BRED HEIFERS // HEIFER CALVES // COMMERCIAL FEMALES

# welcome from **BOHRSON** marketing services

It is a pleasure to be part of an event that continues to grow in quality, reputation and enthusiasm each and every year. The Ladies of the Peace Sale has become a tremendous showcase of the cattle and breeding programs throughout the Peace Country, bringing together a group of dedicated breeders who are committed to producing cattle that will make a lasting impact. This year's offering is the largest to date, and the depth of quality represented throughout the catalogue speaks volumes about the programs behind it and the commitment of each consignor to bring their very best to town.

The strength of this sale lies in the kind of females being offered. From powerful, high-quality purebred heifer calves and bred females to a strong selection of commercial bred heifers, there is something here for every type of cattle producer. Maternal quality, sound structure, good feet and udders, fertility, disposition and the ability to raise productive calves are priorities that continue to drive these programs forward. Whether you are looking to invest in the next generation of your purebred herd, acquire females with donor potential, or add functional, dependable replacements to your commercial operation, this offering provides an outstanding opportunity to do so.

It is also exciting to see the combination of proven cow families and established sires alongside the next generation of genetics that are creating enthusiasm throughout the industry. These are females backed by generations of selection and development, bred with the intention of building productive, profitable cow herds for years to come. With the quality of cattle being offered and the continued strength of the beef industry, there has never been a better time to be selective and invest in the kind of females that can move a program forward.

We would like to sincerely thank all the consignors for their continued confidence in this sale and for the time, effort and commitment it takes to assemble an offering of this calibre. We also extend our appreciation to the buyers, bidders and cattle enthusiasts who support this event and help make the Ladies of the Peace Sale such a success. The dedication of the breeders involved is what makes this sale special, and we are proud to work alongside them.

We invite you to join us Friday, November 20th, at Evergreen Park in Grande Prairie, Alberta, to evaluate this outstanding group of cattle firsthand. For those unable to attend in person, online viewing and bidding will be available through DLMS. Please feel free to contact any member of the Bohrsen Marketing team with questions, for additional information or for assistance with your selections.

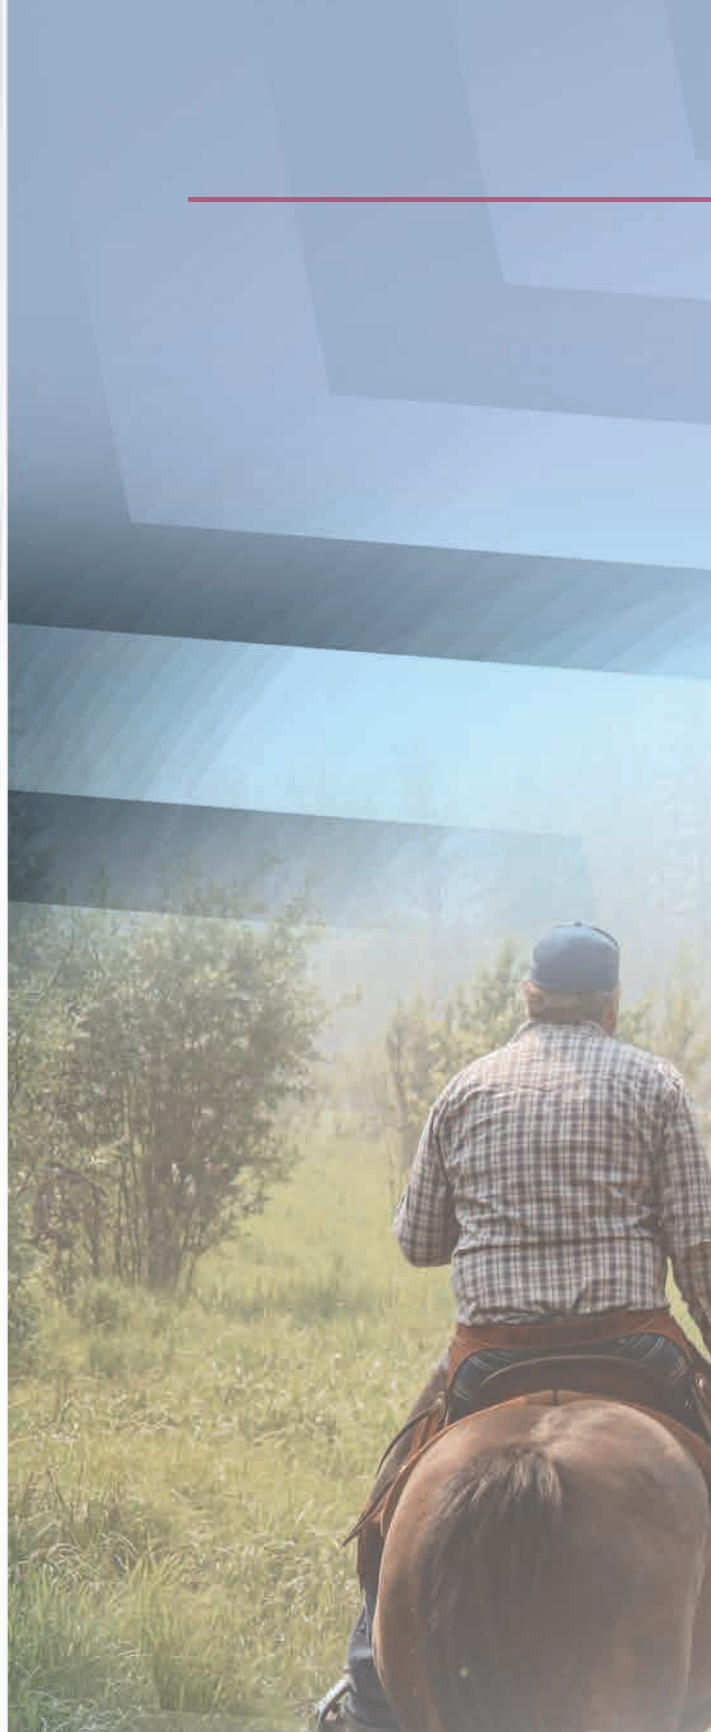

We look forward to seeing you in Grande Prairie and wish all consignors the very best of luck on sale day.

Best regards,

*The Bohrsen Marketing Team*

# WILLOW CREEK simmentals

welcome

We would like to welcome you to the 5th annual Ladies of the Peace sale. Each year we have seen consistent growth throughout the sale. The quality of cattle has got better year after year and the prices have reflected that. We feel that this year will be the strongest group assembled to date for LOP, which we thank our fellow breeders for digging deep into there programs to bring such a quality set of cattle.

It has been an exciting year in the Peace Region to be a cattle producer, we have seen above average crops which has led to an abundance of feed for most producers, something we have not seen for quite a few years. We feel this is with out a doubt the strongest group of females that we have brought to town. We have always really emphasized on the foot and udder quality being our top priority, along with structural soundness and productivity. Our offering this year really embraces these philosophies. We have something for everyone in this group with multiple donor prospects right from the heart of our embryo program, heifer calves that are show prospects and bred females that are just going to produce high quality calves for there new owners. We have dug deep in our program for this offering and are very excited to share them with the industry. Again our sale will be managed by the Bohrsen Marketing crew, so we encourage you to reach out to them if you cannot attend the sale. We will also be on DLMS for online bidding as well. And like always, we really enjoy showing off our cow herd, so we encourage anyone to swing by for a visit and tour if you happen to be in the area. See you on November 20th at Evergreen Park.

