31st Annual Bull Sale

Thursday

February 26, 2026

SASKATOON LIVESTOCK SALES

Saskatoon, Saskatchewan | 1:00 PM

70+ coming
two year old bulls

welcome

TO OUR 31ST ANNUAL BULL SALE

On behalf of my family, I would like to welcome everyone to our 2026 and 31st Annual Bull Sale. The old saying of time flies when you are having fun comes to mind as I write this. Everyone in the Ag industry knows there are always the ups and downs and these recent times in the cattle sector are definitely life time rewards for the strength and historic values we are seeing in our dedication and hard work. Right across our country we are seeing the demand for our product at record levels. The cow herd has yet to show much for signs of regrowth in herd numbers. The demand for quality genetics is at an all-time high.

As I mentioned in my 2025 Welcome, the Agriculture industry has offered us much more opportunity to gather and produce data and information to assist your selection and breeding decisions. EPD's and genomics are tools to assist in the selection of these genetics. One thing that has remained constant over the years is the importance of finding cattle and assessing them for the traits that best fit your program and environment.

OUR OFFERING FOR 2026

Once again, the majority of our offering is made up of sires that walk our pastures. We have put great emphasis in finding leading genetics that offer consistent, reliable, and proven traits that we highly value. The herd sires that lead our bull battery originated in some of the most highly respected operations in the industry.

In our Limousin offering we have the Wulf Handiwork bull that was a past sale top seller and has went on to be a solid breeding sire. Moderate calving with ample muscle and frame. His young daughters are leading in production values. New to our sire group is Commitment, past Western Select top seller. A sire that adds growth and frame with an ability to place heavy hair coats on his sons. Backing this all up from the dam side is the influence of Westmoreland who has been featured for many years in our bull sale. Fernando daughters are beginning to make their mark as top producers.

On the Black Angus side, we cannot be more excited with the influence of our new herd sires. Klondike 2505, Kade 2050 and Cool Down. Klondike is a rare find in his calving ease, low birth weight, performance, feed efficiency, disposition and maternal traits. Kade 2050 holds some of the breeds highest valued traits for foot quality, muscle shape and highly proven pedigrees. Cool Down offers a pedigree with high individual carcass numbers. His lineage traces back to some of the most highly proven lineage before all the EPD's and genomics. The proven Fireside leads with sons that compliment his top selling sons from 2025. To stand in Fireside's physical presence is to fully appreciate his design and size of body with the length and volume.

Our Red Angus brings some new genetics with the sons of Tycoon 709K. A sale top seller when Mark found him. His progeny is born easy, grow fast and are correct with above muscle shape and depth. Common Sense is showing through his son Common Place. This line is some of the most appealing bulls of the group.

CALVING EASE, HEIFER PROSPECT BULLS

We continue to keep the birth weight and calving ease in all three of our breeds a priority. We have once again, in this group a number of young prospects that are proven in calving ease and low birth. You as a producer understand your program, we have highlighted a number of bulls that would work in any type of heifer project you are breeding for.

MATERNAL STRENGTH

As we see the daughters get further into their production lives we cannot be more satisfied with how the sires we have influencing our cow herd have become. In the Limousin herd Westmoreland has the longevity plus Handiwork daughters show high maternal values and udder structure.

Black Angus. The influence of past sires that have had sons highlight our sales now have daughters producing of the full offering, Northside, Payweight 6458, Bronco and Emblayzon 109X. Fireside's first daughters in production have become our top two-year-old group. Klondike and Kade come from some of the most highly proven dams. The udder structure in their dams is simply perfect by design.

In the Red's we have seen the Red Angus breed dominate in the recent replacement heifer sales. Our Red cows are fault free in their udder placement and are trouble free at calving time.

We welcome you to come view the sale offering, herd sires or the cow herd at any time.

A big thank you, once again, goes out to Stacy Young for the picture and video shoot. What started out as a cold day and getting many bulls done turned out to be a delay with the bitter cold. With the weather, time constraints in everyone's plans, we may be a bit late, but we finished the task. We did not get as many photos as planned, but all bulls are videoed.

