Welcome TO THE SALE

Westway Farms and Soderghlen South are pleased to invite you to our First Annual Bull & Female Sale, to be held at the Fort Macleod Auction Market on Friday, November 27.

SELLING:

- 250+ Angus x Simmental Bred Heifers AI'd and exposed for 45 days
- 17 Red MAX Bulls
- 23 Black MAX Bulls
- 7 Red and Black Angus Bulls
- 6 Angus Plus Bulls

Westway Farms and Soderghlen South are proud to announce a new strategic partnership dedicated to providing progressive cattle producers with quality long yearling bulls backed by proven genetics, performance, and customer service.

This exciting collaboration brings together more than **60 years of combined seedstock experience**, blending the strengths of two respected programs with a shared commitment to producing practical, profitable cattle for the commercial industry.

By combining their resources, genetics, and industry knowledge, Westway Farms and Soderghlen South are creating a powerful foundation focused on delivering bulls that offer calving ease, performance, maternal strength, longevity, and marketability. Both operations share a passion for continuous improvement and a commitment to helping their customers succeed.

The bred heifer offering represents a large, uniform group of productive females developed to become profitable and dependable brood cows. The MAX bulls have been selected for performance, structural soundness, fertility, and the ability to add value to commercial cow-calf operations.

Westway Farms and Soderghlen South look forward to building lasting relationships with producers and providing genetics that work in the real world. We invite you to join us on November 27 for this exciting inaugural event and see firsthand what this new partnership has to offer.

Westway Farms & Soderghlen South

SIGHT UNSEEN

purchase plan

We understand that making it to sale day isn't always possible. If you are unable to attend the sale, **Westway Farms and Soderghen South are pleased to offer a Sight Unseen Purchase Plan** to make buying with confidence as simple as possible.

Contact Westway Farms prior to the sale and let us know what you are looking for. Tell us about your cow herd, your breeding goals, the type of cattle you prefer, and your budget. With more than **60 years of combined seedstock experience** behind this partnership, we will help identify the bulls or females that best match your program.

We know these cattle and their genetics, and we will give you an honest assessment of the animals we believe will work for your operation. We can discuss individual lots, pedigrees, performance information, disposition, structure and any other details that are important to you.

Once we have established your selections and budget, we can assist with purchasing on your behalf. **Your information and maximum bid will be kept confidential.**

Our Sight Unseen Purchase Plan is built on **trust, honesty and customer satisfaction**. We want you to be comfortable with your purchase and confident that the cattle you buy are the right fit for your operation.

Can't make it sale day? Give us a call. We'll help you buy with confidence.

Sale Day INFORMATION

TERMS OF SALE

All cattle sell under the standard terms and conditions of the Canadian cattle industry. Payment is due at the conclusion of the sale unless prior arrangements have been made with Westway Farms and Soderghen South.

LUNCH will be provided for all registered buyers. Please come early to view cattle, register and have lunch. **Lunch will start serving at 11:00 a.m.**

BIDDING

Each animal will be sold to the highest bidder. Any disputes regarding bids will be settled by the auctioneer, whose decision will be final.

Westway /Soderghen reserves the right to refuse any bids, live or on internet for any reason whatsoever.

Bidders will be required to register for a bidder number prior to the sale starting.

ANNOUNCEMENTS

Announcements made from the auction block on sale day take precedence over information printed in the sale catalogue or other sale material.

PURCHASER'S RISK

Each animal becomes the responsibility of the purchaser as soon as it is declared sold.

BREEDING GUARANTEE — bulls

All bulls are sold as sound breeders. Bulls will have passed a breeding soundness evaluation by a licensed veterinarian prior to the sale. Any specific bull guarantee offered by Westway Farms will be outlined separately in the sale catalogue and will form part of these terms.

BRED HEIFERS

Bred heifers will be represented with the breeding information available to the consignors, including service dates and pregnancy information where applicable. Pregnancy status will be determined by a qualified veterinarian prior to sale.

HEALTH

All cattle will meet applicable health requirements. Health and vaccination information will be available upon request or as provided in the sale catalogue.

