shlivestock.com buyagro.com dlms.ca

Welcome everyone to our 16th annual sale. We are proud to work with Eye Hill Stock Farm and MG Angus once again this year. It's an exciting time to be in the beef industry as a primary producer. Returns on cull cattle and feeders have stayed up at the point where we need them to be for awhile. It is a great time to be in cattle and invest in technology and genetics to improve our operations. The hard times make us strong and make the good times more enjoyable! The offering this year is deep.

Our policy of "never a better time to cull hard than the present" continues to pay dividends in the depth of our herd, and thus the bulls we have to offer. The cattle are managed for longevity and selected for eye appeal and functionality. We run two separate calving seasons with January and April time periods. Our January calvers are a select group of purebred individuals that produce the yearling bulls for this sale. Our April calving group consists of 95% purebred cows and some commercials which produce two-year old bulls and F1 heifers for sale, and a higher percentage of feeder animals.

We will be hosting an open house again this fall on the date of August 15th, 2026. A large number of our herd will be available to view within walking distance of our yard. I have always said August is the best time to look at the herd and I hope you can join us for a tour, meal, and visit at a warmer time!

This catalogue is a great guide of our offering and along with videos and all the other online tools you can get a pretty good idea of what we're up to. That being said, I think you would appreciate the cattle even more in person so, hopefully you can join us prior to or for the sale March 13th. Thank you to our past customers, your support means the world to us!

BEAR CREEK BLACKJACK 13K

DURALTA 8020 INFERNO 42H

Inferno has given us alot to be excited about. He has eight sons on offer in this year's sale. Six of his daughters have sons in the sale and many more daughters are in or coming in to production this year. Both sexes of his offspring have benefitted our program with fertility, muscle, length of body, and eye appeal. The heifers look like cows early and the bulls crest up early and show high libido. His EPDs feature positive values in calving ease, birth weight, milk, and marbling. Sons have made up a large part of our show pens in the past years. Owned with MG Angus

Coalition 55M is a beast. The first and only group of 11K sons are feature two-year olds this year. Unfortunately we lost 11K to injury. We are keeping an interest on two sons, including 55M. He has been the heaviest bull in this contemporary group throughout. He is packed full of muscle, sound structured, and smooth made. He has always shown a great libido; should breed very well. His dam is large capacity and good uddered. January 5 wt-1860. **RETAINING SEMEN INTEREST**

				MILK 26

32M is a very soggy boy with exceptional lower body dimension. He is the widest based bull in the offering, also boasting a moderate frame, deep rib, ample muscle, and strong feet. His dam is a hard working, good uddered female from Jayce's Elba cow family. They have produced well and had stayability. A must see cow bull on sale day. January 5 wt - 1790.

33M is a deep and long bodied bull with calving ease and eye appeal. I can't say enough for what his grand dam, 117X, has done here; she is in a lot of the pedigrees. Love the capacity of this guy and he's as smooth as can be. He would be an option on heifers.

We went back to the vault and pulled some older semen out on this mating. 9N is grand sired by Freedom 89U. The 89U daughters excelled at longevity and production since we bought the herd. 9N's grand dam 117X continues to make her impact felt. Last year a lot of the top sellers in the sale went back to her. 9N is phenotypically impressive with length, muscle, attractiveness, all the while boasting a moderate 78 lb birth. Top 15% for BW, 20% for MCE, 4% for milk.

One of one and a solid one at that. 162N has some performance with a couple of our top cow families from the Angus and Hereford divisions. With a moderate birth-weight he could prove to be dual purpose but I'd stick to cows for starters. Very solid individual that I can't poke many holes in. Wish we had ten of these to sell.

306-821-6446

Welcome to the 2026 Standard Hill/Eye Hill Connection Sale. I want to thank Stephen & Brennan and families for inviting us to join them at their annual sale. It is a fun and rewarding week working with these two families and friends.

The years seem to go by quickly and the boys are growing up quickly as well. Rylen is busy working at Home Depot and at the farm. Nevan is currently going to school at Polytech in Saskatoon enrolled in the Autobody program. We are very appreciative of their help around the farm and in life. Jeanette and I are both busy with our jobs as well.