In closing I would like to give an update on our family. Our youngest grandson, Hudson, is coming up to his 2nd birthday in June. He keeps busy with his small chicken flock and watching "game cam" videos of all types of wild life. He is a farmer from the start with his room full of tractors, trucks and a longhorn bull.

Henry and Levi continue their busy lives of sports and athletics. Henry loves to analyze hockey games and stats and he does not shy away from sharing his own ideas for the farm operation. Levi is one that loves anything motorized that will go fast and always pushing the limits.

Isabelle is about to get her driver's license and continues to excel in her school studies and dance. Growing up to be a young lady much too fast.

Carter is off to his first year of university. We get the stories second hand, but according to him, his studies are going great and he is a model student.

The cattle industry continues to be strong and we are excited to be a part of it. We thank those who have purchased and supported our program in the past and look forward to working with you in the future.

As our past sales, for those who cannot take their purchase home at sale time, we will return the bulls to our farm. We have been able to deliver many of the bulls to their new homes when time and availability permits. For purchases that are going longer distances, we will keep the bulls until the necessary arrangements are made.

If you require more information on any of the bulls, please contact us or any of the sale staff, as they will have viewed the bulls at the farm beforehand. The bulls will be available for viewing at the farm up to February 23rd and then at Saskatoon Livestock Sale for the two days prior to the sale day.

Thank you,

Rob & Cindy

SALE DAY PHONE... 306.382.8088

If you are unable to attend on sale day or would like to discuss anything about the bulls, give us a call or talk to any one of our sale staff.

All two-year-old bulls will have passed a satisfactory semen test prior to sale time and are fully guaranteed.

DELIVERY We will assist with delivery where ever possible. The bulls may be returned to the farm until arrangements can be made. We highly recommend insurance be placed on any bulls returning to the farm.

If we deliver, it will be at our timing to co-ordinate. As we also farm a sizeable amount of grain land, please advise us as to when you begin your breeding so we may schedule an appropriate delivery time.

Commitment was Grand Champion at Farmfair 2022 when later in the fall he was top seller at Western Select. The most impressive trait of Commitment is his big solid foot structure from hoof size, angle and amount of heel. For a performance bull he keeps the calving ease and birth weight at a very acceptable size. One of the most notes features in our herd in his progeny is the amount of hair coat he passes on. The song Hair in my eyes like a Highland Steer comes to mind when working on his sons. Lot 18 is one that before and after makes quite a difference. Shaggy coated, ample frame and length and great feet and legs best describes all his sons.

LIMOUSIN TWO YEAR OLD BULLS

LOT 1: Micro 262M starts off our Limousin section coming from one of our most treasured dams 80B. The sire, Handiwork, was a past Wulf top seller and produced our top sellers in 2024. Micro is smooth made throughout his front and the extra length adds to his character. We are impressed with this combination in the balance of calving ease, growth, performance, and easy going disposition. The sire of 80B, Westmoreland, has been one of our most influential sires. Micro 262M comes as one of our most favorite choices in pedigree and physical presence.

Moreland 881M is the first offered of our red herd sire, Commitment. 881M is capable of adding pounds and frame to his progeny. He stands on an outstanding foot and leg structure. His grand sire, Westmoreland, has proven his longevity in our herd. The Commitment progeny have added performance starting from a moderate birth weight. 881M has one of the heaviest hair coats of the offering. For performance cattle that will make the grade at sale time, Moreland 881M progeny will earn top dollars. Top 10% EPDs for WW, YW and MILK.

White Mark 329M will not be hard to find. He is unique in his color pattern, not sure were white pops up from, but in some circles it is referred to as the money stripe. White Mark 329M comes as one of the top performers of our offering. He has had the growth and substance from an early age. He combines two of our top performance sires in Commitment and Impact. For those that want the exotic influence on Angus based cows, here is a top choice for high performance calves that you want pounds to market in the fall. Better yet, if you follow through and market finish cattle, the progeny of White Mark 329M will have top yields and get the big carcass weights.

