# THB

# Welcome

## TO OUR 23<sup>rd</sup> ANNUAL BULL & FEMALE SALE

It's our pleasure to welcome you to our 23rd Annual Bull & Female Sale here at High Bluff Stock Farm. As always, we take great pride in offering cattle that reflect the quality, consistency, and performance we've worked hard to build into our program over many years. The beef industry continues to present strong opportunities, and with solid demand across the sector, we're pleased to share this year's offering with fellow cattle producers.

While we did not exhibit cattle this past year, we were honoured to stay actively involved in the show industry through judging opportunities across British Columbia, Alberta, Manitoba and Ontario. We value the chance to work alongside breeders across the country and believe these experiences continue to sharpen our eye, reinforce our breeding priorities, and strengthen our program at home.

As you browse through this year's catalog and every catalog going forward, you'll again notice the inclusion of HRJ prefix cattle, representing Johnson family genetics. Our HRJ and HBSF cattle are managed under the same principles, with a consistent approach to breeding, selection, and a shared breeding guarantee. You will once again see PAX Angus bulls in the sale from Tyler Digby - it's been great to add this Angus division to the bull sale - Tyler's bullpen continues to get better each year, if you are looking for an Angus bull make sure to take a look.

We're excited about the strong group of females on offer this year. Our Momma cow herd remains a point of pride, built around soundness, productivity, efficiency, and disposition. We expect our cows to wean big calves, maintain structure and longevity, and do it all with a quiet, workable attitude. Whether you're looking for a foundation female, a junior show prospect, or a future bull builder, we believe this year's heifer pen offers something to fit your program.

The bull pen is really impressive to walk through, we're proud of what we've put together. We've focused on building a consistent, uniform set of bulls with depth, thickness, hair quality, and functional conformation. Disposition continues to be a top priority, and we're confident these bulls will be valuable, dependable additions to your operation. Our pens are always open for viewing, and we'd be pleased to walk through the bulls and females with you ahead of sale day.

To our customers, thank you for your continued support—we sincerely appreciate the opportunity to work with you. To our family and everyone who helps behind the scenes, thank you for everything you do. We're grateful to make our living doing what we love and look forward to visiting with you throughout the sale season.

The tradition continues,

*Erin*

**SALE DAY WEIGHTS** will be available a couple days prior to the sale.

**BREEDING GUARANTEE** All bulls are fully guaranteed to be a breeding bull as outlined by the Charolais, Simmental and Angus Breeder's Guarantee Guidelines. If a problem occurs with your purchase, please notify us as soon as possible and if needed we will get you a bull of equal quality to cover your cows that season. Any bull or female that does not prove to be a satisfactory breeder if in healthy condition may be returned to High Bluff Stock Farm at the buyers expense. The seller will have the right and the privilege of six months from date or return to prove the bull or heifer a breeder. Should the animal prove to be a breeder, they will be returned to the buyer and the matter will be considered closed. If the bull fails his semen test or proves not to be a breeder we will give you a sales credit or replace your bull with another bull of equal quality or lend you a bull to make sure your cows get bred. No guarantee is given that semen collected from a bull will freeze. If the female fails to get pregnant, the seller may either provide a sale credit to the buyer or replace the animal with another of equal value.

**HERD HEALTH** The health of our herd is excellent. We are committed to raising cattle the best we can in the environment we have. Animal health, temperament, fitness and longevity are important to us and key to our own and our customers success. We work with a nutritionist to make sure all our cattle's dietary needs are met. Our bulls and heifers are developed on a TMR ration to promote growth and longevity. We have a complete herd health and vaccination program with Roblin Vet Clinic. Prior to the sale all bulls and heifers will have been poured and vaccinated with Bovi Shield Gold and evaluated by a licenced veterinarian.

**TERMS & CONDITIONS** The sale will be conducted under the standard Transcon Livestock Corp Terms & Conditions. Copies will be available at the settlement desk.

