

SPRING LAKE SIMMENTALS

The Zimmers

BULL & FEMALE SALE

Wednesday
March 4, 2026

AT THE FARM
Daysland, Alberta
Sale Time 1:00 PM

On behalf of everyone here at Spring Lake Simmentals, the Zimmer's, I would like to extend to you an invitation to attend our 7th annual sale at the farm in 2026. We truly appreciate the time you are taking to view our sale offering whether it be online or walking through our pens. We are proud and excited about the strong group of bulls that are in the offering this year. Whether you are looking for a power bull to add weight on calves, a middle of the road bull for some younger cows or even a few select heifer bulls, we feel that we have them in our sale offering. On the replacement end of it, no bull that is used here at Spring Lake comes from anything but a top end female so that not only ourselves but our valued customers can put those really good replacement females back into the herd. Mentioning females, we have 25 in the sale. 10 purebreds to also help showcase the herd sires used here and 15 "commercial" females to do the same.

Several new herd bulls have been added as new genetics for ourselves and our customers are always important along with the tried, tested and true who are also in the sale offering.

If you want a little help or advice as to your needs in a bull, we are very happy to assist you as we practically live with them. Also the very trusted Transcon team is available to independently provide an opinion as they have gone through the bulls and their mothers several times over the year.

If you want a little extra bang for your buck, once again I believe you can get it done here. Hopefully we will see you at the sale but no matter how it's done, THANK YOU for taking the time to view our sale cattle in 2026.

Thank you,

Eric, Cristin and family
Doug and Larene

On behalf of Doug, Eric, and the entire Zimmer family, the team at Transcon is pleased to formally invite you to the 7th Annual Springlake Simmental Bull and Female Sale, to be held March 4th at the farm near Daysland.

This year's offering includes 70+ yearling bulls, a select group of two-year-old bulls, along with 10 registered and 15 commercial replacement heifers.

The 2026 pen may be the deepest and most consistent set Springlake has assembled to date, while still showcasing the exceptional hair coats, wide tops, and structural soundness buyers have come to expect. You'll find both proven sire groups that have stood the test of time, as well as exciting new genetics added to the program.

As the industry continues to push for darker red cattle, you've come to the right place to find your next herd sire. The Zimmers are widely recognized for their unique, deep dark red colour—often referred to as "Zimmer Purple." These red bulls not only stand out for colour, but also for their thick hair coats, wide tops, and tremendous muscle.

The Fullblood division is exclusively sired by B Bar C Justify, a bull the Zimmers have confidently walked for four years with outstanding success. Justify continues to produce the right kind for today's industry—polled and horned bulls that offer exceptional growth, muscle, and the ability to add pounds to your calf crop.

While smaller in number, the Black division is every bit as impressive. This may be the best set of black bulls the Zimmers have ever offered, featuring the same hair, condition, and quality found throughout the entire pen.

All bulls are developed in large pens designed to encourage movement and responsible growth. They are structurally sound, fluid moving, and quiet in disposition. Whether you're searching for calving ease or added power, there is truly something here for every program.

With cow numbers still at historic lows, don't miss the opportunity to add high-quality replacement females to your operation. Doug and Eric retain the majority of their females, making this offering a rare opportunity. You'll notice many lots are backed by cows carrying the ZSL tattoo, a testament to the productivity and longevity of the Zimmer cow herd. These females simply work, and you can purchase with confidence—registered or commercial.

We hope you can join us March 4th at the farm near Daysland for great cattle and outstanding hospitality. If you're unable to attend in person, please contact any member of the Transcon team to assist with your absentee bidding needs.

We look forward to seeing you there.

Cody Coupland

Milestone will likely be the lead off bull at this years sale. He started off at a low birthweight, he went on to wean at 1085 lbs and an actual yearling weight of 1520. He has every attribute you look for in a herdsire. Length, thickness, tons of middle and great feet under him. His mother is a big framed Tundra female who is one of the top cows in the herd.

