# WELCOME

## TO THE U2 QUALITY BULL SALE

Dear Friends,

We would like to welcome you all to join us for our annual bull sale on Tuesday, March 24, 2026 at the ranch. What a historic time to be in the cattle business with excitement and optimism at all time highs! We share in the excitement and are especially gratified to see the commercial cattleman receive these well-deserved prices. We all have a lot to be thankful for and we are especially grateful for the trust and confidence you have placed in our breeding program. The continued support that we have received year after year from our loyal customers is both humbling and extremely gratifying.

Our focus has not changed and our belief that a superior, continually evolving cowherd is the key to providing you with the bulls stacked with generations of beneficial genetics to improve your profitability, lessen your workload and set your cowherd apart.

Your support has enabled us to do what we love and aggressively utilize all avenues to make better cattle that reach higher goals. This never-ending journey involves hard work, endless hours and continued investment to develop cutting edge reliable genetics to keep our customers at the forefront of the industry!

We feel that the continual progress we strive for is very evident in this years offering! Many sire groups are highlighted again by many full brothers from our aggressive ET programs. The same sires and donor cows we rely on to advance the success of our program are represented here so you can put your faith and confidence in them to also advance the success of yours. We believe there is no substitute for using proven superior donor cows through ET to provide large sire groups giving our commercial customers of all budgets access to these elite matings. This is evident in both the RED and BLACK programs which have risen in both quantity and quality. We will be bringing you 50 more bulls this year to help further your selection and also to attempt to make it a one stop shop!

As our long-term customers know very well, our top priority has always been to build lasting relationships and make your experience be so much more than buying a bull! We thoroughly enjoy pre-sale tours at the ranch spending time with our established and future customers listening to their needs and priorities and matching the most suitable genetics accordingly. Following up is just as important, providing feedback that is essential for customer satisfaction and continued progress. We know that for us to have success it is essential for you to have success.

Our bulls are being developed here at the ranch on a higher roughage lower energy balanced TMR ration designed to improve longevity. Like always, we will let the bulls speak for themselves and encourage everyone to come out to the ranch ahead of time and see them in their large pens and most importantly see the cows behind them!

If we can be of any assistance in any way, please don't hesitate to call. We love talking cattle and take being your genetic supplier seriously. Thank you for your interest.

Cole and Tia

### SIGHT UNSEEN PURCHASE GUARANTEE

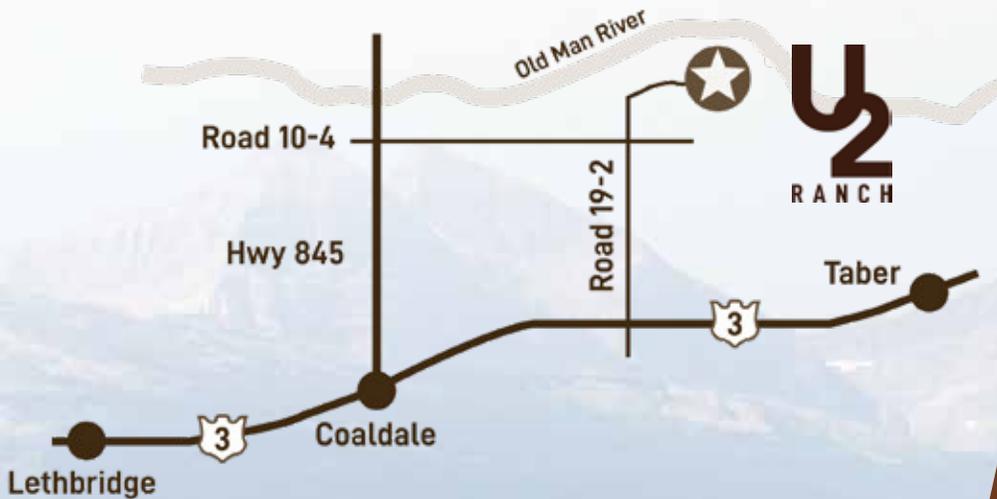

If you are unable to attend the sale, we have "Sight Unseen Purchase Plan" that is very popular and satisfaction guaranteed. We will gladly visit with you to discuss your bull requirements and together, choose bulls that meet those needs. If you are not satisfied upon delivery, you don't own the bull.

### USA EXCHANGE

USA customers have a buyers advantage due to a weak Canadian dollar. Exchange rate will be announced on sale morning.

### DIRECTIONS TO THE RANCH

From Coaldale go approx. 5 miles East on HWY 3 and turn North on Road 19-2. Go approx. 8 miles to ranch sign and wagon at the entrance. Follow the road to the right, down into the ranch and sale facility.

### TERMS & CONDITIONS

Cattle will sell under the standard terms & conditions put forward from the breed association. These are available upon request. U2Q is keeping in herd semen interest and has the right to collect any bull in the sale at buyers convenience and our expense.

