On behalf of Bohrsen Marketing, we'd like to invite you to the Mar Mac Farms 22nd Annual Bull Sale, happening Wednesday, March 11 at the farm south of Brandon, Manitoba. Blair and Lois built this program on

practical cattle ranching and generations of experience, with a clear focus on producing bulls that are structurally sound, functional, out of a very maternal cow herd ready to go to work in real world conditions.

Mar Mac Farms is proud to be joined by guest consignors Angus Valley Farms, MC-3 Farms Striker Cattle, and Springhill Farms. Together, these programs are offering a deep and consistent lineup of Red Angus, Black Angus, and Simmental bulls. All the bulls have been developed with an emphasis on longevity and disposition giving buyers confidence that these cattle will hold up and produce for years to come.

Whether you're a purebred breeder looking to add high quality fresh genetics or a commercial cattleman focused on maternal, efficiency and profitability, there are bulls in this sale that can help take your program to the next level. In today's strong cattle market, investing in quality genetics has never been more important. Bulls that add performance, improve maternal strength, and deliver predictable calves can have a direct impact on your bottom line and help maximize the opportunities this market offers.

Stop by the farm ahead of time for a tour or reach out to Blair and Lois or any of the consignors to discuss this strong offering and which bulls will work best in your program. We look forward to seeing you March 11 to evaluate a great set of bulls and enjoy some exceptional hospitality. Additionally, if we at Bohrsen Marketing Services can help you in any way prior to or sale day do not hesitate to reach out we would be pleased to provide any assistance or information you require.

Best regards, Bohrsen Marketing Team

**JOIN US NOON SALE DAY FOR A HOME RAISED ROAST BEEF MEAL  
PREPARED BY J&S MEATS  
SOUTH BRANDON 4-H BEEF CLUB WILL BE SELLING DESSERTS**

From the desk at T Bar C. Welcome to the Mar Mac and Guests Bull Sale. This event has become a must attend sale for progressive cattlemen, and we're pleased to be part of another outstanding offering.

The sale is once again headlined by an exceptional Red Angus section. Mar Mac Farms has established itself as one of the true leaders in the Red Angus breed, and for those searching for herd sires that combine performance, structure, and consistency, this offering deserves serious consideration. Whether you are shopping for a bull for your heifer pen or your next main herd sire, the selection is here. The offering includes both yearling and two-year-old bulls to fit a variety of programs.

Some of my personal favorites in this year's sale are the Rage and Advance sons. These bulls are powerful, stout, sound, and dark red — they check all the boxes. Not to be overlooked are the tried-and-proven Lincoln, Navigator, Roughrider, and calving-ease Simplify sons, offering dependable genetics with a strong track record.

Springhill brings a stout set of Red Angus bulls that nicely complement the Mar Mac offering. Blair and Lois have also added a pen of black bulls this year, joining the quality-over-quantity pen of Angus Valley bulls. Bruce McRae consistently brings a powerful group of AI-sired Black Angus bulls to this event, and this year is no exception. In the black division, you'll find both payweight bulls and calving-ease options, all backed by a high degree of maternal strength.

The Simmental offering may never be large in quantity, but this year's pen is the most consistent we've seen. Striker Simmental brings a strong set of bulls that are ready to go to work and complement the McRae bulls extremely well. As expected, there are a few calving-ease options, but the bulk of the pen represents what Simmental cattle are known for — stout, hairy, performance-oriented bulls with that highly sought-after Simmental maternal influence that continues to be valued in the commercial industry.

We encourage you to study the catalogue, evaluate the bulls, and attend with confidence. This is a sale built on quality, consistency, and genetics that work. If you are unable to attend please feel free to contact myself or any member of the T Bar team as we are all very familiar with this program and would be more than happy to assist you in a confident manor.

Chris Poley

# Welcome

What a great time to be in the Livestock Industry! Last Fall we saw record prices for calves. Cull cows and Bulls were very strong, and the Bred Female market was outstanding. All indications are for this to last for the foreseeable future. We are proud to be Cattle Producers and thankful we are being rewarded for our efforts.

Mar Mac Farms is a 5th generation family farm, where everyone is involved in day-to-day operations. Our grandson Corbin and our granddaughter Brylee are the 6th generation and they love spending time outside at the farm. We are very proud to be members of the Canadian Angus Association for 70 years and The Canadian Simmental Association for 50 years. We love the challenge of the purebred industry but the best part is visiting with all of our customers and colleagues past and present. You truly make it all worthwhile for us and we thank you for your confidence and support of our program for nearly 7 decades.

