VIDEOS

Videos will be available late September on cattlevids.ca

TRAVEL

We are conveniently located just 6 miles south of the Trans Canada highway between Moose Jaw and Swift Current on Range Rd 3042 near Parkbeg, Saskatchewan. Google Twin View Livestock for directions.

ACCOMMODATIONS

A block of rooms will be held at the Pilgrim Inn located in Caronport until October 1. Ask for Function and Finesse when you call to book. Call Joe at 403 465 2805 if you need any help with accommodations.

U.S. EXCHANGE

US funds will be accepted at the exchange rate of the day. There is currently a substantial premium on US dollars giving US customers added buying power and value.

SIGHT UNSEEN

We would be happy to visit with you about your interest in any lots. Please contact Aaron or Joe prior to the sale to allow us time to discuss your needs and make suggestions to fit your criteria. Your order will be handled in the strictest confidence with integrity and professionalism. Your satisfaction is 100% guaranteed when you've visited with Joe or Aaron prior to the sale.

DELIVERY

At their convenience, consignors will make every effort to work with purchasers to get females as close as possible to their final destination. For longer distances the seller will work with the buyer to share delivery costs.

LIABILITY & RISK

Although every precaution will be taken to protect the safety and comfort of buyers, the auctioneer or owners assume no responsibility or liability in the event of an accident. Each animal becomes property of the purchaser as soon as sold.

INSURANCE

Call Stockman's Insurance, Larry Toner, at (306) 834-7652 if you require insurance on your purchases.

Welcome to Function and Finesse 8.0! What a time to be in the business! A renewed sense of optimism and excitement for the future is so refreshing for the industry. There is no more important time to raise the bar within our breed. We need to position ourselves with the greatest quality cattle possible and we strongly feel we have done that with this set!

We are humbled by what Function and Finesse has become. We never dreamt this event would become what it has and we have such gratitude for all those who have made this possible. We are entrusted by our Sale Partners to curate and assemble a group of females, to prepare and present them then to put them out into the industry. Each year, more and more lots meet the Full Circle criteria. We know this is a testament to the quality of cattle offered here. We are so proud of the females we have sent to work.

As always the complete set has been managed here at Twin View allowing us to present you with a consistently prepared group. This eases your selection process without sorting through a variety of presentation methods. The cattle are often out grazing to meet their needs. It is possible to buy elite quality, practical, common-sense cattle in this breed and we believe they can be found here at Function and Finesse.

We remain staunchly dedicated to the most modern practices and each lot is presented with the most in-depth DNA profile possible including parentage verification, polled and colour testing as well as a 100K profile in most cases. We encourage you to follow updates available through the CGA registry for current EPDs. On that note, we are so proud to be part of the Canadian Gelbvieh Association and of the leadership role our breed has positioned itself in. An exciting future exists for those who stick with this association.

We would be excited to visit with you before the sale and welcome you to Twin View anytime. The people cattle have brought into our lives is truly the most special part of what we do. We can't wait to see you on Friday, October 16! Function and Finesse is one of a kind. It is a celebration of our breed's leading ladies so be sure to bring your leading ladies along for our hospitality!

Aaron and Joe

LML 1M

19-Jan-24

LML Mighty Machine 1M - The rare and limited opportunity to access a truly unique breeding bull kicks off Function and Finesse 8.0!

The crew at Last Mountain purchased Mighty's dam in Function and Finesse 5.0. They soon shared reports of just how good they thought this bull calf was. When we toured the following summer, we found Mighty Machine wrapping up his breeding duties in the heifer pasture and were blown away! It is rare in this breed to find a bull with so much true muscle shape, overwhelming sweep to his center body all while maintaining an attractive and extended front third. Added bonuses include outstanding foot quality, liver red colour and big testicles. He has proven himself to be a heifer safe breeding option and saw significant use both at Last Mountain and here at Twin View this spring. He is the Grizzly Red son we've been waiting for and we can't wait for you to see him. Mighty Machine is unique and is sure to put his stamp on the breed!

Offering 200 doses for the 2027 breeding season available to Canada and the United States in 10 dose packages. Semen is qualified for other countries as well. Contact us for those details.

LML Grace 3P is a moderate framed, extra stout female with the look of a future mama cow. She represents the first calf crop of Mighty Machine and is stamped with his tell-tale liver red colour and sweeping rib shape. She's really tidy in her skull design and backed by a super functional two-year old cow with a textbook udder. Grace's pedigree is stacked with some heavy hitters and all indications point to awesome foot quality and maternal capability. Five generations of females in her maternal pedigree remain in production at Last Mountain. If that isn't an indicator of long term potential, we aren't sure what is!