Magnify 180M matches his Commitment siblings in frame, length, and performance. These red brothers will get the pounds on their sons and daughters for top weaning weights for those that market in the fall. The higher weaning weights with the dollars in today's market place gather a high amount of total dollars per herd.

Mentor 70M comes as one of the most treasured Westmoreland influenced progeny. His dam, Carissa 70C is an ideal beef cow with her shape, soundness and udder qualities. We thought long and hard about keeping this young fellow to run with a group of our own cows, but decided to offer him with this solid set of Commitment sons. With all the positive attributes of his dam combining Commitment, adds more in hair coat, growth, and well-made foot structure and correctness.
Retaining right to collect semen for in herd use.

LIMOUSIN TWO YEAR OLD BULLS

LOT 17: Mercury 115M is a Commitment – Fernando combination, this time in a red package. Here again, if you want a red sire with low birth, +8 CED, 1.78 BW and top maternal traits, +34 this is it. Fernando daughters have consistently kept the birth weight in line while becoming high producing dams.

LOT 18: Two things about this Commitment son; #1 – If you want to add hair coat to your herd he is the red choice; #2 – If you ask Jody her pen favorite, this guy will be her top pick. Born easy, good growth, long body and correct with a stellar disposition and once again a Westmoreland dam. We should have taken a before and after picture, simply put, this guy cleans up real nice. I mentioned earlier about longevity in cow families. This pedigree will trace back to some of the first Limousin our Dad/Grandpa started with 50 years ago. They have stood all the different types and era's and have been profitable in all generations.

Klondike came to us from the 2023 Basin Montana Bull Test Co-Op Sale. He was a feature and top seller. He brings in the Payweight 1682 influence through his sire. The best part of the pedigree that impressed us is the dam, Basin Rita 9150. She has gathered over \$500,000 in progeny sales in her early production career. A flush sister to Klondike was the top seller in the 2022 Nile Sale. She in turn as a 2 year old raised the 2025 \$120,000 sale top again at the Basin Bull Sale. Klondike has bred and mated as we had anxiously anticipated. He stands along Fireside and High Class for his sheer body mass and correct structure from his foot and leg to body length and depth. His disposition and calving ease is reflected in his progeny. His first born are all from

first calve heifers in this offering. The first group of Klondike's to calve are developing into our top valued first calvers. He has been widely used at Basin Angus plus large heifer projects in Montana. He carries the very unique ability to combine calving ease with growth and maternal. Look at his full EPD profile on line and see his stats across all levels. Currently his progeny after 2 calf crops are averaging 78 lb BW on male and 76 lb BW on female calves. With his proven calving ease and growth Klondike is a unique breeding package.

EPD's: Top 4% CE, top 25% BW, to 1% WW, top 1% YW, top 1% RADG, top 1% scrotal, top 3% docility, top 1% carcass, top 15% marbling, top 15% HPG, top 15% maternal calving ease, top 15% MILK, top 4% mature weight, top 9% CBI, which combines top important economic traits for calving ease, growth and maternal. Klondike is unique in his double digit calving ease, low birth, growth and high residual average daily gain.

Cool Down was spotted in Denver in 2023 from longtime acquaintance Doug Satrie of Texas. He impressed with is correct stature and muscle shape plus having a large ribeye score. He brings a fresh well proven pedigree into our sire group. Unfortunately, Cool Down suffered a breeding injury in his first season that could not heal safely. He done a tremendous job in the amount of females he bred. His progeny are moderate at birth, solid growth with the head, neck and shoulder extension he displayed.

Entense was a past top seller at Justamere's 2021 Bull Sale. He has been an Allstar for pinch hitting when called upon. He holds a great disposition and does his job in any pasture he is put in. We have used him on heifers and cows with great success in calving ease and low birth weights. His sons come as potential heifer bulls. They are moderate in frame, real stout and hold their sires easy going attitude.

Fireside came from the Cudlobe 2021 Sale where he was a top seller and feature bull. He has continued to mature into an impressive well designed herd sire. His size, stature and physical soundness continue to attract the attention he so deserves. To compliment his individual presence is his ability as a powerful genetic breeding sire. His first sons highlighted our 2025 Sale. The first daughters entered production in 2025 also and have fulfilled every requirement of a model Angus cow. Three of his daughters rank at the top of the 2 year old group in their production levels and calf quality. We are excited as his progeny continue to mature with traits that are highly sought.