Every year we are impressed by how our cowherd just keeps producing better bulls. We are proud of the depth of quality in all sections of the sale. They are all fresh and athletic yet show lots of muscle expression, hair, and testicles. As always they have been selected for structural soundness, ease of fleshing and temperament. We would use any of these bulls in our own program as our philosophy is if we would not use a bull how can we be comfortable selling him to you.

We welcome our guest consignors to the sale. They share the same commitment to producing beef bulls as we do. Springhill Farms from New Brunswick have a nice set of red bulls for your appraisal. Bruce McRae has the Black Angus bulls here are a strong set. Striker cattle Co. (Kim and Tyler Warburton) has a strong stout set of Black Simmental Beef Bulls.

MC3 Farms, Tyson McRae has a Simmental bull in the sale. Tyson works at Mar Mac Farms and we really do appreciate the dedication and all of the work he does for this farming operation.

Hosting a sale at the farm takes a lot of time and we have to thank our friends and neighbors who help us out whenever needed. We really have to thank you for all of your help. Special thanks to our Fall Show and Sale team, an exciting group of young ladies.

We look forward to visiting with you to discuss your herd bull needs. We know that there are a lot of options out there for your bull needs but want to let you know that we are honored and really appreciate that you consider the bulls on the following pages as an option for your herd bull needs.

There are top end genetics from the front of this book to right to the last lot!

*- Blair and Lois McRae*

# About the bulls

This crop of bull calves has been one to admire for the uniformity and depth of quality in all 3 divisions. As we toured through the pastures admiring what the mother cows had produced you get a sense of pride of the cow herd you have worked hard to establish. As you will see in the footnotes many strong cow families have been established in our herd and work well every year. Our cowherd grazed most of the winter on bale grazing and bales till calving season. Once they are brought home to calve they are fed a silage, hay, and straw mixture. When we select a herd sire, the bull's mother or grandmother is an important part of our selection. Stop by anytime to view the dams of the Red Angus and Simmental bulls, we are very proud of the cowherd we have assembled. We have spent long hours researching our herd bull battery and are very proud of bulls we have added to our program.

This year in the Red Angus, and Simmental, you will find power bulls for your cows, and heifer bulls for those ease of calving individuals. 98% of our calves are born unassisted we feel mainly due to our cowherd being fed out in paddocks with lots of exercise, blended rations, and bull selection.

Remember we get paid by the pound for our calves and length of body adds pounds. Mar Mac has tried hard to keep that length and natural thickness in all of their divisions.

Our calves are not creep fed in the summer, so we can evaluate the full potential of the cowherd. Two weeks before weaning, a feeder with an oat pellet ration is put in the field to get the bulls used to eating away from their mothers. Then one week before weaning, the low stress quiet weans are put in. Calves are returned to the pasture with their mothers for 5 days. At the time of the nose wean insertion, fall booster vaccines are administered. Deworming and parasite control are administered in mid October. Weaning day, the bulls are weighed, brought home and started on a TMR ration of corn silage, hay, grain and supplement that has been balanced and formulated for longevity and fertility. In early January the bulls were vaccinated with Express 5.

All calves birth weights are taken within 24 hours of birth, where we vaccinate and tag each calf. These sale bulls have been through a strict culling process with structural soundness, ease of fleshing, and disposition taken into consideration. Any of the bulls in the sale, we would use in our program.

**WE WOULD LIKE TO RETAIN THE RIGHT TO COLLECT 200 STRAWS OF SEMEN FOR IN HERD USE, AT BUYERS CONVENIENCE AND SELLERS EXPENSE, ON ANY OF THE BULLS IN THE SALE.**

Customer Service is very important; we talk to our buyers at least once during the year to see how the bulls are doing. If you have a problem with your bull, we expect you to call and talk to us.

## CALVING EASE SCORE...

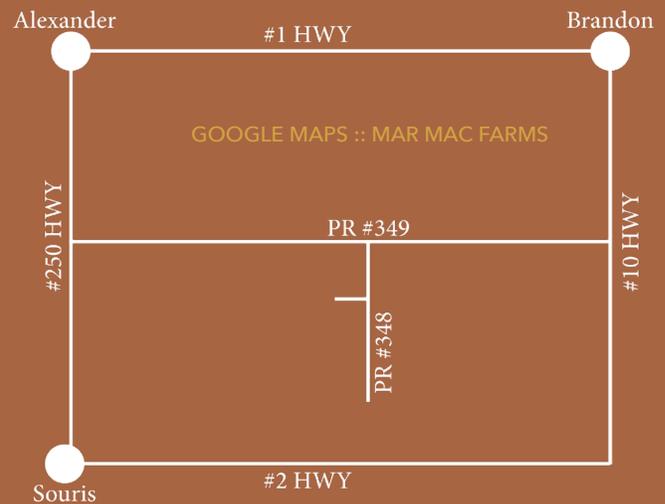

We evaluate each bull for calving ease determined by bone size, birth weight, birth weight EPD and profile. Scoring is as follows:

- ★★★ Recommended for use on moderate framed heifers
- ★★ Recommended for use on well developed heifers & cows
- ★ Recommended for use on cows.