## WILLOW CREEK SIMMENTALS

Mike & Mari Klassen  
Colby & Tiffany Klassen  
Crooked Creek, AB  
Mike 780-832-7343  
Colby 780-832-6714

What an opportunity to acquire genetics off of the very best cow in our herd. Up until now we have held MAF Linette 101C relatively exclusive trying to build up an embryo inventory and accumulate as many daughter for the herd as possible. 101C just flat out gets it done no matter what the cross is. Only because 101C is so fertile are we offering these embryos for sale. Over 3 flushes so far she has averaged 37 embryos on conventional flushes. When you get to analyze 101C the main attributes that really jump out are the udder and foot quality that she has really passed down to all of her calves. The structural soundness, amount of hair, and temperaments are other things she has consistently passed down. Her production continues on through the progeny as many daughters are among our best producing cows with a daughter also entering the donor pen. Daughters of 101C have raised our two highest selling bulls for \$42,000 and \$30,000. The matings are relatively proven and will certainly prove there worth in a short amount of time. The cross on No Limits will speak for itself sale day with the pair of flush mates selling. If you get a chance to stop by for a tour beforehand, i would say the best bull in the pen is a full sib as well. The Dunlop cross is extremely exciting, we did this with the plan to create some black Dunlop calves. This creates some very outcross black genetics and gains the hype of Dunlop in the process. Another one of the top bulls this year is her natural Dunlop son. Then the Captain Blaze mating provides some tried and proven with the Captain Morgan in the back ground and stacks up some of the breeds top cows. We have two very good full sister daughters milking that are very good, and we sold a full sib brother 2 years ago that commanded \$20,000. Take advantage of this opportunity and enhance your herd with a cow family that has certainly proved there worth here at Willow Creek.

BREEDING INFORMATION FOR 105N...AI BRED TO ULTRA TOKYO ROSE 17M ON  
APRIL 7. (SAFE) Exposed Circle G Marquis 38M from April 10 to May 25.

**FULL SISTERS HOMO POLLED & HOMO BLACK TEST PENDING** For the first time ever we will be offering a daughter of our number 1 donor cow, Linette 101C up for sale. And what a feature lot this pair will be. For years we have been very hesitant to let any Linette daughters go as we have been trying to add as many to our herd as possible. With 101C being so fertile and flushing so well, we have built up a large embryo inventory and we thought it was time to let some go. We have never had a cow that has consistently raised this many daughters that just flat out work. Every daughter we have ranks right up at the top of the herd, and they themselves produce just as good. 2

separate daughters have raised our two highest selling bulls to date, the \$42,000 Legendary bull this past spring, and the \$30,000 Popeye son the spring before. Not to mention all the other high sellers in between from 101C herself. The flush to No Limits has been exciting to say the least. These are true performance type cattle that add size, capacity, foot quality, and udder quality (wait until you see the udder that 105N is setting up). We have a pair of very impressive black baldy full brothers to these in the bull pen this year and they are impressive. 105N brings added size, thickness and dimension while maintaining impeccable udder quality and foot structure, something 101C has passed along to all of her progeny. 105N has been our favorite black female in the 2025 calf crop from an early age, and her service early to Tokyo Rose only adds to the excitement as his first progeny are taking the industry by storm. Her first calf may just very well pay for herself. 998P might just be the very best 101C daughter to date. She is impressive from every angle. Like her sister, the foot and udder quality is very apparent, and she has an abundance of hair. We are very confident that there is a good chance that these heifers can go on to become donors in there new owners herds. We feel we have become known for producing big, performance black bulls up here in the Peace Region, and its these females like this that have built that reputation. It is tough to let this type of quality heifers go but we have always remained committed to offering our best to keep LOP moving forward and this duo of flush sisters are truly sale features!

BRED HEIFER

#### HOMO POLLED TEST PENDING

These Dunlop daughters are really peas in a pod consistently. Dark red, stout made, extra length, sound structured, really I guess just a lot like Dunlop is himself. We have always believed that the strength of Dunlop will be his daughters, and as they mature here we still really do believe that. 13P is really stout made, big topped and heavy muscled, excellent foot structure, lots of hair, and very docile. Its hard to let these good dark red Dunlop's go, especially out of really good cows.

I will definitely sound like a broken record here with another real dark red, long spined Dunlop daughter that has a real presence to her. We really appreciate 34P for the overall completeness, rib shape and structural soundness that she exemplifies. 34P would be a full sibling by blood to our third high selling bull last spring that commanded \$24,500. As stated in the footnote for 20N, this Dunlop x Defender combination has really clicked.

#### HOMO POLLED - HETERO BLACK

I am not sure if we have ever offered a more intriguing heifer for sale then Carievale 345P! The undeniable quality, the whose who in the Simmental breed in her pedigree, the EPD profile, and the Potential. When your pedigree features the worlds best donors in Sage, Sammie, and Not Just a Flirt 404B, then i guess the resulting calf should be pretty phenomenal. We purchased her dam out of the KT production sale a couple years back as the lead off and high selling Simmental bred heifer with the sole intention of her being our next big donor. With her first group of ET calves and a very impressive natural calf we feel she is well on her way to achieving this. When we flushed her Lethal Weapon the plan was exactly this, stacking as many of the breeds best donors in one pedigree to build a group of females to build our program around. Carievale 354P has that "cowy" look. It is very hard to make them with any more middle third, and overall capacity. She does this while still be elegant through her front end, beautiful headed, fluid in motion and structurally sound. We feel she has as much future donor potential as any female ever raised here at Willow Creek. What a way to highlight the 5th annual Ladies of the Peace Sale.

from some great connsignors AT THE BACK OF THE CATALOGUE

**HOMO POLLED TEST PENDING** Every year we remain committed to consigning high quality females to the LOP sale and 20N is exactly that. She is a dark red, awesome footed female that has the classic Dunlop stamp with added length and capacity. We literally cannot wait to get these Dunlop daughters into production. This cross of Dunlop on these dark red Defender daughters were some of the most popular bulls in the bull sale last spring, and i expect the same here. These are the type of females that have really pushed our program forward the last few years. Bred up early to Ease makes things even more enticing here.

They do not come much more easy doing then 2N. This powerful Dunlop daughter is a high capacity, big barrelled excellent footed female that's going to be a big time bull producer type. We can go on for days about the consistency and quality that Dunlop adds to his progeny. 2N is out of a hard working, cherry red Playmaker daughter that is a graduate of this very LOP sale ring that came from our good friends at Albrecht Farms. We are pretty sure she stuck to her service to Ease, as we never seen her repeat but the vet said to close to call. This could make for a very quick return. She make lack part of her ears but makes up for it in quality.

