2026 BULL SALE

We look forward to hosting you at the farm on February 14 and welcome you to the 2026 Bull Sale.

We hope that as you flip through this year's catalog, it feels different from the rest.

For 2026, we made a deliberate effort to build this catalog entirely around solid facts and collected data. We pulled heavily from our herd database and have presented each bull in a way that truly reflects him as an individual, based on all of the measurements we have collected since birth.

Here, you can look for yourself and you can blatantly see:
Did this individual perform in the operation where he was raised?
Is his dam a fertile, productive cow?
Does his production record suggest he will add value to your program?

We are always happy to explain the data and how it is collected, so please don't hesitate to ask questions.

Once again we have partnered with a strong team to support the sale. Clerking will be handled by CCHMS-Cow Calf Health Management Solutions-a group that plays an integral role in our herd. Online bidding services will be hosted through DLMS, as well as TEAM Auction Sales-who have marketed our steer crops and cow groups for more than a decade.

We look forward to visiting with you on sale day or touring you through the cattle ahead of time. Please feel free to reach out with any questions, and you are always welcome to walk through the bull pen and heifers at any point leading up to the sale.

We look forward to seeing you.

The Pages
Travis & Becky, Joni, Grady, Morgan, & Orin

Delivery

Redline Livestock will deliver all bulls within 150km free of charge. Bulls may be kept at Redline Livestock until Mar 1 for no cost. After that time, bulls will be kept for \$5/day. Buyers who pick up their bull within a week of sale day will receive a \$100 discount per bull.

Volume Discount

A volume discount will be applied to multiple purchases as follows: 3 Bulls, 3% | 4 bulls, 4% | 5 bulls, 5% | 6 bulls, 6% | 7 bulls, 7% | 8 bulls, 8% | 9 bulls, 9% | 10 or more bulls, 10%

Terms & Conditions

Cattle will sell under the standard terms & conditions put forward from the breed association. These are available upon request.

THANK-YOU

TO OUR CREW
OUR CUSTOMERS
& OUR FAMILY

THANK-YOU

Good people make great teams.

HAPI: The All-Purpose Index.

The Herdtrax All-Purpose Index (HAPI) is the single most important number. It's an all-encompassing score comparing a cow's ability to be strong both maternally and terminally, also accounting for replacements retained in the herd. A HAPI of 100 is the herd average. Higher the better.

Elite Greater than 110

Platinum 107.7-109.9

Gold 105.1-107.5

Silver 102.5-105.0

Bronze 100-102.5

Unranked
Bottom 50% of
Herd

CE	BW	WW	WWI	WADGI	DHAPI	DAMR	DR	SHAPI
***	80	621	101	86	124.7	GOLD	3	131.2

CE	Calving Ease; Recommendation on calving ease, based on a 3 star system, 3 stars being the easiest calving
BW	Birth Weight; Weight at birth in lbs
WW	Weaning Weight; Actual weight at weaning
WWI	Weaning Weight Index; Comparative of weaning weight within entire herd; all calves weaned. Higher is better
WADGI	Average Daily Gain Index; Comparative of average daily gain per day of life, within the entire herd. Higher is better.
DHAPI	Dam HAPI Index; Comparative of cow's ability to be strong both maternally and terminally. Higher is better.
DAMR	Dam Rank; The cows rank based on HAPI. Only the top half of the herd receives a rank.
DR	Dam Replacements; The number of direct & secondary replacements currently working in our herd from the dam.
SHAPI	Sire HAPI; Comparative, all-encompassing index number that compares the sire's ability to produce.

**your reference: the complete
catalog legend.**

Measuring the bull from birth to sale day.

An entire offering...born **unassisted**.

These metrics show the individual's performance against his contemporary group; our whole herd 2024 calf crop.

CE / BW

Calving Ease & Birth Weight.
Our recommendation on calving ease safety (3 Star System) and the bull's actual weight in pounds at birth

WW / WWI

The bull's actual weaning weight and his comparative rank within the entire calf crop weaned. A score of 100 is average, higher is better,

WADGI

A comparative measure of the bull's average daily gain per day of life against the entire herd.
Higher is better.

Questions? Let's talk bulls.

Behind every bull is a great dam.

We measure the maternal line relentlessly.
This data reveals the true factory behind
the bulls.

DHAPI

An all-encompassing number comparing the cow's ability to be strong both maternally and terminally. Higher is better.

DAMR

The dam's rank (Bronze, Silver, Gold, Platinum, Elite) based on her HAPI score. Only cows above the overall herd average are ranked.

DR

Dam Replacements. The number of direct and secondary replacements from the dam currently working within our herd. The ultimate proof of maternal excellence

Herdtrax data is
more accurate than
our memories, and
far less biased than
our own eyes.
And it is not manipulated.

We set alerts on any calf that was treated for sickness, or any that were assisted at calving. Those bulls are culled out automatically, and there have been zero exceptions. The sale offering is healthy, up-to-date on vaccines, and were all unassisted at birth.