*This system is just a suggestion, many other factors affect calving ease.*

## Directions:

6 miles south of Brandon on #10 HWY, to PR Rd #349, go 4 miles west to PR Rd #348 Go South 1.5 miles lane is on west side of road

## BIRTH WEIGHT AND CALVING EASE

University studies in Wyoming and data from Montana and Colorado lend credence to the following conclusions.

1. The birth weight itself influences calving ease by 65%.
2. The female has 60-70% influence on birth weight of her calf.
3. The bull has 30-40% influence on birth weight of his progeny.
4. Pelvic measurement and angle as well as the shape of the calf has 35-40% influence on calving ease.
5. Length of gestation greatly affects birth weight. A fetus can gain over one pound per day in the last days of gestation.
6. Weather and temperature the last 30 days affect the length of gestation.
7. Size and maturity of the cow influences calving ease.

Remember, everything is relative. Increased growth, frame and performance will increase BW. A longer-bodied calf will weigh more. If a calf is expected to have the genetics to growth, it will display this prior to birth as well as after. As a rule of thumb, it takes a calf weighing 85 lbs. at birth to finish at 1200-1250 lb. A cow should easily give birth to a calf weighing 8% of her own body weight. Thus a 1200 lb cow should give birth to a 96 lb calf with ease.

Continued selection for light birth weights will ultimately reduce the mature sizes and performance of your cattle.

### PUREBRED RED ANGUS

Searching for **two full brothers that combine calving ease with real performance?** Well lot 1 & 2 are the answer! These well-balanced individuals check every box, standing out for their structure, muscle, and dark cherry-red color.

Their pedigree is as good as it gets—**Lincoln x Lady Trooper**, two proven Red Angus genetics that simply work. You won't write a better mating.

DAM TO LOTS 1-5 & 25 - LADY TROOPER 114Z

At Mar Mac, Lady Trooper was a female that excelled in everything she did. She was a standout as a heifer calf and then as a yearling, she went on to be the Canadian Angus Red Angus Show Female of the Year in 2013.

She maintained power and performance in her calves, along with sound footed and lots of fertility. Unfortunately, Lady Trooper had her last natural calf this year after many years as the Mar Mac Donor Female. Owned with Dale McKay.

Here is a female who went beyond our expectations. She was a true legend at Mar Mac and one we will never forget. Check out her five sons Lot 1-5. Don't miss the opportunity to put this well known, proven cow's genetics in your program.

## Full Brothers TO LANDMARK

### PUREBRED RED ANGUS

Their full brother Landmark was named Grand Champion Red Angus Bull at Ag-Ex 2024 and went on to compete in the Supreme Show at Agribition. Landmark drew widespread interest, with semen packages selling to producers across Canada, the United States, and Australia. Early calf reports have been outstanding, **featuring low birth weights combined with impressive growth**. Due to an injury, Landmark is no longer with us. Landmark was purchased in the Mar Mac Bull Sale by Double F Cattle Co.

Another full brother, **Locomotion**, is currently a working member of the Mar Mac herd bull battery, being successfully used on heifers—further proof of the consistency and reliability of this mating.

**Two bulls that demand a serious look.**

### PUREBRED RED ANGUS

#### Unquestionably one of our feature bulls.

He offers an outcross pedigree for most programs, combining a Red Shag Rage sire with a Black, Red-Carrier dam. It's hard to say we've ever raised a bull with more thickness, power, and performance—plus the kind of foot and testicle quality everyone is looking for.

His dam was purchased from the Spring Creek Dispersal specifically because she was a Black Red-Carrier female, and she has flat-out delivered. We have flushed her, and wow—she has done an exceptional job on every sire. **RRAR Favorite 8D** is a picture-perfect female with a picture-perfect udder. We have had a few black calves, but when they come Red, you'd better take a serious look.

We truly believe this young prospect is loaded with potential for the Red Angus industry, combining elite genetics, tremendous body type, and true bull power.

You'll drive the wheels off your pickup trying to find a herd bull with this combination of quality, power, and pedigree.