### RED ANGUS BULLS

LOTS 1-127

### BLACK ANGUS BULLS

LOTS 128-218

### BLACK RED GENE BULLS

LOTS 219-254

-View the bulls all day followed by a meal & sale social

**TUESDAY MAR. 24**

**10:30AM - BRUNCH**

**1:00PM - SALE TIME**

-Steak dinner immediately following the sale

## WELCOME FROM BOHRSON MARKETING SERVICES LTD.

Welcome to the 2026 edition of the U2 Quality Bull Sale. This year's set of bulls is not only the largest set Cole & Tia and family have assembled but it is the most diverse as well. The many options of Red, Black and Purple bulls to select from is staggering and from some of the most elite cow families and sought after sires makes this one of the must attend events of the year! There is a reason this truly is "Your Herdhub Headquarters" and we invite you to see it first hand for yourself on March 24th.

The U2Q belief has never wavered and it has always been about building around the mother cow and the rest will fall into place. This is as tried and tested as anywhere with the stacking of so many of the influential cows and cow families on top of pedigree after pedigree that have resulted into what their program is today. Feminine, big bodied, easy fleshing cows with great feet and near perfect udders annually raise bulls that are masculine, heavy muscled and soft made and that is exactly what you will find here from the Unger's. They have built a rock solid foundation under this protocol and year after year it has proven to work as the huge crowd of familiar faces repeat buying these bulls is truly a testament to the cattle and the people. The bulls on offer this year are as perfectly geared towards all aspects of the industry as ever before. No matter your need and no matter your colour preference, you will have multiple bulls to select from. If you need calving ease bulls, performance bulls, highly maternal bulls or a combination of the 3, we know you will be covered. These bulls are developed and designed to get out and work for their valued customers and we know that if you love selling heavy weight steer calves or marketing fancy replacement females, then you need to seriously consider a U2Q bull. Not only are the bulls and the cowherd here top shelf, the people and the genuine care and connection shared by Cole, Tia and family with their customers is unmatched.

Be sure to make plans to tour the large, impressive bull pens anytime prior to sale day and then be with us March 24th, 2026 on the ranch near Coaldale, AB for a set of bulls that you must appraise for yourself. If the busy spring keeps you from joining us, please don't hesitate to give any of us at BMS a call as we would be happy to visit with you about the bulls and answer any questions you may have. See you sale day!

Best regards,  
*The Bohrson Marketing Team*

## WELCOME FROM T BAR C CATTLE CO. LTD.

When you think of purebred Red and Black Angus cattle within the North American continent with a mindset of progression for superior stock, you automatically think of the U2Q program. The cowherd behind this outfit is one of the very best you'll ever lay your eyes on. You won't find seedstock with pedigrees layered with donor females like this program has. Their extensive embryo transfer is unmatched to any other establishment we know of. As you browse through this catalog you'll see the opportunities of multiple full brothers, 7/8 brothers and 3/4 blood brothers that gives so much consistency to add to your bottom line. The matron females such as 294E, 350C, 157C, 7800 and 3501 to name a few are just an example of how to inject power and maternal values into your operation. This year growing in the number of bulls to evaluate, we promise the product put forth by the Unger family will more than impress the most discriminating buyer. Whether your search includes cow bulls, heifer bulls or dual-purpose bulls, the selection of diversity is incredible in both the red & black sections. But even more impressive is the attention to detail this family has to service their customers. Cole and family are heavily invested. This is all they know and you'll go a long way to meet a family that cares more than the Ungers do. Their customer relations and follow up is taken very seriously and they do everything they possibly can to make sure your experience at U2Q is a positive one. All of us at T Bar C are proud to endorse this breed leading name and ask you to take the offering within this catalog with serious consideration. Please don't hesitate to contact any of us prior to sale time for any questions you may have.

See you in Coaldale,  
*T Bar C Cattle Co. Ltd.*

## WELCOME FROM PETEROSA EXPORTS LTD.

Never have I seen the enthusiasm in the cattle business as it is today. When we thought prices could not go higher, they did. The demand for top quality bulls is at an all-time high and what better place to source your Red and Black Angus herd sire for 2026 than at U2Q. Cole, Tia and the boys have stepped up even higher with the quality and number of bulls on offer this year. Year after year it impresses me as to the quality of the U2 bulls. Cole certainly is a master at seeking out the best bulls he can afford and mating them with cows whose sons in the past are leaders in the industry today. Here is your opportunity to purchase ½, ¾ and Full brothers in numbers to enhance your breeding program.

As I have said numerous times, consistent quality doesn't come by chance. It comes from years of commitment and planned genetic mating's. It comes from the knowledge passed down through the generations here at U2. It comes from travelling thousands of miles to find that new herd sire or sires. The homework is done on your next herd sire here at U2. To reap the highest quality, weights and priers for your calf crop, please consider U2 to be your source for your next bull or bulls. Longevity is bred into this herd of cattle. I recently was touring Mexican ranches and saw 2 great bulls purchased from U2 still working at 6 and 8 years of age. Still in great condition and very sound footed.