**AI BRED TO WBC EASE 6L APRIL 7.**

When sale day rolls around i feel that 87N might be one of the most popular females in the barns. This powerful red baldy heifer is attractive from every angle and really commands multiple looks. She was one of our favorite heifer calves last fall and has always kind of been slated to be one to be features for the Dunlop sire group. 87N is ideal sized, comes with a great amount of depth and capacity, stoutness and always had that thick haircoat. The Petula cow family has been productive for many years here at Willow Creek and have become known for there impressive udder quality. We absolutely love these Dunlop females and 87N might just be one of his best ones yet. Her mating to Circle G Marquis should prove to be a quick return. An average picture of a true sale feature!

A farm favorite right from the start. This red Elite daughter has always had this immense muscle shape, attractive skull design and ideal foot structure. We are really starting to realize that the true impact that Elite will have on our herd will be through his daughters. Elite had really seemed to improve foot and udder quality, two traits that we really strive for. With 85N being a part of the Syrup cow family, this should instill some highly productive traits. 85N just screams "Bull producer". She again is bred to the impressive Circle G Marquis bull, a cross that should really make a big time calf. If you get a chance to tour before the sale, we have a very impressive Marquis bull in our bull pen. When you see him, it just gives you the glimpse in to how good these Marquis cattle might be.

Ai bred to WBC Ease 6L April 3.

This Squeak cow family has been very productive for us, raising numerous high end feature bulls through the bull sale. It was also a Squeak female that was the lead off heifer and high selling heifer calf through the LOP sale ring last fall. Then when you add in the great KWA 14X cow from Shamrock, it really does prove the potential that 114N has to be a big time producer. 114N actually lost her dam at just 3 months old and was orphaned but she was able to keep up with the rest and you would never know. Her dam was the our very best female in her age group, so losing her really hurt. 114N is again bred to the Circle G Marquis bull, who we would argue has been the best heifer bull we have used in a number of years. As you will notice because of this we bred most of our heifers to him this year.

**EXPOSED TO CIRCLE G MARQUIS 38M FROM MARCH 23 TO MAY 25.**

**HOMO POLLED - HOMO BLACK TEST PENDING**

This is the largest framed, longest bodied female in the offering. She hails from the very good Lisa cow family, this is the same cow family that produced the \$21,000 LOP high seller last year. 70N is actually a maternal sister to the dam of that high seller female. This cow family has always been very strong with feet and udders. This is a female you can breed a lot of different ways and maintain some added size. She is bred nice and early to our super star calving ease bull, Circle G Marquis. This past winter we calved out 14 heifers bred to Marquis and they all were born unassisted and we were very impressed with the calves, hence why we bred 90% of our heifers ack to him this spring.

**EXPOSED TO CIRCLE G MARQUIS 38M FROM MARCH 23 TO MAY 25.**

Observed bred on April 1 (SAFE)

#### HOMO POLLED & HOMO BLACK TEST PENDING

We really dug deep into the pen this year to offer some really good females right from our embryo program. This beautiful black baldy comes as a direct daughter of the highly productive Pashmenia cow that has really proven her worth since we acquired her in the Meadow Acres dispersal. So far to date we have sold 9 sons to average \$17,000. This includes 4 full sibs to 97N that have averaged an impressive \$19,750. We also have 3 full sisters to 97N that we have retained that we really like. The foot quality amongst this flush has been second to none. 97N is a moderate made, smooth and attractive made females that is sound structurally and ready to prove her worth. 97N was raised by an older poorer recip cow so she's always been a little more moderate then her siblings but the genetics will shine through and i feel like she will be a sneaky good purchase for her new owner.

**EXPOSED TO CIRCLE G MARQUIS 38M FROM MARCH 23 TO MAY 25.**

Vets feels due early January

# JAYDAWN farms welcome

Welcome to the 5th annual Ladies of the Peace female sale, we are honored to back again this year to join this great group of fellow breeders and friends. This sale brings to you some of the very best cattle that the Peace Country has to offer in both breeds and on the commercial offering as well. It is a very exciting time to be in the cattle industry with all facets firing all at once. It is great to see the enthusiasm not only in long time cattle ranches but from our youth as well.

We are very excited about this group of females that we have put together to bring to this sale, we feel our offering is a great representation of what our cow herd is built around. Sound functionable, easy doing low maintenance cattle that will go out and produce for a long time. We strive on fertility, good udders and docile cattle as we are super hands on with our program. The bred heifers are a powerful group that are either safe to the industries top end ai sires or bred to our walking bull we acquired from Tri K who has done an excellent job for us on his first set of calves. The heifer calves are a very powerful set of fancy heifer calves that represent some of the industries top end proven sires such as RF Caliber who is known for making tremendous females, Kingpin a bull we owned with Kathol Ranches who stamps his offspring consistently and the new and exciting upcoming ai sires who we're lucky enough to acquire semen on through exclusive semen packs, the \$170,000 KSR Legacy bull and the \$200,000 Wheatland Royal Merchant bull.

We are very proud of our offering for The Ladies of The Peace female sale, if you have any questions feel free to give us a call.

## HOMO POLLED AND COLOR TEST PENDING

Here is a very fancy fancy heifer calf that I'm really having troubles parting with. She is out of one of our favorite cow families on the farm. The Bobby Sox cow family stems back to Darcies old 4H cow that always produced top end calves both for the bull and heifer pen. The Night Hawk bull that we had so much success with was out of this cow family. This cow family is known for their excellent udders with perfect teat size and placement. The Bobby Sox females always add some extra chrome to give that extra flashy look, this heifer does have two small white socks on her back feet. This heifer is stout yet moderate made and weaned off her dam just shy of 1000 lbs end of September, these Bobby Sox females are bred to produce. Hang a halter on this heifer and have some fun on the show road or put her in your herd, either way you will be happy to have added her to your program.

#### HOMO POLLED AND COLOR TEST PENDING

This heifer has been a standout right from day one, stout made with all the natural thickness in the right places. She is very nice made up thru her front third with that typical Mattie skull structure that makes her so attractive. The Mattie cow family is known for their superior udders and mothering ability with gentle dispositions. This heifers dam is as good footed and uddered as they come, she is a super soggy made Broker female. We were a little late to the game with using Caliber in our program and wish we had used this bull earlier. He worked very well in our program, both the females and bulls are very complete in their makeup and have a ton of performance to them. This heifer will be around for the long haul and can be mated a lot of different ways dont pass her by.

#### HOMO POLLED AND COLOR TEST PENDING

Only because we have a full sister and her dam is bred back the same way does this heifer become available for sale. Check out this heifers pedigree she stems back to the Pepsi 61U cow that had as much impact on the simmental breed as any other female out there, mother of the Harvie JDF Wallbanger bull that went onto sire some of the breeds most used and influential bulls such as Captain Morgan. This cow family is in a lot of pedigrees in the simmental industry. Her dam is your typical Bentley female that is moderate and stout in stature and knows how to produce, this heifer weaned off at 955 lbs the end of September. This heifer calf is very complete in her makeup, very nice and smooth fronted that blends into a long smooth made female. Her full sister is dropping a really nice udder and we are very excited to get her calved out as we know how this cow family produces. This is one that should not be leaving the farm, but our commitment to this sale is to bring some of our best.