**MAR MAC IS RETAINING A 1/3 INTEREST IN ADVOCATE.  
WE ARE OFFERING 2/3 INTEREST AND FULL POSSESSION.**

PUREBRED RED ANGUS

Admiral was our show bull last fall and turned plenty of heads with his dark cherry-red color, big top, and tremendous length of spine. He went on to be named **Champion Senior Red Angus Bull at Ag Ex** and was a member of the first-place Breeders Herd.

When we purchased Advance at the Cockburn Sale in partnership with Moose Creek Red Angus, Mar Mac retained the right to use Advance at the start of the breeding season—and wow, what a set of bulls and females he has left behind at Mar Mac. When the Moose Creek Dispersal took place, we felt we needed a bull of this quality and proven genetics to remain in our program, so along with BNK Cattle Co. (the Millers), we purchased Advance back to use in both operations. If you like them dark cherry red, black-footed, thick, and meaty, be sure to study the sons in this sale.

Of course, Admiral's dam is the **RRAR Favorite female**, who has consistently produced top-quality bulls and females. RRAR Favorite 8D is a picture-perfect cow with a picture-perfect udder.

This is one you'll want to be sure to check out on sale day—you won't be disappointed.

PUREBRED RED ANGUS

**Here is some history in this bull.** Blazer was one of the first Red Angus sires we bred 43 years ago and went on to be marketed by Western Breeders. Going back to one of the top older sires Red FCC Rambo and one of our very first Red Angus cows 30W.

Siera 38U was a beautiful Mulberry daughter out of one of the top **Siera Cow Family** 38U left outstanding daughters in our program. We flushed her to Blazer.

A power bull with some unique breeding that will add length and **make beautiful females.**

SIRE - BLAZER 336

DAM - SIERA 38U

PUREBRED RED ANGUS

**Heifer Bull Candidate!** Here is a bull that caught our eye all summer long. A dark Cherry red, moderate framed, solid built son of the Cockburn Premium. Premium was a half brother to the Advance Bull we purchased. We purchased a semen package on Premium, and he left us a solid set of moderate framed, thick meaty individuals.

Ace 38N's dam was purchased from Lauron Red Angus at Red Roundup. She is moderate framed, but boy does she ever produce.

**A bull to check out for the heifer pen!!**

PUREBRED RED ANGUS

A Dividend son that will add some power to your calf crop. In top 10 percentile for Weaning Weight and Yearling Weight EPDs. Lots of maternal depth in his pedigree. **Siera Cow Family**

Heifer Bull Candidate.

TWO YEAR OLD BULLS

This group of **Two-year-olds were held over on purpose.** There was a demand for 2-year-old bulls for bigger pastures the last two years. The Two-year-old bulls are virgins except for KOF 95M. He was used as a clean up in our herd in a small pasture. He will be Trich tested before the sale.

All Simplify son's bulls that will work in the heifer pen or on a group of cows with a little added frame.

**BEV MCMURTRIE** 506.292.1248 **KRISTA FLIEGER** 506.470.8067

Hello from Springhill Farm! We are very excited to be back for our fourth year as guest consignors at the Mar Mac Farms & Guests Bull Sale. The McRae team did an excellent job developing our well received bulls in 2025 and we thank them for their professionalism and friendship. We deeply appreciate the bidders and the buyers who took the time to consider our bulls and put them to work in their herds. Your success is our success and we are humbled by your support.

For three generations now the McMurtrie family has been farming at Springhill in picturesque Fredericton NB. We are committed to developing trait balanced genetics that will instill confidence and reliability. Our cows are efficient, easy calving, maternally minded females that need to demonstrate overall soundness and quality foot structure in order to thrive in their environment - just ask anyone who has tackled the 'Hill' to see the herd!

We had a significant and record breaking drought in the Maritimes this summer. The bulls came in a little lighter because of it but have had good gains even with the trip West. Mar Mac has them in great condition and ready to positively enhance your programs!

### PUREBRED BLACK ANGUS

COVER BOY! When we dispersed our Black Angus cows, we had one female missing a hoof from foot rot. We did not feel confident to put her in the sale, but we kept her around as she was a member of our Bridget cow family.

Here is her son, Typhoon, out of the Horizon bull who we admired and sold in our dispersal to Leaning Spruce Stock Farm. Leaning Spruce have used Horizon very successfully and many of his sons in their Black Angus program.

This is not a fluke; this is the mating of two superb individuals and wow what a bull calf he is. Extremely well balanced, thick, smooth shouldered and has lots of natural presence. Extremely Quiet!

In the top 25% in the Weaning Weight, Yearling Weight and Milk EPD's He checks all the boxes of Herd Bull needs. Some unique genetics all packaged up in this amazing individual.

