

RAWES RANCHES

PERFORMANCE TESTED CHAROLAIS BULL SALE

STROME  ALBERTA

43rd Annual | Tuesday, February 17, 2026

180 Two-Year-Olds

Welcome to Rawes Ranches Ltd.

Welcome, and thank you for your interest in our family's 43rd Annual Performance Tested Charolais Bull Sale. We appreciate the opportunity to earn a place in your breeding program.

We trust that our customers and friends in the industry are looking forward to another year of strong prices and profitability, supported by low herd numbers and solid demand. The importance of investing in proven, reliable genetics is as important as ever. Bulls that are sound, fertile, and built to last play a critical role in capturing opportunity in today's market.

From the beginning, our program has been focused on longevity, fertility, performance, and disposition—traits that matter every day, not just on sale day. This catalogue is an honest reflection of that program and represents decades of selection, and commitment to quality. Our bulls have the genetic ability to generate profit at every stage of the production cycle, proven by our long-standing reputation for siring high-quality, high-gaining feeder cattle. It is sincerely humbling to contemplate that our cow herd and our program wasn't built overnight, and it isn't going anywhere anytime soon. We appreciate the trust our customers have shown us over the years, with 92% of the bulls in last year's sale going to repeat buyers.

Whether you are a long-time customer or joining us for the first time, we welcome your questions and appreciate your interest. We encourage you to study the offering prior to sale day and make a healthy list of bulls that meet your needs. You are always welcome to visit the ranch to view the bulls in a relaxed environment, or take advantage of the bull videos available online. Your confidence in our program is important to us, and we are committed to customer satisfaction on sale day and beyond. We stand behind every bull we sell.

If you are unable to attend the sale in person, please feel free to contact Philip, John, or Marie. We would be pleased to assist with your selection and personally handle your sight-unseen purchase.

We would also like to take this opportunity to formally introduce Arnie, who married our Elizabeth this past summer. Arnie is not a new face around the ranch; we value the energy, perspective, and dedication he has brought to our family business. John and Myrna remain actively involved day-to-day and we are very blessed to have three generations working together—representing growth and continuity, firmly grounded in the same values that have guided us from the beginning. If you happen to see the newlyweds during bull sale season, please take a moment to stop and introduce yourself—they will be happy to visit with you.

Take confidence in our program, and let our family's commitment to the beef industry benefit you!

**RAWES
RANCHES**

Philip & Marie Harty Cell: (780) 385-5977 • Cell: (780) 385-8416
John & Myrna Rawe Ph: (780) 376-3598 • Cell: (780) 679-7725
44509 Range Road 150, Strome, AB, T0B 4H0

Left to right: Philip, Marie, Arnie, Elizabeth, Austin, and Mackinley.

180 TWO-YEAR-OLD CHAROLAIS BULLS

Health: Bulls have been strictly culled for structural soundness. A complete vaccination program has been done as well as a recent Ivomec treatment. All bulls have passed a semen test and breeding soundness evaluation prior to the sale.

Guarantee: All animals are sold under the personal guarantee of Rawes Ranches Ltd.

Sight Unseen: We can help you with selection or purchase arrangements. No one knows our cattle better than us. Contact Philip (780-385-5977) or John (780-679-7725) to inquire.

Delivery: Rawes Ranches will provide delivery within 200 miles **FOR THE COST OF FUEL ONLY**. On distances over this we will do everything we can to see that delivery will be at a reasonable rate.

Warranty: We offer a program that demonstrates our commitment to our customers. Should you have a problem with a bull, contact Rawes Ranches directly and we will handle it immediately. Two options: Basic and Extended warranty are available.

Basic – 30 Day assures that your bull(s) remain in satisfactory condition until bulls are delivered. An additional cost of 2% will be added to your invoice on any bull that remains at the ranch after sale day, unless proof of alternate insurance is provided.

Extended – Breeding Season starts on sale day and will last for 7 months protecting your investment during the most critical time - Breeding Season, for a cost of 7%.

Right To Semen: Rawes Ranches Ltd. retains the right to draw semen on any bull sold for our in-herd use only.

Insurance: If you require, Canadian Farm Insurance Corp. will be available at the sale. Jill Wildman 780-305-1146.