LML Jenna 46P is another moderate, dark red female sired by Mighty Machine. She offers his sweeping rib design with ample length of spine. She is a 7/8 sister to lot 1 and truly represents so much of what the Last Mountain program has been built on. Jenna's dam is a really beautiful, feminine two-year old that is so well constructed and correct in her angles. This is your chance to get in on the ground floor of a Mighty - a bull we think has a very bright future in the breed!

AWB Twin View Rosemary 138P is a sassy, high performing, March born female who is sure to impress! She's so attractive in her design yet muscular and broody. Many will know her maternal sister who has blazed quite a trail for Bryce Hicks - Champion Yearling Female out of nearly 100 at Swift Current Regional then Champion 2 Year Old at the same show, Champion Mature Female at the 2026 CJGA show and also raised the Champion Bull calf as well as the Champion and Reserve Bred & Owned. Another maternal sister sold to the Anderson family in North Dakota. These Rosemary females are powerhouse mama cows! 138P is set to blaze a trail of her own!

AWB Twin View Savanna 94P is another daughter of Iconic we think very highly of. She is so smooth in her design, long sided and sound in her construction. She is backed by a proven mama cow who maintains ideal foot and udder quality at nearly 11 years of age. We have a maternal sister and the donation heifer we shared a year ago was a full sister. 94P is stouter than her sister from last year but has the same super sweet, junior friendly disposition. We expect Savanna to be an ideal show prospect but most important to mature into a productive, long lasting herd matron down the road.

DAF Lucy Wynn 32P is among the larger outlined females in the offering but she maintains ample muscle and overall shape to go along with that extra stretch. She's tremendously elongated and moves with authority and prowess much like her Grizzly Red sired mama. A maternal sister to Lucy's dam was extremely popular in last year's sale. Her sire was purchased in dam through Function and Finesse from the Goodview program. He was used at Diamond Acres before going to work at a reputable commercial program. If you like females with some extra punch, Lucy Wynn should be high on your list!

JOE Pearl 366P caused us to 'full stop' during our tour at the Jonus program. She is a striking and powerful female that was immediately on our must have list for Function and Finesse 8.0! Her dam is a tanky, ideal uddered female from the Jace program and she is sired by a past bull futurity entry from Goodview Gelbvieh. He has matured into an extremely impressive herd bull who is certainly producing well. As a point of interest, his granddam was purchased through Function and Finesse! It is easy to appreciate Pearl's side profile and sound joint construction and we think she could be a competitive candidate on the show road.

SVF Princess Baha 2P ET is one who quickly grabs your attention and packs a punch! She's impressive from a dimension point of view sporting massive width across her top with extra spring of rib and volume. Her pedigree is a no miss, insurance policy of sorts. By combining the genetic consistency of The Boxer with the potency of Baha 1H, Princess Baha is backed by some of the best. A full sister from Function and Finesse 6.0 owned with Del Wyatt resides here and is doing a bang up job on her first bull calf. Her liver red colour, ultra sleek skull and neck design and skeletal correctness make her a true standout when it comes to show ring potential!

AWB Twin View Baha 118P is a deep bodied beauty who carries herself with extra swagger and sass! Her dam, Baha 9J, is a super tanky, wide pinned daughter of the great Baha 35B and Get N Go 90J. A flushmate to 9J was a past Function and Finesse high seller, now a donor for Hillsdown Gelbvieh. We have flushed another full sister to 9J ourselves. A maternal sister to Baha 118P sold to the Anderson family in North Dakota. The Dunbar bull has created quite a stir already. Consistently, we are so thrilled with the Dunbar cattle at each stage of development but we think their best days are ahead as mother cows. Baha 118P truly represents our commitment to share the top cut in Function and Finesse!

CDGV194012

ZAL 22P

21-Feb-26

ZAL Diamond Z Baha 22P is a gorgeous female who commands attention with her striking good looks and balanced profile. She is shapely in all the right ways with extra depth of quarter and overall mass.

Baha 22P's young dam is creating quite a story already raising herdsires for Ledgerwood Gelbvieh and Overby Stock Farm. Take a look at lot 22 - her sire is Baha 22P's maternal brother. Her granddam was purchased through Function and Finesse and has also done a great job at Diamond Z. Baha 22P is sired by the Bullseye sire who walks at Diamond Z and has developed into an impressive mature bull. Baha 22P has the attitude and quality to excel in the show ring before she becomes an awesome mama cow like those before her.