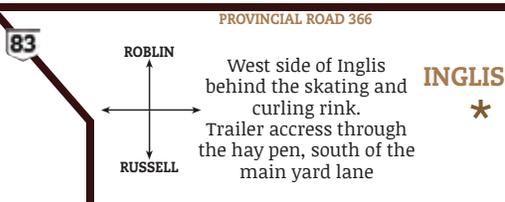

**PHOTOS & VIDEOS** Pictures taken by High Bluff Stock Farm Crew Videos taken by John Wright - Wright Livestock Marketing Services Videos can be found at cattlevids.ca

**RIGHT TO SEMEN** We reserve the right to draw semen on any bull in the sale for in herd use, at our expense and the buyer's convenience.

**DELIVERY** Free delivery to your farm free of charge up to 200 km. Other destinations can be arranged at cost. We will Deliver bulls from March 16 to May 1st at our convenience. If you are unable to take your bull when we are going by you can pick up your bull when it works for you. Board free until May 1st or until we are able to deliver your bull- whichever comes first. \$5/day after that. All animals left at the farm after the sale must be insured. The High Bluff team will provide the best care we can to the animals that stay on the farm but all bulls and females become the risk of the buyer once sold.

**DISCLAIMER** We take every effort to make sure everything in the catalog is correct. If there is any discrepancy between the catalog and breed association websites, the website is correct. All descriptions are opinion.

## WELCOME FROM TRANSCON LIVESTOCK

CONSISTENCY, CONSISTENCY, CONSISTENCY!!!

As it would come to be expected, the Charolais bullpen at High Bluff is deep with hairy, thick, sound, big testicled and QUIET candidates that offer and envelope multiple excellent sire groups. The many brother acts included have sires representing their fantastic in-house bull battery and very interestingly, sons of past high sellers that they have been able to use back in the herd too! Of course that only strengthens the bottom side of their pedigrees stacking in more of their own good cow families to the packages. Thus, the consistency!

The Simmental section of the bull sale, is competitive, especially in recent years, with their "white" counterparts. They too offer the attractive consistency feature of brothers sired by notable past sellers with a dabble of A.I. sire codes included. Again, there's lots of proven cow family strength in their DNA.

The Black Angus bulls, offered by Donna's cousin, Tyler, are still the "new kids", but are an ever improving dimension to the bull sale. The strongest group ever are presented this year, without a doubt, and different options for different programs and utilizations exist.

As you walk through the heifer offering, it becomes very obvious they have been sorted very thoroughly and with intent to create an incredible uniform group, fitting well with the whole sale's them of CONSISTENCY! Herdbuilding opportunities exist in volume here.

Certainly feel free to call on any of us at Transcon Livestock for any appraisal viewpoints you may have. We are, of course, as always, available to bid and buy in your absence. This free service has been used for decades very successfully by many cattlemen and is confidential to you. It's conflict free, as we are never paid bonus commissions by the seller nor do we own these type of cattle, so we won't be bidding against you for our own benefit. Simply call any of our cell phones listed, we'd love to talk cattle.

It's a "Family Tradition",

## WELCOME FROM BOHRSON MARKETING

It is a pleasure to welcome you to the 23rd Annual Bull Sale for High Bluff Stock Farm, proudly operated by the Jackson family. Reaching this milestone is a true testament to the consistency, integrity, and dedication that have defined this program for more than two decades worth of sales.

The Jackson family has built their program around the fundamentals that matter most, performance and strong maternal value. Their breeding philosophy focuses on producing a balanced, functional set of cattle designed to excel in real-world conditions. Depth of body, natural thickness, hair, and eye appeal are trademarks of the High Bluff program, but never at the expense of structural integrity. Sound structure and foot quality remain at the forefront, ensuring longevity and durability in both the pasture and the breeding pen.

This year's offering of Charolais and Simmental bulls once again reflects that disciplined approach. The bulls are powerful yet practical — built to add pounds, enhance maternal strength, and maintain the structural correctness commercial cattlemen demand. The fact that High Bluff sells many bulls to lifelong repeat customers speaks volumes. That loyalty is a direct reflection of both the quality of the cattle and the character and service of the Jackson family behind them.

Complementing the bull offering is an outstanding set of Charolais and Simmental open heifers. These exciting females provide a genuine look into the maternal strength behind the program, as many are siblings to the sale bulls. They represent the consistency, udder quality, capacity, and structural soundness that support this entire offering, giving buyers added confidence in the cow families at work.