LIABILITY

All persons attending the sale do so at their own risk. Westway Farms, Soderghen South, Fort Macleod Auction Market, sale staff, and their representatives assume no liability for accidents, injury, loss, or damage, except as required by applicable law.

DELIVERY

All bulls and females must be picked up from Southern Auction Livestock Exchange - Fort MacLeod following the sale. If bulls require delivery, arrangements can be made to central points in Western Canada, directly from Fort MacLeod Auction Mart. For delivery arrangements, please contact Bill from Westway Farms at 403-540-3565.

INSURANCE

Insurance is recommended on all purchases. Any loss, injury, sickness or death occurring after an animal has been declared sold is the responsibility of the purchaser, subject to any specific written guarantee provided by the seller.

Cheryl Brown, Stockmans Insurance 403-601-3460

ERRORS & OMISSIONS

Every effort has been made to provide accurate information. Any corrections or updates will be announced from the auction block and will take precedence over printed material.

BUYER SATISFACTION

Westway Farms and Soderghen South stand behind the cattle we sell. If a concern arises with your purchase, we ask that you contact us promptly so we have an opportunity to work with you toward a fair and practical resolution.

Our goal is straight forward: sell cattle we are proud to stand behind and build relationships with customers that last well beyond sale day.

VOLUME DISCOUNT

2 Bulls - \$1000 off your total purchase

3 Bulls or more -\$1500 off your total purchase

SALE ORDER

The bulls will be sold in catalogue order

VIDEOS of the bulls can be found on DLMS.ca or the Westway website - www.westwayfarms.ca

BULL

Delivery

Bull delivery will look a little different this year than it has with our on-farm sale.

All bulls and females must be picked up from Southern Auction Livestock Exchange - Fort MacLeod following the sale.

If bulls require delivery, arrangements can be made to central points in Western Canada, directly from Fort MacLeod Auction Mart. For delivery arrangements, please contact Bill from Westway Farms at 403-540-3565.

We recognize this is a change from our usual practice and appreciate your cooperation.

Please contact us prior to the sale if you require delivery arrangements.

You can find more information on AgSights - BioTrack Plus Program on Page 19

WEANING WEIGHT (WW)

All weights are taken at weaning and adjusted to 205 days to allow you to compare the bulls on an even playing field.

YEARLING WEIGHT (YW)

All weights are taken at the end of test and adjusted to 365 days, again to let you easily compare the bulls.

WEIGHT PER DAY OF AGE (W.P.D.A.)

All weights at the end of test are used to calculate the bull's weight per day of age. It covers the entire gaining period to date (on the cow and on the feed).

AVERAGE DAILY GAIN (A.D.G)

After a 30 day warm-up period, bulls are put on test to measure their A.D.G. for the next 120 days.

LONG YEARLING S.C.

Actual scrotal measurements were taken October 15, 2026 by Didsbury Vet Services. All bulls were semen tested and meet industry standards based on breed and age.

HORNED-SCURRED-POLLED

- **Horned:** Horn growth affixed to the skull that has or has not been removed.
- **Polled:** Rudimentary horn growth that will not develop into a horn. Scurs are the result of an independent gene unrelated to either the horned or polled gene.
- **Scurred:** Absence of horn growth. (An animal can have scurs and still be genetically polled.)

performance DATA INFORMATION

ESTIMATED SALE WEIGHT

Actual weights were taken in October 2026.

DISPOSITION SCORING SYSTEM 1 TO 4

1. These bulls have been eliminated from the program. They are not easily handled.
2. Harder to handle, with a wide flight zone. These bulls will get worked up very easily when alone or under pressure.
3. Most of the bulls fit into this score. 3's are very easy to handle but will move off pressure with ease.
4. These bulls are extremely quiet and will take a lot of pressure.

CALVING EASE

Calving ease is one of the biggest concerns to most bull buyers and most often related to the birth weight of a bull. However, there are many other factors that are influences like nutrition and gestation. Our ratings are based on all of the information we have available.

- ✦ Should produce minimal calving problems when bred to moderate sized, first calf heifers.
- ✦ Recommended for use on second calvers or small framed cows – 1100 to 1300 lbs.
- ✦ Recommended for mature cows - 1400+ lbs.

