Visit us to view the bulls anytime prior to the sale, up to and including March 21<sup>st</sup>, and you will be entered in a draw for a \$500 2026 Sale Credit to be drawn the night before the sale.

# Welcome

## TO THE 2026 47<sup>TH</sup> ANNUAL TOWAW BULL SALE

2025 and the early part of 2026 has certainly been a fun time to be in the cattle business! Prices are way up and until the North American herd sees a big increase, we should be in good shape for some time to come. It is nice to see ranchers, the eternal optimists, getting rewarded for all their faith and perseverance in an industry that has never been easy. The optimism that comes with this is encouraging to the youth of our industry and we are seeing young people want to stay on the ranch now and make a career of it. This is vital to the future of the cattle business in Canada and great to see.

2025 brought around some changes here at the ranch. Thomas's television station in Lloydminster closed its doors in May so his broadcasting career as a full time job is on hiatus. With Ryder finishing college at Olds, both of the boys have been home and been a big asset at the ranch. Many projects were completed and routine chores and jobs have been done without as much stress as in past years. Reese is in her second year at college in Oklahoma and will graduate with her associate degree in Animal Science with a Specialization in Ag Education in May. Jill and Reese judged a fair amount of cattle shows over the last year and Kirk mostly stays home and focuses on his Fantasy Football teams and Cattle Podcasts. Dave and Gail have fully retired and Mom has a new knee so we are excited that she will be getting more and more mobile again.

Longevity has always been a focus at Towaw; the traits that make a cow last in a cow herd are important to bulls as well. Fertility, correct structure and feet, easy fleshiness, sound udder,

maternal instincts and docility, are all traits that are important to longevity. The best way to ensure our bulls pass on these traits is to cull mercilessly. No EPD can make up for a lack of culling in a purebred herd.

The other way to really focus on longevity is to truly test a cow herd. We have always said that you can't make a diamond without some pressure. Challenging the cowherd, by not overfeeding for example, makes it so you can identify the standouts and, even more importantly, find the individuals that can't make the cut. In a maternal breed like Angus, we know a lot of our bulls are used to make replacement heifers and we take that responsibility seriously. Our friends at Redline Livestock recently did the math on the cost of replacement heifers and the amount of money made for every year after her fourth calf that she stayed in the herd.

In our herd we would like to use as many proven bulls as we can to take some of the guess work out of genetics. Using yearling bulls is a reality though, so delving deep into the pedigrees for longevity really helps. We purchased a bull last spring, Red ACAD Jumpstart 323M, that is out of a twelve year old cow that still looks like a five year old. Her dam produced until she was 12, her granddam produced until she was 11, her great granddam until she was 15. Old cows and proven genetics don't make for top 1% EPDs but we feel it gives us the best chance of passing on traits that will positively affect our Customers Profits.

We are happy to have OBI Livestock involved as Consultants with the sale again this year. Mark Holowaychuk and