Also featured are eight Black Angus bulls from Paxhill Farms, offered by Tyler Digby. This group adds further depth to the sale and provides performance-driven Angus options that fit well alongside the High Bluff program.

We encourage you to reach out to anyone from High Bluff Stock Farm to visit about the cattle and discuss which bulls or females best suit your operation. We sincerely hope you can join us on sale day to evaluate this impressive set in person. If you are unable to attend, please contact any member of the team listed in the catalog from Bohrson Marketing, as we would be happy to assist you in any way possible.

Best regards,

JJ is a nicely made bull who is smooth made but well muscled and soft sided. He has a tremendous amount of depth of body and natural thickness. He has that herd bull presence, lots of nuts and a ton of hair and a nice big foot under him. An extra bonus is he is about as good-natured as they come. JJ is backed by some of our favourite dams. 942D "Donny" is an easy keeping big ribbed female with a good disposition and udder. 176W was one of our nicest made, youthful looking, most consistent, top-producing cows in our herd. *Co-owned with MJT Cattle.  HRJ Limitless is the 2023 Players Club Champion that surpassed all expectations with his first calf crop; from high selling females to high performing bulls he has so much to offer. He offers exceptional length of body combined with a bold, correct muscle pattern, and he consistently passes on an attractive, high-quality look to his calves. Limitless is known for producing high-index, growth-driven calves that perform from an early age and continue to excel as they mature. Backed by the elite and time-tested Paris cow family, Limitless delivers reliability, performance and style—making him a powerful genetic asset. Thank you to our good friends at Wilgenbush Charolais for purchasing Limitless and allowing us to use him extensively in our program. *Homo polled, PAF*

Deputy is a heifer bull that has been successfully used at Johnson Charolais for 6 years and HBSF for 4 seasons. What I first noticed about the Deputy sire group was the consistency in their growth, hair, disposition and was impressed with the weaning and yearling weights of the sire group. First calf heifers that can raise off-spring that can compete with what a mature female can raise is no small feat! Deputy consistently sires calves that are the right size and shape for heifers. The Deputy females in production can really crank- they have raised some of the top end bulls in this years sale. Homo polled. **PAF**

**CE 12.1 / BW -0.9 / WW 69 / YW 125 / Milk 21 / MCE 10.7 / MTL 56 / TSI 274.13**  
National has been a pen favourite with visitors all winter. He's loaded with hair, strong topped and long spined with a balanced, attractive look from every angle. Built with substance and quality, he represents the consistency, maternal strength and practicality the Deputy cattle are known for. His dam is a beautiful Ballyhoo female. We're excited for the Ballyhoo females in production- the way they look and the way they crank has us thinking they will be raising cattle that top the market for years. **Age of dam- 3, HOP**

HIGH BLUFF MISS RED MAJOR 111C

CE 0.8 / BW 3.7 / WW 59 / YW 108 / Milk 23 / MCE 6.6 / MTL 53 / TSI 254.69

Arguably the top red factor in the pen, a person will cover a lot of miles to find a red factor bull of his type and kind. Next Level is out of a tank of a red cow that is good uddered and good footed that goes back to the proven Red Major cow family; known for their correctness and longevity. This rascal is heavy haired, wide topped, sound on the ground with a style and presence that is hard to beat. An exciting outcross red factor herd bull that is "Next Level."

Legend is a Walk the Line son from a Driller cow that has clicked well with our herd. Wanda 11G is a big, beautiful, quiet female with a good udder. We sold Legend a couple years ago to our good friends at Triple C Charolais. The next year they came back and bought his full brother as our high selling red bull. Lucky for us this year she has a Walk the Line female beside her. Our Walk the Line females in production are exceptionally beautiful females. Whenever we have crossed Walk the Line with Driller it has worked exceptionally well. Last year we had no Legend heifer calves, this year we're glad to have a few on the ground. **HOMO POLLED, NON DILUTER.**

We first saw Ice Man alongside his dam in Brandon in our good friends the Barnett's stall and were intrigued by the good looking blaze bull calf with the beautiful momma cow with a flawless udder beside him. We are really happy with the first set of Ice Man calves for offer and have plans to use him again extensively in our 2026 breeding program. He worked well on a wide variety of females, and has sired a strong set of both bulls and heifers. Knowing what his dam looks like we're excited to watch the Ice Man females develop. **HOMO POLLED, NON DILUTER.**