AWB Twin View Sugar 88P is a sweet young thing who has a really pleasing presence about her. She is bold in the center portion of her body and comes high out of her shoulder into an attractive neck and skull. Her dam is a maternal sister to the World Champion Sugar 26F and a daughter of the matriarch, Sugar 24A, who is set to calve in the first days of the season next year at 14 years of age. We have a maternal sister to 88P in the bred heifer pen who is a carbon copy of their moderate, beautifully uddered dam. 88P's sire, Apex, was the Agribition Senior Bull Calf Champion in 2024 before becoming a potent breeding bull. Unfortunately, very few Apex cattle will be available as we lost him to an injury but his sons next spring will be very easy to find just like Sugar 88P!

AWB TWIN VIEW HOPE 52P

CDGV193249

AWB52P

29-Jan-26

AWB Twin View Hope 52P has secured her place amongst the favourites in the 2026 calf crop! From an early age, she stood out as an elite prospect. She's so deep bodied from end to end, extremely level in her top and comes complete with a stellar disposition.

Hope's dam was one of the feature high selling lots from the JSJ dispersal and is now in our donor arsenal. Her ET sons were extremely popular this spring including our high selling black bull to Last Mountain Livestock. We anticipate big things as we build our Hope cow family. Hope 52P is the first offering from our new homozygous black sire, Macallan. After searching high and low for a resident black sire, he emerged as a clear favourite at the 2025 Larson sale in Minnesota. We have high hopes for Hope and plan to have her be an integral part of our show string this fall. With Hope, all things are possible!

AWB TWIN VIEW HOT DONNA 79P ET

CDGV193330

AWB79P

09-Feb-26

AWB Twin View Hot Donna 79P ET is sure to get the blood pumping. We have loved this heifer from the get go and knew she was just right to be the very first Hot Donna we offer!

Hot Donna inherited her mama's good looks and ultra extended front third without compromising density and shape. She is one to mark very highly if you've got a young person wanting to be on the halter with her tremendous disposition and laid back attitude. On the top side, Undisputed, the 2023 Bull Futurity Champion, brings the influential and highly regarded Gracie Gayle cow family into the mix. This is a no miss pedigree. Hot Donna 79P is bred to be a mother cow but we think she's going to make a splash in the show ring first. Donna is hot!

MIGHTY MACHINE
Lot 1, Sire of Lot 16

COMIN IN HOT
Son of Hot Donna 77J

Lot **16**

BLC HOT DONNA 77J X LML MIGHTY MACHINE 1M

When the opportunity to access the heart of the Beamish herd came, we knew Hot Donna would be an anchor. We felt she was the next right addition to our donor lineup with her fresh look, balanced profile, and gorgeous silhouette. She quickly became a Dam of Merit and is just getting warmed up. She has a natural heifer calf this year and we have other ET calves we're very excited about. We're also incorporating her son, Comin' In Hot, whose first calf crop will make their public debut very soon. Mating Hot Donna to Mighty Machine is a golden ticket! We anticipate hairy and liver red, good looking, elite footed results from this combination. The heart of our work is yours!

Selling 3 embryos and we will give you a fourth as your guarantee. Qualified for Canada, USA and Australia.

AWB TWIN VIEW GRACIE GAYLE 27L ET, Dam of Lot 17

TIMBER CRICK
Sire of Lot 17

GRACIE GAYLE 14N
Daughter of Gracie Gayle 27L

Lot **17**

AWB TWIN VIEW GRACIE GAYLE 27L ET X JLSL LEDGERWOOD TIMBER CRICK 5146N

Gracie Gayle 27L was the selection from the most talked about trio of heifers in Function and Finesse history. JSJ and Del Wyatt teamed up and let us stay in the game with her and she has exceeded every hope we could have dreamt! Her first daughter was a feature last year and made her way to our friends in Missouri at Red Ridge Gelbvieh and she's raised another rip of a heifer this year. Timber Crick is one of the newest additions to our work and we're pretty pumped up about him! Samee spoke highly of T.C all along but when Joe got the chance to see him in the flesh, there was no doubt we needed him. His dam is a real smoke show and we have appreciated the Revival cattle for years. A fresh take on the Gracie Gayle family. You can't go wrong here!

Selling 4 embryos and we will give you a fifth as your guarantee. Qualified for Canada and USA.

