SAMTIA FARMS

COMPLETE SPECKLE PARK DISPERSAL

As I sit here and write this, it is with mixed emotions. This has been a very hard decision for us, as we have been in cattle most of our life. We have been in the Speckle Park breed for over 15 years and watched it grow and become world class. We feel our cattle have also come along way from our early years. We have worked hard to improve our cattle to where we feel the cattle needed to go to become strong contenders in a purebred and/or commercial herd. Our cattle offer longevity, structural soundness, disposition, and maternal excellence, all backed by strong genetics. Whether you are looking for donor cows, herd bulls, or adding new genetics to an existing herd, you can buy with confidence. We are very proud of our cattle and what we have to offer to you for your consideration. This could not have happened without help along the way, especially from our family. This includes the late nights of calving, late-night runs to the vet, vaccination time to roundup—we called on our daughters, Sam and Tiana. The girls were always there to take time off from their jobs to help, and it was always greatly appreciated more than you know.

I want to reflect and spend a bit of time explaining our cattle operation. We are truly a family ranch with 100% of the management and labor coming from Layne, myself, and the girls. Some are aware, and others are not, that I worked off the farm for 35 years. My career was demanding, involved much travel and crazy and irregular hours, and this resulted in much of the workload landing on the shoulders of my wife. She became a very good cattle person over the years, to the point that when I was there to help... most of the time I was just getting in her way. Samtia Farms would not exist if it was not for her hard work ethic, resilience, and dedication to the cattle industry. Layne, a very sincere thank you for all that you have done to make Samtia Farms a success.

We would also like to thank Gary and Nancy Kiziak from Codiak Acres. They were instrumental in the breed itself but also helped us produce and present what we have in this sale. Our herd has a significant number of Codiak genetics, as Gary and Nancy always allowed us to buy some of their best. Codiak Acres has helped introduce many to this breed and have helped us immensely, which has allowed us to take our herd to the next level! Gary and Nancy... we thank you.

We have dispersed several times over our 25-plus years of raising cattle, but I honestly think this one will be the most difficult. We have met some incredible people in the Speckle Park world, and for that we are grateful. One of our great regrets is that we could not spend more time taking our genetics into the show world, but this simple truth is we just did not have the time, as our operation is truly that of a family farm.

We would like to thank some significant contributors who made this dispersal sale possible. First, to Bob Balog for opening up his auction facilities to us and being an incredible host for our final sale; Mark Shologon and crew for pasture pictures, videos, and all of the hard work to make this sale possible live on the internet for our out-of-town guests; T bar C for making us a very professional catalog; Justin Pittman and crew for fitting all of our animals prior to the sale; and to all of you that are in attendance and the people participating online.

As this chapter is ending, we take pride in knowing our genetics will be going to others who have the same love and drive to take the Speckle Park breed further in the industry. Thank you for all the pasture tours, encouragement, confidence, and interest in our program, and as we welcome you all to our final sale.

Happy trails and see you down the road!

Lee Gleim

WELCOME FROM BALOG AUCTION SERVICES

Welcome fellow livestock producers!
To Lee & Layne's – Samtia Complete Cow Herd Dispersal!

For many years we have had the pleasure and privilege of working with the Gleim's in their very successful cattle operation! Gleim's have been extremely selective and critical in their evaluation of the breeding program. Calving ease, fertility and performance have been a must in all of their plans. This cow herd has been developed with both the commercial and purebred man in mind! The cows are excellent milkers, easy keepers and very attractive to look at. The selection of their breeding bulls, attributes to the uniformity and performance needed for success!

In the purebred world, the Samtia cattle can, and have, competed with the best, with excellent results. In the commercial end, the Samtia calves have always been market toppers. We know that this set of cows will bolster which ever cow herds they go into, and the industry will benefit from their strong genetics. We are sorry to see Lee and Layne's dispersal and we wish them well in their future ventures. However, what a tremendous opportunity to buy the best from a tremendous proven program! See you at the sale!

Respectfully, Bob
R.C. (Bob) Balog

TESTIMONIAL FROM DR. CORY DAVIS

I have had the pleasure of working with the Gleim family for the past six years.

The passion and dedication this family has for their herd has been a joy to work with. Samtia Speckled Park uses a comprehensive herd health program that highlights the health and performance of their livestock.