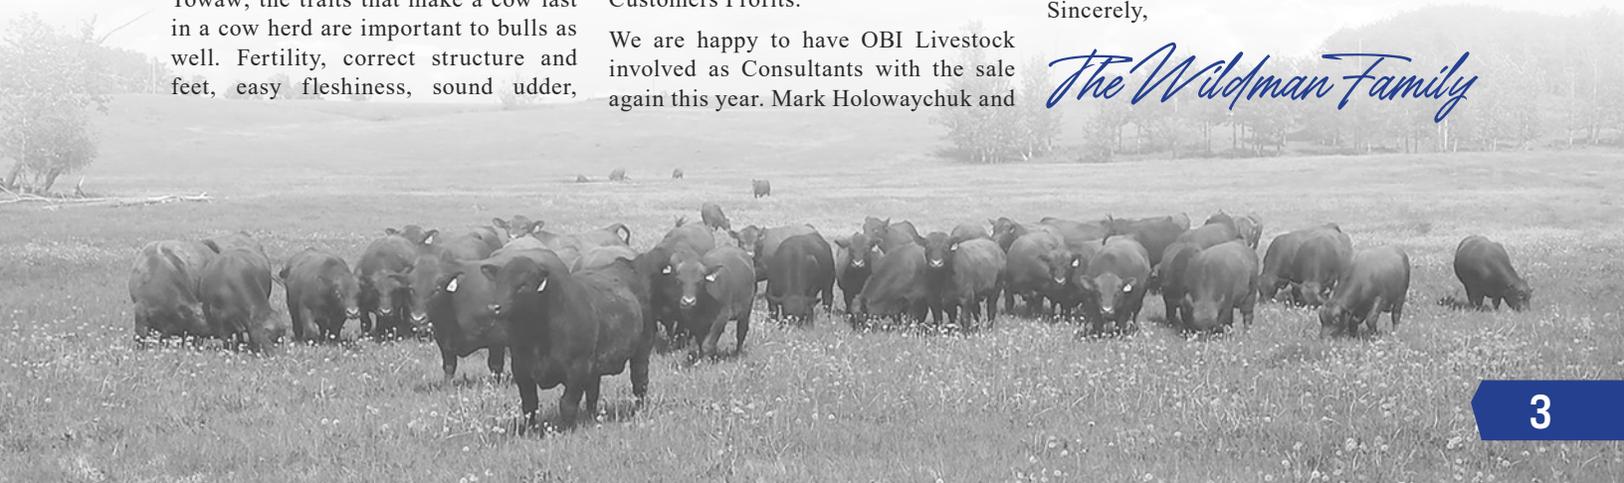

his crew know our herd well and help us with marketing year round. DLMS will once again be on site for bidding online on Sale Day. The videos will be up on [cattlevids.ca](http://cattlevids.ca) as well about 2 weeks before the sale. Our Sales staff of Robert Lind, Bryon Wolters and Dory Gerrard will be with us again and will be ready for calls if you would like to be represented.

We are always available to show you the bulls prior to the sale, or we can certainly go through the offering beforehand on the phone. We have a sight unseen program where we can either bid on bulls on your behalf or use any of our capable sales staff. Our number one goal is to get the right bulls into the right situations. The bulls will all be semen tested prior to the sale and all bulls in the sale will have PASSED that test. We don't sell deferred bulls, and we cull them pretty hard, so subsequently we deal with very few sale credits in the sale. We know cows don't get bred by "sorries", so we do our level best to mitigate potential problems before they leave Towaw. Having said that, unforeseen things can happen, so we keep spare bulls should problems arise. Please let us know of problems while we can still fix them; we know we can help you better than the guys at the coffee shop.

Please come early on Sale Day, have lunch with us, and plan to stay after the sale for some hospitality and a good visit. After a long winter it is great to catch up and see all of our Customers and Friends on Sale Day.

Sincerely,

*The Wildman Family*

# SALE INFORMATION

## VOLUME DISCOUNTS

- Buy 3 - 4 bulls - 5% discount on each bull
- Buy 5 or more bulls - 7.5% discount on each bull

## DELIVERY & BOARD

We will deliver bulls free of charge within 200km of the sale site. Delivery will be at cost after 200km. A rebate of \$100.00 per bull will be offered to buyers who bring their trailer and truck their bulls home themselves within one week of sale day. Bulls may be kept at Towaw, free of charge, until April 15, 2026. If bulls are left longer a fee of \$4.00 per day will be charged. Bulls are left entirely at the risk of the purchaser and we recommend that insurance be taken.

## RETAINED INTERESTS

We are selling some bulls in this sale as  $\frac{2}{3}$  interest and full possession. The  $\frac{2}{3}$  interest part means that the seller wishes to retain a  $\frac{1}{3}$  interest in the bull entitling him to use the bull through artificial insemination and sharing in any future drawing expenses and revenue of semen on a  $\frac{1}{3}$  basis. Full possession entitles the new owner to all physical rights to the bull. As in any other information, announcements from the block take precedence over any written information in the catalog.

# GLOSSARY OF BULL DATA

## EPDS: EXPECTED PROGENY DIFFERENCES

EPDs are a powerful tool that is available for making genetic progress. EPDs incorporate the performance of the individual, along with the performance of all its relatives.

- CE:** Calving ease - higher number predicts more calving ease.
- BW:** Birth. A lower EPD predicts lower birthweights.
- WW:** Weaning. A higher EPD predicts higher weaning weights.
- YW:** Yearling. Higher yearling EPDs indicate greater expected yearling weights.
- MILK:** Milk EPD should be used to predict the milking ability of the daughters of the bulls in question. Higher milk EPDs project more milk.
- REA:** Rib Eye Area in sq. in. Describes difference in rib eye size.
- MARB:** Marbling. Describes marbling potential of calves expressed as difference in grade score.
- FAT:** Fat thickness in inches. Predicts difference in fat measured at the 12th rib.
- CW:** Carcass weight in lbs. Predicts differences in hot carcass weight of progeny.

