27th ANNUAL
PRODUCTION SALE

MONDAY MARCH 16, 2026 · 2:00PM · SILVER SAGE ARENA · BROOKS, AB

SUNRISE

WELCOME TO OUR 27TH ANNUAL PRODUCTION SALE

It is our absolute honour and pleasure to welcome you our 27th Annual Angus Production Sale. What a historic time to be in the cattle industry. I would like to start by thanking you for the confidence you have shown in our breeding program. We are a family totally committed to our cattle and building the long-lasting friendships that come along with dealing with wonderful cattle people. We want the Sunrise brand to be a reliable source for your Angus genetics and someone you can trust to help your business thrive.

It is with your continued support that our herd has continued to flourish and in return, hopefully yours as well. With that responsibility comes our unwavering commitment to breeding the type of cattle that continue to move our industry forward. The cattle market is changing rapidly, and quality cattle are finally getting paid what they're worth, so having the right genetics in place is going to put you in an awfully good spot. We are anticipating these prices to hold as there is just not enough cattle around.

This is why we have strived to select and breed cattle that meet our criteria for structural integrity, performance, fertility and docility, while meeting the carcass demands of our end consumer with a quality, tender, highly marbled carcass. We strive to breed cattle that will build your reputation and make you proud of the cattle you offer. We feel that our sale offers bulls that get better every year, with this year being the best yet. Every animal in this sale has been genetically tested with Angus HD to help you select your next herd sire with the most accurate data available. The goals of our bull program have never changed having them continually tested for feed efficiency and performance and being able to thrive in any environment. With this in mind, the management of our cow herd has changed making an even more genetically superior cow. The cows are no longer fed through the winter. We now calve a bit later forcing the cows to nurse their calves into December. They go from grazing grass to swath or bale grazing in the couple cold months and then back to grass in the spring. They are made to calve on their own, cycle back quickly and raise an above average calf. Cattle that need to be propped up in any of these qualities do not last. It's with this management that will take our bulls to the next level, raising cattle that are highly fertile and thrive anywhere while raising quality calves that gain quickly and efficiently. We feel that if you want to market yourself as a maternal cowherd then quit taking the maternal out of the cow.

We would truly like to thank the Tateson and Morasch families for managing the sale offering with the same care as if we were doing it ourselves. They have been very easy to work with in understanding how I would like these bulls fed and cared for.

I would also like to thank my family, Logan and Madi for their hard work and devotion to our program and especially my wife Shauna for her unwavering support in the new journey our family is on. They have definitely made it easier through this transition, and we've had a bit of fun along the way.

As always, we love to talk cattle any time so stop by for a coffee/whiskey or to look at the bulls anytime, and please stick around after the sale for snacks, refreshments and for a visit.

Dan Pahl

WELCOME FROM BOHRSON MARKETING

On behalf of the entire Bohrson Marketing Services team, it is a pleasure to welcome you to the Sunrise Ranching Company 27th Annual Production Sale. Each year this event continues to build on a reputation rooted in integrity, quality cattle, and a customer-first approach, and we are proud to once again work alongside the outstanding Pahl family as they present this powerful set of Angus genetics.

There are few operations that exemplify dedication to the beef industry quite like Sunrise Ranching Company. The Pahl family are among the most genuine, hard-working people you will encounter and true stockmen who take tremendous pride in the cattle they raise and the relationships they build with their customers. Their commitment to doing things the right way has resulted in a loyal and growing customer base that returns year after year with confidence. This program has been thoughtfully developed with longevity and real-world functionality at the forefront. The bulls on offer have been managed with a practical mindset and benefit from the added maturity that commercial cattlemen appreciate. They have been rigorously evaluated and culled, leaving you with a dependable, athletic group designed to go out, cover ground efficiently, and withstand the demands of modern ranching environments. These are the kind that minimize problems and maximize profit potential.

Behind this impressive offering stands a cowherd that deserves significant recognition. Built over decades through disciplined selection and strategic genetic investment, the Sunrise female base is responsible for the consistency and reliability you see throughout the sale. Dan has never hesitated to source leading herd sires or proven cow families, ensuring that each generation moves the program forward and, more importantly, positions their customers for long-term success. Complementing the bull battery is a select group of females that beautifully represent the maternal strength Sunrise Ranching Company is known for. Productive, sound, and bred with purpose, these females stem from the same foundational principles that have guided the program for decades on end. Whether you are searching for herd bull power or looking to strengthen the cow side of your operation, this is a sale where you can invest with confidence.