#### HOMO POLLED TEST PENDING

Here is one of the first Legacy females to be offered up for sale this fall. Another heifer that should not be leaving the farm, but her mother is bred back early the same way and because of our commitment to this sale we wanted to bring some of our best. When Legacy came up for sale we tried to buy him and had to settle for a semen pack when he commanded \$170,000 to purchase him. We purchased an exclusive semen pack and were sure glad we did. He worked extremely well in our program, he calved easy and calves have a ton of grow to them. Mated with our Rendezvous bull daughter 265K sure clicked, this heifer weaned off this smaller made female at 965 lbs the end of September. 265K is a solid red female that has a perfect udder and really good feet which the Red Doll cow family is known for. Super long and thick made this female is going to make a tremendous brood cow that is going to be a herdbull maker.

#### HOMO POLLED TEST PENDING

Here is a bigger framed dark cherry red baldy heifer out of the Wheatland Royal Merchant bull that created a lot of interest when him and his dam were on the show road in the fall of 2024. Royal Merchants dam is a big bodied beautiful made female that has a picture perfect udder. They were an impressive pair when we seen them at Farm Fair that year and went onto being the Grand Champion Simmental female at Agribition in Regina that same year. When it came time for Wheatland bull sale Royal Merchant commanded \$200,000 dollars and once again we were lucky enough to acquire an exclusive pack on this great breeding piece. 644P is out of a smaller made Bentley female that stems back to the Fleck Laguna cow family. This cow family is known for maternal traits, good feet and really nice udders. A little different twist to her pedigree and one that for sure will be around for the long haul.

We dug deep into the bred heifer pen when we selected 505N. This heifer is super deep ribbed and tanky made with a ton of good to her. She is a super quiet female and has been right from day one, a female that is very hard to part with. We are very impressed with how our Big Energy females are developing, he added some frame and performance to them and they appear to be developing very nice udders. 505's dam is a beautiful red baldy female with really nice udder that stems back to Capone, Wallbanger and the 16X Annie cow that we flushed a few years back. This cow family is known for being super fertile, raising big calves and their gentle dispositions. This female will be easy to find sale day, bred early to Top Tier for a January baby is just an added bonus.

#### HOMO POLLED TEST PENDING

Here is a beautiful dark red heifer that is out of our walking herdbull Maverick, a bull that we bought from Siroski Simmentals in 2024. Maverick has developed into an impressive individual with so much natural muscling and is super long made with really good feet. He calved super easy, produced excellent bull calves for us and well his females are looking to be developing into tremendous young females in the making as we get set to calve out his first daughters starting in January. This heifer is dropping a really nice udder, she is very complete in her makeup. She also stems back to Capone and the Annie 16X cow family making her very closely related to 505N in this sale.

**EXPOSED TO KKH STATE OF WAR 883M FROM APRIL 11 TO JUNE 2.** Observed bred April 30.

Vet felt she was 65 days plus on June 29.

**HOMO POLLED TEST PENDING**

Here is a double polled full fleck heifer that we own in partnership with Ten Bar Cattle co, they purchased half her dam thru this very sale a couple years back. 272K has grown into a big beautiful stout made cow with a ton of thickness. She is smooth polled, deep cherry red with tons of pigment right down to her hooves. She has a real nice udder with tons of milk, and stems from an extremely good cow family. Both 461B and 24M walked our pastures for years, big broody cows producing some of our best fullbloods. Mating 272K to Malone has produced this long stout made heavily pigmented bred heifer that is dropping a really nice udder. She has all the makings of making a great brood cow. We have sent out poll testing to see if she is homo polled. She is mated early to the homo polled bull Kuntz North Star a mating that sure is to ring the bell.

**AI BRED TO KUNTZ NORTH STAR ON APRIL 13 (SAFE).** Exposed to KKH State of War 883M from May 10 to June 2.

530N stems from the Charm cow family that has been extremely good to us over the years. This cow family came to us thru the Kimlake Farms dispersal years ago and have been top end producers both on the bull and female side. Really good feet, nice tidy udders and lots of maternal traits is what this cow family is all about. 530N is similar build to her ancestors, moderate yet stout made and just easy doing. She is also dropping a really nice udder just like her cow family that she stems from. Her sire Masterloc Kinsmen left us some really nice females that are just coming into production and we are excited to see what they can do. We also mated this heifer to the homo polled bull Kuntz North star, a mating that's sure to click

#### HOMO POLLED & HOMO BLACK TEST PENDING

546N is one of the first High Bluff Kingpin daughters to leave the farm. We purchased Kingpin along with our good friends at Kathol Simmentals a few years back from High Bluff Stock farms. Kingpin is super long and a smooth made bull that calved very well and left us with calves that have a ton of grow to them. 546N stems from one of our favorite Riddler cows, super tanky on a moderate frame with a really nice udder and lots of milk. Our Riddler cows have been some of our best producers on both the bull and female side. 546N is built just like her dam, moderate and stout made. She is very sound in her makeup and will be around for the long haul. She is mated to one if the industries exciting young herdbulls Ultra Tokyo Rose a bull who's first calf crop is garnering some attention already this fall. This mating with 546N could give a quick ROI with her first calf.

**AI BRED TO ULTRA TOKYO ROSE ON APRIL 12 (SAFE).** Exposed to KKH State of War 883M from May 10 to June 2.

# WILLOWDALE simmentals

welcome

Welcome to the 2026 "Ladies of the Peace" Annual Female Production Sale! On behalf of Willowdale Simmentals, we are thrilled to welcome you to this year's event in Grande Prairie.

For over 35 years, we have proudly raised, bred, and sold purebred Simmentals right here in the Peace Country. Our breeding program focuses strictly on producing homozygous polled animals built for longevity, excellent foot structure, high udder quality, and maternal strength. The select group of bred and open heifers we have consigned represent the very top tier of our red and black divisions—genetics designed to advance your herd.

Our current walking herdsire lineup includes:

- BlackGold Tycoon 194L (who has sired an outstanding first crop of calves mirroring his excellent phenotype)
- Young Mr Lockheed 61L (a powerful WFL Mountain View 4J son)
- IPU 58K Red Sochi 171M

We also diligently AI our heifers to industry-leading calving ease sires, including Mader Folsom Prison 66L, Can-Am 123H, and KWA Statement 31J. Every female in our offering comes from a consistent, birth-to-pre-breeding herd health protocol and the yearlings have been preg tested.

We invite you to take a close look at these Black Gold females and the rest of our lineup. Please feel free to stop by the farm anytime for a personal tour. Additionally, our annual bull sale will move to a new venue in Valleyview on March 21, 2027.

Thank you for your continued support, and we look forward to connecting with you in Grande Prairie!

Willowdale

### HETERO BLACK/ HOMO POLLED

- This solid black heifer is deep ribbed and has a very feminine front.
- The "Blk Summer" cow family has been an outstanding black cow family for us. We sold a Blk Summer heifer in last years sale to D.A.M. Livestock.
- 5N is moderate framed and developing a very nice udder.
- We have one crop of Red Sochi calves on the ground, all from heifers. He is an easy calving heifer bull.

**OBSERVED BRED TO IPU 58K RED SOCHI 171M ON APRIL 23.** Exposed to IPU 58K Red Sochi 171M from April 23 to May 30, 2026.