I would invite you to come prior to the sale to evaluate these bulls to see how they are raised and fed. The time and the trip will certainly be worth your while. Whether you need that new elite herd sire or a dozen or more bulls for your commercial herd, you will find lots to choose from.

If you have any questions or cannot attend sale day, please give me a call at 403 828 9815. Will be a pleasure to help you out on March 24th. See you at the ranch north of Coaldale.

Sincerely,  
*Roger Peters*  
*Peterosa Exports Ltd.*

# WHY A U2Q BULL?

**1. QUALITY** – Top end bulls in volume! We take extreme pride in the fact our sales offering is strong from one end to the other! These bulls are chosen from the utmost top-quality cows we can find to meet your herds furthestmost needs! Bulls that we would not use ourselves do not make the sale!

**2. UNIFORMITY** – Sire groups of  $\frac{1}{2}$ ,  $\frac{3}{4}$ , and full brothers by breed leading sires and dams that rank extremely high in fertility, soundness, longevity, structure, fleshing ability and muscle.

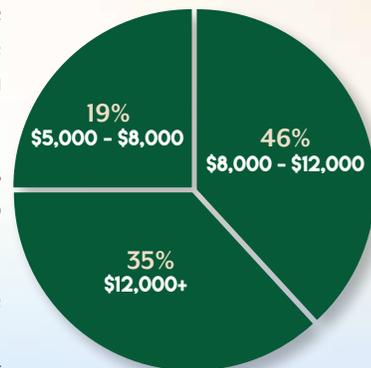

**3. CALVING EASE** – Over the year's customer feedback has taught us the most sought-after bulls combine the traits written above, and calving ease with performance.

**4. AFFORDABILITY** – Our focus remains the same as it was in the past with serving the commercial cattleman by providing high quality bulls, in volume, at an affordable price range. Whatever your budget is, with this many bulls to select from, you can expect to find a great selection!

**5. SERVICE** - We specifically keep good quality bulls on hand so in the event that a bull goes down during breeding season, we will have a replacement bull of similar quality available to you on short notice!

**6. THE BEST GUARANTEE IN THE BUSINESS** – We are customer driven, as this is our whole source of income, and we rely hugely on repeat business. We stand behind our product. If something goes wrong, we will look after you - guaranteed! We want to sell your next generation their bulls!

**7. SIGHT UNSEEN PURCHASE PLAN** – Although it is great to come before or attend the sale, we understand many producers cannot. For this reason, we have many customers take advantage of this program. Call Cole or Darren with your bull needs and we will be more than happy to visit with you to help with your bull questions and selections and represent you in confidence Sale Day! We stand behind what we recommend. If you are not satisfied upon delivery, then you don't own them!

The lead-off high selling Guinness son in 2020 that sold to Valnes Ranch in South Dakota. His dam and him were the most brought up and talked about pair in all the 2019 tours we had. We used him as a sniper thru AI and after being beyond impressed with his loose hidden progeny with massive body depth and muscle shape, we suspected we needed to see more of this bull. After speaking with Emit multiple times on his success with the bull and once we started having our own first females calving his value was sealed and our pursuit to get him back to Alberta began. This is the first large sire group by Monte we have and we couldn't be prouder. The consistency is as obvious as the quality - he stamps them all with his super dark haircoat, flawless foot quality, with extra middle and shape. His daughters are even better. As a seven-year-old herd bull, Monte still stands on perfect feet and looks terrific. We will have an eight year old herd sire photo for him next year. 20 sons sell!

**3**

**4**

**5**

**LOTS 1-6:** A true dream-team flush; phenotype, performance and maternal excellence all come together to lead off not only this tremendous sire group, but the entire offering. These genetic trendsetters raise the bar with next level center body mass, impressive top width, flawless foot quality and superb structural integrity. Their dark cherry red haircoats and the remarkable consistency across this large flush speak to the strength and potency of the mating. We have never produced a set of full brothers with this much loose hided softness, bone and herd bull presence! We consider U2 Anexe 294E to be one of the most elite donors ever raised on the ranch. She is backed by four generations of Anexe brand building legacy dams that we could write a book on. 294E is a maternal sister to Reckoning, Entourage, Fortunate Son, Outlander, Bad Moon Rising, Legend, Anexe 566C, 69G, 27H just to name a few of many. Her front pasture phenotype and structural integrity are only surpassed by her unmatched production and bullet proof pedigree! Her sons consistently rise to the top of the sale order, and her daughters are rising to the top of the herd and replacement pens here at U2Q and Sunberry. She has raised top herd bulls to Peacock Red Angus, Fyke Ranch, Thiessen Red Angus, Sunberry Valley Ranch, John and Julie Watson, GQ, Spring Lake, and Hillsvale. Her best endorsement may be the fact that we are using two of her sons heavily in our program: U2Q Shameless 2120(25 sons in this offering) and Sunberry Prodigal Son 3117(many sons in our next years offering). This is a donor to better the breed! We plan on using a couple of these STUDS thru AI for further herd advancement.