Twenty-seven years is a milestone worth recognizing, and it speaks volumes about the trust the industry has placed in this family and their program. While the name Sunrise Ranching Company reflects an exciting evolution, the core values of elite genetics, strong customer service, and an enjoyable buying experience remain unchanged. We strongly encourage you to mark this sale on your calendar. The proof is evident in the performance and return on investment that Sunrise customers continue to experience. If you are unable to attend in person, please do not hesitate to contact Dan, Logan, Madi, or any member of our Bohrson Marketing team as we would be honoured to assist you in a professional and confidential manner.

Best regards,
The Bohrson Marketing Team

TERMS

TERMS Terms of the sale are cash or cheque, payable at the sale location. Credit arrangements may be made with the Sunrise Family prior to sale. The right of property shall not pass until after settlement has been made; no invoicing on buyers not in attendance, unless previous arrangements have been made. Every animal sells to the highest bidder and in case of disputes, the auctioneer's decision will be final. Announcements from the auction block will take precedence over the printed matter in the catalogue. Current exchange rates will be announced on sale day. All monies are in Canadian funds.

TRANSFER OF OWNERSHIP Proper instructions must be provided at the conclusion of the sale. Extensions granted on order bids only. Costs incurred due to incorrect transfer will be born by the purchaser. Ownership will not be transferred until full settlement has been made.

GUARANTEE Each animal becomes the purchaser's risk immediately after the animal is sold.

LIABILITIES All persons attend the sale at their own risk. The owners, their employees, sales staff and representatives, and facility owner assume no liability legal or otherwise, for any incidents that occur.

HEALTH All sale cattle are on the Complete Herd Health Program and will be given Ivermectin prior to sale day.

DELIVERY ON BULLS We will deliver free within a 300 mile radius. If you bring your own trailer to the sale and pick up cattle we will refund \$100.00 on every purchase up to a maximum of \$300.00. Every assistance given in the arranging of shipping and delivery of your purchases. Each animal becomes the risk of the purchaser as soon as sold. All U.S. purchases will be delivered to our closest border crossing unless other arrangements are made with consignors.

SEMEN Sunrise Ranching Company reserves the right to collect semen from any bull sold through the sale. Any semen collected will be at Sunrise Ranching Company's expense and buyer's convenience. Any semen collected will be for Sunrise Ranching Company use only.

ERRORS All announcements at sale time, written or oral, supercede any written material in the catalogue.

SIGHT UNSEEN PURCHASE PLAN

We have sold many bulls to people who were unfortunately unable to attend our sale. If for some reason you are unable to attend, we would be happy to assist you with your selection and represent you on sale day. Please feel free to call any of the sale representatives to discuss your selections and discuss the offering, preferable a few days before the sale. We will guarantee your satisfaction!

WHOLE HERD HEALTH

THERE ARE 5 KEY COMPONENTS TO THE HEALTH AND MANAGEMENT PROGRAM:

- 1. Nutrition**
- 2. Animal Care and Welfare**
- 3. Disease Prevention**
- 4. Breeding Soundness**
- 5. Tracking Sale Bull Progeny Performance**

BULL AND HEIFER NUTRITION

All pre-weaned calves are raised on mama's milk and lush green grass. No supplemental creep is needed or provided. After weaning they are introduced to a fibrous total mixed ration comprised of chopped hay and silage ration, and an all-natural vitamin supplement. This diet is more than adequate for maintaining growth and performance and superior for rumen, hoof and reproductive health.

ANIMAL CARE AND WELFARE

All the animals (not just the cattle) at Sunrise Ranching Company are managed and handled with the utmost of care. The cattle are comingled in small groups in large spacious paddocks that have 360 degree wind protection and a large amount of slope so that there is always a dry area to stand or lay down. Straw bedding is abundant and always fresh. Cattle are always handled with ease, but when necessary (in the event of injury or lameness) an analgesic medication (Meloxicam) is administered to help lessen the pain.