The breeding herd receives annual preventative 8-way clostridial with tetanus and 5-way viral vaccinations to protect the cow-calf herd. At birth, calves receive intranasal pneumonia immunization and preventative coccidiosis treatment. During spring turnout and weaning, calves are vaccinated with a 5-way viral vaccine including Mannheimia haemolytica, as well as a clostridial vaccine with Tetanus. Additionally, a mineral package is provided free choice for the herd.

To ensure they meet all necessary criteria before entering the herd, replacement heifers undergo pre-breeding palpation yearly. Buyers can be confident when purchasing at Samtia Speckled Park dispersal.

Best regards, Cory Davis
Veterinarian: Dr. Cory Davis

CODIAK STELLA GNK 52E

We are very excited to share a bull to the industry that we feel has the potential to enhance the Speckle Park breed. Leading Edge 5L is a bull that checks all of the boxes. He has been admired by every visitor for his depth, muscle mass and great foot structure. This bull is also a gentle giant with an extremely quiet disposition. His dam, GNK 47H, is a never-miss female that we purchased from Codiak Acres several years back. She is a very long-bodied, broody female with a beautiful udder. The sire of this bull is a River Hill bull that we purchased as a yearling. RH Jubilee 151J was a tremendous bull that unfortunately we got very few calves from due to a very serious injury. He comes out of some bloodlines that we originally had in our herd when we started out 15 years ago: Below Farms Lilly 218X.

This bull was shown as a 2-year-old in Lloydminster and Agribition, where he placed very well. He is very well halter broke and very easy to work around. Our plans were to show him hard in 2026, but with all the work associated with preparing for our full herd dispersal this year, we made the decision to keep him at home.

Leading Edge spent 8 weeks in Moose Jaw at Bovigen, and both Canadian and US semen was drawn on this bull. The technicians at Bovigen could not say enough kind words regarding this bull, and over his time there, he became a favorite. We are looking to partner up with another progressive breeder who is enthusiastic regarding marketing semen on this bull. No semen has been sold to date.

Knuckles is a home-raised bull out of a Prairie Hill bull that we used for several years, and Dam GNK 401D, who sells as lot 13. We have used this bull for three years and could not be happier with his progeny. He is long, deep, has great conformation and has excellent feet. He was used on around 25 females this year. He is a breeding machine. I would keep every female sired by this bull. Buy with confidence...you will not be disappointed.

Mumbo Jumbo is a home raised bull and was an embryo calf out of Codiak Del Ray which is a bull that was tremendous for length, muscle and mass. Dam was out of a female that was a total outcross to most herds. This bull has it all...length, depth, muscle, bone and exceptional feet. A full brother, Samtia Landslide 50L, was purchased by Jordan Underhill this Fall and he too is an exceptional bull. Another full brother sells as lot #6. This was our first year of using this bull, but I have no doubt that his calves are going to be exceptional.

Macho Man is another home raised bull coming out of a very strong female that we purchased from INC. Unfortunately, this female got injured and had to be culled as a very young breeding female. The sire of this bull is a very strong INC bull. Macho Man was used on all of our heifers this year. He is a calving ease bull that also has performance. This was our first year of using this bull, but I am excited to see his calves this Spring.

CODIAK PACKER GNK 74H

SIRE: X-TREME'S KASPER 2K

DAM: SAMTIA LILAC 2L

BELMORAL'S JENNY 30F

SAMTIA JEWEL 4J

This is the only bull that we have ever sold out of X-Treme's Kasper 2K which was a very strong calving ease bull. This breeding was the right combination. Unfortunately, the dam was injured after her first year of breeding and had to be culled but she was a tremendous female.

Our program has always been focused on selling 2-year-old bulls versus yearlings. In our minds, this allowed us to develop the bulls slower with the goal of increasing longevity, foot quality, and athleticism. We cull strongly, and only the very top end of our bulls make the cut to sell to customers. Our bulls, as well as our replacement heifers, are all developed at a local feedlot. Heifers are then turned out for breeding, and bulls continue to be developed at our place until the following spring. Bulls are developed with free-choice alfalfa and a moderate ration of grain that is fed by hand daily. We do not use silage in our operation, so these bulls will not shrink once you bring them home.

WITH OUR BULLS.... WHAT YOU SEE IS WHAT YOU GET.

This is a sale feature. This bull is the only offering out of our Katifa bull and his mother has been a cornerstone of our entire breeding program. She is a female that does not miss no matter what she is bred to. We always meant to flush this female but unfortunately, we did not. It is very difficult to find fault in this bull he checks all the boxes. 401D may be the best cow that we own and sells in this sale.