Service Sire IPU 58K Red Sochi 171M

#### HOMO POLLED

- Honey is a very soft made lighter red Epic heifer. She is long spined, deep ribbed with a great disposition.
- We bought her grandmother out of the Spring Creek dispersal sale. A big black cow with a ton of volume, along with a great udder and foot structure. 53E and 13L have keeper bulls this year in the keeper pen.
- Lots of calving ease and growth in this heifer.

**AI BRED TO MADER FOLSOM PRISON 66L ON APRIL 15, 2026. (SAFE)**

Exposed to IPU 58K Red Sochi 171M from April 23 to May 30, 2026. Vet's opinion she is safe to AI.

## welcome

Welcome to the 5th annual Ladies of the Peace female sale. Us consignors are proud to present another exceptional group of females this year; with this being the biggest offering to date. With cattle prices continuing to stay strong and feed levels across the peace country being plentiful, this is great opportunity to take advantage of such a great group of females.

Our Females have been selected right from the top of our replacement pen and showcase some of the best genetics in the breed. The females are on a full herd health program and will be vaccinated with Scour Guard prior to the sale. If you're in the LaGlance area prior to sale day, stop by to view the heifers, bulls & their dams as we would be happy to take you for a tour of the cattle. We Invite you all to come view the heifers Thursday prior to the sale and hope you can stick around after the sale for socializing and refreshments. Look forward to seeing you on sale day!

### HETERO POLLED/BLACK

This heifer has been a standout from a young age and just keeps getting better and better. An ET calf out of the great female maker himself, Spring Creek 56U has produced some awesome females over the years. 10N has an unreal set of feet under her, big and square with extra heel depth. We have 2 full sisters in production with another one selling to Tri K Cattle at last year's sale, this cross is the real deal. If you're looking for females to pass on feet and udder quality, these Ramona females are as consistent as it gets. Expecting big things from this female!

# FALLEN TIMBER farms

## welcome

Welcome! For the 5th edition of the Ladies of the Peace sale, we have decided to showcase half sisters from our up-and-coming walking sire Ultra Apollo 39M.

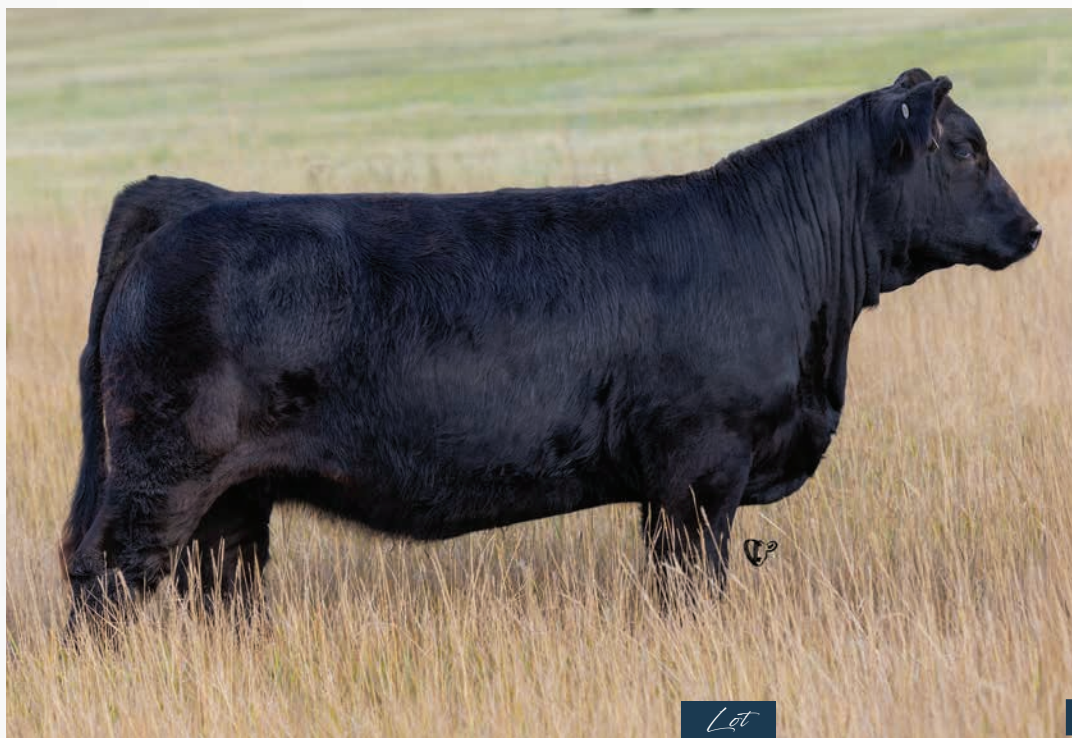

These open females were weaned end of September and were pictured 1 week off grass. Development with longevity as top priority is our mission, and to that effect these ladies are provided with an 8lb/day oat-pellet ration hand feeding, in addition to TMR pea/haylage mix. All FTF animals are on total herd health vaccination protocol with Express 5 VL5/Fermcon7 boosters and ivermectin applied at weaning.

Should you have any questions about our program or the females on offer please do not hesitate to contact us.

#### HOMO POLLED TEST PENDING.

Big time presence is how I would describe 388P. She commands attention in any pen, and was easy to find on grass this summer. Square feet, correct leg set, and a female that moves seamlessly, Onyx Aura is very complete in all categories. Stemming back to our good old Arizona female 452E and there again back to our old 33U cow, this girl possesses a rock-solid foundation female bloodline that is proven time and time again. Her sire Ultra Apollo 39M, is the real deal with identical physical attributes. Big time future dam here with an outstanding prospect to drop flashy replacement females that can compete, and also produce those powerful bull calves that just plain work!

#### HOMO POLLED TEST PENDING.

Power prospect right here. If you are in the market for a thick made, big middled broody female that doesn't give up an inch of conformation, take a long look at 392P. This big girl is a sweetheart to have around, and one that could go into the hands of any Junior showman and be fun, fun, fun! Passion goes back to a big broody MRL Daredevil female that carries a ton of middle and a big top, and keeps condition year round. The Apollo calves are all easy keepers, and this female has a bright future as one that should make the show ring a pleasure to be in, and provide functional progeny down the road.

If you're looking for a junior heifer with show presence or one to put right into the herd for production, Jackie can do both. This heifer is out of a powerful first calver from our friends Bill and Andie at Westway Farms. Sired by Woodford on the top side, leads to great potential in raising calving ease bulls.

It's her correct feet and legs paired with her natural dimension that can give you confidence to kick her out on pasture, while still being competitive in the ring at jackpots or even as a bred next year with her quality haircoat and feminine look. Take note of this eye catcher.

## simmentals

### welcome

Ashley and I are proud to be part of the Ladies Of The Peace Female Sale. Our operation, located near Young's Point, Alberta, is built around a focused herd of 25 purebred Simmental cows and 30 registered Quarter Horse mares. We place strong emphasis on sound foot quality, correct udder structure, and practical, functional cattle we are confident to stand behind. Raising our two kids, Hudson and Jillian, on the farm is a big part of why we do this, and we're grateful to share that lifestyle with them.

