

# SOUTH VIEW RANCH

**26TH ANNUAL RED AND BLACK ANGUS BULL SALE**

APRIL 2, 2026 *SALE STARTS AT 2:00 PM - THE RANCH IN CEYLON, SK*

**WELCOME TO SOUTH VIEW RANCH'S 26TH ANNUAL RED AND BLACK ANGUS BULL SALE!**

We at South View Ranch are proud to host our 26th annual Red and Black Angus Bull Sale right here on the ranch, just south of Ceylon. Whether you are longtime customers, neighbours, or joining us for the first time, we appreciate you being here and supporting our operation.

Our family has been committed to raising quality Red and Black Angus cattle built for the real-world performance for 34 years. Our bulls are developed on a balanced ration designed to promote steady growth, structural soundness, and longevity – not overfed but fed to last. We focus on producing cattle with good temperament, strong maternal traits, good feet, with the kind of performance that works in commercial and purebred herds alike.

This year we are proud to present a strong pen of bulls – deep bodied, sound-footed and ready to go out and work for you. We stand behind our program and the cattle we raise, and we are confident these bulls will add value to your operation.

Thank you for your trust, your business, and your friendship over the years. We hope you can join us on April 2nd to enjoy the day, the hospitality, and more importantly the cattle.

**THE KAUFMANNS**

Will be available on sale day

## SIGHT UNSEEN PURCHASE PROGRAM

If you are unable to attend the sale, we would be happy to assist you with your purchase. You can call Shane or Keaton so they can help you find the bull that will suit your needs. On sale day you can either be on the phone bidding yourself, or have Shane, Keaton, or any of our capable staff look after it for you. 100% satisfaction guaranteed.

## DELIVERY

Free delivery for bulls within a 200 mile radius of South View Ranch. Bulls delivered further will be to central locations, or the nearest port of entry to the USA. Deliveries beyond Saskatchewan will be on a cost share basis.

***\$100 discount per bull if you take your bull home sale day.***

## CALVING EASE SCORES

\*\*\* Recommended for use on heifers

\*\* Recommended for larger framed heifers or cows

\* Recommended for use on cows

These are our suggestions based on the information we have available. Other factors that can influence birth weights are the birthweight, frame score, and bone size of the dam, management, nutrition, and gestation. All this needs to be taken into consideration.

# WELCOME

FROM BOHRSON MARKETING SERVICES

It is always a privilege to work alongside families like the Kaufmanns. Keith and Linda, along with Shane, Keaton and the entire South View Ranch crew, represent the very best of the cattle industry. They are some of the hardest working, most genuine people you will meet and true salt-of-the-earth folks who take tremendous pride in their cattle and even greater pride in the relationships they have built with their customers over the years. The hospitality, honesty and integrity you experience when visiting South View Ranch are the same values that have helped this sale grow and remain successful for over a quarter century.

Running a large purebred herd in the often harsh conditions of southern Saskatchewan demands cattle that are built to last. The South View cow herd has been developed with a very practical mindset with females that are fertile, functional, easy doing and structurally sound with strong udders and good feet. These cows must work for a living, and only the most productive and efficient genetics remain in the program. It is this disciplined approach that continues to produce bulls with the kind of real-world traits commercial cattlemen depend on: calving ease, performance, longevity and strong maternal value.

The strength of this year's offering is evident throughout the catalogue with an impressive and consistent set of bulls backed by generations of proven cow families. The powerful red sire groups are represented by cornerstone bulls such as Red Allison Paradigm, who is one of the very best bulls in the entire breed and walks here at SVR, and Ter-Ron Judo, another incredible breeding bull that is quickly becoming a legend in the making. The black section is anchored by impressive

herd sires like Musgrave Rob Roy 233-840, a calving ease and maternal-packed sire, Greenwood Home Town, a stud that reads extremely well on paper and whose production has exceeded expectations, and Vee Tee New Look 574H, an incredible bull whose sons are annually in high demand. These bulls represent as strong of a red and black sire lineup as you will find anywhere in the industry, along with several other complementary sires utilized within the program. Together they bring calving ease, muscle, structural soundness and the kind of phenotype that works in both commercial and purebred operations. The consistency seen throughout these sire groups speaks to the strength and uniformity of the South View cow herd.