WESTWAY FARMS

WFL *herd bull* GUARANTEE

We expect our bulls to go to work—and we stand behind them when they do.

Every WFL bull is developed with one purpose in mind:

TO GO OUT, BREED COWS AND WORK FOR OUR CUSTOMERS.

Our sale bulls are evaluated for **fertility, structural soundness and breeding ability** before they are offered for sale. We want you to be confident that the bull you take home is ready to do the job he was purchased to do.

We also understand that cattle are cattle, and sometimes things simply don't work out as expected. If you have a concern with your WFL bull, **call us first and call us early.** Give us the opportunity to understand the situation and work with you toward a fair, practical solution.

If a bull fails to perform, as a satisfactory breeder, we will work with the customer to provide an appropriate and creditable solution.

Our priority during breeding season is simple:

Keep your cows getting bred and keep your program moving forward.

We aren't interested in giving customers the runaround. We believe in looking after the people who invest in our genetics and building relationships that last well beyond sale day.

You bought the bull from us. You deal directly with us. And we stand behind what we sell.

The seller's maximum liability will not exceed the original purchase price of the bull. Guarantee claims may require a veterinary examination. Injury, neglect or mismanagement are not considered breeding failures under this guarantee.

On behalf of the Hadway Family and our Westway Crew we Welcome you to our 1st Annual Bull and Female Sale with Soderghen South. Westway Farms is family owned and operated and we are very excited to work together with Soderghen South. Westway Farms has long admired the Soderghen Program and in the Fall of 2023 we were able to purchase Soderghen's winter calving cow/calf pairs from the dispersal of the Soderghen herd. This partnership has provided a tremendous opportunity for us to complement each of our programs and work with an exclusive co-operator herd. This partnership is also a great fit because of the high demand from our bull customers to include long yearling bulls in our sale. Together we can supply cattle producers with long yearling bulls that are backed with the very best of two operations that focus on quality, performance, proven genetics and customer service. We will continue to have a yearling Bull Sale at the farm in Didsbury and it is set for March 1, 2027.

The cattle market has been exceptionally strong in both the calf market and replacement heifer market so finding the right bull to move your program forward to meet these needs is important. We are not breeding cattle to make something that is popular, we are doing everything we can to make the right cattle with the commercial cattle producer in mind. The bulls in this sale have been developed with an emphasis on

fertility, structural integrity, performance and disposition - all traits that will pay in today's market and into the future.

We invite you to review the offering and if it works to stop by the farm prior to November 24th and walk through the bull pen and evaluate the bulls in their familiar surroundings and see which bull might be best suited for your program. If you are unable to view the bulls, attend the sale or even bid online and wish to have someone bid for you, we ask you to contact one of the Westway Farms contacts and they will assist you.

Westway Farms is very much a family operation and Tom and Carol feel very blessed to have their four children, along with their spouses, help us operate our business. The "next generation" has worked hard to expand the Westway cattle program. They have incorporated new Angus and Simmental genetics that are working in both the cow herd and feedyard. As parents, we are thrilled to have Scott and Elan as mentors for our young people and we are certainly excited for what this partnership can provide for our cattle customers.

We look forward to catching up with you all on Friday, November 27th!!

SODERGLLEN SOUTH

Scott & Elan Lees Become Westway's Exclusive Co-operator Herd

Westway Farms is proud to announce that Soderglen South, owned and operated by Scott and Elan Lees, has become Westway's exclusive co-operator herd.

This partnership brings together two established seedstock operations and more than 60 years of combined seedstock experience, built around a common philosophy: produce functional, productive cattle that work for commercial cattlemen.

Scott and Elan bring generations of cattle knowledge, a strong cow herd and a proven commitment to the beef industry. Combined with Westway's breeding program and genetics,

the partnership creates an opportunity to expand our offering while maintaining the quality, consistency and accountability our customers expect.

As Westway's exclusive co-operator herd, Soderglen South will work closely with Westway on breeding decisions, genetic selection and the development of bulls for our customers. The cattle will be developed with the same goals in mind — soundness, fertility, performance, maternal strength and longevity.