2025 was another great year for the cattle industry. The market was very strong for all sectors. Our cow herd is doing another great job raising very functional, growthy, and eye appealing calves. They are doing very well at Standard Hill, and I want to thank Stephen and family for their hard work and dedication to the farm. The first calving heifers have done well this year as they have raised the bulls in the yearling pen. The yearlings are low birth weight with exceptional growth and muscle development. The 2 year olds are really good, with low birth weights and excellent testicular development.

We want to thank the buyers from last year's sale for your trust in our program. If you are interested or have any questions about the sale offering, please don't hesitate to call myself, Stephen, Brennan, or Shane Castle. The cattle are available for viewing any time before the sale at the Standard Hill farm. We are looking forward to seeing and talking cattle with many of you on March 13 at the Standard Hill farm.

Michael

202M is a calving ease specialist with lots of body length and enough muscle shape. His dam is a very good Flo Rider daughter with lots of rib and an excellent udder. His sire, LCL Randale 11K, had a short career but left some very good progeny behind. 202M's maternal sister is the dam to MGA 208N in the yearling pen.

220N possess good structure, hair, testicular development and calving ease. His dam is a very good first calver with a beautiful udder. She is sired by our outstanding herd bull, Inferno, who has sired some very good bulls and some great females for us.

TATTOO: MGA 220N REG #: PENDING YEARLING BULL

On behalf of the Schachtel family and Eye Hill Stock Farm, welcome to the Red Angus section of the bull sale. We are very excited to once again work with the Myer and Gerlinsky families. I can't thank all our past and future customers enough for the support and taking time to look at our offering. This time of the year the catalogues flock to the mailboxes in droves and there are lots of options; I appreciate that we are one of them.

To summarize this past year's cattle market in a short statement. "It's been a whole lot of fun". The buzz, vibe and excitement of the calf sales this fall mixed in with "look how much I got for my cull cows" has been awesome. It's nice to see the producers have some extra funds to acquire a few more things on their "want list" not the "need list". Here's hoping for many great years to come.

We are very proud of the bulls we have on offer this year. I can say this with utmost confidence this is the strongest bull sale offering we have had to date. New genetics clicked, certain cows had bulls, the bulls weaned off extremely well and bulls continue to grow/develop into what they are presented to today. There is a great mix of both cow and heifer bulls with a very diverse set of genetics; some being outcross. There's lots of new exciting genetics for repeat customers as well. As always, my main focus has is building the base of the cow herd; cows need to be sound, easy fleshing, with great structure, or they hit the road. These bulls in the sale are backed by dams that I am proud to show you. Additionally, the commercial heifer pens are a very strong group that would be great additions to anyone's herd.

The bulls were weaned on Sept.10. Since weaning they were developed on a moderate growing ration to promote longevity and adequate growth. Pictures were taken Jan. 14, and videos will be taken mid-February. The bulls change rapidly at this age, so if you need updated information please contact us. Better yet you are welcome to tour the bulls anytime leading up to sale day; we would love to show you their mothers and their sisters. Please feel free to call with any questions. Thanks

REFERENCE SIRES

The 2026 bull sale sire group is a mix of dependable genetics as well as some new genetic options. The newest sire group is that of Instinct 36L. I was fortunate purchase a semen package as he was one of the most talked about, and admired bulls in the 2024 season. He has done an exceptional job and sired moderate birthweights, dark coat colours and unmatched growth. There also is a very strong set of Crown Royal sons, which were very popular last year. He is one of the easiest fleshing bulls you will find, and is made so right. We are using a couple home grown bulls, both are sons off of 314A, our most cherished cow. 23J was a former high seller to McAleer's. His sons all have his stamp/look, easy to find in the pen. The second home grown sire, 18K, is a son of 23J's brother who was purchased by Kenray Ranch. So, there are 6 grandsons of 314A in this sale. Other sires include the 90K Slowburn bull; Lex: a new herdsire, the great First Down bull, as well as a couple sons off our resident heifer bull, Lightning 44J. All these sires were selected and utilized based on overall structure, calving ease with performance, predictability, fleshing ability and the dam behind them.