# POLAR farms

welcome

We are excited and proud to be a part of the 2026 Ladies of the Peace Female Sale. When we decided to be involved in this sale, we knew we wanted to bring some of our very best females, and we believe the group we have selected represents the quality and direction of our program.

We are a family-run Simmental operation located just outside of Dawson Creek, British Columbia, where we raise Red, Black, and Fullblood Simmental cattle. At Polar Farms, we take a great deal of pride in our cow herd and especially in having the best walking herd sires we can acquire. Each year, we work to strengthen our program by adding genetics that we believe will move our herd forward. Whether through herd bulls or bred females, we are continuously touring herds, studying pedigrees, and purchasing cattle that we feel can make a positive impact not only for us, but also for the ranchers who put their confidence in our genetics.

All five of the heifers we are offering this year are sired by MMWK LAMBEAU 64J, who was the high-selling bull at the Willow Creek Simmentals Bull Sale in 2021. LAMBEAU has done an outstanding job for us ever since, consistently producing the kind of bulls and females we are proud to raise and stand behind. His daughters have developed into attractive, functional females, while his sons continue to show the power, performance, and quality we look for in our bull pen.

These five heifers are bred to one of two exciting young sires. IPU 35L WARRIOR 5N was the high-selling heifer bull at the LaBette Simmentals Bull Sale last year and was a bull we knew we wanted to add to our program. The other service sire is NUG ROLLER 96N, another exciting young bull we purchased last year from the good people at Maxwell Simmentals. We have a lot of confidence in both of these bulls and are excited to see what they will add to our program. We believe these matings make an already strong set of females even more exciting.

The females we are bringing to the Ladies of the Peace sale are ones we are genuinely proud to offer. Some come from cow families that have played an important role in our herd, and several are the kind we would have been more than happy to keep at home. However, we believe that when you come to a sale like this, you have to bring your best.

We would like to thank everyone who has supported our program, purchased cattle from us, or simply taken the time to visit and talk cattle over the years. We invite you to stop by, take a look at our offering, and visit with us on sale day.

Also, watch for our bulls selling in the first annual Northern Force Bull Sale on March 7th, alongside Short Grass Farms in Dawson Creek, BC. We are excited about what the future holds and look forward to seeing you down the road.

## POLAR FARMS

Joe, Lindsay

Dawson Creek, BC

PF BLACK LUSH 510N is another exciting MMWK LAMBEAU 64J daughter that is hard to overlook. This black heifer has an outstanding hair coat and the kind of presence that makes her stand out in the pen. Her dam is a big, powerful red KUNTZ SHERIFF 8A daughter that we purchased from the great people at KRS Simmentals, bringing a strong and proven maternal background to this female. We believe BLACK LUSH 510N has all the makings of a productive cow and would be a great addition to anyone's herd. To make the package even more exciting, she is bred to IPU 35L WARRIOR 5N, who we purchased for \$39,000 as one of the high-selling bulls at the annual LaBette Simmentals Bull Sale last spring. With her eye-catching appearance, strong maternal pedigree, and exciting service sire, PF BLACK LUSH 510N offers a great opportunity and an investment with plenty of potential.

**EXPOSED TO IPU 35L WARRIOR 5N FROM MARCH 19 TO MAY 28.** ultra sound says due January 11, 2027

PF TIBBIE 515N is a strong black cow which has both thickness, length, and a good deal of natural ability packed into an attractive and well-balanced frame. She is a long-bodied, deep-sided animal with a good amount of shape and solidity, yet still retains a feminine appearance. PF TIBBIE 515N is the daughter of MMWK LAMBEAU 64J and comes from HARVIECREST TIBBIE 147H, which in turn is a daughter of MRLSLEEPEASY 140D. This cow is in good condition right from the ground up, with a solid set of feet and legs, and she is developing a neat and clean udder that enhances her maternal prospects. Because of her mix of power, structural soundness, body depth, and general appeal, we think that PF TIBBIE 515N possesses all the qualities necessary to become a productive and impressive cow. She has been bred to NUG ROLLER 96N, so this is an exciting pairing and she has a promising future ahead of her.

**EXPPOSED TO NUG ROLLER 96N FROM MARCH 19 TO MAY 28.**

PF BLACK HONEY 520N is the kind of heifer that checks a lot of boxes. She is a dark, attractive female with a solid set of feet underneath her and an exceptionally quiet disposition, making her a pleasure to work with. Her dam, KRSS BLK HONEY 44H, is another female we purchased from KRS Simmentals a few years ago and has proven to be a valuable addition to our cow herd. KRSS BLK HONEY 44H is a daughter of WS STEPPING STONE B44, giving 520N a strong maternal foundation backed by proven genetics. PF BLACK HONEY 520N combines functionality, soundness, and temperament in a package we believe will make a dependable brood cow for years to come. She is bred to IPU 35L WARRIOR 5N, making the calf she is carrying just as exciting as the heifer herself. This is a solid young female with plenty of potential and one we think will work hard for her new owner.

PFRS HONEYBEE 522N is a LAMBEAU daughter with a little extra chrome that is sure to catch your eye. Her striking white face, attractive profile, and overall presence make her an easy one to pick out in the pen. HONEYBEE comes from a beautiful cow we purchased from Wolfe Farms, and this is the very first heifer we have ever offered for sale out of her. We think that says a lot about the quality we see in this female and the confidence we have in what she can do for her new owner. With a strong maternal background and the added influence of LAMBEAU, HONEYBEE has the pieces to develop into a productive, attractive cow. She is bred to NUG ROLLER, adding another exciting element to an already impressive package. If you are looking for a female with eye appeal, maternal potential, and a pedigree we have a lot of confidence in, PFRS HONEYBEE 522N deserves a serious look.

PF MAPLE 523N is a female that is not easy for us to part with. She comes from a double shot of Willow Creek Simmentals genetics, with both her sire, MMWK LAMBEAU 64J, and her dam, MMWK SYRUP 100D, coming from the great Willow Creek Simmentals herd at Crooked Creek, Alberta. Her dam, affectionately known around here as "Crooked Neck," has developed into an outstanding and dependable cow in our herd, and MAPLE 523N looks to be following right in her footsteps. She has the pedigree, maternal strength, and overall quality we look for when selecting replacement females, and under different circumstances, she would be staying right here in our herd. However, when you commit to bringing your best to a sale, females like this have to be part of the offering. PF MAPLE 523N represents genetics we have a lot of confidence in, and we believe she has everything it takes to become the kind of cow her new owner will be proud to have in the front pasture.

# DONATION

## lot

We are located in Crooked Creek, AB and have approx 100 commercial simmental / charolais cows and we are working on building a small herd of purebred charolais cows. We sold our first two Charolais bulls to Klassen Ranching in 2026.

In April of 2025 Warren was diagnosed with an inoperable brain tumor and given months to live. Through countless donations, community love and support we have been able to go out of country for medical support not offered in Canada.

Happy to say Warren is still here with us and his brain tumor is not growing. He's now been to Mexico 3 times and will continue going as long as it continues to help him.