For our customers, this partnership means greater numbers and more selection without compromising the standards behind the Westway program. It also gives us the ability to offer a larger, more consistent group of long yearling bulls developed specifically for the needs of commercial cattle producers.

The relationship between Westway and Soderglen South is about more than increasing numbers. It is about combining experience, resources and proven cow families to build something stronger for the future.

We are excited about what this partnership means for Westway, Soderglen South and, most importantly, the cattle producers we serve.

Success *breeds* Success

SODERGLEN SOUTH TEAM

Soderglen South owns and manages a 1,000-head summer cow herd, made up primarily of Angus-based females and MAX genetics. At the heart of the operation is a commitment to good cattle, good people and building a cow herd that performs under practical ranch conditions.

Scott and Elan Lees have spent their lives in the cattle business, and that experience has shaped the philosophy behind Soderglen South. The focus has always been on raising functional, productive cattle with the traits that matter to commercial cattlemen — fertility, soundness, performance, maternal ability, disposition and longevity.

A successful cattle operation is only as strong as the people behind it, and Soderglen South is fortunate to have an experienced and dedicated team. Roger has been with us for 19 years, Jeff for 13 years and Brendan for 2 years. Maggie also started work us part time last year and works on cattle records, administration and anything we need her for, she is in. Their commitment, knowledge, and hard work are a big part of the operation's success. We are proud of the team we have built and the experience they bring to the ranch every day.

For us, Soderglen South is about more than raising cattle. It is about family, people, relationships and a lifelong commitment to the cattle industry. We believe in continually improving our herd, standing behind the cattle we produce and working with people who share the same passion for agriculture.

We are proud of where Soderglen South has come from, proud of the people who make it possible, and excited about where we are headed.

THE Westway CREW

SODERGLÉN / SOUTH
and
THE MAX
PROGRAM
MATERNAL ANGUS CROSS

At Soderglen South, the cow herd is where everything starts. Scott and Elan Lees own and manage a summer cow herd of approximately **1,000 females**, made up predominantly of Angus-based cattle carrying **MAX genetics**. That kind of cow herd provides something that can't be created on paper — the opportunity to evaluate genetics year after year, under real ranch conditions and on a meaningful scale.

The **MAX program is a maternal Angus cross built around the female**. The objective is simple: produce moderate, productive cows that are fertile, sound, easy doing and capable of raising a good calf every year. Females need good udders, good feet, disposition and the ability to maintain themselves and breed back without being pampered.

At Soderglen South, those traits aren't theories. **They are tested every day.**

Managing 1,000 cows quickly identifies which genetics work and which ones don't. Cows have to earn their place in the herd. Fertility, longevity and maternal ability matter because

every open cow and every problem cow has a cost. Over time, that pressure builds the kind of female we believe commercial cattlemen are looking for — **a cow that quietly goes to work and gets the job done.**

THE MAX BULL PROGRAM STARTS WITH THOSE FEMALES.

Our bulls are selected from cows that have proven themselves in production. We want bulls with the performance and muscle to add pounds, while maintaining the maternal characteristics that make their daughters valuable. Sound feet and legs, structural integrity, disposition and longevity remain essential. The goal isn't simply to produce a bull that looks impressive on sale day; it is to produce a bull whose influence will still be evident in the cow herd years down the road.

For Scott and Elan, the MAX program represents over 30 years of selection, observation and experience. It is about staying focused on the fundamentals that make a cow herd profitable.

ALWAYS IMITATED BUT NEVER DUPLICATED
Built by the cow. Proven in the pasture. Designed for the commercial cattleman.

PROVEN MATERNAL GENETICS. BUILT IN THE COW HERD.

Know the Bull. Know the Genetics. Know your investment.

INCREASE EFFICIENCY. ADD VALUE. BOOST PROFITABILITY.

With **bioTrack Plus** herd records and **AgSights bull testing** that incorporates ultrasound results, buyers can see beyond the appearance and pedigree to understand the traits that matter for their breeding program.

Choose leading KPIs that impact your bottom line

From animal birth to market, every data event collected provides valuable information about your herd. Customizable reporting provides tools to identify arising issues, quickly address customer questions, manage costs, and find production efficiencies by enabling data driven decisions.