Bull Viewing / Video Sale

We recommend customers try to view the bulls prior to the sale and make a healthy list of bulls that will suit their needs. Bulls will be available for viewing at the sale barn, and will be sorted in groups of four. Groups will be sorted to complement one another genetically, in performance and style. This presort is a unique and great opportunity to assist customers with their bull selection. During the sale, bulls will be sold individually on video rather than entering the ring.

Terms & Conditions

This is a Canadian Charolais Association Certified Sale and will adhere to the terms and conditions as described in the CCA Code of Ethics. Announcements made from the auction block will take precedence over printed material in the catalogue.

Unable to Attend the Sale?

We appreciate the effort you make to visit the ranch and view the bulls prior to sale day, and we also understand that circumstances may not allow for customers to be in attendance at the sale. For these reasons, we have several options available to you.

- Place an order with Philip or John.
- Place an order with one of our trusted sales team.
- If you require, representatives from these online services will be happy to assist you with internet bidding. Please choose a system that you are comfortable with and become familiar with its features prior to sale day.

The *No Nonsense* PROGRAM

Rawes Ranches was established near Strome, Alberta in the mid-forties by Herman and Elaine Rawe. In the early fifties, the cattle industry moved toward more feeding of cattle for the slaughter market, and our family responded with an expansion of our commercial Hereford-based cow herd. That is where our focus began; to raise cattle that excel in the auction barn, the feedlot, and at the meat counter.

Always looking for a better way to do things, Herman started using Charolais bulls in 1957 and was a founding member of the Canadian Charolais Association. From the beginning, our feedlot involvement and fat cattle marketing, alongside building a registered Charolais cow herd, kept our ideas in focus. This naturally led to a “No Nonsense” Program founded on **COMMON SENSE, CONSISTENCY, AND PROFITABILITY**. Today, this focus remains the same.

Simply put, the cattle must meet the needs of the marketplace they were designed for. Rawe Ranch cattle are produced and sold with honesty and integrity. We don't have banners, ribbons, or trophies; we have a long-standing program, satisfied customers, and functional cattle that excel in all areas of production having been proven in the industry.

All sale bulls are **ONE IRON**, bred and raised on the ranch. We have personally attended to our Charolais breeding and herd management for **FIFTY-FOUR YEARS**. The purebred herd was established in 1972 and today undergoes annual evaluation and replacement by our own females sired by our own ranch-raised bulls without the possibility of setbacks from outside genetics. In doing so we have **CONCENTRATED OUR GENETICS** in the areas we feel are most important: feet and longevity, temperament, performance, and carcass quality.

The cows **CALVE ON PASTURE** during May and June. Today, 25% of our breeding herd are 8 years and older, 60% are between 3 and 7 years, and 15% are first-calvers. The consistency in our program is proven by these older productive cows that have not been pampered, never had their feet trimmed, and calved unassisted every year. There is no distinction in management practices between our purebred and commercial cow herds.

A large herd and **RIGID CULLING PROGRAM** ensure that only the top end of our productive animals continue in the program leading to steady advancement year over year. We don't sell replacement females or proven cows from the herd. They either work for us, or they don't work at all, they're functional or they go! Yearling heifers not selected for breeding and bulls not selected for sale are finished for harvest under our feeding and management.

Each year we obtain performance and grading information to **EVALUATE AND IMPROVE** our genetics. We have always strived for growthy cattle; however, we realized very early on that performance achieved through growth alone (high frame score) was not sustainable. For growth to have any value it must be combined with rapid fleshability and the **PRODUCTION OF RED MEAT**. This understanding is the foundation of our program and has developed a genetic package with proven performance in all stages of the production cycle.

Our bulls are raised under the same principles as the cow herd. They are May-June born, calved on pasture, weaned in November, and undergo a full 15 months of evaluation to sell between 18-20 months of age after they have **MATURED AND ARE READY TO GO TO WORK**. They aren't pushed to sell as yearlings.

All bulls are developed for our annual bull sale; we don't sell by private treaty nor consign to other sales. We believe in letting our cattle sell in the **COMPETITIVE MARKET** and letting you, the commercial cattleman, be the judge.