**LOT 13:** 5726 is a soft-made, exceptionally strong haired bull with excellent structure, balance, and capacity. Recommended for cows, he is loose-hided and well put together, showcasing the kind of build that will carry him into a productive breeding career. His pedigree is impressive, with his dam a full sister to the \$52,500 Churchill high seller in 2024. A perfect example of how perfectly Full Monte has blended with the Misty cow family. With his combination of style, substance, and maternal strength behind him, 5726 is a no brainer. WR 102

**LOT 14:** A very popular pair all summer, 5608 is exactly what we were hoping for when acquiring 277G back! A cherry red, long fronted, phenotypic masterpiece with extra flash and a big old wide top, sets 5608 apart! His young, front pasture dam is a first class Anexa 439A daughter that will probably end up in the donor pen like her mama one day. The Full Monte daughters are some of our most desirable young cows in production - combining that with dams like 2381 and 439A has us to believe the female making potential here is limitless! Buy with confidence! Recommended for heifers and cows.

U2Q SHAMELESS 2120 is one of two bulls we selected to bring the \$290,000 U2 SHAMELESS 145G influence into the Red Division, and he has exceeded every expectation. His ability to stamp the progeny with herd bull character, length of body, overall thickness, foot quality, and impressive top and pin width is remarkable and unmistakable throughout this sire group. Last year, most of his calves came black, yet his only red son on offer rose to the top as a high seller to Louber Farm, Quebec. This year marks our first substantial sire group; 25 red and black sons strong, and we believe they rival some of the best we've ever raised. His first daughters are beautiful, broody young females with loads of capacity and exceptional teat size and placement. We also have two full sibling sisters to 2120 developing here at home, both emerging as standout young herd favorites. Early visitors have consistently been impressed with the uniformity, power, and presence of this group.

El Scorcho is an impressive, well-balanced full brother to Estranged 83G, and after seeing the quality and consistency in the Estranged bulls and females, we didn't hesitate to double down on this mating. Their dam, Envious 147X, is also the dam of the \$76,000 Renown 193C; an influential sire who has carved out his own legacy in the Red Angus breed. El Scorcho himself is making his way to the legendary breeding bull status, meeting every expectation of a maternally stacked herd sire. This is the strongest set of 547J sons we have ever raised, and unfortunately, there will be only one more to follow as he was lost this winter. His influence will be carried forward through this exceptional group of sons.

 U-2 MISTY 542A

The genetic showpiece selected by Jason Weber of SD in 2022, and he has consistently proven his value in the herd. This phenotypic outcross has been used through AI to replicate his kind and diversify the gene pool with his maternal black pedigree. His dam, Misty 456F, is a black-red carrier daughter of the prolific JL Signature 4106, renowned for producing shapely beef bulls and angular, highly productive females. In 2024, Mr. Brownstone truly hit it out of the park, siring multiple high-selling sons to progressive breeders. His daughters have been exceptional; very fertile, big bodied, strong footed, and unmatched udder quality with ideal teat size and placement. We were lucky enough to make a deal and be able to purchase him back this past fall!

**LOT 42:** A long-made Brownstone son that offers notable performance and muscle from end to end. He's clean made, stout, and easy fleshing, with the kind of design that works in a wide range of programs, and is sure to make you look twice when you enter the pen. Backed by a proven, dependable cow family, his big-boned, powerhouse dam adds depth, base with, and strong maternal lineage to the equation. 5645 is built to sire functional, growthy steers and replacements with added length. Recommended for cows. WR III YR 123

**RED U2 LADY 368C**  
Grandam of Lot 42

**LOTS 43 & 44:** Captivating flush brothers by the newly reacquired Brownstone 551J that are bred for the ages with pedigree power, phenotypic appeal and pure pounds. Powerful in their design, these big-ribbed superstars have the fleshing ability, structure and style to excel in all environments. We plan to implement both these bulls in our program through AI. Their grandam is no other than Anexa 294E, and their dam is a young front pasture Shameless daughter, that is a full sib to Shameless 2120 (sire of lots 21-31 & 219-232) that we have the utmost confidence in for making the next generation of females here! Combining donors like Rosebud 157C, Anexa 294E, Misty 456F and Envious 147X in one pedigree has us pretty excited. Recommended for cows.

Churchill 3361 was a \$52,500 sale feature in 2024 to Hansine Ranch Red Angus in North Dakota, and he has since proven himself as an elite dual-purpose sire. He offers true calving ease while still delivering the extras; eye appeal, consistent base width, added rib, and the potency to consistently stamp his progeny with quality and kind. We admire his easy-keeping nature and balanced muscle pattern, all

backed by maternal strength that is difficult to match. His popular black outcross pedigree adds further value, while his beautiful donor dam reinforces the consistency he transmits. Misty 350C is no stranger to the spotlight, having raised countless high sellers, including last year's \$140,000 standout, Double Down 4515. Churchill 3361 continues to rise as a sire that blends calving ease, phenotype, and maternal excellence in a highly marketable package.