Data security and privacy protection

The bioTrack Plus platform includes the highest security and privacy protection. It is supported by the Ag Data Transparent (ADT) Seal of Approval, providing users with the reassurance their data is secure and confidential while supporting industry benchmarking.

Designed by Ranchers, for Ranchers

With more than 30 years of experience working with farmers and ranchers, AgSights tools make it easier to add objective performance information to your selection process. Because the right bull isn't just an investment in this year's breeding season. He's an investment in your next calf crop - and the future of your herd.

WHY RED ANGUS & ANGUS PLUS

BECAUSE THE COW HERD STILL MATTERS.

We want bulls that do more than sire a heavy calf. We want bulls that leave behind **productive females, sound udders, good feet, fertility and longevity.**

CALVES THAT COME EASY.

Born with vigor, get up and get going.

PERFORMANCE THAT PAYS.

Enough growth and muscle to put pounds on the scale without chasing extremes.

FEMALES YOU WANT TO KEEP.

Moderate, fertile, easy-keeping cows with the maternal ability to raise a calf year after year.

THE ADVANTAGE OF HETEROSIS.

Angus Plus adds hybrid vigor while keeping the Angus influence and maternal traits we value.

BUILT FOR THE LONG HAUL.

Sound feet. Good structure. Fertility. Longevity. Cattle designed to work under real ranch conditions.

CALVES THE MARKET WANTS.

Practical, Angus-influenced cattle with the quality and performance to give you options on sale day.

SELL THE STEERS. KEEP THE HEIFERS. BUILD A BETTER COW HERD.

SODERGLEN BLACK MAX PROGRAM MATERNAL ANGUS CROSS

The **Soderglen Black MAX program** was developed with the commercial cattleman in mind.

For more than 30 years, Soderglen has worked to build a predictable hybrid that captures the maternal strengths of **Black Angus** while adding the performance, muscle and carcass traits of **Simmental**.

But Black MAX is about much more than simply crossing two breeds.

Generations of selection have gone into developing MAX cattle with the consistency and predictability commercial producers need. Selection has always focused on the whole animal—balancing **calving ease, fertility, maternal ability, milk, udder quality and longevity** with the **growth, muscle and performance** required to produce calves that weigh and sell.

BUILT AROUND THE FEMALE

At the heart of the Black MAX program is the cow.

We want females that breed back, maintain themselves, raise a good calf and stay productive in the herd. Black MAX bulls are designed to sire the kind of replacement females cattlemen want to keep while still putting performance and pounds into the steer calves.

THE ADVANTAGE OF HYBRID VIGOUR

Black MAX also gives commercial producers the opportunity to capture the benefits of **heterosis** without giving up consistency.

That means added vigour and performance while maintaining the maternal qualities necessary to build a productive cow herd.

This is not crossbreeding by chance.

It is a planned breeding program backed by generations of selection.

The result is a Black MAX bull designed to do exactly what a commercial bull should do:

Breed cows. Add pounds. Make females. Last.

MORE THAN A CROSS — A PROGRAM BUILT WITH PURPOSE

Maternal by design. Performance with purpose. Built for the commercial cattleman.

ALWAYS IMITATED BUT NEVER DUPLICATED

Built by the cow. Proven in the pasture. Designed for the commercial cattleman.

Mash 392J is a prime example of what we can do with the MAX program. Combining generations of solid pedigrees, and replicating traits that are so important. Calving ease, eye appeal, growth, carcass and maternal strength. 392J sons are as good as we have raised. Simply put, if you are using Black MAX bulls you need to own 392J sons. If you aren't convinced yet on the MAX program, these sons are where you want to start.

SODERGLÉN BLACK ANGUS

BUILT AROUND THE COW

*At Soderglen, we have always believed that **a good bull starts with a good cow.***

Our Black Angus program has been an important part of our cow herd for generations. We believe Angus cattle bring together the traits that matter most in a commercial cow herd—**fertility, maternal ability, calving ease, soundness, longevity and the ability to raise a good calf year after year.**

We aren't interested in chasing one trait or one number. Our goal is **balance.**

We want bulls that will go out and breed cows, hold up in real ranch conditions and sire calves that have the performance and marketability commercial cattlemen need. Just as importantly, we want their daughters to become the kind of females you want to keep.