*Percentile Tables have been added to take some of the confusion out of the EPDs. A trait listed as 5% would mean that bull is in the top 5% of the breed for that trait. 49% would be slightly higher than breed average, while 51% would be slightly lower than breed average.*

## TERMS AND CONDITIONS

**TERMS:** Unless otherwise previously arranged with Towaw Cattle Co., terms of this sale are cash or cheque, payable in Canadian funds. As soon as an animal is sold it becomes the responsibility of the purchaser.

**ANNOUNCEMENTS:** Errors in the catalogue will be corrected by announcements from the stand at sale time, and such corrections will take precedence over the printed matter in the catalogue.

**DISPUTES:** In case of disputes, bidding will be reopened between the parties involved. If no further bid is made, the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision in such matters will be final.

**CERTIFICATE OF REGISTRY:** A certificate of registry duly transferred will be furnished to the buyer by the seller for each REGISTERED animal after settlement has been made.

**DELIVERY:** We will arrange delivery of the bulls to central points in western Canada and closest U.S. Port of Entry. Delivery within 200km is free of charge, outside of 200km will be at cost.

**CURRENT WEIGHTS AND SCROTAL MEASUREMENTS WILL BE AVAILABLE SALE DAY**

## ABBREVIATIONS

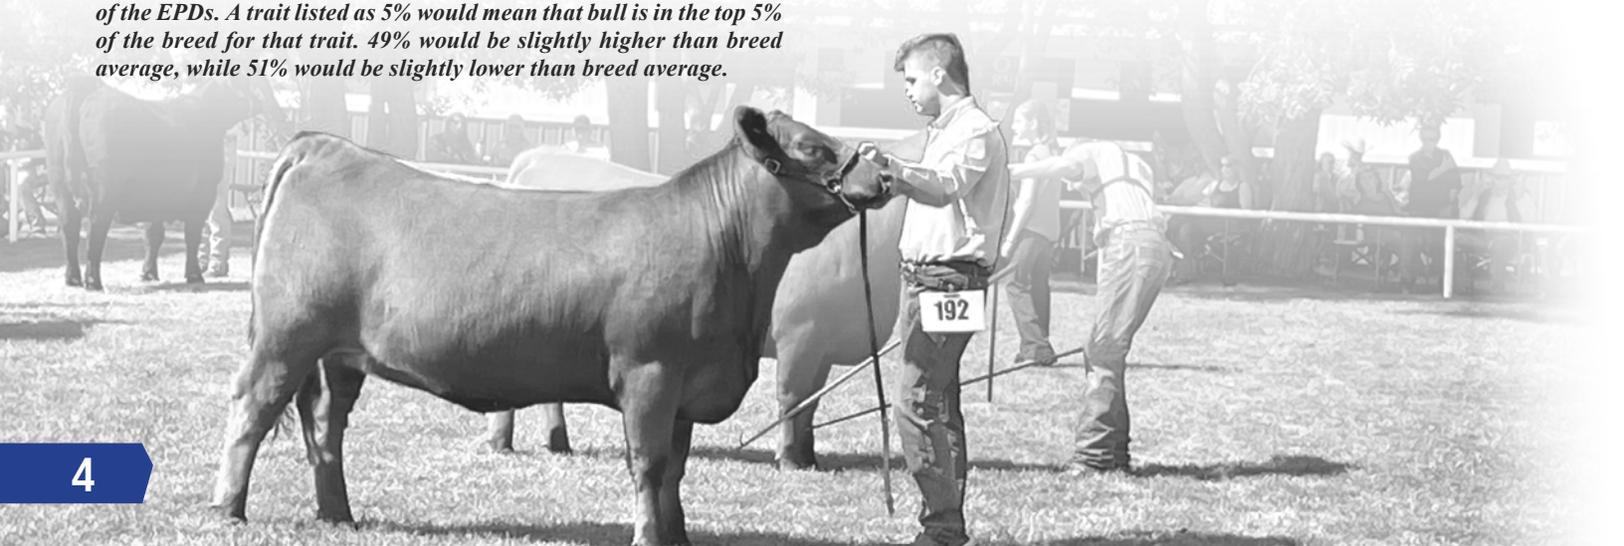

- AOD:** The actual age of the dam when she calved the bull offered for sale.
- CE:** Calving Ease, U =Unassisted
- BW:** Actual weight at birth
- WW:** Weaning weight in lbs. Adjusted to 205 days.
- WI:** Weaning Index - Weaning weight as a % of average WW of contemporaries.
- YW:** Yearling weight in lbs. - calculated as adjusted 205 day weight + (ADG on feed x 165 days)
- YI:** Yearling Index - Weight gain from Weaning to Yearling as a % of average gain of contemporaries.