Kade was found in the 2023 Hoffman Ranch Bull Sale where he was one of the popular and top selling lots in his Embryo brother group. We have been impressed with Barricade progeny and were delighted when we purchased a son of the caliber of Kade. On the dam side Hoffman's list his dam Y2 as one of the most impressive Angus cows they have come across. Tracing back on the maternal side OCC Emblazon 854E is there plus the grand dam is Henrietta Pride 81M. Also dam of SITZ Upward 307R. Kade was brought into our herd for the quality in foot structure and width and body capacity his pedigree lineage is made of. Kade has a perfect foot and claw placement with ample hoof size, angle and heel. His leg structure is sound and correct leading up to a width of chest and flank that handles a level topped, long sided, smooth muscled body full of volume and mass. For his muscle shape, he is very smooth throughout and for a growth bull he has very good birth records to date. In two seasons and in two herds he is 88 lb birth weight on male calves and 83 lb birth weight on female calves.

EPD's: top 9% WW, top 9% YW, top 20% MILK.

Kade has the design and the proof will be in his sons that he is capable of producing sound range ready bulls.

Co-owned: JPM Farms Ltd.

KADE

BLACK ANGUS TWO YEAR OLD BULLS

LOT 25: We are starting out the Black Angus with a son of Fireside and one of our most dominant dams. Since Fireside's purchase as a top seller from Cudlobe he has developed into a powerful sire. His sons were our top sellers in 2025. The first daughters in production have met our high expectations. Three of our top 2 year olds are Fireside daughters that have established already top production levels. The dam of 322M is the donor dam by Cowboy Up and the highly regarded Lass Family from Hinman's. Lass 7611 was a top seller at the 2017 NILE Sale in Montana. She excels at leaving perfect foot structure and performance in her 15 progeny to date. She has had four sons being previous top sellers. Enough of the influence of 322M's lineage, he himself stands out as one of the most structurally sound and correct made bulls of the entire group. From the character he displays through his front and neat trim body style to his frame and length. To me what sets him above is the hoof structure and size. He is destined to travel a big pasture with ease and has a proven pedigree to back him up. Angus HD

LOT 26: There is always a favorite that has been on your short list from an early age, that would be High Plains 149M. His sire, High Class, has proven to be one of the top sons of Showman. High Class daughters have become some of the breeds top matrons at an early age. From top sellers to showing and producing elite progeny. The dam, 149H, is an absolute model of an Angus cow. She has clean feminine lines, length, depth and correctness, but the most attractive feature is her perfect udder. From the shape, teat size and milk volume you can understand why 149M comes with top growth numbers. Her sire Northside by KG Solution and the famed HA Ever Lady 1575 has left us with an impressive set of working daughters that are short gestation calving ease genetics. High Plains 149M fits the bill, he has the character through his front to impress you with his proudness than carries through with the depth and shape with the muscle and width to demand extra attention. He is one of the bulls that simply puts it all together. One of our sale favorites. Angus HD

BLACK ANGUS TWO YEAR OLD BULLS

LOT 30: When you write footnotes sometimes you are not sure where to start with your thoughts on some of the bulls. This is one of those times. When you look through the pen there are ones that catch your eye for various reasons, but as you walk through this fellow checks a lot of requirements. Smooth front ✓, correct level top ✓, deep body, thick made ✓, sound from the ground up ✓, eye appealing look ✓. Now get to the sire, dam and his individual numbers, Kade, Barricade, Henrietta, Pride, Broken Bow. The numbers: 86 BW, 755 WW. EPD's – moderate CE, BW top 3%, WW top 4%, YW top 8% REA, top 3% MILK. Pedigree, performance, top maternal in an attractive package. For those that have seen the physical structure of his sire, Kade, you will understand why we are so excited with the future potential of 63M. Angus HD

LOT 31: If you want to design the perfect body type and structure of a young bull Barricade 737M is the mold. He is so impressive in his physical presence. True Angus head, clean shoulder, perfect top-line of straight and wide, depth and muscle shape. He is moderate in frame size with the undercarriage of Kade 2050. One of my all around favorites.