BLACK ANGUS PLUS — A LITTLE MORE

Our **Black Angus Plus** bulls build on that same Angus foundation while adding the benefits of complementary genetics and **hybrid vigour.**

The goal is straightforward: maintain the maternal strength and predictability of Angus while adding performance, muscle, efficiency and pounds where they matter.

For cattlemen retaining replacement females, Angus Plus offers an opportunity to capture added heterosis while keeping the cow herd practical, maternal and functional.

For cattlemen selling calves, it means genetics designed to produce **vigorous calves with growth, muscle and the ability to push down the scale.**

These bulls aren't bred for a show ring.

They're bred for pastures, cows and commercial cattlemen.

After decades of developing purebred and hybrid genetics at Soderglen, our philosophy remains the same:

Build the cow first. Add performance without sacrificing maternal strength. Produce cattle that work.

MATERNAL WHERE IT MATTERS. PERFORMANCE WHERE IT PAYS

A great group of people with exceptional cattle on hand is what you'll find here at the Soderghlen South operation, and it's been a pleasure to work with this crew. I am excited to see their genetics back on offer with the introduction of this year's bull and female sale partnered with Westway Farms.

The bull power here starts at the foundation of the cow herd. Touring the Soderghlen herd on pasture this summer was fantastic and gave a line of sight on where the bulls' performance all starts. The Soderghlen cowherd is on an organic mineral package throughout winter and breeding to capitalize on herd health and reproduction. This mineral package changes seasonally depending on forage type and quality, but year-round mineral supplementation is key knowing that early-life health is critical to maximize the longevity of these bulls.

When developing the bulls it is important that rumen health stays a priority during every stage of the bull's development. The bulls are developed on a high forage-based, moderate energy diet balanced to promote lean muscle growth and maximize their genetic potential. Forages are samples and analyzed to ensure quality feed sources are working into the balanced rations.

If you have any questions about the nutrition, please feel free to contact me.

Best of luck to Soderghlen's & Westway Farms on their 1st annual partnership sale!

SODERGLÉN BLACK ANGUS+

INTRODUCING OUR NEWEST HYBRID OPTION!

Our Fastest-Growing Program for Southern Alberta Cowherds

75% Angus. 25% Simmental. The Best of Both Breeds.

Built with the commercial cattleman in mind, this exciting hybrid combines the strength of our best Angus genetics with the added benefits of Simmental influence and hybrid vigour.

Like our proven MAX line, these cattle are homozygous polled and bred for colour consistency, bringing together the predictability of Angus with the added performance and maternal advantages of crossbreeding.

Selection pressure is placed heavily on **calving ease, maternal strength, milk production, early maturity, sound udders and overall quality.** These are cattle designed to work in real-world ranch conditions, raise a good calf year after year and remain productive in the herd.

With the right balance of Angus quality, maternal function and hybrid vigour, it's easy to see why this has become **our fastest-growing program.**

ANGUS QUALITY. HYBRID ADVANTAGE. BUILT FOR SOUTHERN ALBERTA

250+ BRED FEMALES + 50 SECOND CALVING MAX Females

A FEMALE OFFERING YOU WON'T FIND ANYWHERE ELSE

Westway Farms, Soderghen South, and Matt & Ronda Tees are proud to offer a **truly unique set of females—an offering of this kind and depth is available nowhere else.**

Selling

250+ MAX AND ANGUS-INFLUENCED BRED FEMALES, along with 50 second-calving MAX females, giving cattlemen an opportunity to purchase from a large, uniform group of young, productive females built for the commercial cow herd.

The bred heifers have been AI bred and exposed to proven Angus cleanup bulls, combining carefully selected genetics with the maternal strength, fertility, longevity and practicality these programs demand. These aren't simply females put together for a sale. They represent years of selection and breeding from programs focused on producing **functional, profitable cattle that work in real-world conditions.**

The numbers. The uniformity. The genetics. The opportunity.

You won't find an offering like this anywhere else.