12

Simmental X *Speckle Park* BULL

SIRE: SPECKLE PARK

DAM: SIMMENTAL

This is a bull that is 50% Speckle Park and 50% Simmental. We kept this bull back for a couple of reasons. First, we just plain like the bull. Second, we wanted to show our customers what a cross like this could produce. This guy is an extremely fancy Baldy bull that has tons of performance. Baldy calves are very sought after by producers and feedlots. This bull will give you the Simmental performance and the Speckle Park carcass traits.

Feature female. Flush potential. This cow sits right at the top of one of the best that we own. We purchased her from Codiak as a bred heifer and unfortunately, she was late bred that year. We have been working hard to catch her up but she is still calving later than most of our herd. This female needs to be flushed in our opinion. The original plan was to take her out of service this year and flush but with the dispersal sale...we decided to breed her instead.

EXPOSED TO SAMTIA LANDSLIDE 50L STARTING MAY 15.

EXPOSED TO SAMTIA MUMBO JUMBO STARTING JULY 2.

SAMTIA PANSY 81E

This light-colored bred heifer has a low birthweight, but in terms of her growth rate and condition, she speaks for herself. Her mother has great calving ease and high milk production, obvious from her frame and exceptional condition.

EXPOSED TO SAMTIA MACHO MAN 35M STARTING APRIL 18.

83

84

This bred heifer is built to produce; she is the definition of an easy keeper. She is clean-fronted and holds her mass in all the right places. This female is one we think will be a top producer for the future years to come.

SHORTHORN

purebred heifers

We purchased these purebred Shorthorn bred heifers with no real vision in mind, other than that it was something different. On the day of the sale, all four females looked amazing and had incredible conformation and temperament. Rather than purchasing a bull to breed four females, we sent all four up to Bow Valley for 75 days to AI. We selected Firestorm, as we liked everything about this bull.

These females were not run with a cleanup bull, so they have varying confirmed bred dates. A tremendous set of second-calving females here that are bred to a very sought-after sire. I struggle selling this group of Shorthorn second calvers, as their future is so bright.

HILL HAVEN FIRESTORM 28C

terms & conditions

TERMS: All cattle sell in their entirety apart from Lot #1. Terms of the sale are cash unless other arrangements have been made with Lee Gleim. Every animal will be sold to the highest bidder, with the auctioneer settling any disputes. All cattle become the buyer's property as soon as sold and will be cared for until delivery at the buyer's risk. Neither Balog Auction nor any person connected with the sale assumes any liability, legal or otherwise.

INSURANCE: Insurance is strongly recommended. Insurance is the responsibility of the buyer and should be arranged immediately after every lot. Someone will be available on sale day for insurance.

PAYMENT: All purchases are to be paid in full. No animal will be transferred until full payment is made or other arrangements have been made with Samtia Farms.

ANNOUNCEMENTS: Announcements from the auction block take precedence over information printed in the catalog. Any errors, omissions, corrections, or changes will be announced from the auction block or noted on sale day.

GUARANTEE: All pregnant females will be pregnancy checked on October 16, 2026. Young females will be palpated then as well and sell without any further guarantee. All bulls will be semen checked on November 16, 2026. There is no guarantee on semen.

DELIVERY: All cattle will be shipped via Balog Auction unless other arrangements are made with Samtia Farms.

We will work with you on delivery and trucking arrangements. Jordan Underhill will be working directly with Knill Transport to ensure that we can get the best rates for all cattle going to Ontario East.

Knill Transport Ltd.: 519-442-6242, toll free 877-442-3106

Canada and US Bonded Carrier
Overweg Trucking Ltd.: 403-308-9238

FOR US BUYERS: The exchange rate will be announced from the block. Every effort will be made to assist buyers in meeting current export requirements. Required export testing and health certificates will be completed for animals being exported, with associated costs to be borne by the buyer. Delivery arrangements will be made to central points, or border crossing will be coordinated with the buyer following the sale.

SEMEN: Semen is stored at Bovigen Genetics, Moose Jaw, SK, 306-690-3243.
Semen will be transferred within a week of payment.

TO ALL OUR CUSTOMERS AND THE PEOPLE WHO SHOWED
INTEREST IN OUR CATTLE OVER THE YEARS...

Thank You!