**NOTE: All Indexes are calculated within the herd.**

## AUCTION FORMAT

We will be working with Mark Shologan and broadcasting our sale online on DLMS.ca.

The bulls will be videotaped prior to the sale and on sale day we will have large TV screens set up with the bulls video running while they sell. Two weeks before the sale, videos of every bull will be available at [www.cattlevids.ca](http://www.cattlevids.ca).

Please don't hesitate to contact Robert, Dory, Bryon or any of our buyer reps to represent you at the sale. If you intend to bid online make sure you sign up with DLMS and get your buyer approval for our sale.

As always we have our sight unseen program going and are ready and willing to help you with your needs. Hopefully all the bases are covered whether you can make it to the sale, want to bid online, or use the sight unseen program.

**REGISTER** To view this sale, visit [dlms.ca](http://dlms.ca). Fill out the registration form located under registration and sign-up for your free user account and select a username and password.

**BIDDERS** To be approved as a bidder, Log in to [dlms.ca](http://dlms.ca) and click BUYER APPROVAL tab, select the sale you are interested in bidding at and click sign up.

### FOR MORE INFORMATION CALL DLMS

Mark Shologan 780-699-5082 | Dacie Przekop 780-656-5513

**BULL VIDEOS WILL BE AVAILABLE ONLINE PRIOR TO THE SALE: [www.cattlevids.ca](http://www.cattlevids.ca)**

## SIGHT UNSEEN PURCHASE PLAN

**IF YOU WOULD LIKE TO PURCHASE A BULL, BUT CANNOT ATTEND THE SALE, CONTACT US:**

**Kirk's Cell . . . . . 780-305-1661**

**Email . . . . . [towawcattle@gmail.com](mailto:towawcattle@gmail.com)**

Call or email us prior to the sale and let us know your specifications and your price range. We will select animals which would fit your program and arrange for an independent buyer to attempt to purchase one for the agreed upon price. We will call you after the sale, and inform you of the results.

**ALL SIGHT UNSEEN SALES ARE MADE WITH A SATISFACTION GUARANTEE.**

## TOWAW BULL WARRANTY

Towaw Cattle Co. guarantees to sell you a bull that is structurally sound, and a bull that has passed a semen test conducted by a licensed veterinarian.

In short, we guarantee to provide you with a sound breeding bull. If he hasn't passed a semen test, he doesn't sell.

Should any animal fail to be a satisfactory breeder, he will be replaced with a bull of equal value. Should this not be possible, an adjustment will be made to reflect the bull in question, as a credit towards the purchase of another bull. In no case shall credit exceed the purchase price of the bull.

We however, will not provide replacement or adjustment for physical injury or mismanagement. Bearing this in mind, we stress the importance of insurance on your bulls. Should you have a problem with your bull, please call us right away, and we will work with you to make sure you are satisfied with your bull.

Jentry 4J is a Black Hided/ Red Gene Carrier that we own with Ter-Ron Farms. He has bred in two breeding seasons for years for both programs and always stays in great shape. He is a masculine herdsire with a tremendous angus type head with all kinds of character. He passes on that tremendous skull structure, easy fleshing, big bodied style to his offspring. They have very good performance and muscle and rib shape. The black side of his pedigree is steeped in power and correctness and is an outcross to our previous genetics. Whether you want to add pounds or retain females, the Jentry sons should fit the bill.

## RED TOWAW JENTRY 435M

TOP %	51	10	90	56

This guy is powerfully built from head to tail while still sporting a moderate birth weight. He was the number 3 ranked bull in the group for weaning weight and ranked number 2 for yearling weight. He has two sisters retained in the herd and his full brother should be near the top of next year's sale. You can't go wrong with the outcross Jentry paired with the Copper Lady cow family.