Lot **18**

BBG PRESPHONE 180P

CDGV193918

BBG180P

05-May-26

BBG Presephone 180P is another female who quickly found her way onto our 'must have' list this summer during selection. We kept coming back to her while touring at Blake's but then we saw her mama and it was a done deal! Her sire has grown into an impressive dude with a big time pedigree backing him. Just a May born baby, Persephone has proven her performance ability with an adjusted weaning weight of 721 pounds. She's hairy, wide topped and stout. We're confident she will be highly competitive in the youngest division of any show next spring. As the youngest in the pen, we anticipate her to change the most by sale time but have no doubt she's only headed one direction. And wait until you see Mom!!

Flush

The factory behind the gorgeous heifer calf in lot 18, Denali, has been turning heads on every tour. She's tough to miss! Striking, bold and robust, big ribbed, elevated, elegant and attractive with awesome foot and udder quality - all accurate ways to describe Denali. She's an Apollo daughter which makes her a granddaughter of the two most influential animals at Ledgerwood - Time Traveler and Phoenix. Throw in a shot of The Boxer and the genetic potency is massive! The mating potential with females of this caliber is truly something rare. This young female will make a big impact in the forward movement of your program!

Offering the right to flush to the sire of your choice with a guarantee of SIX transferable embryos. Flush is to be completed by March, 2027 at an agreed upon facility. All costs are the responsibility of the purchaser.

AWB Twin View Sugar 101N is a halfblood female who packs a punch. She has a beautiful skull with big flyaway ears and as much volume as you can ask for in one. It's no secret we don't play the Balancer game but we do run an Angus bull to capitalize on heterosis. Some really good cows occasionally end up in that pasture after AI to make numbers work. We are rarely disappointed when Harvester gets one covered because time and again he has proven himself to produce exceptional results. The daughters we have working here are awesome in their udder design, wide pinned, cowy, and high performing. Sugar is safe to Fugitive so surefire calving ease and vigour are a given.

AI bred April 18 to JLSL Twin View Fugitive 3185L. Exposed April 20 - June 12 to IVERS Alpine L351 ET. Preg tested safe to AI date.

JLSL520N

25-Jan-25

Ledgerwood Nichol 520N has been well loved by the kids around Ledgerwood. She's a real sweetheart who was shown at Junior Nationals so there needed to be a committee decision for us to get her to Function and Finesse.

Nichol is extremely balanced in her design and we really appreciate her teat size and placement. Her pedigree is entirely Canadian. She is sired by the Laramie bull from Diamond Z who's doing a great job south of the border and out of a direct Pop a Top daughter Samee bought here from JSJ. Take another look at lot 10 - she is a maternal sister to Nichol's sire, Laramie. Cow families on the top and bottom of this pedigree are really getting things done! She's due early February to Baller. This should be awesome!

AI bred May 4 to DDGR Baller 429G. Exposed May 4 - July 1 to LRSF Blitz L236. Preg tested safe to AI date.

AWB Twin View BLC Riviera 117N is one of the younger bred females in the group who has done nothing but come on in the past months. She's long bodied, super sleek and has the look of a trouble free mother cow for years to come. Her dam is a larger scaled cow we work with Calvin & Donna Beamish on. She has another awesome heifer calf at side this year. Her sire is a bull the Beamish's bought to use in their heifer pen with trouble free results. Riviera is a more calving ease oriented female with an attractive profile, excellent foot shape and an ideal udder coming. A year from now, 117N may be one of the wisest investments of the day. She is safe to Alpine, a bull we're excited to keep exclusively in our program outside of services like this one.

AI bred April 9 to LML Mighty Machine 1M. Exposed April 20 - June 12 to IVERS Alpine L351 ET. Observed bred April 28. Preg tested safe to observed breeding date.

AWB 83N

21-Feb-25

It's no secret how much we love our Macy females. They're powerful and dynamic mother cows who consistently go above and beyond to get the job done. Just like all those before her, AWB Twin View Macy 83N is poised to make her mark!

Macy 83N is a truly gorgeous beast. Her dam is a maternal sister to The Boxer who will likely move into our flush string next year. We thought long and hard about halter breaking a five year old cow this summer because 49J deserves a black halter. A maternal sister to 83N was highly sought after a year ago and led off Function and Finesse 7.0 as the high selling bred heifer to Venture Livestock. That female has developed into an absolute bomb-shell cow whose first son, sired by Alpine, is in the show pen. We would not be at all surprised if the Alpine baby on board 83N ends up in your show pen too!

AI bred April 17 to LML Mighty Machine 1M. Exposed April 20 - June 12 to IVERS Alpine L351 ET. Preg tested 50 days on July 29th for a mid March calf by Alpine.