While we were doctoring with Warren, Stephanie developed some hip pain that just wouldn't stay away. We tried massage and chiropractor amongst other things. They would temporarily help but then the pain would return. In July we took her to emerg in Valleyview after the pain got unbearable. The doctor ordered an X-ray thinking it was bursitis or something similar. Never in our wildest dreams did we think they would find a tumor affecting her pelvis bone and the soft tissues surrounding it. Off to the Stollery in Edmonton and after roughly 2 months of testing including multiple bones biopsies, bone marrow biopsies, x-rays, countless scans and blood tests she was diagnosed with B-Cell Lymphoma mid September of 2025 and began treatment.

Stephanie then spent the better part of 9 months in Edmonton receiving chemo. Some rounds were harder than others and we came home as often as we were allowed. She missed being at home on the farm more than anything. It was also incredibly hard for her to be away from her friends and having to do school online but she pushed through.

Stephanie recently applied to further her education at Lakeland College in Vermillion. She'll be starting with a degree in animal sciences focusing on beef then moving into a finance degree in Ag business.

3D Children's Society helped us so much with financial support and gifts for Stephanie. They definitely made all the traveling and being away from home more bearable.

The last year and a half has been extremely hard on our family but we are finally starting to get our feet under us again and wanting to give back.

Now to the good part.

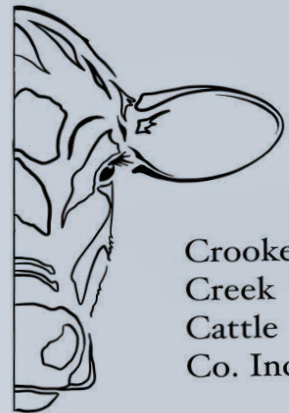

**We are offering pick of our home raised bred heifers. They are Simmental/Charolais cross. Bred to start calving January 14th for 40 days. Full herd health. Bred to either a low birthweight Charolais or red angus bulls. We know which are bred which way so you can choose which you'd prefer.**

***Half of the money raised will go to 3D and the other half will go towards Stephanie's college tuition fees.***

Can't thank everyone enough for reading this and hopefully we will see you sale day.

Warren, Maria, Stephanie and Charles Wohlgemuth  
Crooked Creek Cattle Co Ltd.

If you questions or would like to come walk the heifers feel free to contact Maria @ 780-831-7859 or Warren @ 780-512-3727

# RAFTER SJ angus

welcome

Welcome to the 5th annual Ladies of the Peace sale. It's a great time to be in the cattle industry!! The Red Angus breed continues to gain advancement in the cattle world, with Red Angus females being well known as efficient and highly maternal cows. We are sure proud to be part of this sale along with these great Peace Country ranchers!

We have 140 head of registered Red (and a few Black) Angus to calve this year. We have sourced and built up our registered herd from top production and dispersal sales and the prestigious Red Round-Up sales. We have a variety of genetics, to cover all of our customers needs; from moderate framed heifer bull makers to growthy scale benders, and always keeping great feet, udders and temperament top priority. We are confident in these 3 heifer calves and the cows they will make for their new owners to succeed and profit with.

We are very passionate about our cattle and enjoy visiting old, new and potential customers. So if you have a question about our program or our heifers, give us a call or stop in for coffee and we can show you their dams, and our herd bulls. Also; we sell all of our bulls off the place, so stop in and see them as well.

RED RAFTER SJ MS MOONSHINE 3P came in off pasture weighing 910 lb on September 27th. She is a big middled, wide topped, deep in her twist and smooth in her front end. Her dam has superb feet and also nice udder structure; and it's no wonder with BAZINGA, MOONSHINE and COWBOY CUT in her background. Her sire LEEUWENBURGH FLEX is well known as a prominent sire for his magnificent eye appeal and awesome feet.

# TRIEBER farms

welcome

Trieber Farms is excited to once again be part of the Ladies of the Peace Sale as a consignor! We are a locally owned and operated family farm located northwest of Beaverlodge, Alberta, raising Purebred Black Angus, Purebred Shorthorn, and commercial cattle. We strive to offer our customers quality animals with sound structure, strong genetics, and longevity in mind.

This year, we are proud to offer four Purebred Angus females. These females have calm dispositions, making them a great addition to any program. Our three bred heifers are tie broke, and our heifer calf is halter broke. We take pride in the health of our herd and maintain a complete herd health program, with all vaccinations up to date.

We welcome you to stop by the farm to view these heifers and the rest of our herd. You can also check us out at Farmfair International, where we would love the opportunity to visit with you and talk cattle! Be sure to join us at Evergreen Park on Friday, November 20, 2026, to view an outstanding group of cattle carefully selected by all the consignors of the Ladies of the Peace Sale. We look forward to seeing you there!

Trieber Farms — Quality cattle, built for longevity.

## TRIEBER FARMS

Beaverlodge, Alberta  
Naomi: 780-814-0052  
Fred: 780-831-1346  
Chelsey 780-512-4131

Wow! Wow! The youngest heifer in the pen, yet Chelsey's top pick of the year! This is a tough one for Chelsey to let go! She is a smooth-necked female with plenty of length, tremendous shape, and a solid structure. She tracks perfectly on the move and has all the pieces to make a great one. Her half-siblings have been part of our show string in previous years and have done very well on the road. Her dam, Erica, consistently produces superb females and is an easy-calving cow with excellent milk quality. Her sire has also been a tremendous asset to our breeding program. With this kind of quality genetics on both the top and bottom sides of her pedigree, this female has a bright future ahead of her, no matter what direction her new owner chooses to take her. A special heifer with a lot of potential!

Trieber Dutchess 652 N is a bred heifer that has shown consistent growth and boasts a smooth front end. She reminds us so much of her mother, a cow that continues to produce impressive calves that are consistently at the top of our selection pen year after year! Her dam also maintains an excellent udder, strong maternal instincts, and the kind of genetics we strive to build our program around. The quality in this cow family speaks for itself. Her full sibling from last year was the high-selling Angus bull at the Heart of the Peace Bull Sale, while another sibling qualified for Canadian Western Agribition in 2023. Dutchess 652 N is bred to Dwajo Showtime 79L (2346859) and has been vet-verified for a mid-February calving. With her proven cow family, strong maternal backing, and quality genetics, this female has a bright future ahead of her. She has all the makings of an excellent brood cow and will be a valuable addition to any breeding program.

Dutchess May is a well-muscled female with a smooth, attractive look and a strong genetic package behind her. With a pedigree like hers, you can't go wrong! Her dam has an impressive show record, qualifying for Canadian Western Agribition and earning Supreme Champion honours at the Dawson Creek Rodeo. Her sire, America, has added valuable depth and length to her genetics, making this female an exciting prospect for the future. Dutchess May was exposed to the Purebred Black Angus bull Dwajo Showtime 79L (2346859) and has been vet-confirmed pregnant, with an expected calving date toward the end of March. With her muscle, smooth design, and proven genetics on the maternal side, Dutchess May is a complete package with the potential to become a powerful, productive brood cow for years to come!