Was an obvious choice to carry the 60H exclusive outcross genetics into the red gene pool. His individuality and strong donor cow family give us the confidence to make him a cornerstone of our future breeding program. We are thrilled with the results in both the bull and replacement heifer pens. Kennedy consistently stamps his sons with an attractive muscle pattern, dark red hair coat, structural and foot integrity, and the highly sought-after length of body. His sons created quite a stir last year, with the majority selling to progressive breeders and commercial cattlemen. His first daughters are now calving, showing excellent fertility and laying down picture-perfect udders. We hope you appreciate these fresh genetics as much as we do.

Playboy was our high-selling Knockin' Boots son in 2023, commanding \$62,000. He is a tremendous fronted phenom with added rib shape and eye-catching herd bull presence. His structural integrity is anchored by an ideal big foot with ample heel depth, making him a true foot improver. His dam, Queen 68H, is a second-generation donor with a flawless foot, added frame and outstanding udder suspension, teat size, and placement. After calving a world class group of daughters, we are moving forward with Playboy in a major way as these females have quickly become favorites around the ranch. They are

feminine fronted, wedge-made and beautifully balanced with picture perfect udders. Playboy is proving himself as a sire that consistently elevates both phenotype and maternal quality.

83G was a product of one of the greatest flushes ever produced at U2 and a bull we HAD to continue with—his maternal history and pedigree speak for themselves. He is a big-heeled, square-toed herd sire with massive volume, exceptional lower-quarter shape, and extra frame stature. His male progeny remain in high demand, consistently impressing progressive breeders, while his young daughters have exceeded expectations with outstanding udder structure, high fertility, and the ability to maintain excellent body condition. Even at age 7, Estranged continues to walk our pastures on near perfect feet, leaving a legacy of elite genetics in both sons and daughters.

These Estranged sons are as predictable as we can make them, and their daughters in production are proving to be even better. Expect added frame, length and pounds in your steer pen, backed by excellent disposition and extremely sound foot quality. The maternal longevity here is real as Estranged is still walking our pastures, and his 16-year-old dam remains in production at her current home in the USA with Mark Jolly. 5574's big-bodied, outcross dam is a performance-driven Urgent daughter, making the Estranged x Urgent combination a true no-brainer. Proven genetics, built-in predictability, and daughters that are made to last. Recommended for cows. YR 110

70

**LOT 85:** Here is a super gentle, heavy-muscle, big-bellied prospect with impressive volume and over-all structure, destined to sire progeny that combine moderate birthweights with strong growth and pounds on the fall scales. His maternal pedigree is exceptional, blending the best of the Robello and Beauty cow families into one that consistently produces functional, productive offspring. Maternal greatness runs deep, with his dam already delivering another outstanding low birthweight calf this year. A bull with both performance and pedigree, 5462 is one we expect to leave a lasting mark on heifers, cows, and the herd for years to come. Recommended for heifers and cows.

A major feature of the 2023 sale, part of the lead off flush in the catalogue alongside his two brothers, all of whom went to progressive breeders. We were fortunate to purchase 2138 back through the North Point Angus dispersal sale. He is a smooth-made, calving-ease bull with a classic Angus skull, curve-bending growth, and exceptional phenotype. Backed by one of the most beautiful donors to walk our pastures, 62G, his sons are inheriting his same impressive phenotype, while his daughters carry that signature Beauty cow family type and superior fleshing ability.

Brimstone is the complete package, combining exceptional soundness with blockbuster performance and impressive numbers. He was a sale highlight and acquired by Sunberry in 2024. Extra length, frame, and body mass have matured him into a powerful, rugged herd sire, commanding attention in any pasture. He consistently sires offspring with remarkable uniformity, dark red hair coats, long-bodied conformation, and strong muscle pattern, ensuring calves that impress. His progeny are consistently easy fleshing with excellent temperaments, and replacement heifers are shaping up to be top-quality females with longevity and productivity built in. This is a bull we are excited to use extensively in the future, and one that will leave a lasting mark on the herd for years to come.

Lincoln 2228 was a natural calf of our "lights out" donor Lakota 687E. He has been a reliable calving ease dream with huge maternal potential. We will continue to use Lincoln on heifers to make these free moving, sound structured, excellent footed heifer bulls. Daughters are checking all the boxes so far; You can never have enough 687E influence in the cow herd!

Fort Knox has stepped into his role as a herd sire in impressive fashion. The \$30,000 feature seller from the stacked Sundance 175J sire group in 2024, he caught attention immediately with unmatched stoutness, depth, and capacity. We were lucky enough to use him for part of his first breeding season before going down to our great friends (Mike and Rachel) at Elkhorn Red Angus. His progeny are already adding length, incredible hair, and consistency; turning heads across every pasture. Loose-hidden, rugged, and built to perform, this herd sire is proving his early promise and is poised to be a game-changer in any progressive breeding program.

RED U-2 ROBERTA 96J

El Presidente was phenotypically one of the most flawless bulls we've been around, truly the complete package. He matured into an exceptional breeding bull, consistently transmitting his proud character, style, and structural correctness. His daughters will undoubtedly be his greatest legacy, as his full sisters already stand out as some of the most impressive females on the ranch. We lost El Presidente this winter, making these genetics limited and increasingly valuable. His influence will live on through the quality of his daughters and the unmistakable stamp he left on his progeny.