11N is another rip of an Instinct son. He's had the look of something special since he was a baby calf; which sometimes doesn't pan out. Dark red, deep sided, awesome numbered all with a herd bull look. His dam is an absolute pistol of a young cow and reminds me the most of the 314A cow. This one I should be keeping. **RETAINING 1/3 SEMEN INTEREST**

18N is a dark red, moderate framed, well balanced tank! He has a lot of Angus character, great structure and may have the most lower 1/3 of any bull in the sale. As good as his picture is, I believe that he's better in person. His dam is a moderate dark red tank that puts one into the top of the pen annually. 18N is a bull that I feel can be used many different ways, and is probably one of the best heifer bulls we have ever sold. **RETAINING 1/3 SEMEN INTEREST**

16N is a long bodied, deep sided, heifer bull option with a great look. Most importantly he has very good growth after birth, and could be used in the cowherd as well. He's extremely quiet and will follow you around the pen, like Resch and Lyndi's kittens. His dam is a beautiful young cow that is long bodied and has a beautiful udder.

EPDs CE 8.0 BW 0.2 WW 42 YW 75 SC -- MCE 6.0 MILK 30

Elite calving ease. Smooth made, well balanced and long. A great calving ease option. The 44J sire has done a great job providing no nonsense calving ease options. Out of a young Rockefeller dam who's built for the long haul.

TATTOO: PBS 37N REG #: 2429257 YEARLING BULL

**LOT 72 RED EYE HILL LIGHTNING 38N**

LOT 78

**DONATION HEIFER: 1 F1 HEREFORD/ANGUS HEIFER**

Donated by Standard Hill Livestock - Dutch Auction proceeds to Maidstone Arena Projects

## Terms and Conditions

**Terms:** All sales are in Canadian Funds, payable by cash or cheque on sale day, unless other arrangements have been made prior to the sale with consignors. Every animal sells to the highest bidder, and in cases of disputes the auctioneer will make the decision to reopen the bidding. The auctioneer's decision will be final. Each animal becomes the responsibility of the purchaser as soon as sold.

**Announcements:** Any announcements from the stand take precedence over print material.

**Guarantee:** All animals are backed by the respective breed associations Breeder Guarantee. All bulls will be semen tested before the sale, weather permitting. A list of semen evaluation results will be available at the sale or by calling the consignors before the sale. Bulls will be semen tested prior to the sale, however may sell deferred. Deferred bulls will be semen tested satisfactory prior to delivery. If a satisfactory semen test is not produced the purchaser will be refunded. The sellers have replacement bulls available. Hereford bulls sold to purebred breeders will be parentage and genetic defect tested by the seller prior to delivery at buyers request and cost. Angus bulls sold to purebred breeders will be parentage verified by the seller prior to delivery, or seller will work with buyer until verification is completed. Any other parentage or defect testing may be requested by the purchaser, however cost may be the responsibility of the purchaser. All genetic testing results will be shared with the purchaser.

**Delivery:** Free delivery is available to central locations in Saskatchewan and Alberta with consideration of volume and value of purchases. Deliveries will commence after the sale.

**Feeding/Wintering Program:** Purchases can be sent back to their home pens and remain under consignor's management until April 15th free of charge. We recommend you insure your purchases for liability reasons.

**Insurance:** For liability reasons, the sellers encourage the purchasers to insure animals that remain at the seller's ranch. Ownership and risk of the bull is transferred at the time of auction, therefore, bulls are the purchaser's risk prior to delivery while still in possession of the seller. Larry Toner with Stockmen's Insurance will be available to sell insurance.

**Sight Unseen Purchases:** Call the consignors to discuss what type of animal you require and your purchase price in mind. Sellers will do their best to fill your orders. Sellers encourage buyers to utilize the sales staff as well as picture and video to aid in selection.

All persons who attend the sale do so at their own risk.

# THANK YOU!