“**Rawes Ranches** implements a comprehensive herd health program developed with Lacombe Veterinary Centre. All bulls are fully vaccinated with a modified live respiratory vaccine and an 8-way clostridial vaccine, and are maintained on a complete internal and external parasite control program. Every bull offered for sale has undergone a satisfactory breeding soundness evaluation, including semen testing, to ensure soundness and fertility. Rawes Ranches uses the Herdtrax management system to track individual animal identification, health treatments, breeding and calving data, performance records, and movement history. This program supports strong traceability and informed management decisions, providing buyers with confidence in the documented health, management, and performance history behind every bull.”

Skylar Bieleny, DVM

Performance Information Explained

In order to use this data to its full potential, it is important to have an understanding of the terminology and collection methods. Take the opportunity to become familiar with the information below, so you are able to make a better-informed decision about the bull that will fit your needs.

- BW** The recorded birth weight of the calf when born.
- SC** Bulls have been scrotal measured January 2026 and all will sell with a valid semen certificate.
- FS** Frame Score has been calculated based on age and hip height to assist customers with online and sight unseen purchases for situations where in-person appraisals are not possible. Call us if you have any questions about frame score.
- WT** The live weight of bulls taken in mid January 2026 to be used in combination with frame score to assist customers with online and sight unseen purchases.

Expected Progeny Differences (EPDs)

EPDs incorporate the animal's individual performance, genetic testing, as well as the performance and genetic testing of its relatives. The EPDs available on these bulls have been provided by the Canadian Charolais Association and can not be compared between breeds.

- CE** Expected difference in Calving Ease of progeny. A larger number indicates easier calving (less assistance).
- BW** Expected difference in Birth Weight of progeny, expressed in lbs. A larger BW EPD indicates heavier calves at birth.
- WW** Expected difference in Weaning Weight of progeny, expressed in lbs. A larger WW EPD indicates heavier calves at weaning.
- YW** Expected difference in Yearling Weight of progeny, expressed in lbs. A larger number indicates heavier calves at one year of age.
- CW** Expected difference in Carcass Weight of progeny, expressed in lbs. A larger number indicates heavier carcasses.
- REA** Expected difference in Rib-Eye area of progeny, expressed in square inches. A larger number indicates bigger rib-eye muscle.
- MRB** Expected difference in Marbling Score (quality grade) of progeny, expressed in marbling score units (MSU). A larger number indicates more marbling.
- TSI** Terminal Sire Index expresses the difference in expected \$ value of progeny when the progeny is retained through to slaughter. A larger value indicates more expected \$ profit.

TRUE GENETIC POTENTIAL

And it all starts at calving time when data is first collected on the animal. Our second-calvers and mature cow herd calve on grass in May through June. We like to calve cows on carry over grass (barring a drought). The cows are moderate framed “Charolais” cows. After coming through the winter and into calving season, they are in their working clothes; not carrying a lot of extra flesh and weighing roughly 1500-1600 pounds. It’s the norm for these cows to have calves weighing 100-110 pounds. A lot of that weight is in extra length. We are not ashamed to print what the scale reads. We believe the shape of the calf is, for the most part, more important than the weight of the calf. Rarely do we ever bring a cow in unless it’s for malpresentation. Like most operations today, we simply don’t have time for unnecessary problems.

ACCURATE RECORD KEEPING AND CONSISTENT DATA SUBMISSION CONTRIBUTE TO PROVEN AND PREDICTABLE GENETICS

A second-calver babysits at the calving pasture May 6, 2020

EXTRA LENGTH, EXTRA POUNDS!

The calves are long-bodied, small-headed, and clean-fronted, just like the bulls that sired them.

High Gains and Superior Carcasses, we have it all! Bold statements backed by bold facts!

The long-time Rawe Ranch slogan, “The Ranch where performance is no accident!” demonstrates a commitment to performance testing and encompasses all stages of production. While producing sound, functional cattle that are pleasing to the eye, we are continually working towards superior performance. Generations of carcass information have been measured and considered to make breeding decisions in our herd. Utilizing ultrasound and grading information allows us to breed by design, not by accident!

Grading information on 473 head of 2024 born ranch-sired steers and heifers show over 90.8% graded Prime/AAA and dressed 60.6% (both steers and heifers) with an average YG 2.79. As marbling trends higher in the industry so does the potential reduction in other areas of carcass quality. We have maintained a balance, and designed a herd with superior carcass genetics that is backed by the actual harvested data!