Purebred **BLACK ANGUS**

Our 4th generation farm

We understand they are cattle producers but also understand they are grain producers as well. We encourage producers to grow as many on farm ingredients as they can and we will help fill the nutritional gaps that the forages and grains leave. McRae's do an outstanding job growing quality silages, hay, greenfeeds and grains that help provide protein, energy and some minerals and with their Custom Bull Developer Supplement I provide the nutritional shortages to balance their programs requirements. Over the past number of years we have been able to lower the energy requirement of the diets and increase the forage percentages because of the way the bulls are converting. Conversion is the most economical trait we have and The genetics in the Mar Mac bull program is showing us this.

Our goal is to raise well grown out bulls that will go out and cover females without breaking down and melting away. We want the bulls to mature and grow in a sound development program and we are very conscious about not getting them over conditioned and to cool down the bulls post sale to get them used to their new surroundings and environment. The sound nutrition I design will help enhance growth, conversion, and overall performance. Strong emphasis is on structure soundness, feet and legs, hair and reproductive development with increased scrotal development and semen quality. A sound nutritional program keeps all of this in mind.

I balance Mar Mac's feeding programs with Cargill's BEEF MAX Ration Balancing Program. This program balances to different types of proteins, amino acids, fibers, chelated minerals and selenium, vitamins and the natural Diamond V-NaturSafe product to enhance stronger immunity and absorption of nutrients.

Once again the key to a successful relationship is communication. This communication with Mar Mac Farms helps with a part of the success of their Bull Development Program for their customers.

(WARBURTON FAMILY)

Tyler & Lindsay & Family Kim & Sheree

Looking forward to once again being a part of Mar Mac's Annual Bull Sale. The way they feed and care for the bulls is impressive and lends itself to producing predictable breeders that will perform and last.

We are offering a set of bulls with varying strengths and traits. There are bulls that would be considered "power" bulls, one that would work well as an exceptional calving ease bull and a couple of blaze bulls. All bulls are Homo Polled and four are Homo Black.

Feel free to contact us for information at any time. Hope to see you sale day.

Kim (204)724-2354 Tyler (204)761-6124

**CUSTOMER SERVICE PLAN...**

Give Mar Mac or any other of the consignors a call anytime... Call us a few days in advance of the sale with your bull needs and we will compile a list of bulls that we feel will work for you. As we are with the bulls everyday, we know the qualities in each bull. If we buy a bull for you sight unseen and you do not like him, you don't own him - no problem! Don't forget to check out the videos!

At the Mar Mac and Guests Bull Sale our 70 plus years of experience as a family run operation means **CUSTOMER SERVICE** is an important part of our business. We stand behind our bulls 100%, sight unseen purchase satisfaction, wintering program, personal contact after the sale of the bull and the coffee is always on for you to come and view our program.

**BULL GUARANTEE...**

All bulls have completed a breeding soundness evaluation. If your bull fails to be a satisfactory breeder, we will replace him with a bull of equal value or give you your money back. We make sure you will have a sound bull to service your cows. We will not provide a replacement if your bull has been miss managed. At no time shall the liability exceed the purchase price of your bull. **BULLS UNDER ONE YEAR OF AGE ON SEMEN TEST DAY WILL BE TESTED AFTER THEIR BIRTHDAY, BEFORE YOU NEED THEM.**

**PIECE OF MIND...**

Your new bull is a valuable asset and we recommend insuring your bull for infertility coverage and all risk mortality. If you are taking advantage of our wintering program, your new bull must be insured so we both have peace of mind. Insurance will be available from Keystone Livestock Services.

**DELIVERY...**

**IF YOU PICK UP YOUR BULL AT THE FARM ON SALE DAY, YOU CAN SAVE \$150 PER BULL TO A MAX OF \$300 OFF THE PURCHASE PRICE.** We offer to board your bull free until April 15, after that at cost until you need him. **AS WELL, WE WILL DELIVER YOUR BULL FREE TO CENTRAL POINTS IN WESTERN CANADA OR THE US BORDER AND COST WILL BE SHARED TO EASTERN CANADA.** We will make every effort to get the bull to your farm. Delivery will be as close to the date you request your bull, but will be at our convenience. If you can not take your bull when we are in your area, we would appreciate if you made arrangements to pick up your bull.

**ACCIDENTS...**

Although every precaution will be taken to protect the safety and comfort of the buyers, neither the sales staff, auctioneer or consignors assume any responsibility in this matter and disclaim any liability, legal or otherwise, in the event of an accident or loss of property.

**TERMS...**

The terms of the sale are cash or cheque payable in Canadian Funds. The right of property shall not pass until after settlement is made. All settlements must be made with the clerks before any cattle are released.