DISEASE PREVENTION

Sunrise Ranching Company follows a detailed vaccination program to help ensure that the cattle stay healthy and continue to thrive on the farm and carry this forward onto their new homes. Below is a list of the antigens vaccinated against and the associated product names used. Calves are vaccinated in the spring prior to pasture turnout with the following:

- » IBR/P13/BRSV (MLV) - Inforce 3® (intranasal)
- » Long Range Injectable Ivomec
- » BVD (MLV) and Mannhaemia hemolytica - One Shot® BVD
- » 7 way Clostridial and Histophilus Somnus - Ultrabac® 7/Somnubac®

Calves are vaccinated at weaning with the following:

- » IBR/P13/BRSV/BVD (MLV) and Mannhaemia - Bovi-Shield® GOLD One Shot®
- » 7 way Clostridial and Histophilus Somnus - Ultrabac® 7/Somnubac®
- » Parasite Control - Ivermectin in fall

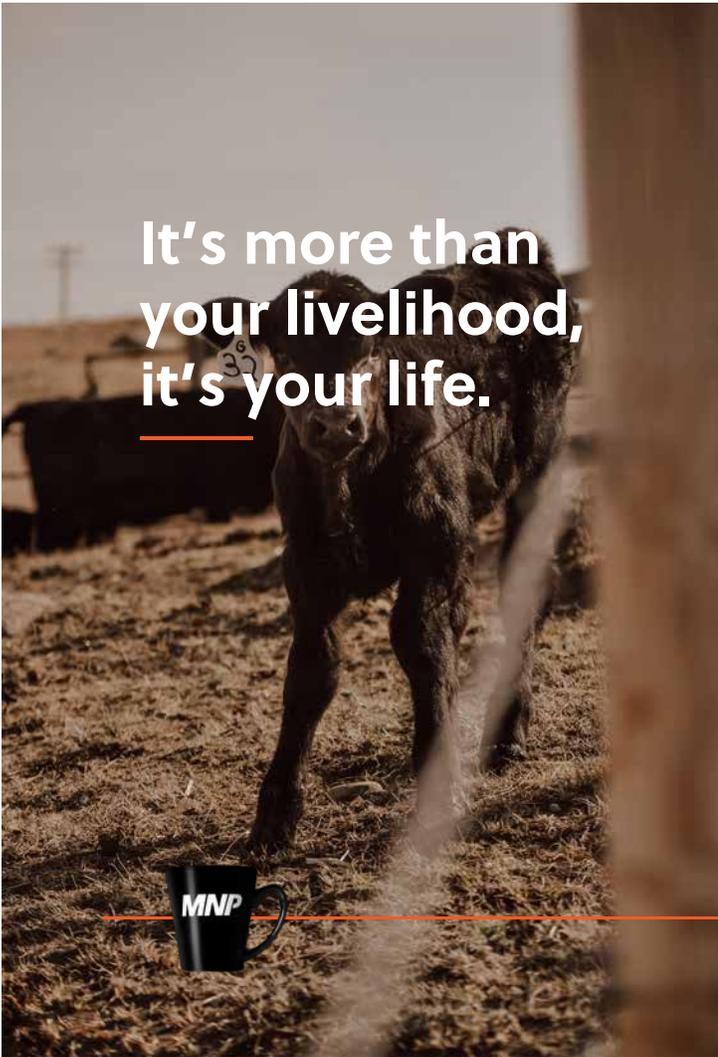

BREEDING SOUNDNESS EXAMINATION

Every bull for sale will have been evaluated for the following criteria:

- » Physical Examination
- » Soundness of structure and movement
- » Palpate testis, epididymis and internal sex glands
- » Scrotal Circumference
- » Minimum requirements must be met or no further evaluation is performed
- » Examination of the Penis
- » Verify each bull can protrude and there are no warts or defects of the penis
- » Sperm Motility and Morphology
- » Verify sufficient gross and individual motility and sperm morphology

The bull must pass all the above criteria to be considered a satisfactory breeder. If the bull passes all of the above criteria, but falls just below the minimum threshold for sperm morphology (70%), he is considered to be a "decision deferred" breeder. Approximately 40% of all bulls will fail to produce an adequate semen sample at 11 mo. of age, 30% at 12 mo., 5% at 16 mo. This classification of bulls means that they are either prepubertal or stressed, but are showing sufficient signs of improvement and will likely be satisfactory soon when the days get longer and the grass is greener. Any Decision Deferred bulls offered for sale will be announced at sale time and none of these bulls will be delivered until they achieve satisfactory semen status.

Bulls will be semen tested by Red Rock Ranch Vets and full insurance is recommended.

GLOSSARY OF SALE INFORMATION

EPD ABBREVIATIONS EPDS are a powerful tool that is available for making genetic progress. EPDs incorporate the performance of the individual along with the performance of all its relatives.

CE Calving ease. The higher number predicts more calving ease.

BW Birth Weight. A lower EPD predicts more calving ease.

WW Weaning Weight. Higher weaning EPDs predict higher weaning weights.