Knockin' Boots was our last natural calf born in Canada out of the legendary U2 Beauty 113Z and a \$50,000 sale feature in 2020 sold to Barenthsen Bullinger Red Angus. 113Z's influence around here cannot be overstated and KB is definitely one of the top sons we have chosen to carry that influence forward with. He has ideal skull shape, foot quality, structural correctness, body mass, muscle shape and the hair he puts into all his progeny is impressive. He has raised countless high-quality sons to top commercial cattlemen and breeders across North America including the \$62,000 future Hall of Famer, Playboy 2197. Boots daughters are visitor favourites with their unmatched fleshing ability, strong maternal instincts and what we would call an udder improver.

Is without a doubt one of our favorite sure-fire calving ease herd bulls we have used in some time. This cherry red \$32,000 phenom is as sound and impeccably footed as they come, with a beautiful muscle pattern, extra length of body, and an exceptional hair coat. His overall balance, soundness, and eye appeal set him apart. His first-calving daughters are proving high fertility, with tidy udders and strong maternal instincts. Look to Dominion 158J sons for worry-free calving ease, strong performance, standout look, and exceptional maternal value.

Big Energy was selected by our friends at MRL and is another valuable outcross sire we're using to bring Shameless influence into our red program. And what better way to do it than through the legendary donor Roberta 147C. 2126 is a true genetic trendsetter; combining an outcross pedigree with phenotype, softness, foot quality, and cow-family strength that can move the needle for the entire industry. His maternal backing is second to none and shows up in his progeny including last-

year's \$140,000 high seller, Double Down 4515, to Ter-Ron Farms and Canadian Sires. Big Energy offers potency and predictability, offering a fresh pedigree with the structural integrity and maternal depth to build around.

Mr. President 3368 is a flushmate to Churchill 3361 and has already proven his ability to sire consistent calving ease without sacrificing eye appeal, performance, or maternal strength. His calves come small, get up and grow, and display the kind of balance and presence that make them easy to appreciate. Dark red, hairy, loose hid and massive ribbed. The maternal potential behind this sire is tremendous, and his daughters are expected to be the kind that stay in the herd for years. Use Mr. President with confidence as he delivers the combination of calving ease, quality, and long-term value that every program strives for.

**LOT 123:** A very impressive bull that has caught the eye of many visitors so far! Cherry red, long spined, with ample depth and true herd bull character. He's built for functionality and carries a rugged, "cowboy-ready" presence in the pen. His mama is a tanky, wide pinned, strong milking Headliner daughter that goes back to the great foundation herd builder, Anexa 48B! 5641 is the first Prodigal Son 3117 son to sell with a big sire group for next year. The calves on the ground look outstanding so get ahead now with 5641! Recommended for cows. WR 109

**RED MINBURN COPENHAGEN 3Y**  
 \$67,000 Sire of Lot 124

**LOT 124:** A throw back from the past, 5358 is a very unique breeding tool for herds that never used a direct Copenhagen son or ones that want to go back to the well. Like all 3Y's he is as long as a train, massive middled and loaded with herd bull character. He possesses great structure from the ground up, with a design that emphasizes capacity and longevity. A twist on the bottom side of the pedigree with the proven and highly respected Primrose 107W makes him an outcross to most and a very reliable choice for adding quality, balance, and cow-making ability to the next generation. Recommended for cows. YR 107

**LOT 128-130:** The highly anticipated flush brothers from the mighty mating of Badger to the legendary Rosebud 157C. They are led by Prowess 5820, a new generation herd bull with as much promise as any we've raised. He has been a standout individual from the start with an eye-catching swagger, a loose-hided build, added length and top-width, female making extension and a gentle demeanor; he has all the fundamentals to be a great one and more! Their high-selling dam is a fourth-generation donor going back to the world-branded Rosebud 115F. 157C is one of the most recognized females ever born on the ranch and has the production record to match her maternal elegance! She has a page long list of influential sons and daughters working for some of the most progressive herds. Rosebud 157C's excellence is embedded with the traits that matter most- fertility, fleshing ability, femininity, productivity, udder structure and foot design.

**LOT 131-132:** A pair of big-time flush mates from the power-on-power mating of Badger to the iconic SAV Emblynette 7800. They are numerically and genetically outstanding displaying the phenotype, masculinity and performance we all strive to find in our next herd bull while being backed by a cow of this calibre. With strong Angus character, ideal skull shape, and impeccable foot quality coming from both sides of their pedigree the picture is complete. The full sibling sisters are also must see! Emblynette 7800 is a fourth-generation donor with as much substance, bone and body as you can fit in a cow while still keeping her feminine and extremely fertile. Last year she had 20 sons average \$20,000 and now the final box was checked as we just calved out a set of daughters that surpassed expectations. Recommended for cows.