More than anything, the cattle offered here are designed for the real world. That philosophy has been the cornerstone of the South View Ranch program for decades and continues to drive the direction of the herd today. As you study the offering, we encourage you to visit the ranch, evaluate the cattle in person and spend time with the Kaufmann family. Their passion for the Angus breed and appreciation for their customers is evident in everything they do. If any member of the Bohrson Marketing team can assist with your selections or answer questions about the offering, please do not hesitate to reach out. We look forward to seeing you at the ranch on April 2nd for what promises to be another outstanding edition of the South View Ranch Bull Sale.

# WELCOME

FROM T BAR C CATTLE CO.

Welcome to the South View Ranch Bull Sale.

It has been my pleasure to work with the Kaufman family for nearly two decades. Over that time, I've had the opportunity to see firsthand the dedication and integrity they bring to their program. Running a large purebred Red and Black Angus herd in some of the harshest conditions found in southern Saskatchewan, the Kaufmans have built a cow herd that is functional, durable, and proven.

Cattle raised in this environment must work for a living, and only the most practical and productive genetics rise to the top. The bulls on offer today are a reflection of that philosophy—sound, calving ease, and strong maternal genetics backed by a program that stands behind what they sell.

On behalf of the Kaufman family, I'd like to thank all the buyers, bidders, and supporters who continue to make this sale a success. We appreciate your interest and hope you find the kind of bulls that will move your program forward.

- Chris Poley

# SOUTH VIEW

## REFERENCE SIRES

**Red Allison Paradigm 74L** was the lead off \$115,000.00 high seller from Allison Farms 2024 sale. Just as impressive today as he was the day Shane and Lex stopped and toured, and he has been as impressive every day in between. Shane knew we needed to own him, he was buying Paradigm, he knew he wouldn't be a bargain as many people likely found this good one. Sale day rolled around at Allison Farms and we were trying to come up with a budget, not sure we ever did as we just bought him. We are sure glad we did; the best purchase we have made to date and the best sire group we have ever had. 31 Paradigm sons highlight this year's offering. Paradigm is the ideal herd sire with his exceptional structure, soundness and great phenotype. Paradigm combines great muscle expression, depth of body, balance, and easy fleshing ability. Paradigm stands on an exceptional foot and is a great balance of performance and calving ease. Paradigm without a doubt sired the most consistent calf crop that we have ever had. One will drive a lot of miles to find a sire group as consistent as these Paradigm sons. He is a true breeding bull that stamps his progeny with consistency, eye appeal and structural soundness and fleshing ability, the kind of herd improving quality that drives profitability forward.

**Red Allison Clash 13K** is noted for his exceptional breeding ability, muscle, bone, testicle development, foot quality, and performance. We bought a semen package on Clash to add all these traits and he did just that. We are extremely pleased with his sons this far. They are big bodied, have adequate muscle and are easy fleshing. They have plenty of jam while still maintaining a fancy look and plenty of style. His daughters are built the same with lots of muscle and shape with a good look. We have calved heifers out of him and are impressed with their udders and maternal traits.

**Pictured:** *Top Left* - Red Allison Clash 133K - *Top Right* - \$90,000 Son sold to Canadian Sires - *Bottom Left* - \$67,500 Daughter sold to Yeguada El 3 - *Bottom Right* - \$15,500 daughter sold to Allison Farms

**Red Ter Ron Judo 56J** is a moderate framed, dark red, hairy, stout made bull. He is full of muscle and is very much calving ease. His calves are stamped with the same hair, muscle, and calving ease that are extremely easy fleshing. His daughters are very consistent with strong maternal instincts and good udders. We are very please with the production of his daughters. Judo himself stands on perfect or as close to perfect of a foot you will find.

**Red LV Capital 62K** is a proud looking, phenotypically correct bull that is stout, soft made, and easy fleshing. He adds an extra look and eye appeal to his calves. We are calving out his heifers this year and very pleased with their production so far.

**Red RREDS Seneca H062** This is a bull that looks awesome everyday of the year. He is super easy keeping, good footed, and huge middled, His sons are moderate birth weight bulls with tons of muscle, and a good look. The Seneca sons are one of the most consistent sire groups in the offering this year. His daughters are very intriguing and continue to check off all the boxes.