AMGV1636010

JLSL506M

06-Dec-24

Ledgerwood Natasha 506M is a captivating female who will stop you in your tracks every time. This female is flat impressive - super soggy and soft middled.

Joe had the opportunity to be at the Ledgerwood and Rafter C bull sale this spring. He completely appreciated Pete's pen of Red Angus bulls where most were sired by the Reputation bull. While touring cattle after the sale, this heifer stuck out in a pen of over 100 heifers. Reputation himself is impressive to say the least and has an exceptional foot and more substance than many in his breed. He's a unique breeding piece and this Balancer heifer is legit! A son of Reputation, Manhattan, won the NILE in Billings and Red Reno last fall. Natasha is safe to the herd builder himself, Time Traveler. Ask Samee about the influence Time has had on her program!

AI bred May 4 to JDPD Time Traveler 450X. Exposed May 4 - July 1 to LRSF Blitz L236. Preg safe to AI breeding.

Ledgerwood Natalie 5115N is a stretchy, ultra sound female with a little more frame. She's homo polled and homo black with a completely outcross pedigree. With these attributes, Natalie offers a multitude of mating options. Ledgerwood purchased her sire, Tradition, from the Gustin program. Samee has been really impressed by the sire group and his first sons were in the lead off draft of their bull sale this spring. Natalie's mother has earned Dam of Merit status with the AGA further entrenching the value in this female. With the natural service and timed AI being very close, Natalie may be safe to a new resident sire at Ledgerwood or the well proven Easy Rider bull. Either way, mid February will be an exciting arrival.

Exposed May 1 to May 2 to CCRK 5260N. AI bred May 3 to JLSL Easy Rider 9160G. Exposed May 4 - July 1 to LRSF Blitz L236. Preg tested 70 days on July 7. Ledgerwood will cover the costs to DNA parent verify the calf.

AWB TWIN VIEW GRACIE GAYLE 84N

CDGV189404

AWB84N

22-Feb-25

It just wouldn't be Function and Finesse without a high class Gracie Gayle on offer. We firmly believe 84N is among the most unique and elite Gracie Gayle's we have produced so far!

84N is next in a long line of Gracie Gayle's who epitomize our work. She, quite simply, is our ideal female. She's so attractive and extended in her front third with a beautiful shoulder design before she explodes into a massive center body. Udder and foot quality on 84N are second to none and the Gracie Gayle family have made the mark as outstanding mother cows. We anticipate Dunbar to further entrench the maternal quality we already know exists in this one. We did discuss the idea of halter breaking her for the fall because we have no doubt she'd be competitive. With that in mind, we will maintain access to a flush on Gracie Gayle 84N at your convenience and our expense. We just can't live without her!

AI bred April 19 to IVERS Alpine L351 ET. Exposed April 20 - June 12 to IVERS Alpine L351 ET. Preg tested safe to AI breeding.

THE FUNCTION AND FINESSE FUTURITY SCHOLARSHIP

Excitement for Gelbvieh cattle is growing and we are so excited to see so many young people taking an interest in the breed! The Junior Gelbvieh Show this summer is a great example of how bright our future is. As always, the Function and Finesse group supports any junior member interested in being a part of this breed and we are excited to continue The Function and Finesse Futurity!

Females of any age purchased through Function and Finesse are eligible. Females out of past Function and Finesse purchases are also eligible. All females must be shown by 4-H or Junior members 21 years of age and under and owned by the junior member or their immediate family. You can earn points at any event you attend.

Points can be earned each time an animal is shown from October 15, 2026 - October 1, 2027.

Points are awarded as follows:

- 5 points each time you show
- 2 points if you win your class
- 1 point if you send us a picture

Any animals shown at the Canadian Junior Gelbvieh Show in Swift Current next summer will receive double the points for that event only.

The winner will be announced prior to Function and Finesse 9.0 and will receive \$1000.

FUNCTION AND FINESSE GUARANTEE

Sale lots are DNA parent verified to both parents where possible and homozygous polled/black tested where applicable. Most lots will have Genomically Enhanced EPDs.

Sale lots proudly carry orange Gelbvieh RFID buttons

Sale lots have been managed under the guidelines of Verified Beef Production Plus

Sale females are backed by strong cow families

Rations for sale females have included a full mineral program.

Sale females have been developed to be fit, not fat. With them being developed together there is no need to push them to look better than other sale heifers. They have access to pasture and are kept active for longevity.

Driven. Dedicated. Dependable.