**LOT 143-146:** A very impressive set of brothers that have an equally strong set of sisters in the replacement pen. They stand on sound structure and exhibit a correct Angus pattern that is highly sought after. Wide pinned with massive volume and dimension guarantees some added pounds to the calf crop. Emblynette 6506 completes the equation with her front pasture phenotype, performance and production record. Her progeny performs in the top end and have surfaced to the front of the line in many cowherds.

The bull feeding program is built to maximize forage utilization, gut health and as a result quality sperm production. Nutritional status of a bull, particularly from the previous 60-days can affect the semen quality being ejaculated today. Sperm production is a continuous process and proper nutrition is critical to maintain peak fertility and longevity of bulls. Bull calves are generally developed on grass with their moms on a quality mineral program.

Once bull calves are weaned, they are slowly moved onto a balanced TMR. The bulls are challenged with a forage-based TMR to help them develop and express their genetic potential. This is important for consistency of maturation and puberty of bull calves. Sampling and analyzing forages are important for properly balancing the overall ration.

Forage quality and digestibility are important for maximizing ruminal health. Matching suitable protein sources with proper starch with the available forage sources is key to promoting lean muscle growth. The addition of organic minerals are used to ensure proper immune function and overall health of bulls. All of these factors contribute to semen quality and conception within a herd.

If you have any questions about the nutrition program, please feel free to reach out. Buy with confidence knowing the bulls have been developed on a balanced nutrition program.

Was our pick and the high selling Badlands son at the 2023 Ellingson sale. After seeing the influence Badlands was leaving, we knew if we found the right son we would have to own him. A phenotypical standout, Unchartered was an ultra loose hided, long spined, with a very strong footed and expressed massive lower quarter muscle; topped off with great hair and a world class Madame Pride cow behind him. With Bells Girl 7617 on the top side the cow power in Unchartered is second to none! Last years sire group was extremely popular and was highlighted by our high selling \$95,000 black bull, High Noon selected by Duppons Willow Creek Angus in North Dakota. We just recently drove down there and were very impressed by the way High Noon has developed in one short year! We are beyond excited for the set we have for your appraisal this year, as they are truly an exceptional group.

**LOT 147:** Trail Boss is a perfect specimen to start this sire group. Long and extended through his front end, with unmatched true HERD BULL character that exemplifies the type of cattle we are trying to produce. Starting with his sound structure from the ground up, this phenom checks all the boxes; massive ribbed, deep flanked with muscle extending deep in his twist, we believe his maternal genetic code has the ability to make rapid movements to a cowherd. Erelite 2198K is a direct daughter of our most cherished donor cow Erelite 6H and grand daughter of the world renowned Erelite 109Z. WR 110 YR 110

**LOT 151:** A must see, and maybe the favorite among early bull tours. Blackjack is an attractive, multipurpose herd sire with natural thickness, hair and superb phenotype; from end to end an impressively complete individual. All that power comes uniquely infused with calving ease and unprecedented maternal strength. This guy is no accident as his dam, Rosebud 2241 is a front pasture, direct daughter of Rosebud 157C. She is a full sister to the \$75,000 Powerline at Covey Hill and looks to have the knack for raising the good ones! We have a full sib to 5422N that calved in January that we are very proud of and sure helps further our confidence in Blackjack. For you EPD fans, his genomics are very reassuring. Top 1% for scrotal, claw, and udder quality. Top 3% for foot angle, longevity and REA. We think Blackjack is a herd sire prospect with immediate impact and long-term credentials! Recommended for heifers and cows.

**LOTS 177-180:** First and only Smokeshow sons to sell in Canada! A great opportunity to acquire some next level, powerful genetics backed by the great Emblynette 7800. They exceed on the fundamental key Angus traits that we and our commercial customers consider essential. They are anchored by 5369, a sharp fronted stout individual with incredible character and presence. These early maturing brothers have unparalleled crest development, big tops, and distinct muscle shape. Their consistent user-friendly numbers combine convenient birth weights with rock solid performance and second-to-none maternal value. Their dam Emblynette 7800 is a maternal centrepiece here and a world class producer that had 20 sons last year that averaged \$20,000. Look to her to keep 'em easy fleshing while adding frame, bone and heel depth consistently! Her daughters are angular, soft made beauties that are worth the trip!

A herd bull that carries authentic Angus breed character exhibiting as much muscle, shape and power you can put on a phenotypically flawless bull. His excellent foot quality and docility with the maternal power of SAV Emblynette 2369 behind him made him an easy choice. We had very limited semen so we mated him to some pretty special cows and are thrilled with the results here and in the replacement pen.