YW Yearling Weight. EPD describes in pounds the difference in expected yearling weight in progeny, on average.

MILK Milk EPD should be used to predict the milking ability of the daughters of the bull in question. Higher milk EPDs project more milk.

REA Rib Eye Area in square inches. Describes marbling potential of calves expressed as difference in grade score.

MARB/IMF Marbling. Describes marbling potential of calves expressed as difference in grade score. IMF. Percentage of fat in the ribeye area muscle (similar to marbling)

FOOT EPD is expressed in units of both Claw and Angle based on a foot that is a 45 degree angle at the pasture joint with

appropriate toe length and the claw set has toes that are symmetrical, even and properly spaced. The lower EPD being more favourable.

GENOMIC PERCENTAGES Genomic EPDs are the best estimate of an animal's genetic value as a parent combining all available sources of information.

Genomics permit higher prediction accuracies for younger animals and characterizes genetics for traits where it's difficult to measure the phenotype. The top 20% of any trait will be better than the bottom 80%.

Helping your Agri-Business flourish

You've worked hard to help your crops, livestock, or land flourish – we work hard to help your wealth do the same. From business owner planning to tax-efficient strategies, we work diligently to ensure you, your family, and your business can reap the rewards of what you've sown for generations to come. And no matter where you are in your Agri-Business journey, our dedicated team of specialists and partners are committed to walking alongside you every step of the way.

Secure your Agri-Business' financial future with our comprehensive approach

Business owner planning

Whether you're starting, growing, or selling your Agri-Business, we provide access to the unmatched resources of Canada's largest wealth management firm so that you can access capital, manage cash flow, and maximize your investments.

Risk management strategies

From weather hazards to currency fluctuations and more, our experienced team is equipped to help you actively manage and mitigate risk through an all-encompassing, confidence-inducing risk management strategy.

Succession and retirement planning

We help simplify the sale or transition of your Agri-Business to the next generation, take advantage of the lifetime capital gains exemption (LCGE), and set you up for success in your well-deserved retirement through thoughtful planning.

Tax-efficient strategies

In every decision we make on your behalf, we incorporate tax-efficient strategies to help minimize your tax burden, maximize your estate, and ensure more of your hard-earned wealth can be put to good use for you and your family.

101N

ELLINGSON BADLANDS 0285 SIRE OF 101N

We are going to start the catalog with a son from the hugely popular Ellingson Badlands. He's a bull, with how he's bred, we should probably be keeping. But that's why you raise the good ones is to give others the opportunity to benefit from them. When you look through the numbers he's top 10% in foot angle and claw and top 20% in scrotal and heifer pregnancy, with overall performance not far behind. The third generation donor dam is a pure mass cow in a moderate frame. Both her and her second generation donor mother are super feminine, angular and with perfect udders.

103N

BEAR MTN JUSTICE SIRE OF 103N

Justice is a very uniquely bred bull that would be an outcross for most. The Bear Mtn Justice bull was chosen for his maternal qualities. He is in the top 5% in the breed for Scrotal, Heifer Pregnancy and Milk, while being the top 1% in weaning and yearling weight. The absolute front pasture dam is loaded with Angus character and presence. Her dam is the Merit Flora 6078D cow, who could arguably be the best and most productive cow in the Merit herd.

MERIT FLORA 6078D MGD OF 103N
KR INCREDIBLE 8149 MGS OF 103N

105N

Lawman is a bull we are super high on. He's a phenotypic powerhouse with incredible thickness, muscle and soundness with a real herd bull presence. When you read through the pedigree you will find cows and bulls that have changed the breed. Obviously Bar E-L Natural Law has written his own story of being arguably the best cow making bull ever, coming from the Magnolia cow family. On the bottom you put together Hoover No Doubt with Baldrige Y69 and HF Tiger 5T, I don't think you could write it any better. Lawman is a bull that demands your attention. The home raised donor dam comes when I obtained the Canadian rights to Baldrige Pappy and I thought what a better cross than my best Tiger daughter. The result has definitely not disappointed. This cow is feminine, angular and super efficient in a moderate frame with a perfect foot and udder.

110N

ARDA CASH FLOW 63D MGS OF 110N

Here's the first bull from our new herd bull Sitz Triumph 707H. He's a bull loaded with mass and muscle, with a huge foot and scrotal. He's a bull we are quite high on as well. It's going to be interesting to see if 105N or 110N is going to demand more attention on sale day. Both amazing bulls but 110 is going to be all performance, as a yearling he is massive in size and scale. The docility in this bull is second to none, he's what you call an "in your pocket type". He might end up being the best bull in the yearling pen when you compare pure performance, capacity and pay weight. The high efficiency dam is a sample of our cow herd over the last decade crossing Arda Cash Flow with Belvin Warrior. Resulting in cows with great feet and udders that raise well above average calves.