We were looking for a bull to AI our Simmental females to and Slider was highly recommended to us. Slider has exceptional calving ease, and at first we worried that the calves were too small for a Manitoba winter. They proved us wrong as they were hairy and lively little things with lots of get up and go that did just fine through the cold snaps. There is a good reason Slider has been so heavily used in the industry; he sires stylish calves with a good mix of calving ease and grow. **HOMO POLLED, HETERO BLACK.**

**HOMO POLLED RC PV 100K** Low set with presence and added muscle, Next In Line is stout made and balanced in his build. His dam is a beautiful Walk The Line female with a near-perfect udder. We feel he could confidently be used on heifers or second calvers while still adding muscle and shape. **Age of dam- 3**

**PAXHILL FARMS BLACK ANGUS**

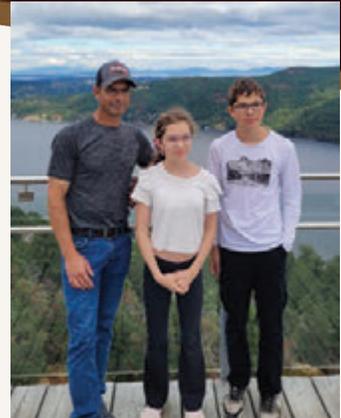

Tyler Digby  
 Dropmore, MB  
 (250) 681-3270  
 paxhillfarms@gmail.com

Welcome to the Paxhill Farms Black Angus bull offering for 2026! This is my fourth year of having the great fortune of being able to sell my bulls at the High Bluff sale and words can't express my gratitude towards the Jackson's for this great opportunity! The amount of work that goes into putting on a sale like this would be prohibitive for me to do on my own, so thank you Carmen, Donna and family for allowing me to live this dream!

This years offering includes bulls sired by the power house Ellingson Turn Key 0170, the calving ease specialist Ellingson Badlands 0285, the curve bending Pine View Mogul G241, and a really nicely balanced, multi trait Peak Dot Lancaster 26G son that I purchased from the good folks at Glasman Farms. Interesting note on Lancaster, in the spring of 2025 we had an unexpected, and unknown, AI flop and this poor two year old was the clean up bull for the synchronized AI cows.....he had 56 calves born in 2025, so needless to say, this bull knows how to settle cows.

Please accept my invitation to come to our farm to view these bulls, their mothers, siblings and half siblings. I am proud of the herd that calls Paxhill Farms home and am happy to show them off and discuss how they could fit into your program over a cup of coffee.

*Tyler*

When walking through the pen your eyes just can't help but being drawn to this bull with the undeniable herd bull confidence he exudes. This Badlands son is off a picture perfect Turn Key daughter with a great disposition and tidy udder that exemplifies what we have come to expect from the Turn Key females. From a modest 78 pound birthweight this fellow exploded to have the second highest weight when weaned on Oct. 15 and these real world numbers match his curve bending EPDs. He has excellent depth of body and hind quarters with a bit of that extra Turn Key length. The combination of the proven calving ease of Badlands and Stature with the frame and performance of Turn Key and the Enchantress cow family should make this a high performing heifer safe bull. **GESTATION: 278 DAYS HEIFER SAFE**

Here is a larger framed bull off the curve bending Mogul, starting off with a 74 pound birthweight he quickly caught up with his peers to wean off as the third largest in the pen. With Baldrige Isabel Y69, one of the top cows in the Angus breed on the top side of his pedigree, and Southern Charm/Excitement on the bottom, maternal greatness in a larger framed package from this bull's progeny is a given while keeping the birth weights down. Due to the larger frame size throughout this pedigree, I would recommend this bull for larger framed heifers and cows. **GESTATION: 274 DAYS**