Every now and then it's fun to dust the lid off that semen tank in the back corner of the barn office and pull out a straw from back when. Especially when you can get a calf like this Mandako son. Mandako himself was purchased by Rendezvous Farms and went on to be an integral part of their Red program. Overdrive is moderate framed calf with lots of middle thickness and good feet. He did very well on his own as his mother died when he was 3 months old.

A low birthweight bull that is very well balanced from a good young Epic cow. Canyon will work really well on some younger cows by adding that extra milk and muscle to his offspring. The rest of his EPD's are some of the best in the red pen.

North Star is an impressive bull considering he started out with an 89 pound birth weight. His sire, True North, is a black baldy bull that we used exclusively in the heifer pen as he calves very nicely. We were pleasantly surprised with the performance and growth that we see in his calves. His mother is a moderate framed, easy doing kind of heifer with plenty of milk which this bull calf turned into muscle and growth.

Velocity is one of the stoutest and thickest calves on offer in our black division. Even though he is moderate framed, he packs the pounds on him as seen with his 990 pound weaning weight. His picture tells the story. He is a sharp profiled herd sire prospect that is long bodied, deep flanked and heavy quartered. Not only has his sire, Warden, given him the genetics to make him good but then you add in his Missile sired mother to make him even better.

When is the last time that you saw a Shear Force bred herd sire prospect? Well, here he is and he's a good one. It doesn't take long to notice him in the pen with his deep body, big hip and heavy hair coat. His mother is a solid black, easy doing female with a little different pedigree but one that is a top producer which is why I bred her to Shear Force \$\$\$. Shear Force over the years has been one of the ultimate female makers in the Simmental business. This bull is definitely worth having on your short list.

ZSL Advocate 199N is one of the special bulls in the pen this year. Not only is this guy polled, he's homo polled and diluter free and coming from one of the really good young cows in the herd. To go along with those traits, ZSL Advocate comes fully goggled and scarlet red. This moderate framed bull has the performance and thickness to be a top prospect for any one looking for a homozygous polled fullblood bull. This individual will not be hard to pick out in the pen on sale day.

ZSL King Pin is one of the bulls that has what I call the wow factor. He is a polled herdsire prospect that is just plain stout and good. He is a bull that is wide topped and heavy quartered with a massive spring of rib that you just don't see in many polled fullblood bulls. You also don't see many full-blood bulls that are almost solid patterned like King Pin. His mother was our pick of Lone Stone's sale offering a few years ago and she has turned out to be a special young cow. This bull is one that any astute breeder, looking to add performance and the polled factor using a fullblood bull, should be adding to their short list of possible herdsires.

Baron 128N is a polled performance oriented, full-blood bull that comes by that trait very naturally as his mother is one of the easiest doing, soft sided females in the herd. When we purchased her out of the MAVV sale offering two years ago and got her home, I don't think there was a way to be happier with her. This bull is proof of what that cow can produce as her second calf and the value that she will have in our herd for years to come. Put this bull in your herd and you will see that extra value in a couple of years for yourself in the calves that he produces.

Okay, you have to get over the color pattern as this bulls broken color coat is totally not typical of his sire, Justify. Now that we talked about the elephant in the room, this bull is as long spined and stout made as any bull in the pen. His mother is a solid dark red cow with as much spring of rib as any in the herd and the perfect udder that IMax, her sire, is known for. She did one hell of a job on this calf as he weaned off of her at over 1000 pounds. This bull will produce the heavyweight calves that you will be proud of when you take them to town.

ZSL MS FORCE 9X

This is a smooth and feminine heifer sired by our new herd sire Black Gold Tycoon 198L. He sires females that are not only deep, thick and hairy but easy to look at being clean and sharp front ended. The pedigree alone that this heifer possesses should make her a 'no miss' kind of female and one that I would love to follow in her years of production to come.

Ms Millie 223 N is a beautiful dark red blazed face female that exhibits that balance of femininity with overall thickness and depth of body that we strive for in our best females. Her sire, Moe's Revelation, is another one of our new bulls that has got us very excited after seeing his first calf crop.