BRED HEIFER OFFERING

QUALITY FEMALES. PROVEN PROGRAMS. BUILT FOR THE LONG HAUL.

CALVES THAT COME EASY.

We are proud to offer an outstanding selection of bred females backed by established ranching programs, proven genetics, and years of careful selection. These females have been assembled with the commercial cattleman in mind, emphasizing maternal strength, fertility, soundness, longevity, and the ability to raise a profitable calf year after year.

250+ BRED HEIFERS

Our bred heifer offering brings together females from respected ranching operations across Southern Alberta.

• 65 Black and Red MAX Bred Heifers — Soderghen South

Selected directly from Soderghen's MAX program, these females represent years of breeding for maternal quality, fertility, structural soundness, and productive longevity.

• 100 Black Bred Heifers

Purchased in April from three reputable Southern Alberta ranches, these heifers were selected to complement the offering and provide commercial cattlemen with quality, productive replacement females.

These females were AI'd June 24 & 25th and pasture exposed 45 days June 27 to Aug 1st.

• 100 Black Bred Heifers — Westway Farms

Raised in the Westway Farms program, these females reflect a commitment to developing sound, functional cattle with the maternal strength and performance demanded by today's commercial cattle industry.

AI bred on June 13 (March 20 due)

Exposed June 14 - July 15 to Westway, South View Ranch and Hamilton Farms Angus bulls.

• 20 Red MAX Bred Heifers — Matt & Ronda Tees

Matt and Ronda Tees have been valued partners in Soderghen Ranches' Red MAX program for 25 years. Their females are backed by a long-standing commitment to the same practical, maternal-focused genetics that have built the Red MAX program.

BREEDING INFORMATION

The **Soderglen and Westway bred heifers** were synchronized and artificially inseminated using two carefully selected sires:

- Red Bieber Paycheck K102
- Basin True Value 3017

Both sires were selected to complement the maternal strengths of these females and add value to their resulting calves.

The **Matt and Ronda Tees heifers** were turned out on July 1st with **SODER 204L** and **SODER 116L**. On August 25th, the heifers were ultrasound pregnancy tested and staged to identify those **confirmed bred during the July breeding period**.

HERD HEALTH & PREGNANCY EXAMINATION

The females have been managed under a herd health and reproductive program designed to give buyers confidence in their purchases.

- Vaccinated with Boehringer's Breed Back program
- Palpated June 1
- Pregnancy tested September 10 by Tommy Ware, VAHS
- Westway Heifers were preg tested the first week of November by Dr. Caith Cameron of Didsbury Vet Services.

OUR BRED FEMALE GUARANTEE

We stand behind the females we sell. All bred females are guaranteed pregnant for 30 days following the sale.

Should a purchased female be found open within 30 days following the sale, we will refund the difference between her salvage value and her original purchase price.

This guarantee reflects our commitment to standing behind our cattle and treating our customers fairly.

50 SECOND CALVING

MAX FEMALES

SPECIAL OFFERING

In addition to the bred heifers, we are pleased to offer 50 second-calf MAX and Angus-cross females, consisting of:

- 25 Red Females
- 25 Black Females

These young cows offer buyers the opportunity to purchase females that have already raised their first calf and are entering some of their most productive years.

ALL 50 FEMALES HAVE BEEN BRED TO SODERGLEN MAX BULLS.
Breeding period: July 23 – September 15

For cattlemen looking to add young, productive cows to their herds, this is an excellent opportunity to purchase females with their first calving behind them and years of production ahead.

A FEMALE OFFERING WORTH YOUR ATTENTION

Bringing together the breeding programs of Westway Farms, Soderglen Ranches, Matt and Ronda Tees, and respected Southern Alberta ranches, this sale offers a unique opportunity to purchase quality replacement females in volume.

Different programs. Shared standards. One goal — productive, profitable females that work for the commercial cattleman.

FOR YOUR *notes*

This image shows a single sheet of white paper with horizontal blue or grey ruling lines. The lines are evenly spaced and run across the width of the page. There are approximately 20 lines visible. The paper has a slightly textured appearance and some minor discoloration or shadows, suggesting it's a scan of a physical document. The background behind the paper is dark and blurry.
