H son, but this time coming at you as an embryo transfer from our one and only RWR 63B. This end of January calf is a beast. He boasts tremendous length, depth, and thickness. As a polled bull, we find him to be an original in terms of his style and performance. His numbers are off the charts, with a YWPDA of 4.61 - which I believe is the highest out of the entire bull offering. He's a meat machine, extremely well muscled and is coloured just the way we hope for. This bull has been impressive all year long, with his deep flank, lower quarter and ample hip. He's thick over his loin and ties all this power together smoothly. We are super happy with what we've seen the ROD 60H bull produce and know his progeny will go out and leave their mark just like he has here for us with Lots 21 & 22. Hetero polled, non-diluter.

The BGS Glacier 192L progeny have been top tier. This bull that kicks off our red division is nothing short of a masterpiece. He's homo polled, soft made, with tons of middle and width of top. We've joked all fall that he should have been a show bull, and not just because he'd be a clear contender in the show ring, but because his personality and temperament has been a dream to work with. He's so balanced and complete, he's a must-see in person. He moves on a big, square hoof and is strucrurally correct on all fours. He's fancy looking, clean fronted, and deep flanked. He's tough to fault and is definitely our kind! Raised by an attractive, tidy uddered momma cow that goes back to IPU Red Liner 215A, this is a fully stacked pedigree in a stylish, powerhouse package. Add him to your bull battery! Homo polled.

An absolute tank that demands your attention. This sire group is incredibly strong across the board on both the female side and the bull side of the spectrum. 192L has done an excellent job moderating frame here without sacrificing performance and this calf is a tremendous testament to the job he's done here so far. Another super fancy, blood red herd sire prospect that you don't want to miss. He's got explosive growth, mass, and muscling. A complete show stopper, if he were to enter the ring, and we invite you to come anazlyze him and his brothers. Red Bud offers tons of hair, sound structure, and style to burn. Sign me up to see a pen full of his females, because they will truly be a sight to see. Raised by a powerhouse Westgold Standout daughter, it's evident where his capacity partly comes from. He has a maternal brother working in the herd of Wheatland Farming Co. Ltd. Hetero polled.

It's like we took lot 30 and hit copy and paste! Another fancy bull we appreciate for his deep shade of red, loads of hair, excellent hip, quarter, big footed and performance packed. This sire group doesn't just look good, they come equipped with the growth and power that we feel can be challenging to find in the red Simmentals. They're so consistent in their confirmation that the presentation of these bulls is something you need to see to believe. His dam is a powerful female that was known to put her all into her calves. Just check out that 1000lb WW! Past sons of hers have went to the well-respected herds of Daryl & Marcella Paulgaard and Christensen Land & Cattle. Homo polled.

It's great to see the consistency within this sire group. This bull is super stylish, deep in colour with tons of hair. The 192L sons are loose-hided, soft made in the girth and easy doing. They have excellent tops, width across the loin and are neat through that front third. The Glacier 192L females are at the top of the pen in our replacements and his sons will surely do the same for you. Mothered by a hairy, pear-shaped hard working red cow that goes back to Heritage, this is a purebred bull, but unpapered. Calling all commercial cattlemen to get your hands on a purebred-caliber, homo polled bull!

RWR NOVA 108J

RWR NOVA 49D

We were big fans of the IPU 25J progeny over the years and looking at this calf makes it even more deflating that we lost him last winter. This bull is so balanced and complete with impressive width, a great hip, top, and flank. He's another soft in his make, bold in his look homo polled firecracker of a red bull that will no doubt sire some very marketable calves. Born to a big hipped, powerful, eye-catching black baldie momma with a great udder, she placed her first calf, a full sister to this bull, in the herd of LaBatte Simmentals for \$16,000.