Gold Rush 815M has been interesting to watch develop. From a 2 year old Bronco dam that excels in her production. 815M had top performance numbers with low birth. The Klondike progeny combine so many traits that have been proven in his first two calf crops here and at Basin Angus. 815M will come as one of the larger framed bulls that combines top WW 8%, top YW 5%, top CE 20%, top MILK 15%. Performance and calving ease is a positive combination of 815M to service any type of cow herd.

Sometimes bull situations throw a curve at you, such as with 778M. His dam is one of our favorite Payweight 6458 daughters. Note his young age. We had faith in his ability to grow and that he did. He is one of the higher performing bulls of the group. Frame, growth and length coming with a great disposition.

Tycoon 719K is a SSS Tycoon 225E son that Mark found for us and was a sale top seller. His calves are born easy with low birth weights. His young daughters look the part to be setting up to be well structured maternal dams. Look for Tycoon sons to be calving ease specialists with their small head and well-designed front neck and shoulders. Unique for Tycoon 719K is his ability to add shape and muscle. Note his birth numbers of CE +5, BW +0.3, coupled with top 12% WW, top 4% YW and a rare top rating of 1% RADG. His docility numbers also rank high in the bred.

	84 lbs	765 lbs	1205 lbs		3.0	1.3	51	95	0.73	6.0	23

Tycoon 249M is one of the most impressive packages of the group. His dam 249A was one of our most prominent cows of our herd. She produced at the top each and every year. 249M marks as her last calf. Note his age with a bull mishap his dam was moved and unfortunately lost some time. This youngster more than makes up for his young age in his physical attributes and numbers. He is exceptional in his correctness and outstanding foot and leg structure. His deep cherry color adds the accent to the package. **Retaining right for in herd semen.**

RED ANGUS TWO YEAR OLD BULLS

73 Red Nordal HEDGE FUND 971M

2454027 RJG 971M Apr. 13, 2024

Another top heifer sire choice. He combines the proven calving ease of the Common Sense lineage with the past heifer sire of our Cardplayer 6B. Sound made, functional in type and designed for the heifer pen.

Smarter Selection Starts with Angus HD

Canadian Angus members are committed to using the best tools and technology available to drive genetic improvement and produce the best possible breeding stock for the Commercial Producer.

It takes the best possible genetics, and the best management practices, to maximize profitability in the Canadian beef industry. And, Canadian Angus members are committed to producing the best possible breeding stock for their commercial customers, for their environment, management, and market. Here are some of the tools and technology that Canadian Angus members use to achieve genetic improvement.

The World Angus Evaluation is a single-step, multi-trait, genetic evaluation using pedigree, performance, and genomic information from the American Angus, Australia Angus, and Canadian Angus Associations. The GEPDS (genomically enhanced expected progeny differences) from this evaluation are informed by vast amounts of performance, pedigree and genomic information. Thus, they are the most accurate and predictive tool of genetic merit or breeding value available.

When you invest in Angus HD (genomic) testing, it increases the accuracy of EPDs.

Genomically enhanced GEPDS can be up to 40% more accurate than EPDs. On young animals, this gives Canadian Angus members and their commercial customers the ability to identify animals with superior genetic merit or breeding value with more accuracy. Considering there is little room for mistakes in the cattle business, this investment in genomics and additional accuracy is invaluable.

notes section

WHAT ARE EPDs?

Expected progeny differences (EPDs) are genetic selection tools that provide producers a measure of an animal's genetic merit for traits that are economically relevant to their operation. Basically, EPDs are a measure of how an animal's progeny can be expected to perform, on average.

An animal's genetics will contribute in part to how it performs. A portion of that performance is also dictated by the environment provided to that animal. The environment includes weather, disease, feed, stress, handling, vaccination protocols, maternal environment, housing, and the animal group dynamics. The environment differs for each herd as geography and producer management plays a large role in environment. EPDs remove the environment from all traits measured and provide producers with an estimate of the genetics that contribute towards each trait.