Check out the centre body mass on this Turn Key son! Right from his early days in the calving pen he has been the thickest, deepest, fastest growing in the pen and his own numbers match his breed leading WW and YW EPDs. That growth comes from a combination of his genetics and his maternal powerhouse Southern Charm dam. As a heifer she had a set of twins, raised them both to end up in my replacement pen, and still caught on her AI service to be one of the first to calve the next year and grow him into the bull you see today. Without missing a beat, she caught again to her AI service and calved early this year. Based on that and how much we like the Turn Key dams, I think this is definitely one of those 'keep every heifer' bulls while enjoying the bonus paycheques from the big boys he will sire. **GESTATION: 277 DAYS**

One of the reasons (and there are many) that I really like the Turn Key offspring is the long, deep body they possess in a really nicely balanced moderate to large height frame. Turn Key 11N is an excellent example of this build. His dam is a beautiful larger framed cow with added calving ease from the Force/Distinction combination, however I would still recommend this bull for cows due to his own birthweight until you see how they come. In my experience the Turn Key calves come very easy for their birthweight due to their length. **GESTATION: 281 DAYS**

In 2024 while on the search for my next herd bull, I took a walk through the pen of bulls at Glasman Farms and was really impressed by how good and consistent their Lancaster offspring were. Two years later walking through my own bull and heifer pens I see that same consistency in the many positive attributes this Lancaster son passes onto his offspring. This bull displays the deep side, mild temper, great hair, square feet that we have come to expect in a thick, moderate, easy doing package that he got from his mother. Recommend for cows. **GESTATION: N/A**

Normally when the calendar page flips to March, the rubber bands come out for all the bull calves. When I first saw this calf, I began to contemplate just how special the Lucy cow family combined with Lancaster might turn out and we slipped the little green ring back into the tool box. Watching this bull develop into this heavily muscled, early maturing, big crested fellow with that herd bull look to him I'm sure glad he was left intact. He just needed to give his pen mates a month or two head start so he didn't outgrow them as he sported the highest average daily gain of his contemporary group.

Natassia is true sale feature! Every year when it comes to adding females to the sale there is one that you just grit your teeth and say "she's up for grabs." A female that we would be ecstatic to have in our own herd and feel that she has all the goods to go on and do great things. The overall mass and explosiveness with her type has the ability to create breed leading sons yet she has that highly maternal look to create females to build a herd around. Sound from the ground up and near flawless in motion. Fun fact- the first "Natassia" female was HBSF 120N a Hank x Jive female who was shown by Fawn at CCYA where she was Reserve Champion Female. Now Natassia is one of our most well-known cow families.

Havana is one elegantly constructed female that carries tremendous length of spine and structural correctness. Are far as the Limitless daughters go it's hard to part with even one. We are very excited how well Limitless bred for us. Havana's dam had 9 registered calves in 9 years, all first cycle.

Madonna is the result of mating maternal power and calving ease with ruggedness and performance. 183N's dam is powerful half French cow with a perfect foot structure that come from the great Gilliland Dispersal. We believe that the Kudos females will have a bright feature with Dandy 960G in their pedigree. Dandy 960G has produced some outstanding sons and finally this year had natural born heifer.

This is fast becoming one of the most consistent matings on the ranch. Deputy has been used extensively on heifers for the last 6 years and has surpassed all expectations. If you look through the bulls you will find that some the top bulls in the pen come directly from Deputy daughters. Schatzi comes from a great cow family that produces time after time; her grand dam 5E is the mother to Lot 14 (44N) . She has great depth of body and over all softness about her.

Breeze is a heifer that a junior could really fall in love with, have some fun with and come out with a solid cow in the end. The Breeze cow family has stood the test of time and worked. A full sister to Breeze sold last year to Jess Hendriks where she was so dearly loved and even made an appearance at the Toronto Royal. Having videos and pictures of heifers we have sold sent to us always makes our day. This heifer should lay down a beautiful udder, and has the muscle mass to produce top end bulls.

A true sale feature. 181N is a heifer that as she matures is becoming harder and harder to part with; she very well could be one of the most interesting simmental heifers we have ever had on offer. Her phenotype is rather remarkable; not often do you get a heifer that is so elegant and extended through her front yet has the big swooping middle in her. Lashes is strong topped, great structured, fluid on the move and has a unique pedigree. We feel 181N could have a bright future with a junior in the show ring.

**Retaining the right to a future flush at the buyers convenience and the sellers expense.**