434M is a dark red, big bodied, bull that really pushes down the scale with a nice low bw. He is masculine and good headed and his dam has had two previous sons sell through the sale. He doesn't look like a typical heifer bull, but remember muscle and masculinity comes with testosterone and maturity; it's not there at birth.

### BLACK HIDDEN / RED CARRIER

438M is a long bodied, smooth made attractive herdsire prospect. He has the same masculine "Angus Type" head that Jentry always stamps them with. My Argentine friend, Ricardo Orazi, from La Cabana Pastoriza, once told me that you can tell if a bull is any good just by looking at his head. I think there is some truth to that statement.

### BLACK HIDE / RED CARRIER

Moderate BW and good performance out of this well balanced, big bodied, attractive Jentry Son. Calving ease is built in to his pedigree with Julian and Jimmy Page on his maternal side. His dam has produced a son that sold to the Waldners of Jenner, Ab. The Waldners have been great supporters of our sale, buying their bulls by the catalog and studying the videos on Cattlevids. They have bought 25+ bulls over the years and have never been to the Ranch here in Sangudo!

483M is the heavyweight bull of the pen, chock full of body shape and muscle. He was the number 1 bull at weaning and number 2 at yearling and is a cow bull prospect that should sire some big time performance. If we could change him, we would give him a bigger outside claw on both of his back feet. We think that he brings so many elite traits to the table that his flaws can be managed in the right breeding plan.

We purchased a half interest in Working Class as a long yearling from Anchor "1" after seeing how good of shape he was in at the end of his first breeding season. He was an \$18,000 purchase in the 2021 U2 Bull Sale. He had bred for us in two seasons per year and always maintained his fleshiness. He sires low birthweight and calving ease with moderate mature size and early maturity.

445M is a bigger framed, long bodied bull with bet the ranch calving ease. The low birthweight and high calving ease comes as no surprise as his sire, Working Class, is in the top 15% for both traits, and the maternal grandsire, Jive is in the top 10% for both traits.

Much like the rest of the Working Class sons, 528M is a smooth made, calving ease prospect. His dam is from one of our best cow families, the Georgina's, tracing back to a cow purchased from Blue Spruce born in 1978. Our breeding program is based on consistency and longevity, I guess that is why we are still selling bulls in our 47th Annual Sale to 2nd and 3rd generation customers.

Warrior has done a great job here at Towaw in both the winter and summer herds. Purchased as a three year old, we were able to see his progeny at Wildman Livestock and the same quality in his calves there has continued at Towaw. His dam was a past Farmfair Champion Female as a two year old and she traces back to the Stocky Cow Family that is renowned for production and longevity. He is a trouble free sire that is masculine and full of muscle. Look for the Warrior sons to be easy fleshing, early maturing, muscular and maternal.

Lucky 7 was a bull that we retained to use on our heifers as a yearling, continuing a tradition of using our own bulls. He was a low birthweight, big bodied son of a very good Jimmy Page daughter. Jimmy Page proved out to be an udder improver and Rose Dora 466D sure shows that with her beautiful udder at ten years of age. His dam is also easy fleshing, big bodied and moderate, an ideal cow in our herd. The Rose Doras came from the first registered cows that Dave and Gail bought in 1971. Another interesting note is that Lucky 7 sold in our sale as a two year old to Mewassin Red Angus. The Scheideman's were guest consignors in our first bull sales in the late 70s.

406N is a dark red, attractive, long bodied cow bull prospect with extra testicle development and a very good foot.. His dam is a beauty of a cow, good uddered, big bodied and has outstanding foot and leg structure. Pair that with the outstanding show bull, McGregor, we feel this bull has a great future.

The bull feeding program is built to maximize forage utilization, gut health and as a result quality sperm production. Nutritional status of a bull, particularly from the previous 60-days can affect the semen quality being ejaculated today. Sperm production is a continuous process and proper nutrition is critical to maintain peak fertility and longevity of bulls. Bull calves are generally developed on grass with their mom's on a quality mineral program. Once bull calves are weaned, they are slowly moved onto a balanced TMR. The bulls are challenged with a forage-based TMR to help them develop and express their genetic potential. This is important for consistency of maturation and puberty of bull calves. Sampling and analyzing

forages are important for properly balancing the overall ration. Forage quality and digestibility are important for maximizing ruminal health. Matching suitable protein sources with proper starch with the available forage sources is key to promoting lean muscle growth. The addition of organic minerals are used to ensure proper immune function and overall health of bulls. All of these factors contribute to semen quality and conception within a herd. If you have any questions about the nutrition program, please feel free to reach out. Buy with confidence knowing the bulls have been developed on a balanced nutrition program.