EPDs are:

- A prediction of how an animal's progeny will perform
- A genetic selection tool
- Used to compare animals across different environments

Genomics are:

- Used to parent verify animals for guaranteed pedigrees
- Used to calculate EPDs for animals that don't have a phenotype for a particular trait
- Used to calculate more accurate EPDs, especially for younger animals
- Used to calculate EPDs for new and expensive to measure traits, like High Immune Response

UNDERSTANDING AND USING EPDs AND GENOMIC TECHNOLOGY

HOW ARE EPDs CALCULATED?

EPDs describe how the progeny of an animal will perform for a specific trait. EPDs are calculated using pedigree information, individual performance information, progeny performance information, and genomic information.

The Canadian Angus Performance Program is based on whole herd reporting. Participants on the program are required to report complete cow herd inventory information (a calf or a fate or cull code for each cow in your inventory), and a birth weight and weaning weight on every calf. Complete contemporary group information is vital for the calculation of accurate EPDs. In addition, accurate management group recording is vital for the calculation of accurate EPDs. Members should place all calves that were managed the same way, and given the same opportunity to develop the trait being reported in one management group. Any calves treated differently, for example, any calves fed extra or calves that were sick should be placed in separate management groups.

WHY IS EPD ACCURACY IMPORTANT?

EPDs should always be published with an estimate of accuracy. This informs producers of the amount of information available with which to calculate the EPD. P or P+ EPDs or estimates are low in accuracy. As more information becomes available, EPD accuracy will grow from 0 to 100%.

USING EPDs

EPDs are comparative numbers. This means that the easiest way to use EPDs is to compare a bull's EPDs to another bull's EPDs. For example:

Bull A has a Yearling Weight EPD = 150 lbs
Bull B has a Yearling Weight EPD = 100 lbs

On average Bull A's calves will weigh 50 lbs heavier than the average of Bull B's calves given the same cow herd and environment. Another way to use EPDs is to compare to the breed average. This is useful to producers who know the breed and what to expect in terms of performance from the breed. For example, the average calving ease for Canadian Angus genetics is very different from the average calving ease of other breeds. In Angus the average is a lot of calving ease!

WHAT IS ANGUS GS?

Angus GS is a newer version of the Bovine 50K panel that we used to use. It's specifically designed for Angus genetics. It has all the same SNP markers that the 50K panel has on it, and more. There is a lot of value on genomic technology, specifically the Angus GS test.

Angus GS includes:

- SNP Parentage Verification
- Genetic condition test results are available for reduced fees than doing the test(s) individually
- Genomic percentile ranks
- GEPDs (more accurate genomically enhanced EPDs)

WHAT ROLE DOES GENOMICS, AND THE ANGUS GS PANEL PLAY?

Genomic technology has been used to make EPDs more accurate. The genomic data increases the accuracy with which we relate animals to each other, verifying pedigree information, and allowing us to apply phenotypes of related animals to non-phenotyped animals.

Genotyping animals has led to more accurate EPDs for younger animals. Below are the progeny equivalents that come from the Angus GS panel. This means that doing the Angus GS test on an animal gives you as much information as having 23 calves with birth weights recorded and as many as 12 calves tested for individual feed intake.

EPDs: are a universal way of describing the genetic potential of progeny from breeding stock

EPDs: are a genetic selection tool that can help producers reach a breeding selection goal for their herd

EPDs: can help you maintain the traits that you want to keep in your herd

EPDs: can help you avoid traits that you might not wish to use on your cow herd and introduce into your herd

EPDs: are a great way to describe the high quality Canadian Angus genetics that you raise to your customers

EPDs: are the only fair way to compare breeding stock across herds and different environments

Trait	Progeny Equivalent	Trait	Progeny Equivalent
Calving Ease	26	Claw	10
Birth Weight	23	Fertility	17
Weaning Weight	27	MILK	36
Yearling Weight	23	Mature Weight	15
Dry Matter Intake	12	Marbling	11