**Pictured:** Red RREDS Seneca 731C - Sire

**Rob Roy 233-840** is a bull we selected out of the Musgrave Angus program from Illinois. Rob Roy is a powerful, eye-catching herd sire standing on a very good foot, he is structurally correct, deep bodied with a commanding presence. Rob Roy represents the power and calving ease with a spread of just +0.8 birth EPD to +79 weaning and +136 yearling, now that is very impressive and you will see it in his sons as they are low birth, calving ease bulls with tremendous performance. Rob Roy stamps his calves with consistency and the kind of phenotype to stand the test of time.

**SA V Checkmate 8158** Checkmate is a bull we decided to AI to, a bull that combines calving ease with excellent performance. Breed him to cows they have the power and growth, breed him to heifers they calve easy and grow. His sons are stout made, easy fleshing bulls with eye appeal. The daughters are at the top end of the replacement pen.

# SOUTH VIEW RE

**N7 Flat Top 151J** is a bull that as a yearling had tremendous herd bull character. Very long bodied, big topped, deep ribbed, easy fleshing and excellent feet. Flat Top is big scrotalled with calving ease. We have used him on first calf heifers for four breeding seasons, and his calves are moderate at birth with good vigor and excellent performance. Daughters off Flat Top have square udders and great motherly instincts.

**Greenwood Home Town JJP 61H** Home Town is a bull we purchased from Greenwood Cattle. He is extremely long spined, deep sided and soft ribbed. Home Town is backed by an awesome cow, 23D and his sire Natural Law surely needs no introduction in the angus breed. Home Town's sons are long, stout and very good haired with lots of bone. Home Town has met the expectations of what a herd bull should look like in our eyes.

**Vee Tee New Look 574H** New Look is a moderate, stout made, easy fleshing bull we purchased from the VT program. He is a bull that will moderate birth weight. His sons are deep bodied, easy fleshing, moderate birth weight bulls that are consistent. His daughters are moderate framed, easy fleshing females with neat, tidy udders. Unfortunately this will be the last group of sons to sell off New Look as we lost him this past summer.

**Pictured:** *New Look Son* - SVR 464N

**HBH Vision 50J** Vision 50J is a long bodied, well-balanced bull. Siring moderate birth weight with good performance. We are very pleased with his progeny with a solid set of sons and daughters.

**CALVING EASE: \***

In 2019 we purchased a pick of Rhodes Red Angus heifer calves in Denver with our friends at Cockburn Red Angus. We got visiting and since she has been producing very good, we decided to flush her. We flushed her to Red Allison Clash 13K, and that was a good call. We have 1N and a full sister from the flush that is among the top of our replacement heifers. 1N is a masculine, easy fleshing, sound structured bull, dark red and big footed. With a mother and a sister like his, you will love the daughters he leaves you. He posted a 205-day weight of 750 lbs.

**CALVING EASE: \*\*\***  
 This is an impressive individual; this guy stood second in class at Agribition. A bull that is stout made, strong hipped, deep sided, dark coloured, a bull that cheques a lot of boxes. A bull with calving ease like this with a moderate 70-pound birth weight with the growth and performance he has is hard to find. Not to mention the strong maternal side to him, his mother is a dark red cow, with a nice udder and extremely fertile. SVR 48G was reserve champion Red Angus female at Stockade Round Up. Better yet her grand dam is the great SVR 140A cow, who is a CAA Elite dam that has been an incredible producer raising herd sires that have went to respectable breeders. She has raised good functional daughters working in our herd. 4N is a calving ease bull with some power and punch with an October actual weaning weight of 892 pounds and an actual weaning weight of 1330 pounds.

**CALVING EASE: \*\*\***

SVR 5N is a long, sound structured, well-muscled bull that is big nuted, solid footed and was a member of our pen of 3 bulls at Agribition. A bull that stems from a strong cow family. His dam SVR 12K is a dark red, deep bodied cow with a good udder. This cow did a great job weaning him off on October 1st at 828 lbs. Grand dam SVR 59H and great grand dam SVR 121D are both good, easy doing cows. A good well-balanced bull that we like very much.