*Best of luck on sale day!*

Blind Side was the high selling bull in our 2024 Bull Sale at \$27,000 to breed leaders, Six Mile Ranch, Fir Mountain, Sk. He is a very good footed, masculine, big bodied bull with a great look and style to his front end. We purchased an exclusive semen package on his sire Granite in the spring of 2021 after thinking he was the best yearling bull we saw that year. He has not disappointed, giving us easy fleshing, broody progeny that are good footed and good uddered. We use a lot of our own genetics in our herd to make our cattle more consistent and predictable, but also for the sake that if we don't believe in our bulls, why should our Customers. We feel Blind Side has a ton of future in our program!

407N is an attractive, good haired calf with extra scrotal and a correct foot. His dam was a bred heifer purchased from Six Mile and she did a great job on her first calf. She calved at the start of the season again this year and has a very good udder. Tyson told me she was probably the steal of their sale that fall.

## TWIN

Heifer bull candidate here with a calvng ease head and shoulder. His dam is an easy fleshing cow from the Sybil family and is a full sister to Reese's 2019 very successful show heifer, Red Towaw Sybil 407F. 407F is now owned by the Trasks in BC and she is an Elite dam with 6 calves at an average Weaning Ratio of 113. The Granddam, Sybil 417D is designated as a Premier Dam by the Canadian Angus Association as well.

### BLACK HIDE / RED CARRIER

409N is a friendly rascal with a bit of extra frame and a good hair coat. His dam is a direct daughter of the 402E cow who is just plain good; sound footed, great uddered, feminine and functional. She is a maternal sibling to the Lot #37 bull, stay tuned to read more about how much we love that cow.

Baldrige Badger is a new sire for us this year on the black side of the herd. When looking for a new black Angus A.I. sire to use, our friend and astute breeder Brian Willms recommended we check out Baldrige Badger, a bull that SAV had just purchased and was heavily using in their program. He is a direct daughter of the world famous Baldrige Isabel Y69 Cow, a cow that former ABS rep and dairyman Glen Felske told us was the best cow he had ever seen. He has breed leading growth, foot quality, and rib eye area. Recommended on cows as there is a bit of BW, his sons will add power, growth, ribeye area and very good structure.

### BLACK HIED / RED CARRIER

We really like this stout made, hairy, good headed scamp with a very correct foot and the #1 weaning weight in the group. His dam is a direct daughter of our donor cow, Lakima 407E, who just sold for \$20,000 in the 2025 Red Roundup Sale. 408J has been a standout producer in her young career with a \$15,000 son to Heart of the Valley in BC, and a replacement heifer in the herd.

4N is a very complete, easy fleshing, stout made bull with very good feet. His dam is a standout Sitz Stellar daughter with a great wedge shape and nice udder. She raised our high selling black yearling bull last year to Brewin Angus, Taber, Ab. She is a direct ET daughter of our full Argentine donor cow, 7Z, who is the dam of Lot #38.

We really like the head and masculine character in this powerfully constructed, good footed beast. His dam is a beauty; at 11 years of age she could pass as a 5 year old, and she gets it done year after year. Her 13 year old dam just calved the other day and she is good uddered and extremely correct in her structure. Not a surprise as she has HF Tiger as her sire and Indeed 104H as her Grandsire. Her dam worked until she was 17 and was a full sister to 407E mentioned in Lot #35's footnote. How do you add longevity to your herd? Use bulls mothered by old cows!

414N is the powerfully made, muscular, cow bull of the pen. He is good footed, correct, and nice headed. His dam is a deep bodied, straight Argentine pedigreed cow that has never missed. She will calve this spring at 14 years old, and even though she doesn't look like a teenager anymore, her genetics will leave a huge impact on our herd.

Moderate BW son of 467B here. 467B is quite possibly be the best foot scored bull we ever sold that will excel in Milk, Scrotal, and feet. His dam is a hard working young daughter of Granite and our ET donor cow, Lakima 411G. 411G does everything right in our eyes; big bodied, extremely correct, good uddered, and ultra feminine. To copy a phrase from our friend Sebastien Stewart, "She is our mission statement (in bovine form)!".