This is a really good dark red and hairy female that comes with a little bit of a twist. She comes from one of our deepest and thickest fullblood cows. The cross between the red and the fullblood pedigrees has always given that little extra shot of performance.

If you like them moderate framed yet deep and powerful this BGS Tycoon heifer will fit right in to your program. She is mothered by a powerful, solid red cow that has been in the herd for some time because of her physical soundness and above average production record. Her bull calves have been in the front end of our bull sale and several of her females have been retained in the herd.

Another typical BGS Tycoon female that is not only thick and powerful in her makeup but is also very feminine and sharp front ended. We are looking for these females to have all of the wonderful qualities that BGS Tycoon's mother is known for. Oh and by the way her own mother, ZSL 16H, is no slouch of a cow either.

These 15 commercial "purebred" heifers, are once again being offered to you without the papers. These females come from the same herd sires used in our entire program and females that are in our herd. There is a good cross section of red, black and blaze faced females in the group and they will be sorted accordingly on sale day. These young females will go on to be good cows in any new owners herd. Buy with confidence.

They will be sorted in 5 groups of 3 accordingly on sale day. The groups of 3 will be highlighted in our sale video

If you are unable to attend the sale this year, online bidding will be available through DLMS, or give us a call or stop by the farm prior to sale to see the bulls. We have hired the most trusted sale staff we could think of to assist you with any purchasing requirements you may have in your absence. We use them ourselves to help with buying when we can't be there ourselves. Call any of the cell numbers listed in the front of this catalogue.

Terms & Conditions

DELIVERY: \$100 off per lot if picked up sale day. Bulls will be kept free of charge for a reasonable length of time, usually until you need them. In rare cases and for convenience reasons, you may be asked to receive your bull(s) when delivering other bulls to your area. All bulls must be insured if going back to the seller's farm unless arrangements have been made between the buyer and seller. Insurance will be available on sale day.

HEALTH OF BULLS: Spring Lake Simmentals guarantee to sell you a bull that is structurally sound and has passed a semen test done by a licensed veterinarian. Our bulls are raised on a BULLSEYE ration and go through a regiment of herd health shots designed to protect and enhance the longevity of the bulls.

SIGHT UNSEEN PURCHASING: Every year more and more bulls are purchased sight unseen because of the increasing number of repeat buyers. If you wish, contact Eric or Doug with the bulls of your choice and they will discuss them with you. They will then forward you on to one of our very knowledgeable Transcon sale staff members. Then you, the buyer, can get your bull buying done in a very confidential and professional manner.

TERMS & CONDITIONS: The sale will be conducted under the standard Transcon Livestock Corp. terms and conditions. Copies will be available at the settlement desk.

SEMEN RESERVE: Spring Lake Simmentals reserves the right to collect 100 straws of semen for in herd use only on any bull in our sale. Semen would be collected at our expense and the buyers convenience.

Welcome to Spring Lake Simmentals Bull & Female sale. It doesn't take very long looking at these offerings to see the quality. It is a pleasure working with this family as they continue to solidify their reputation for excellent genetics and soundness.

The bull feeding program is built to maximize forage utilization, gut health and as a result quality sperm production. Nutritional status of a bull, particularly from the previous 60-days can affect the semen quality being ejaculated today. Sperm production is a continuous process and proper nutrition is critical to maintain peak fertility and longevity of bulls. Bull calves are generally developed on grass with their moms on a quality mineral program.

Once bull calves are weaned, they are slowly moved onto a balanced TMR. The bulls are challenged with a forage-based TMR to help them develop and express their genetic potential. This is important for consistency of maturation and puberty of bull calves. Sampling and analyzing forages are important for properly balancing the overall ration.

Forage quality and digestibility are important for maximizing ruminal health. Matching suitable protein sources with proper starch with the available forage sources is key to promoting lean muscle growth. The addition of organic minerals are used to ensure proper immune function and overall health of bulls. All of these factors contribute to semen quality and conception within a herd.

If you have any questions about the nutrition program, please feel free to reach out. Buy with confidence knowing the bulls have been developed on a balanced nutrition program.