 Grandam to Lot 181

**LOTS 181:** Thesis is a personal favorite and definite contender to lead off the sale order on March 24th. He is a herd bull through and through with that perfect balance of neck extension, body depth and muscle shape. His weaning number reflects the fact that he was alongside his mother as she was being flushed this summer, but his huge 129 YR more than made up for it and supports this fact. He just keeps getting better and better every day! His dam, Lenore 215E is one of our top producing cows that joined the donor arsenal this year. She is a massive bodied, impeccably uddered Coalition

**MWC ERELITE 4IH**  
 \$52,500 Grandam of Lot 199

**LOT 199:** Ranger is a calving ease dream bull – so much so that we plan to use him in our own program. At weaning he had all the makings of the ultimate heifer bull: sound structure, expressive muscle shape, body depth, breed character, and a calm, workable disposition. Unfortunately, shortly after weaning he was injured and subsequently lost considerable weight, and we were very close to pulling him from the group. It took time, but he healed and today we feel strongly that his potency for calving ease and maternal merit makes him too valuable not to utilize. His genomic profile ranks him among the very best in the breed for CE, BW, Mat CE, Milk, Teat, Udder, Claw and Angle-an elite combination of traits rarely found in one package. His dam Erelite 38K was our \$71,000 "must have" from the MWC dispersal. She is everything we look for in an Angus cow and is poised to play a major

96 role in the future of this herd. Recommended for heifers. WR115

U2Q SHAMELESS 2120 is one of two bulls we selected to bring the \$290,000 U2 SHAMELESS 145G influence into the Red Division, and he has exceeded every expectation. His ability to stamp the progeny with herd bull character, length of body, overall thickness, foot quality, and impressive top and pin width is remarkable and unmistakable throughout this sire group. His first daughters are beautiful, broody young females with loads of capacity and exceptional teat size and placement. We also have two full sibling sisters to 2120 here at home, both emerging as standout young herd favorite producers. Early visitors have consistently been impressed with the uniformity, power, and presence of this group. It marks our first large sire group of 2120 sons; 25 red and black, and we believe they rival some of the best we've ever raised. Last year a high selling feature 2120 son was purchased by Louber Farm in Quebec

**LOT 226 & 227:** Here's an opportunity to put together full brothers that can add some serious pay weight to your calf crop! These big-framed cow bulls have muscle with added bone and length on sound rugged structures. Stylish in their design and athletic enough to cover ground in large pastures. Their dam, Roberta 147C is our signature "herd builder" donor that has raised countless replacements, including multiple donor daughters, and herd bulls to MRL(2), Jean-Francois Leblond, Speargrass, East Cardston, GQ, Dahlke Angus, Sunberry, Raile Angus, Richard Steed, and Hicken Ranch.

**SAV PANTHER 1906**  
 Sire of Lot 244

**LOT 244:** Is a very well put together red carrier Herdbull, with a very intriguing outcross pedigree. The volume and fleshing 5320 carries is very hard to match! He is an extremely rare and first ever son of Duff Red Fox 1997, the high selling heifer at Duff's in 2019 for \$71,000(US), to sell in Canada. Her mating to Panther obviously emphasized her muscle shape, stretch, fleshing ability and rib shape. The extra depth of flank and overall valance in this calf is very noticeable. Recommended for cows. WR 110

**LOT 245:** Here is the 2026 Unicorn; unbelievable birth to weaning spread with unmatched phenotype and design. Espresso needs to be seen to appreciate the overall muscle expression and stoutness he carries while standing on a big square foot. His dam simply does not miss, with her two previous sons expressing very similar traits that left hands flying through the air as they sold. Lassie 144H is the model of efficiency, with unmatched fleshing ability, great foot and udder structure, and the young production record of a future superstar. We plan on implementing Espresso into our program. If your serious about finding your next outcross, you better come take a look.. This kind of thickness with calving ease is hard to find. Recommended for heifers and cows. WR 105 YR 113

VBP+ certified, palpated, on a full heard health program and fully guaranteed.

**THANKS TO OUR AMAZING CREW!  
CALEB, JOSH AND EZRA**

**INNOVATIVE VETERINARY SERVICES**

As the attending veterinary practice for U2Q, we can confidently say that herd health is treated as a top priority within this operation. With our support, the U2Q team works closely to develop and refine a comprehensive preventive health program that consistently exceeds industry standards. This collaborative, proactive approach is key to the continued long-term success of their cattle.

The breeding herd receives an annual preventative scour vaccine, 7-way clostridial vaccine that includes Histophilus Somnui, and a 5-way viral vaccine. Vaccination timing is carefully managed to support optimal immune response and maximize vaccine effectiveness. Calves receive early health support beginning at birth. Timely administration of Optimizer, intranasal viral and bacterial respiratory protection, and an oral scour vaccine provides a strong health foundation through to branding. This approach results in sound, well-developed bulls that are prepared to transition seamlessly into any breeding program and perform reliably over the long term.

What truly sets this program apart is the U2Q team's commitment to continuous improvement. Emerging vaccines, supplements, and management strategies are routinely evaluated and incorporated when they offer meaningful benefits to animal health and performance. All sale bulls have undergone a comprehensive breeding soundness evaluation, including semen testing, prior to the sale. Buyers can purchase with confidence knowing these bulls come from a herd where health, welfare, and performance are never compromised, and that each bull has been thoroughly evaluated for breeding readiness.