This impressive heifer calf has blown us away over the past couple of months! She has sparked some intense discussions around the supper table, and although we have decided to offer her for sale, she is certainly a tough one for us to let go! She is a long-necked, smooth-bodied female with plenty of style and eye appeal. Already halter broke and started on the show road, she has proven herself in the ring, earning Reserve Heifer Calf Champion in the High Point standings for the CPCA Jackpot Series. Her potential is backed by an exciting pedigree. A half-sibling is a bull qualifier for Canadian Western Agribition 2026. Her dam is a powerhouse in our herd, known for her excellent maternal instincts and the quality she consistently brings to her calves. Her sire brings well-known genetics, tremendous muscle, and a proven reputation for calving ease. This heifer has a bright future ahead of her, whether you see her in the show ring or as a valuable addition to your breeding program. She is a special one, and we would love for you to come see her for yourself! Come visit her at the farm or find her at Farmfair International!

# RING CREEK farms

welcome

On behalf of Ring Creek Farms we would like to welcome you to the 5th annual Ladies of the Peace female sale. It is a pleasure to again be working with this great group of consignors to bring forward quality females from right here in the Peace country. This year for the LOP sale we have decided to offer two heifers out of our Ring Creek 24 Carat cow line, a line that originates back to when the first angus cattle showed up here at Ring Creek. This cow line was one of the very few that Pat and Len Friedel opted to hold back during our major dispersal sale as a top pick from the cow herd. The 24 Carat females are exceptionally maternal, always having a tremendous disposition while raising quality calves and being a real treat to have in the herd. The 9 year old 148E cow that is found in both heifer pedigrees is still here in the cow herd with a gorgeous bull calf at her side this summer. These heifers are both sired by HF Tiger 5T, a bull we were privileged with owning half interest on and one that has not gone out of style with semen still in high demand. Tiger has proven himself time and time again within the angus breed as a top quality female maker, and the mature Tiger females we have in the herd here do not disappoint. We are excited to have these heifers on offer so please feel free to stop by for a visit prior to the sale to see the herd, and be sure to join us in person on sale day!

BRED HEIFER

10N is a female that boasts strong depth from front to back while still being a moderate sized heifer. A correct set of feet move her easily along, as a great hair coat makes her draw attention quickly when she comes up for a friendly visit in the pasture. A solid set of EPD's combined with a 78lb birth weight and a moderate frame size gives 10N potential to pack a punch when it comes to performance heifer bull production. Packing a punch is exactly what we were after when we bred her to HF Hi- Country 7L, a bull that needs no introduction in the angus breed and has continued to produce structurally correct offspring that push the envelope on production potential. We expect a quick ROI on this heifer and look forward to seeing some photos of 10N with a calf at her side next summer.

**BRED TO HF HI-COUNTRY ON MAY 14, 2025 (SAFE).** Exposed to Valley Blossom Dillinger 711M from May 20 to July 15.

Service Sire HF Hi Country

Here is a great example of another powerhouse Tiger daughter. This is a female that has been stout since a calf and has brood cow written all over her. 4N is a smooth fronted heifer that transitions to a stout middle and a meaty back end shown in her depth of muscle expression. She has lovely feet and the start to a beautiful udder that will allow her to be a quality addition to anyones cowherd as the industry continues to demand larger mature cow sizes. This is the type of female that develops into a cow that will push muscle mass in her offspring as we expect many solid calves in her future. Bred to our walking sire Valley Blossom Dillinger 711M that we acquired from the Switzer family in spring of 2025.

**BRED TO VALLEY BLOSSOM DILLINGER 711M FROM MAY 20TH TO JULY 15TH (SAFE).** Vet estimated a June 10 to June 15th breeding date.

Full Vaccination Program

We are extremely proud of this year's offering, featuring a lot of three standout red heifers alongside a pen of what we believe are our top three black commercial heifers. All six are sired by purebred bulls and backed by some of the strongest maternal genetics in our program. Two of the red heifers had maternal half-sisters represented in this sale last year; a testament to the consistency and quality these cows continue to produce year after year.

Born in January and February, these heifers were weaned on September 21, 2026, with the red heifers averaging 695 pounds and the black heifers averaging 690 pounds. Their uniformity is one of the highlights of this offering, with a remarkably even set of females that complement one another extremely well.

With a surplus of quality heifer calves this year, we simply cannot keep them all, but we felt these females were far too good to see go to the feedlot. This offering provides an exciting opportunity to acquire females directly from the heart of our program. They represent the kind of cattle we strive to raise; sound, functional, attractive, feminine females backed by generations of proven maternal genetics.

We believe each of these heifers has the potential to develop into a productive, dependable cow and make a lasting contribution to any herd. We are proud to offer them and look forward to seeing them grow into the kind of cows we have built our program around.

### SIRES INCLUDE:

**RST Big Shot 5J** — A true "Cow Maker" in our herd. Son of SVS Tycoon 841F, known for siring high-quality females with longevity. (Sire of #7, #21, #23)

**Crystal Springs Levi 75L** — Fullblood Simmental Adding growth, structure, and power. (Sire of #13, #25)

**Gomack Iceman 51J** — Calving-ease specialist, siring calves with the vigor, style, expected from Angus genetics. (Sire of #2)

### 3 BLACK SIMM/ANGUS *Heifer Calves*

58

- Born January
- Black Sim/Angus commercial open Heifers.
- Watch for videos on Cattle Vids closer to the sale
- Full Health Program

This is a really consistent trio of black heifer calves that are out of some of our top commercial cows. These 3 do have a little more calving ease in them, with 2 being off of our calving ease bull Circle G Marquis. The third is sired by our fullblood herd sire from Wolfe Farms that we use to clean up the commercial cows. All three will have superb foot and udder quality, and high production.

Lot

### 4 RED SIMM X *Heifer Calves*

59

- January/ February Born
- Red Simmental commercial open Heifers.
- Watch for videos on Cattle Vids closer to the sale
- Full Health Program

A great group of red heifer calves that are all calving ease oriented with some performance to follow it up. They are all sired by Circle G Marquis and off of first calf heifers. Udder quality will be second to none, good feet and docility. These are high end heifers with a bright future.

### 3 BLACK COMMERCIAL *Bred Heifers*

60

We are proud to offer these three black commercial bred heifers, raised out of some of our very best commercial cows and sired by our walking herd bulls. Two of these females are sired by MMWK LAMBEAU 64J, while the third is sired by BEE BIG TURK 735L.

These heifers come from proven genetics that we are confident will make a great addition to any commercial herd. All three have been raised under a full herd health program.

#### BREEDING INFORMATION:

- Exposed to heifer bull IPU 35L WARRIOR 5N
- Exposure dates: March 19 to May 28
- vet checked to calf early January

Lot

### 3 RED COMMERCIAL *Bred Heifers*

61

We are proud to offer these red commercial bred heifers, sired by our fullblood heifer bull BEE BOA 147L and raised out of a strong group of young red Simmental cows.

These females come from quality genetics that we believe will make a great addition to any commercial herd. They have plenty of potential to develop into productive, hardworking cows with strong maternal qualities.

All of these heifers have been raised under a full herd health program and have been bred to our fullblood heifer bull JNR HEFNER 493M.

#### BREEDING INFORMATION:

- Bred to JNR HEFNER 493M
- Exposure dates: March 19 to May 28
- Vet ultrasounded and confirmed for early January calving