IPU 245Z PASHMENIA 37G

A potential calving ease prospect here with an 80lb BW, clean front end, smooth shoulder and length in his spine. We used his sire extensively in our purebred heifer pen and his calves came easily without issue. This dark red bull is a looker with his great haircoat, width, hip and lower quarter. His dam put her all into her first calf and we couldn't be more pleased. She herself came from a performance driven powerhouse of a cow, SKORS Red Smartie 406X, who left a true legacy here, raising RWR Fireball 35B who sold to Wallgren Farms for \$21,500, RWR Eastwood 25F who sold to Westgold Farms Ltd. for \$18,250, and RWR Heavy Duty 40H who sold to Fore See Cattle Co. for \$20,000. Hetero polled.

CROSSROAD RAMONA 375R

The last of the red Simmental division and he's a mega meat machine. There was a 25% chance of him being born to a polled bull, but coming horned, and he did. However, that doesn't change the fact that this guy is an impressive herdsire prospect with his freightliner build, style, and overall mass. It's no wonder his numbers are off the charts. An 87lb BW and a 1040lb WW...tell us his dam gave it her all without telling us! RWR 97K is a deep bodied cow with a great udder and teat placement. She's pear-shaped and powerful and this calf is proof of that. Pushing the scale down with a YW of 1520, ample testicular development, he's ready to get to work.

Dam - RWR 97K

RWR MARVEL 1E

Moving into the black bulls with a son of RWR Marvel 44G. She's the best of both worlds - feminine and tanky - all put into one. She's sound, big bodied, capacity driven and elegant in her presentation. She truly is the ideal female and mated with the ideal female maker, LER Dimensional 1147J, this should be another son of hers that you should want to keep every female out of! Her first 2 sons averaged \$28,750 with her first calf going to the great herds of Willow Creek Simmentals & Warkentin Land & Cattle, and her second bull calf to Crossroad Farms in our 2025 sale. RWR 56N is a full sibling to the bull she sold to Crossroad Farms last year and is almost identical in his make. He's thick, deep, and strong-topped. He's heavy on the style and correct on structure. He's one you need to get your eyes on as we feel his picture just doesn't do him the justice he deserves. Comes with stacked maternal backing, impressive numbers, and bold paternal traits. Homo polled, hetero black.

A moderately built, heavily pigmented fullblood sired by SAJ Boone 84J. She's a fancy female with ample length, thickness, and depth. Born to a first calver, her dam did a great job producing this stylish heifer on her first go.

RWR LADY 59H

Ultra feminine, smooth made, and tons of volume on these BGS Glacier 192L daughters. We are big fans of his bulls and females alike and believe they offer what the industry is looking for in terms of doability, frame, and overall completeness. Mothered by a sweet natured, perfect uddered, good footed dam that has a bright future here. She is a favourite of ours. Homo polled and as fancy as can be!

Raised by a power female we purchased from Westway Farms, this gem of a heifer calf is tanky, capacious, and thick. The last BGS Glacier 192L daughter we made the tough decision on to part with. Homo polled.

We asked ourselves why this BLL Enterprise 153J daughter is in the sale and summed it up to the fact that we wanted to bring some of our best. There's so much volume to this heifer, depth of middle, and power. She looks great on the move and is super complete. An original that stands out amongst the rest! She's mothered by one of our favourite young cows on the place, that has a tidy udder and great structure. Hetero polled. (Scurred polled)

RWR X-SULA 18B

Probably our favourite black on offer in the female division. She's incredible to analyze, with her thick haircoat, deep body and overall style. She's got a ton of volume and is super complete in her appearance and confirmation. Her dam is a TNT Bootlegger Z268 daughter and he's been known for his remarkable females. She herself is a bold, capacious, great uddered female and we are excited about what she's going to do here with this only being her first calf. Hetero polled and hetero black.

Being sired by IPU 25J automatically means tons of hair. She's a sweet tempered, long bodied female that moves freely and easily on a great set of feet and legs. Her dam did a great job on her first calf. Power on the bottom side as she goes back to Double Bar D Jessy 408C. Homo polled and hetero black.

R W R Commercial Open Heifers

The commercial open heifers on offer this year are from the top. They are capacity-driven with big-time volume. They're backed by a strong and deep set of highly maternal cows and sired by high-end Angus and Simmental bulls. These commercial heifers are on a full herd health program and are palpated for breeding soundness. Heifers will be sold in pre-sorted groups on sale day.