Here's a real powerhouse from the \$55,000 sale topping Woodhill Revival. Belvinrox is super stout, wide pinned and has a real herd bull look to him. His powerful dam from Brooking Roll Call is a cow I bought from Belvin in there fall female sale. She absolutely milks her heart out, weaning 101M off at over 800lbs. She has only had 2 calves, but so for is destined to be a red carpet female. She has a perfect udder and awesome feet. Belvinrox with his extra volume, dimension and natural fleshing ability will turn some heads on sale day.

BELVIN QUEEN 100'22 DAM OF 101M

Here's a well balanced, calving ease bull from LFE Best Answer that started out light and ended up heavy. He's a bull with presence, curve-bending performance and real angus breed character. His elegant, high efficiency dam comes from the Coleman Donna family. She's a cow that came from the Bohrsen's and is destined for greatness. Her dam is a second generation donor with stand alone maternal design.

Eliminator 103M is a phenotypic powerhouse with incredible thickness, muscle and structural soundness. Eliminator will be a profit making, high performance herd sire that our commercial clients have come to demand and appreciate. His superstar dam is moderate, very nice uddered and highly efficient. Her donor dam Remitall Queen 123B has had 16 progeny to date and goes back to a Queen cow they bought from us years ago.

Triumph was a feature bull we picked up from Schaff's in 2023. He's a bull with the added mass and muscle but still length of spine that I've never seen before. He scanned an 18.2 inch ribeye before the sale and Kelly said his catalog picture absolutely blew up his phone. Triumph is a real profit maker with high performance sons that our commercial clientele appreciate. His son's are peas in a pod with that ribeye that all high end steak houses are demanding. Triumph's picture always seems to make it back into the SAV catalog with his absolute red carpet dam, Madame Pride 9967 raising one sale feature after another.

S A V MADAME PRIDE 9967 DAM OF TRIUMPH

This is the first year for the SAV Triumph sons. The length of spine and natural fleshing ability is what will really set these bulls apart from the others and most other Territory sons that have found there way to Canada. 111M has a real herd bull look to him being powerful fronted with a big wide muzzle and breed character head. Arda Beauty 105A was the high selling pick of there bred heifers from the Angus Collection sale. She is a powerhouse big bodied cow with a perfect udder.

Here's another Triumph son that's sure to impress being stylish fronted with length, muscle and structure. The beautiful, broody dam is a real power cow. She sports a very nice udder and is a production stand out. She raised the 180L bull going to Bar Diamond last year, and a sale feature going to M&R Damen the year before.

We are quite high on this bull as well. Although not quite fed like his sire he carries many of the same phenotypic qualities. He's proud chested with a big muzzle, super long spine and amazing natural thickness. He's a genetic trendsetter who will raise the bar to a new level with dominating performance, consistency and quality from start to finish. He will sire beautiful maternally oriented females to build a cow herd around while also feeder calves that will weigh and pay.

Baron is definitely a power bull with massive thickness and muscle. He's a bull with a big scrotal and foot, and with a very early maturing quality. His structure and mass will raise calves that will definitely push down the scale and gain very quickly.

Another power bull from the Baron sire. These bulls will have a bit of extra frame that will sire calves that will absolutely push the scale down. The performance bred into these bulls will help with big gains on feed as well. If your steers are raised for the beef industry you'll need to take a look at the Baron sons.

Two of a kind flush brothers with the pedigree potency, phenotype, performance and maternal cow power to be real herd changers. They are thick, muscular, wide pinned and solid to the ground with authentic Angus type. The phenomenal, red carpet dam Rita 354X needs no introduction. She has raised multiple purebred herd bulls, has multiple daughters and grand daughters in herd and has embryo cattle all other the country.

191M is a real power in the blood bull, he is very rugged built with tons of muscle and volume. The superstar dam from Musgraves out of Barstow Cash and back to his dam Queen Q16. She was as talked about a cow as any in the US Angus breed. She is the front pasture kind, beautifully fronted with a quality udder and feet.