Raptor is an impressive individual. Powerful bull, stout featured, yet gets out and travels flexibly on a big set of feet and legs. He is long spined, deep sided and masculine fronted. An embryo calf out our 5D donor cow. If we had gotten the DNA back soon enough to know what he was he probably would have been at Agribition. A full brother to a bull Skyline Farms purchased in last year's sale and this one just might be a better version of his brother. His donor dam 5D is an incredible cow, long bodied, great uddered, good producing cow who is a maternal sister to lot 39N. She is also the grand dam to lot 62N. Great bull backed by an awesome cow.

 RED BAR-E-L SPRING ROSE 74B    SVR FREYJA 69D

### CALVING EASE: \*\*

This a bull we like a lot. He is long, stout, deep, masculine, sound structured that is attractive on the move with a proud look to him. His dam is a super deep bodied, moderate framed, milky, good uddered Continental daughter. Continental being s son of the great old 140A cow which certainly doesn't hurt. Grand dam SVR 69D is a deep, tank cow with a good udder. This is a very good bull that will leave a beautiful set of productive daughters, strong maternal traits on both sides of his dam's pedigree.

**CALVING EASE: \*\***

Paradigm 68N is a super easy fleshing, stout made, nice skulled bull that is deep sided, robust in his ribs and just full of meat and muscle. Just a really good well-balanced bull that moves good backed by a super nice uddered, stout, easy fleshing, and the practical real-world type of cow.

The bull feeding program is built to maximize forage utilization, gut health and as a result quality sperm production. Nutritional status of a bull, particularly from the previous 60-days can affect the semen quality being ejaculated today. Sperm production is a continuous process and proper nutrition is critical to maintain peak fertility and longevity of bulls. Bull calves are generally developed on grass with their moms on a quality mineral program.

Once bull calves are weaned, they are slowly moved onto a balanced TMR. The bulls are challenged with a forage-based TMR to help them develop and express their genetic potential. This is important for consistency of maturation and puberty of bull calves. Sampling and analyzing forages are important for properly balancing the overall ration.

Forage quality and digestibility are important for maximizing ruminal health. Matching suitable protein sources with proper starch with the available forage sources is key to promoting lean muscle growth. The addition of organic minerals are used to ensure proper immune function and overall health of bulls. All of these factors contribute to semen quality and conception within a herd.

If you have any questions about the nutrition program, please feel free to reach out. Buy with confidence knowing the bulls have been developed on a balanced nutrition program.

**CALVING EASE: \***

If growth, performance and pounds is what you are after, here is the bull to do it. A bull with length, muscle and frame that is sound structured. 128N is in the top 1% for weaning weight and top 2% for yearling weight and posted an acual weaning weight of 962 pounds as just a middle of March born bull. From an excellent cow family, dark red, good uddered, powerful cows. Dam is a maternal sister to dam of 66N. Grand dam SVR 42D is Grandma Linda's favorite cow.

**CALVING EASE: \*\*\***

130N is a low-birth-weight Paradigm son that is thick made and full of muscle. He is long spined and good looking. His dam is a beautiful looking, milky, good uddered, dark red cow. +5.0 calving ease and negative on BW, actual BW of 76 pounds, safe for heifers.

### CALVING EASE: \*\*

Red SVR Paradigm 150N is the March bull calf we took to Agribition this past fall where he was champion in his division. 150N is a bull that is stout hipped, big topped, heavy quartered with a masculine head and neck. He is sound structured and balanced. He is a maternal brother to our high selling bull in last year's sale that sold to Canadian Sires for \$90,000. Other maternal brothers have sold to Dean McKim, Kurtis Barlett and Brian Brown. Proof that his dam 170D knows how to raise them. Not only is she an incredible producer, she is an incredible cow to look at. She has perfect feet, good uddered, moderate framed, big bodied and long spined. The kind you wish you had hundreds of. This is a good bull backed by an incredible cow.

**CALVING EASE: \*\***

Canadian Classic 357N is standout and has been from a young age. The type and kind we are trying to produce. 357N has power, structural integrity, and eye appeal, in a masculine, herd bull like package. He exemplifies good muscle expression, depth of body, a good presence and great disposition. His mother SVR 342H has an awesome udder structure, excellent foot quality, and is a productive female, with the maternal strength to raise great herd bulls. She has proven her value raising 357N. He is a maternal brother to a bull that went to Roy Kirby a couple years ago.