Redemption was an intriguing outcross sire when I went looking in 2021. He had real breed leading maternal qualities and the pedigree potency to be a dominant force in the industry. Redemption's calves come easy with great vigor and perform very well after weaning. His calves transmit structural correctness while adding maternal value, fertility and docility. His daughters soon to be in production look to have excellent udder design and calm dispositions. Redemption is a good looking stud with all the phenotypic extras, plus offers a rare combination of bone and calving ease.

227M is bull that will surely grab your attention. He's a dominating performance bull with added dimension and power. His heavy milking, hard working dam goes back to HF Tiger, the cow maker. To say that a Tiger daughter wouldn't have beautiful udder, well I haven't seen any.

An absolute beef machine with incredible thickness and muscle, a real pound maker and profit maker. 241M is a bull with a huge scrotal and foot and with a real herd bull look. His beautiful uddered dam is in the top 5% in the breed for milk. She is a moderate framed cow with a beautiful maternal design.

Another absolute stud from the Redemption bull. These bulls are built durable and rugged to last for years with extra muscle and power. Another brother with a massive scrotal and an early maturing quality, resulting in steers that mature and gain and heifers that cycle early and breed back quickly.

Another Redemption stud and bred to be that way. He will have performance and a maternal advantage that will show up in every calf, giving you a competitive edge. His beautiful dam is another Baldrige Pappy crossed with a herd changing Tiger daughter.

Double feature flush brothers fully loaded with performance and maternal cow power to make a lasting contribution. They have superior stoutness and added growth to sire feeder cattle that grow, gain and top the market. This whole cow family is full of runway model type cows going back to grandam Rita 354X. 116G is even a bit wider pinned and brooder than the others, she's a cow that makes you stop and look every time you tour the herd.

PAHL RITA 116G
 DONOR DAM OF 260M & 261M

Check out Bohson's March Madness Sale - We will have embryos from this mating on offer!

Evolution, an exceptional powerhouse, calving ease sire is the result of Baldrige Pappy and an absolute red carpet, highly productive donor Tiger daughter. Pappy comes from the same blood lines as Baldrige Badger, the bull that is taking the breed by storm. Evolution was a high selling, sale feature going to East & West Ranching

Mogul is a full flush mate to the Baron 155M bull. Two powerhouse herd sires as complete and well balanced as you'll find. Both Mogul and Baron are from embryos coming from Brooking Angus and his Top Line Lady 102 cow. She is a super attractive, wedge shaped brood cow you wish you had a 100 of. Mogul was a sale feature and high seller going to Highland Stock Farms.

A bull that is sure to impress with some added muscle, thickness and capacity. He is top 10% in weaning, yearling and ribeye. The super efficient, feminine dam is from the high selling HF Weiser bull. He definitely left a stamp on his daughters in our herd. They have gorgeous udders and feet and milk there hearts out.

PREFERRED PROGRAM

Our recently acquired stud SR Thirty Boss AKA "Thirsty" has been an amazing addition to our horse program. He is a born broke type, such a joy to be around and super fun to ride! He was started by trainer Clint Swales last winter and had nothing but good things said about him. He has an outstanding pedigree, sired by "IM DA BOSS" on the top side who has over \$19,000 in earnings on the track and his grand sire is non other than the OE \$28,000,000 sire TRES SIES. On the bottom "Thirsty" is a grandson of "Paddy's Irish Whiskey" the sire of \$1,700,000 OE.

Macallan is exactly what we are looking for in our equine breeding program. Macallan came from one of our first mares "GAYLA THIS GALS SMOKIN" AKA "MILLY", who has a special place in our hearts. In 2013 Logan had the opportunity to work for Larry David of Gayla Quarter Horses and spent time with Milly's sire "WT SMOKEY BLUE CASH" and swore one day he would own something out of this incredible stud. Macallan is the first cross out of "Milly" and "Thirsty" and he doesn't disappoint. His willingness to please and take everything in stride is second to none!

OUR SWEET SUSSIE

This sweet little filly is going to be a ranchers delight! Her conformation is outstanding, has straight legs, great hip, good wither and floats in the pasture. After this years NFR we were so excited to put her in the sale after watching a horse with similar lineage clean up in the barrel racing. With TRES SEIS on top and Hancock and Driftwood influence on the bottom, we are already seeing the same heart we fell involve with with ADIOS PANTELONES. We bought her mare "MM BLACK HANNA" AKA "Laverne" from Dantan Bertsch in 2023, and she has produced some amazing foals for both us and Dantan. "Laverne" is a stout black mare who is conformationally correct and gorgeous to look at in the pasture. Just like her siblings, Cosmopolitan as been a joy to work with! She is great with her feet and soft on the halter.
